Mumbai: Adani Group companies reported earnings before interest, taxes, depreciation and amortisation of ₹86,789 crore for the 12 months through December 2024, an increase of 10.1% from a year earlier.

Core infrastructure businesses spanning energy, utilities and transport accounted for 84% of the total Ebitda, the group said in a release.

The group said it will look at a capital expenditure of \$100 billion over the next decade, targeting re-

newable energy, airports, green hydrogen and logistics.

Mumbai: Adani Group companies reported earnings before interest, taxes, depreciation and amortisation of ₹86,789 crore for the 12 months through December 2024, an increase of 10.1% from a year earlier.

Core infrastructure businesses spanning energy, utilities and transport accounted for 84% of the total Ebitda, the group said in a release.

The group said it will look at a capital expenditure of \$100 billion over the next decade, targeting renewable energy, airports, green hydrogen and logistics.

As of September 30, 2024, consolidated cash after tax stood at ₹53,024 crore, with an asset base of ₹5.53 lakh crore and net debt at 2.46 times the Ebitda, which the group said it considers to be sustainable for its large-scale investments.

"Adani portfolio companies are entering a new phase of significant capital expenditure," the group said.

The upcoming investments will be primarily financed through internal cash flows unlike the debt-heavy cycles previously, a compa-

ny spokesperson said.

Adani Enterprises, the flagship incubator, will lead much of the capex, focusing on green hydrogen, airports, and data centres. Adani Green Energy, Adani Energy Solutions and Adani Ports & SEZ will also play key roles, with the group aiming for global leadership across major businesses by FY30, the company said.

The group has reduced its average finance cost from 10.26% in FY19 to 8.18% on a trailing 12-month basis, improving its capacity to fund

long-term projects, the company spokesperson said. Even a half percentage point drop in borrowing costs could yield significant savings, enhancing capex efficiency.

"Regardless of external volatilities, since the Hindenburg report in January 2023, not even a single entity out of the more than 100 entities part of the Adani Portfolio companies has seen a downgrade, but only upgrades," the spokesperson said.

As of December 31, 2024, more than three quarters of the group's profits (Ebitda) came from assets rated 'AA-' and above, up from 48% in FY19, the spokesperson said.

Gross debt stood at ₹2.58 Lakh Crore, up from ₹2.41 Lakh Crore at the end of FY24. After accounting for cash balance, net debt was ₹2.05 Lakh Crore, up from ₹1.81 Lakh Crore net debt at the end of March 2024. For the 12-month period ending December 2024, EBITDA touched ₹86,789 Crore, marking a 10.1 per cent

year-on-year growth. Adjusted for prior income, the growth stands at 21.3 per cent. In the December quarter alone, EBITDA rose 17.2 per cent to ₹22,823 Crore.

According to the report, key to this growth are the emerging businesses under Adani Enterprises (AEL), including solar and wind manufacturing and airports. These businesses, part of AEL's infrastructure division, grew 45 per cent YoY in the December quarter and 33.3 per cent in the trailing 12-month period. Since FY19, the Adani Portfolio has shown strong growth, with EBITDA expanding at a CAGR of 25 per cent, despite challenges such as the Hindenburg report and the ongoing US indictment.

Around 85 per cent of the group's profits come from its infrastructure businesses, particularly utilities and transport. The infrastructure sector globally is recognised as the sector that lends a high level of predictability for cashflows.
