Adani Energy profit rises on gains from asset sale

Adani Energy Solutions (AESL) reported a 73 per cent rise in its net profit (attributable to the owners of the company) in the October-December 2024 (Q3FY25) period, helped by robust performance and one-time gains related to the sale of its Dahanu asset.

For the quarter under review, the firm reported a consolidated net profit of ₹561.78 crore, with revenue from operations rising 28 per cent to ₹ 5,830.26 crore from the year-ago. The rise in profit resulted from higher Ebitda (earnings before interest, taxes, depreciation, and amortization), and was aided by the reversal of net deferred tax liability of ₹185 crore, mainly due to the divestment of the Dahanu plant in Adani Electricity Mumbai (AEML), a subsidiary of the company, AESL said.

The transmission and distribution company said the robust growth in its income was driven by the contributions from the recently commissioned MP Package-II, Kharghar-Vikhroli, Warora-Kurnool, KhavdaBhuj, Mahan-Sipat lines, higher energy sales in Mumbai and Mundra utilities

The company said Ebitda rose six percent to ₹ 1,831 crore for the quarter due to strong revenue growth, EPC income in transmission, treasury income, and steady regulated Ebitda in AEML.
