Adani Power profit falls on cost uptick

Adani Power showed a 5% fourth-quarter profit fall on Wednesday, over low tariff realisations and higher operating costs.

The company, part of the billionaire Gautam Adani-led Adani Group, said its consolidated profit fell to ₹2,599 crore in the three months ended March 31 from ₹2,737 crore a year back.

Power sales rose 18.9% year-on-year in the quarter, but revenue grew a modest 6.5% to ₹14,237 crore due to weaker merchant tariffs.

The company said supply of power outpaced demand, leading to a merchant tariff fall in the quarter, which resulted in lower realisations.

Merchant tariffs refer to the price at which electricity is sold in the open market.

The company also said it faced higher operating expenses due to three newly acquired plants in the September quarter.

Total expenses rose 9.2% for the fourth quarter. REUTERS

Mumbai, April 30

ADANI POWER POSTED a net profit of ₹2,649 crore in the fourth quarter of FY25, down 3% year-on-year, missing consensus estimates of analysts who had pegged the figure at ₹2,355 crore. However, the company beat analysts' estimates in revenues which rose 6.5% year-on-year to ₹14,237 crore from ₹13,364 crore. Analysts had estimated revenues of ₹13,839 crore.

The company's finance costs came down 7% to ₹765 crore, while depreciation went up 10% to ₹1,085 crore in the fourth quarter of FY25. Its consolidated power sale volume was at 26.4 billion units (BU), up 18.9% from 22.2 BU in the fourth quarter of FY24 due to growing power demand and higher operating capacity. For the entire FY25, its profit went down 38% y-o-y to ₹12,936 crore, and revenues went up 12% to ₹56,203 crore. Its stock ended at ₹529.50, nearly 3.5% down from Tuesday's close.

Ahmedabad

Despite a 21 per cent year-on-year (y-o-y) rise in electricity sale volumes, Adani Power clocked a ₹12,750 crore in consolidated profit after tax (PAT), a decline of 39 per cent compared to FY24.

"Profit After Tax for FY25 was lower at ₹12,750 crore as compared to ₹20,829 crore in FY24 on account of lower one-time revenue recognition and higher tax charge," the company said on Wednesday.

The profits fell despite a higher y-o-y power-sale volumes and a subsequent revenue from operations. Due to robust power demand and higher operating capacity, the company's consolidated power sale volume rose 20.7 per cent to 95.9 billion

units in FY25. The revenues from operations stood at ₹56,203 crore, a y-o-y growth of almost 12 per cent.

INCREASED CAPACITY

The company's consolidated operating capacity grew from 15,250 MW in FY24 to 17,550 MW in FY25 on account of acquisition of the 1,200-MW Moxie Power Generation, 600-MW Korba Power and 500-MW Adani Dahanu Thermal Power Station.

During FY25, the total expenses also rose 8 per cent to ₹42,546 crore. The fuel costs that were part of the expenses rose 6.4 per cent.

On account of acquisition debt for Korba Power and higher working capital borrowings in line with the increased scale of operations, net total debt rose 17 per cent to ₹31,023 crore as of March 31, 2025.

Adani Power logs strong financial performance in FY25, achieves 102 BU power generation

AHMEDABAD, APR 30

ADANI Power on Wednesday reported a 21.4 per cent jump in consolidated continuing profit before tax (PBT) at Rs 13,926 crore in FY25, compared to Rs 11,470 crore in FY24, due to improved EBITDA and lower finance costs.

The Adani Group company registered a 10.8 per cent rise in consolidated continuing total revenues at Rs 56,473 crore in FY25 compared to Rs 50,960 crore in FY24, supported by higher sales volumes, offset partially by lower tariff realisation.

Continuing revenues exclude one-time prior period income recognition. Continuing EBITDA for FY25 grew 14.8 per cent to Rs 21,575 crore, according

to the company.

For Q4 FY25, consolidated continuing total revenue was higher by 5.3 per cent at Rs 14,522 crore compared to Rs 13,787 crore in Q4 FY24, primarily due to higher volume, offset by lower tariff realisation.

Consolidated continuing PBT for Q4 FY25 stood at Rs 3,248 crore vs Rs 3,464 crore for Q4 FY24 on account of higher depreciation due to new acquisitions, apart from slower demand growth and lower merchant tariffs.

In Q4 FY24, the company's profit after tax (PAT) had non-recurring items like higher refund received from government authorities and gain on sale of unutilised assets. These were at lower level this quarter, with PAT at Rs 2,599.23 crore.
