Adani Commissions First Off-Grid Hydrogen Plant

The 5MW plant relies on its own renewable energy generation for hydrogen production

Press Trust of India

New Delhi: Adani Group has commissioned India's first offgrid 5 megawatt green hydrogen pilot plant in Kutch, Gujarat, the conglomerate said in a statement on Monday.

An off-grid green hydrogen plant is a facility that produces hydrogen using electrolysis powered by renewable energy sources, such as solar or wind, and is not connected to the main electrical grid. This means the plant relies entirely on its own renewable energy generation for the hydrogen production process.

The 5 MW plant has been built by Adani New Industries Limited (ANIL) - the clean energy unit under the group's flagship firm Adani Enterprises Ltd.

Calling it a key milestone towards enabling India's National Green Hydrogen Mission, the group said the successful commissioning demonstrates technical feasibility and sets a benchmark for off-grid, renewable-powered industrial applications of green hydrogen and its derivatives in emissions-intensive sectors.

"The state-of-the-art plant is 100 per cent green-powered by solar energy and integrated with a Battery Energy Storage System (BESS), enabling it to operate completely off-grid. This repre-

sents a new paradigm in decentralised, renewable-powered hydrogen production," the statement said.

Hydrogen is the lightest and most abundant element in the universe. It is also the cleanest form of energy, producing just water vapour when burnt.

New Delhi: Adani Group has commissioned India's first offgrid 5 megawatt green hydrogen pilot plant in Kutch, Gujarat, the conglomerate said in a statement on Monday.

An off-grid green hydrogen plant is a facility that produces hydrogen using electrolysis powered by renewable energy sources, such as solar or wind, and is not connected to the main electricalgrid. This means the plant relies entirely on its own renewable energy generation for the hydrogen production process.

The 5 MW plant has been built by Adani New Industries Limited (ANIL) - the clean energy unit under the group's flagship firm Adani Enterprises Ltd.

Calling it a key milestone towards enabling India's National Green Hydrogen Mission, the group said the successful commissio-

ning demonstrates technical feasibility and sets a benchmark for off-grid, renewable-powered industrial applications of green hydrogen and its derivatives in emissions-intensive sectors.

"The state-of-the-art plant is 100 per cent green-powered by solar energy and integrated with a Bat-

ANIL is developing large-scale production facilities for green hydrogen and its derivatives through an integrated end-to-end ecosystem

tery Energy Storage System (BESS), enabling it to operate completely off-grid. This represents a new paradigm in decentralised, renewablepowered hydroproducgen tion," the statement said.

Hydrogen is the lightest and most abundant element in the universe. It is also the cleanest form of energy producing just water vapour when burnt.

Hydrogen is colour-coded based on how it's produced and the associated environmental impact. When produced from fossil fuels, it is grey. Green hydrogen is produced when electricity produced from renewable sources such as solar or wind power is used to split water into hydrogen and oxygen. ANIL is developing large-sca-

le production facilities for green hydrogen and its derivatives through an integrated end-to-end ecosystem. This includes producing green hydrogen and its derivative products, such as green ammonia, green methanol, sustainable aviation fuel, and manufacturing solar cells, ingots & wafers, solar modules, wind turbine generators, and electrolysers at Mundra, Gujarat, to meet the demand across diverse sectors in both domestic and international mar-kets. The ANIL pilot plant is India's first off-grid 5 MW green hydrogen facility featuring a fully au-tomated, closed-loop electrolyser system designed to respond dynamically to real-time renewable energy inputs.

This provides valuable operatio-nal flexibility, particularly in addressing the variability of solar power, while ensuring efficiency, safety and performance.

"This breakthrough reinforces the Adani Group's commitment to innovation, sustainability, and leadership in the emerging green hydrogen economy. It supports India's ambition to become a global hub for green hydrogen production and sets a benchmark for renewable-powered industrial applications across hard-to-abate sectors," the statement said.

Mumbai

Adani New Industries has commissioned India's first off-grid 5 MW green hydrogen pilot plant in Kutch, Gujarat, a significant step in the country's clean energy transition. The facility operates entirely on solar power integrated with a Battery Energy Storage System.

The plant features a fullyautomated, closed-loop electrolyser system that responds to real-time renewable energy inputs, addressing solar power variability while maintaining operational efficiency. The offgrid design represents a new approach to decentralised, renewable-powered hydrogen production in India.

The company is positioning this pilot as a proof of concept for its planned Green Hydrogen Hub in Mundra.

NEW DELHI

ADANI Group has commissioned India's first off-grid 5 megawatt green hydrogen pilot plant in Kutch, Gujarat, the conglomerate said in a statement on Monday. An off-grid green hydrogen plant is a facility that produces hydrogen using electrolysis powered by renewable energy sources, such as solar or wind, and is not connected to the main electrical grid. This means the plant relies entirely on its own renewable energy generation for the hydrogen production process. The 5 MW plant has been built by Adani New Industries Limited (ANIL), the clean energy unit under the group's flagship firm Adani Enterprises Ltd.

"The state-of-the-art plant is 100 per cent greenpowered by solar energy and integrated with a Bat-

tery Energy Storage System (BESS), enabling it to operate completely off-grid. This represents a new paradigm in decentralised, renewable-powered hydrogen production," the statement said.

ANIL is developing largescale production facilities for green hydrogen and its derivatives through an integrated end-to-end ecosystem.

This includes producing green hydrogen and its derivative products, such as green ammonia, green methanol, sustainable aviation fuel, and manufacturing solar cells, ingots & wafers, solar modules, wind turbine generators, and electrolysers at Mundra, Gujarat, to meet the demand across diverse sectors in both domestic and international markets.

The initiative is aligned with the National Green Hydrogen Mission (NGHM), a flagship Government of India programme that aims to reduce import dependence, enhance energy self-sufficiency and accelerate the decarbonisation of energy-intensive industries - all in fulfilment of India's Atmanirbhar Bharat vision.

FPJ News Service

AHMEDABAD

Adani New Industries Limited (ANIL) announced the successful commissioning of India's first off-grid 5 MW Green Hydrogen Pilot Plant in Kutch, Gujarat, marking a major milestone in the nation's clean energy transition on Monday.

The state-of-the-art plant is 100% green-powered by solar energy and integrated with a Battery Energy Storage System (BESS), enabling it to operate completely off-grid. This represents a new paradigm in decentralized, renewable-powered hydrogen production.

The ANIL pilot plant is India's first off-grid 5 MW green hydrogen facility featuring a fully automated, closed-loop electrolyzer system designed to respond dynamically to real-time renewable energy inputs. This provides valuable operational flexibility,

particularly in addressing the variability of solar power, while ensuring efficiency, safety and performance.

This breakthrough reinforces the Adani Group's commitment to innovation, sustainability, and leadership in the emerging green hydrogen economy. It supports India's ambition to become a global hub for green hydrogen production and sets a benchmark for renewable-powered industrial applications across hardto-abate sectors.

The pilot also serves as a proof of concept ahead of ANIL's upcoming Green Hydrogen Hub in Mundra, Gujarat — a key project that will contribute significantly to India's low-carbon future. Green hydrogen is expected to play a vital role in decarbonising sectors such as fertilisers, refining and heavy transport — and in achieving global netzero targets.

The initiative is aligned with the National Green Hydrogen Mission (NGHM), a flagship Government of India program that aims to reduce import dependence, enhance energy self-sufficiency and accelerate the decarbonisation of energyintensive industries.

अदाणी ग्रुप की बड़ी कामयाबी

देश का पहला ऑफ-ग्रिड ग्रीन हाइड्रोजन प्लांट शुरू

बिजनेस संवाददाता | मुंबई

अदाणी ग्रुप ने देश का पहला ऑफ-ग्रिड ग्रीन हाइड्रोजन प्लांट शुरू किया है। ये प्लांट गुजरात के कच्छ में प्रायोगिक स्तर पर शुरू किया गया है। इसे अदाणी न्यू इंडस्ट्रीज लिमिटेड (अनिल) ने बनाया है। सोमवार को दी गई जानकारी में कंपनी ने बताया कि ये प्लांट मुख्य पावर ग्रिड

से जुड़ा नहीं है। 5 मेगावाट क्षमता वाले इस प्लांट की पूरी एनर्जी की जरूरत सोलर और विंड जैसे रिन्युएबल एनर्जी स्रोतों से पूरी होती है। इसमें

बैटरी एनर्जी स्टोरेज सिस्टम भी लगा है। इसलिए यह पूरी तरह ऑफ-ग्रिड काम करता है। इसमें हाइड्रोजन बनाने के लिए इलेक्ट्रोलिसिस टेक्नोलॉजी का इस्तेमाल होता है। कंपनी ने इसे नेशनल ग्रीन हाइड्रोजन मिशन के लिए बड़ी उपलब्धि बताया है। ये बताता है कि बिना पावर ग्रिड से जुड़े भी हाइड्रोजन बनाना संभव है। हाइड्रोजन ऊर्जा का सबसे स्वच्छ स्रोत माना जाता है।

अदाणी समूह ने भारत का पहला 'ऑफ-ग्रिड ग्रीन हाइड्रोजन' प्रायोगिक स्तर संयंत्र किया चालू

सवेरा न्यूज

नई दिल्ली, 23 जून : अदाणी समूह ने गुजरात के कच्छ में भारत का पहला 'ऑफ-ग्रिड' हरित हाइड्रोजन संयंत्र प्रायोगिक स्तर पर चालू किया है। समूह ने सोमवार को बयान में यह जानकारी दी। 'ऑफ-ग्रिड ग्रीन हाइड्रोजन' संयंत्र एक ऐसी सुविधा है जो नवीकरणीय ऊर्जा स्रोतों जैसे सौर या हवा द्वारा संचालित 'इलैक्ट्रोलिसिस' का उपयोग करके हाइड्रोजन का उत्पादन करती है। यह मुख्य विद्युत ग्रिड से जुड़ा नहीं है।

कच्छ में अदाणी का संयंत्र शुरू

■ NBT रिपोर्ट, मुंबई: अदाणी ग्रुप ने 'ऑफ-ग्रिड ग्रीन हाइड्रोजन' संयंत्र शुरू किया है। यह संयंत्र गुजरात के कच्छ में प्रायोगिक स्तर पर चालू किया गया है। कंपनी ने सोमवार को इसकी जानकारी दी। यह संयंत्र मुख्य बिजली ग्रिड से जुड़ा नहीं है, बिल्क इसकी पूरी ऊर्जा जरूरत सौर और पवन जैसे रिन्यूएबल एनर्जी स्रोतो से पूरी होती है। इसमें हाइड्रोजन बनाने के लिए 'इलेक्ट्रोलिसिस' तकनीक का इस्तेमाल होता है।

भारत के पहले ऑफ-ग्रिड 5 मेगावाट ग्रीन हाइड्रोजन पायलट प्लांट शुरू

अहमदाबाद, 23 जून (एजेंसियां)। अदानी न्यू इंडस्ट्रीज लिमिटेड (एएनआईएल) ने सोमवार को गुजरात के कच्छ में भारत के पहले ऑफ-ग्रिड 5 मेगावाट ग्रीन हाइड्रोजन पायलट प्लांट के सफलतापूर्वक शुरू होने की घोषणा की, जो देश के क्लीन एनर्जी ट्रांजिशन में एक प्रमुख मील का पत्थर है।

यह स्टेट-ऑफ-द-आर्ट प्लांट 100 प्रतिशत सोलर एनर्जी से संचालित है और बैटरी एनर्जी स्टोरेज सिस्टम (बीईएसएस) के साथ इंटीग्रेटेड है, जिससे यह पूरी तरह से ऑफ-ग्रिड संचालित हो सकता है।

कंपनी ने एक बयान में कहा कि यह प्लांट विकेंद्रीकृत, रिन्यूएबल एनर्जी से चलने वाले हाइड्रोजन प्रोडक्शन में एक

नए प्रतिमान का प्रतिनिधित्व करता है।

कंपनी ने कहा कि एएनआईएल पायलट प्लांट भारत की पहली ऑफ-ग्रिड 5 मेगावाट की ग्रीन हाइड्रोजन सुविधा है, जिसमें पूरी तरह से स्वचालित, क्लोज्ड-लूप इलेक्ट्रोलाइजर सिस्टम है, जिसे रियल टाइम में रिन्यूएबल एनर्जी इनपुट के लिए गतिशील रूप से प्रतिक्रिया देने के लिए डिजाइन किया गया है। यह विशेष रूप ग्रीन हाइड्रोजन उत्पादन के लिए ग्लोबल हब बनने की भारत की महत्वाकांक्षा का समर्थन करता है यह प्लांट

से सौर ऊर्जा की परिवर्तनशीलता को संबोधित करने में, दक्षता, सुरक्षा और प्रदर्शन सुनिश्चित करते हुए मूल्यवान ऑपरेशनल फ्लेक्सिबिलिटी प्रदान करता है। कंपनी की यह सफलता उभरती हुई ग्रीन हाइड्रोजन इकोनॉमी में इनोवेशन, सस्टेनेबिलिटी और लीडरशिप के लिए अदानी समूह की प्रतिबद्धता को दर्शाती है। यह प्लांट ग्रीन हाइड्रोजन उत्पादन के लिए ग्लोबल हब बनने की भारत की महत्वाकांक्षा का समर्थन करता है।

अदानी समूहाचा पहिला ग्रीन हायड्रोजन पायलट प्लांट सुरू

नवी दिल्ली : अदानी समूहाने सोमवारी एका निवेदनात म्हटले आहे की, कच्छ, गुजरात येथे भारतातील पहिला ऑफ-ग्रिड ५ मेगावॉट ग्रीन हायड्रोजन पायलट प्लांट सुरू केला आहे.

ऑफ-ग्रिड ग्रीन हायड्रोजन प्लांट ही अशी सुविधा आहे जी सौर किंवा पवन यासारख्या अक्षय ऊर्जा स्रोतांद्वारे चालणाऱ्या इलेक्ट्रोलिसिसचा वापर करून हायड्रोजन तयार करते आणि मुख्य विद्युत ग्रिडशी जोडलेली नाही. याचा अर्थ हा प्लांट हायड्रोजन उत्पादन प्रक्रियेसाठी पूर्णपणे स्वतःच्या अक्षय ऊर्जा निर्मितीवर अवलंबन असतो.

५ मेगावॉटचा हा प्लांट अदानी न्यू इंडस्ट्रीज लिमिटेड ने बांधला असून तो समूहाची प्रमुख कंपनी अदानी एंटरप्रायझेस लिमिटेड अंतर्गत स्वच्छ ऊर्जा कंपनी आहे. ग्रीन राष्ट्रीय भारताच्या हायडोजन मिशनला सक्षम दिशेने करण्याच्या एक महत्त्वाचा टप्पा असल्याचे सांगून, समूहाने म्हटले आहे की यशस्वी सुरुवात तांत्रिक व्यवहार्यता दर्शवते आणि उत्सर्जन-केंद्रित क्षेत्रांमध्ये ग्रीन हायड्रोजन आणि त्याच्या डेरिव्हेटिव्ह्जच्या ऑफ-ग्रिड, अक्षय-शक्तीवर चालणाऱ्या औद्योगिक प्रयोगासाठी एक निश्चित दिशा दर्शवेल.

अडाणी समूह ने भारत का पहला 'ऑफ-ग्रिड ग्रीन हाइड्रोजन' संयंत्र चालू किया नई दिल्ली (भाषा)।

अडाणी समूह ने कच्छ में भारत का पहला 'ऑफ-ग्रिड' हरित हाइड्रोजन संयंत्र प्रायोगिक स्तर पर चालू किया है। समूह ने सोमवार को बयान में यह जानकारी दी।

'ऑफ-ग्रिड ग्रीन ह्यइड्रोजन' संयंत्र एक ऐसी सुविधा है जो नवीकरणीय ऊर्जा स्रोतों जैसे सौर या हवा द्वारा संचालित 'इलेक्ट्रोलिसिस' का उपयोग करके ह्यइड्रोजन का उत्पादन करती है। यह मुख्य विद्युत ग्रिड से जुड़ा नहीं है। इसका मतलब है कि संयंत्र की ह्यइड्रोजन उत्पादन प्रक्रिया पूरी तरह से अपनी अक्षय ऊर्जा उत्पादन पर निर्भर करती है। यह पांच मेगावाट का संयंत्र अदाणी न्यू इंडस्ट्रीज लिमिटेड द्वारा तैयार किया गया है। एएनआईएल, अडाणी समूह की प्रमुख कंपनी अडाणी एंटरप्राइजेज लिमिटेड की स्वच्छ ऊर्जा इकाई है।

भारत के राष्ट्रीय हरित हाइड्रोजन मिशन को सक्षम करने की दिशा में इसे एक वड़ी उपलब्धि करार देते हुए समृह ने कहा कि सफल शुरुआत तकनीकी व्यवहार्यता को दर्शाती है। उत्सर्जन-गहन क्षेत्रों में हरित हाइड्रोजन का 'ऑफ-ग्रिड', नवीकरणीय-संचालित औद्योगिक अनुप्रयोगों तथा इसके डेरिवेटिव के लिए मिसाल कायम करता है।
