MAJORITY OF FUTURE HIRING IN IT BIZ

From Tax Suits to Tech Suites, it's a Recalibrate@Big4

	Deloitte	EY	PwC	KPMG
TC Partners	285	281	300	125-130
TC Headcount	21,000	20,000	15,000	14,000-15,000
Total Firm Strength	35,000	45,000	30,000	22,000+
TC as % of Total Firm	60%	45%	50%	~64-68%

NOTE: Figures provided by firms. Tech experts embedded in tax, audit, etc not included

Amid digital revolution, technology consultants now take up chunk of top advisory space

Vinod Mahanta

Mumbai: Traditionally known for their strengths in audit, tax and deal advisory, the Big Four in India have discovered an unlikely crown jewel in technology consulting. On the back of a post-pandemic digital transformation push, this has grown into the fastest-expanding vertical — now leading in headcount, partner strength and accounting for more than half of all new hires in FY25. Ironically, these very firms — EY, Deloitte, PwC and KPMG — globally sold or spun off IT consulting divisions in the early 2000s, and only began rebuilding those capabilities in 2007-08.

That slow return has since turned into a full-fledged pivot — with India leading globally in both scale and pace of shift. "Consulting is now the new frontier," said Sanjeev Krishan, chairman of PwC India.

Among the top four professional service firms, 60% of Deloitte's India workforce and 45% of EY's now comprise the tech consulting vertical, while PwC and KPMG both have approximately half of their India headcount dedicated to this business.

Recruitment will be dominated by technology consulting in FY26. Deloitte plans to hire another 6,000-8,000 people in this vertical. At KPMG, nearly 45 of every 100 new hires in FY26 will be in technology roles. PwC will hire 6,000-7,000 in tech consulting in the fiscal year.

Sathish Gopalaiah, president, consulting, at Deloitte South Asia, said the firm had hired over 7,300 people as of April 2025, and by the end of May, that number will be close to 8,000. "Our total headcount will cross 22,000 by then," he said. "Last year, our tech consulting business grew by 38%, and this year, we're on track to grow at 27% by the end of May."

Back-of-the-envelope estimates indicate that IT consulting generated over ₹20,000 crore of the Big Four's combined ₹38,500-crore India revenue in FY24—a trend expected to hold in FY25 as well, once all books are closed.

Deep Domain Expertise

▸▸ From Page 1

Accelerating this business is India Inc's tech transformation drive gaining serious momentum, with large-scale projects underway at companies such as HDFC Bank, ICICI Bank, Shell, Unilever, HSBC, and several public sector units (PSUs).

"The Covid-19 crisis was a watershed moment, ushering in an unprecedented era of tech-led transformation powered by cloud, data and analytics," said Rohan Sachdev, managing partner for consulting at EY India. "Today, AI-driven change is taking centre stage."

TRANSFORMED DEAL QUEUE

A look at tech transformation requests for proposals (RFPs) points to strong deal momentum in the consulting space—with over 30 RFPs valued above ₹100 crore, more than 50 above ₹50 crore and upwards of 75 proposals exceeding ₹25 crore. The firms now have built capabilities to provide services across the IT value chain.

"Iconic transformation happens at the intersection of consulting, technology & digital, and data & analytics. We're helping our clients move from opportunities to business outcomes by offering the best customised solution and service set," said Sanjay Dawar, lead partner, One Consulting, at PwC India.

But why are clients increasingly turning to the Big Four for technology transformation work, despite the presence of global tech majors such as Accenture and IBM, Indian IT services giants, a plethora of product companies and other pure-play tech specialists?

Akhilesh Tuteja, national leader, clients and markets and technology, media & telecommunications (TMT), at KPMG India, explained, "The top firms now have deep domain expertise, inhouse consulting capabilities, a technology advisory setup and strong collaborations with global tech alliances, making them one-stop partners for digital transformation."

KPMG has doubled its technology consulting business in the last three years, he added.

After years of gaining experience and credibility, the Big Four surged ahead in tech consulting after Covid-19—when digitisation became unavoidable—by being the only ones capable of quickly marrying strategy with tech execution, mobilising cross-functional teams and driving company-wide change through automation and process innovation. "Speed and RoI (return on investment) on fees is where we differentiate and win," said Dawar of PwC.

Interestingly, it's in the tech consulting domain that the most keenly contested battle in the Big Four is playing out, between early mover and overall market leader EY and aggressive and well-funded challenger Deloitte.

Industry watchers say that technology consulting may well be the first front where Deloitte has finally managed to breach EY's leadership in any of the major service lines, with its aggressive investment-led growth, while EY maintains a lead in tax, deals, management consulting and audit.

The firms are also investing heavily in technology consulting.

It has taken centre stage in the refreshed global strategy of PwC, traditionally a strong player in technology implementation. The New Equation is emerging as the firm's biggest area of focus and investment.

Deloitte is investing 9% of its total revenue in technology consulting, while at KPMG, it's 8% of tech consulting earnings, including man hours spent in building solutions. PwC India has spent nearly ₹300 crore on hiring partners, people and making acquisitions in the last two years.

ARTIFICIAL INTELLIGENCE

What's also helped the firms gain ground on tech companies is the global network of partnerships they've stitched up with companies such as Microsoft, Google, Intel, IBM and Salesforce, giving them early access to technologies in cloud, AI, data and cyber capabilities, among others.

Within the technology consulting vertical, AI has emerged as the top priority, with firms channelling maximum focus, resources and energy into it, and finding strong traction among clients eager to experiment and integrate AI into their operations.

"Clients' asks have evolved beyond, 'What use cases can AI deliver?' to strategic imperatives such as 'How do I transform my organisation with AI or embed an AI-first mindset across my business?'," said EY's Sachdev.

KPMG's Tuteja said his firm was involved in at least 30 AI assignments and every large project had an AI component. It was becoming central to nearly every tech consulting mandate, he said.

Big Four experts say they will be major players even in AI, as they already have a good understanding of clients' tech infrastructure and data setup. "AI is part of every technology conversation these days. We have completed AI-enabled sales worth ₹1,000 crore," said Deloitte's Gopalaiah.

Dawar of PwC India said that during 2000-10, consulting evolved from just making strategy decks to driving implementation, and the following decade was about marrying strategy with core technologies.

"Post-2020, the focus has shifted to digital transformation—and today, it's largely also about generative AI," he said. "To truly leverage GenAI, companies must first get their foundation tech DNA right—by starting with the right infrastructure, data foundation and intelligence layers. It's about bringing these three pillars together and linking them seamlessly to enable tangible business outcomes. The firms have all the capabilities to deliver this end-to-end for clients."

That slow return has since turned into a full-fledged pivot—with the India market leading globally in both the scale and pace of that shift.

"Consulting is now the new frontier," said Sanjeev Krishan, chairman of PwC India.

Among the top four professional service firms, 60% of Deloitte's India workforce and 45% of EY's now comprise the tech consulting vertical, while PwC and KPMG both have approximately half of their India headcount dedicated to this business. Recruitment will be dominated by technology consulting in FY26. Deloitte plans to hire another 6,000-8,000 people in this vertical.

At KPMG, nearly 45 of every 100 new hires in FY26 will be in technology roles.

NITI DEVELOPING NEW FRAMEWORK

Updated Guide to Redraw Urban Map

Think tank's focus shifts to economic parameters to target infra, growth avenues

Yogima Seth

Redefining Moment

City-specific targeted interventions will be proposed

Peri-urban and census towns will be part of urban development

Framework to help states attract investment, generate employment

Pilots run in Mumbai and Surat, underway in Varanasi and Visakhapatnam

New Delhi: The NITI Aayog is readying a framework for redrawing urban boundaries, with economic parameters and current land use being the key parameters for redefinition.

The move is aimed at helping states better address rapid unplanned urbanisation and focus on targeted infrastructure creation to enable them to unlock their full economic potential, said a senior government official. The government's premier policy think tank will also outline interventions to boost manufacturing and services and lay emphasis on new growth avenues including tourism, real estate, healthcare and agriculture, according to the official.

Existing Criteria Inadequate ▸▸ 7

Existing Criteria Inadequate

▸▸ From Page 1

In India, urban areas consist of statutory towns and census towns based on population and engagement of men in non-agriculture activities. However, the existing census definition is about 65 years old and the existing criteria are believed to be inadequate to serve the exigencies of a modern economy.

The Aayog is working on four pilot city-regions — Mumbai Metropolitan Region, Varanasi, Surat and Visakhapatnam – to develop a standardised process template.

"Based on insights and learnings from these pilots, NITI Aayog will shortly launch a framework to guide the formulation of economic plans across other city-regions," said the official, who did not wish to be identified.

The current definition does not capture the new realities, according to experts.

Vivek Mittal, executive director, Deloitte India, pointed out that as per the existing definition only 31% of the Indian population lived in urban areas in 2011. However, going by the definition followed in France, urban population in India would be 65%, he said.

Adil Zaidi, partner and leader — economic development advisory, EY India, said India's urban classification, rooted in the census framework of statutory and census towns, often fails to keep pace with the country's fast-evolving economic geography.

According to the Aayog, India is the world's second largest urban system, contributing about 63% to the national gross domestic product, as of 2011, and this is expected to increase to 75% by 2040.

The shift in the urban planning paradigm is envisaged to lead to several positive outcomes, including attracting investment and generating employment through a clear, long-term economic vision tailored to each city-region, said the official cited earlier.

Ultra Rich Betting on Unreal Estate to Preserve Wealth

Close luxury property deals worth over ₹25,000 crore over the last three years, up nearly 90% over the previous three

Kailash Babar & Kala Vijayraghavan

Mumbai: The country's leading industrialists, promoters, and family offices are increasingly turning to trophy properties for wealth preservation and legacy building, betting on luxury real estate as a resilient asset class that offers a combination of capital appreciation, privacy, and intergenerational value.

From Worli's skyline-defining towers and the tree-lined avenues of Carmichael Road in Mumbai to sprawling colonial-era homes in New Delhi's Lutyens' Bungalow Zone, the real estate market in prime areas of major Indian cities has seen the ultra-wealthy close deals exceeding ₹25,000 crore over the last three years. This is up around 90% over the previous three years, according to data compiled by realty data analytics firm Zapkey.com.

This surge in high-value purchases by promoters and family trusts in cities like Mumbai, New Delhi, and Bengaluru reflects a broader shift in capital management strategies, family office experts said.

These families see them as strategic, long-term investments designed to safeguard wealth across generations. "The trend is in line with how global markets have historically evolved in large cities," said Vivek Gupta, partner at Deloitte India. "India is seeing this trend now—large business groups want to lock in assets that are priced and scarce and can, therefore, become a legacy to be passed across generations."

Vedanta Group, Bajaj Group, Godrej, Infosys, Radhakishan Damani, Uday Kotak, GVK, Welspun, Polycab, Parle Products, and Divis Laboratories are among the large business group and families that have purchased bungalows, luxury apartments, and land parcels in major cities.

For ultra-wealthy families, high-end properties are not mere lifestyle statements. They are strategic, long-term investments designed to safeguard wealth across generations.

"Our family council has always held this belief that real estate offers a better width of investment avenues," a leading industrialist said on condition of anonymity. "Prime real estate is better than gold is what we believe, and we expect this recent trend to keep getting stronger." The scion of a leading Mumbai-based industrialist said the evolution of real estate investment trusts (REITs) and land banks as a trend signals a long-term belief in rising property values.

"The growth in the value of properties, especially in key cities have been phenomenal," he said, seeking anonymity. "A number of key financial advisors suggested that we park funds in such assets where the surge in value will be significant down generations. Also, blocking key properties always makes good financial sense."

Be it billionaire investor and D-Mart founder Damani's Rs 1,001-crore purchase of a bungalow in South Mumbai's elite Malabar Hill in April 2021, or banker Uday Kotak's acquisition of an entire sea-facing Worli building for over Rs 400 crore in 2025—these deals are not outliers, but part of a clear and defining trend.

They signal a deeper shift in how family offices are managing their capital, family office experts said.

"HNI families view real estate as a strategic asset for capital preservation and appreciation, which also helps in diversifying their wealth effectively," said Sandeep Reddy, cofounder of Zapkey.com. "It's also crucial for family wealth division, simplifying intergenerational transfers. While our analysis includes only marquee transactions, there are several transactions of this nature that are relatively smaller and not considered here," he said. According to Reddy, beyond investment, there is a clear preference for premium, landmark addresses for end use, reflecting both prestige and a pursuit of long-term value.

According to Reddy, beyond investment, there is a clear preference for premium, landmark addresses for end use, reflecting both prestige and a pursuit of long-term value.

Over the past couple of years, high-value apartment deals priced above ₹100 crore have been closing at an unprecedented pace, highlighting the strong demand for ultra-luxury residences in an environment of rising wealth and limited availability of marquee properties.

According to data from international property consultant Knight Frank, the number of Indian ultra-high-net-worth individuals is projected to grow 50.1% from 13,263 in 2023 to 19,908 by 2028, marking the highest growth in this population globally over this period.

		Preetam Tadeparthy	Texas Instruments – Architect & chief technologist
		Vikram Gakhar	Texas Instruments – Design engineer
		DB Suryanarayana	Texas Instruments – Sr member of technical staff
Bodhi Computing (2023)	After being acquired by Krutrim, focus is on creating AI chips	Sambit Sahu	Vice-president and general manager, IoT Engineering, at Intel
		Raghuraman Barathalwar	Vice-president, Intel

Source: LinkedIn; company websites

Swathi Moorthy

Bengaluru: About a dozen executives from semiconductor and chip design companies such as Intel, AMD and Texas Instruments have quit to establish AI chip startups in India to tap into the multi-billion-dollar industry.

Four from Texas Instruments have started C2i Semiconductors, which is developing products to reduce energy consumption by semiconductors. They have raised $4 million from Yali Capital and Intel CEO Lip Bu-Tan, according to Tracxn.

Bodhi Computing, which was acquired by Krutrim, was started by two Intel veterans, Sambit Sahu and Raghuraman Barathalwar. They are currently heading Krutrim's semiconductor initiatives, which ET had reported earlier.

Four former Intel and AMD executives have set up Agrani Labs and are developing indigenous AI chips in Bengaluru. They are in talks to raise $8 million from Peak XV Partners, as per people in the know.

Most of these executives have spent 15-20 years in the semiconductor industry. India's semiconductor ecosystem is evolving rapidly through a combination of government initiatives such as design-linked incentives, experts said.

Apart from this, the country is becoming a key centre for chip design and development and concentrated efforts are being made to set up semiconductor hubs.

Local CA Firms Set for Global Tie-ups

12 • PG | 145 • Sqcm | 119921 • AVE | 215.44K • Cir | Bottom Center

Bengaluru • Delhi • Chandigarh • Jaipur • Mumbai

ICAI APPROVES DRAFT REGULATORY FRAMEWORK

Local CA Firms Set for Global Tie-ups

Charting New Path

Local CA firms already affiliated with global entities and new ones have to register with ICAI

They have to nominate senior members as nodal officers for compliance

Such firms have to abide by local audit rules, ethical standards

Tie-ups to enable more local firms to acquire scale, expertise

Currently, EY, Deloitte, KPMG, PwC, Grant Thornton & BDO dominate audit ecosystem via affiliates

They handled audits of 326 of 486 top Nifty companies in FY25

Banikinkar Pattanayak

New Delhi: The Institute of Chartered Accountants of India (ICAI) has approved a crucial draft regulatory framework which will enable domestic chartered accountant firms to tie up with their global peers to set up shop in the country, said its president Charanjot Singh Nanda.

The move is aimed at enabling local entities to gain scale, in sync with the Centre's vision of creating large home-grown accounting firms, he told **ET**.

The framework would require local firms that are already affiliated with global accounting entities to register with the ICAI and undertake necessary compliances, said people aware of the details.

The institute held talks with the corporate affairs ministry before finalising the draft, approved by its apex council on Monday, Nanda indicated. The draft will soon be put out for stakeholder comments and notified by early July, he said.

Currently, EY, Deloitte, KPMG, PwC, Grant Thornton & BDO dominate audit ecosystem via affiliates

They handled audits of 326 of 486 top Nifty companies in FY25

Bankinkar Pattanayak

New Delhi: The Institute of Chartered Accountants of India (ICAI) has approved a crucial draft regulatory framework which will enable domestic chartered accountant firms to tie up with their global peers to set up shop in the country, said its president Charanjot Singh Nanda.

The move is aimed at enabling local entities to gain scale, in sync with the Centre's vision of creating large home-grown accounting firms, he told ET.

The framework would require local firms that are already affiliated with global accounting entities to register with the ICAI and undertake necessary compliances, said people aware of the details.

The institute held talks with the corporate affairs ministry before finalising the draft, approved by its apex council on Monday, Nanda indicated. The draft will soon be put out for stakeholder comments and notified by early July, he said.

Currently, there is no formal framework governing such global tie-ups. Those with foreign tie-ups were earlier required to submit certain details with the ICAI by submitting a form, which was discontinued four years ago, as a formal framework on this was sought to be introduced.

Contours of the draft framework

As per the draft framework, an accountancy firm formed through a tie-up with an overseas entity has to register with the ICAI and designate a senior member or partner as a nodal officer for ensuring various compliances, said the people cited earlier.

Such firms will have to submit their names, registration details and changes in constitution with the ICAI. They will also have to file their annual returns with the institute.

Firms will have to share their names, registration details, changes in constituion, annual returns with ICAI

Domestic entities that would be part of the firms formed with overseas networks will have to abide by the stipulated ethical standards.

"The operations of overseas networks in India will have to comply with all these regulations," said one of the persons, who did not wish to be identified.

To help local accounting firms gain scale, the ICAI had last year amended its guidelines to allow those wishing to merge up to 10 years, instead of the earlier five, to separate if things didn't go according to plan. Similarly, no fees would be charged for freezing the names along with the corresponding firm registration number.

Get AI-Ready Before More TRUST

Shatakratu Sahu

A high-level Indian delegation, including foreign secretary Vikram Misri and deputy NSA Pavan Kapoor, met their US counterparts in Washington this week. Among other issues, they discussed implementing TRUST (Transforming the Relationship Utilising Strategic Technology) initiative, and US-India COMPACT (Catalysing Opportunities for Military Partnership, Accelerated Commerce & Technology) partnership. At the centre of Misri's discussions with US deputy secretary of state Christopher Landau was how tech-trade-talent will shape the India-US partnership.

In May, the Trump administration had repealed the AI Diffusion Rule introduced towards the end of Joe Biden's tenure. The rule classified countries across three tiers, laying down specific criteria for exporting — or not — AI infrastructure to them. India, placed in tier 2, with about 120 other countries, faced a cap of 50,000 advanced GPUs to be imported from the US through 2027. Also, no US company could deploy over 7% of its overall compute power in India.

That rule is slated to be replaced, with recent reports suggesting that new rules on exporting US AI infra could be driven by country-specific negotiations, and may feature in their ongoing bilateral trade negotiations. For India, there are no clear indications yet on what the new rules could mean for it. As of now, repeal of AI Diffusion Rule is widely seen as a 'big breather'.

However, importing an uncapped number of GPUs, or other advanced AI chips, from the US may not necessarily translate to sufficient compute capacity for India. AI Diffusion Rule's repeal should be an opportunity to understand other roadblocks to building compute capacity for India.

Data space, the final frontier

As computing power is necessary to fuel any AI ambitions, GoI recently provisioned about 14,000 GPUs on subsidy for its AI ecosystem. It's expected to procure 15,000 more from 7 shortlisted bidders in the coming months.

Regardless of volume, any GPUs or advanced AI chips imported need to be housed in data centres. This assumes significance as a May 2025 Deloitte report, 'Attracting AI Data Centre Infrastructure Investment in India', highlights that India may need 45-50 mn sq ft real estate, coupled with 40-45 terawatt hours (TWh) incremental power for data centres by 2030 for its AI demand. So, challenges to building data centres must remain in India's policymaking focus.

The rule repeal remains positive news, though limited in its impact and contingent on other factors relating to India's overall compute capabilities. But it serves as an opportunity to clear the mist on capabilities of India's data centres that will ultimately house high-end AI chips from the US. Both governments must now double down on identifying roadblocks to bringing AI infra to India, particularly under the timely TRUST initiative.

Further, the Quad leaders' summit, to be hosted by India later this year, can be opportune platform for presenting Washington's and New Delhi's findings on TRUST. This could lead to reformative policymaking relating to power, finance and regulatory roadblocks.

Compute capacity is only one of the building blocks for India's AI ambitions. Launched last year, the IndiaAI Mission, with a ₹10,300 cr-plus budget outlay, has made significant strides on its seven pillars. In addition to its massive and ongoing compute procurement, its AIKosh platform, unveiled in March, now boasts 350+ datasets and will only grow.

Last month, GoI selected the Bengaluru-based startup Sarvam AI to build India's first sovereign LLM model. It also awarded several projects for safety-enhancing technologies, and has called for partnerships for its AI Safety Institute. But more needs to be done, especially to address AI-induced structural unemployment, and the need to increase public-private spending on the R&D ecosystem.

Business+Leisure = Booming Business for Travel, Hotel Cos

Many new-age firms providing team-level budgets to blend business and leisure help lift weekend occupancies in key destinations

Anumeha Chaturvedi
& Prachi Verma

New Delhi: It is business, but mixed with leisure. It is bleisure. And it is booming.

Marketing professional Surabhi Tiwari likes combining her love for travel with her work trips, be it a domestic conference that she recently attended in Hyderabad or an international summit in Japan. She takes about two to three days off exploring nearby places around the destination post her work assignments. Travellers like Tiwari are now key contributors for travel companies and hotel chains that have seen a considerable rise in bleisure bookings this year, with many companies encouraging employees to mix business with leisure.

At Le Meridien hotel in New Delhi, bleisure bookings, which usually comprise business room nights booked for a conference with a few extended days' stay, have grown by 20-22% this year over the same time last year, according to Meena Bhatia, VP and general manager at the hotel.

For luxury villa rental platform StayVista, bleisure bookings this year are up over 15% from last year. "Additionally, we have seen length of stays doubling as compared to pre-pandemic times. With respect to locations, we have seen a rise in bleisure travel to locations such as Dehradun, Kochi, Pune, Chandigarh and Delhi NCR," its cofounder Amit Damani said. Many companies are encouraging employees to combine work with personal time. They are also facilitating spouse accompaniment, according to Vishal Suri, managing director of SOTC Travel. He said SOTC has responded by curating flexible, dual-purpose travel experiences and itineraries.

Anand Ramanathan, partner and consumer industry leader at Deloitte South Asia, said 29% of corporate travellers now extend their business trips for leisure, with 81% adding one to two days, and 20% adding three to four days.

Further, 40% of travellers extending trips for leisure stay in the same accommodation booked for business, offering hotels a direct opportunity to increase revenues through extended stays or upselling of leisure amenities, he said, citing the report titled 'Exploring India's Corporate Travel Market: Understanding Market Dynamics, TMCs, and User Preferences'. Cleartrip launched its meetings, incentives, conferences and exhibitions (MICE) and offsite travel division in 2022 and witnessed a 3x growth in the first year, its B2B head Sukesh Shetty said.

"We are growing steadily, fuelled largely by demand from ecommerce, tech and fast scaling digital firms. Professionals are increasingly blending work obligations with personal downtime, making destinations like Goa, Coorg, Dubai, and Singapore top choices," Shetty said.

"Many new-age firms now allocate team-level budgets for strategy and bonding retreats for domestic destinations such as Puducherry, Kerala, and Nasik. International picks include Vietnam, Baku, and Sri Lanka," he added.

VARANI SAHU

For Accor, which runs hotels in key metros and locations such as Aero City in Delhi, bleisure has improved weekend occupancies in certain markets.

"Guests are moving beyond just the room and breakfast spends. Our dinner covers and beverage sales have moved up, and our weekend occupancies in some markets, which used to see a double-digit drop, have reduced over the past year, which implies that guests are extending stays," said Vineet Mishra, VP, operations, for India and South Asia at Accor. "A lot of companies are planning conferences towards the latter half of the week, say Thursday or Friday, enabling guests to extend their stays over weekends," he added. Thomas Cook's city breaks and bleisure packages offer curated local experiences. "City or business hotels are also offering attractive weekend rates and offers and this makes the bleisure extension even more viable," said Indiver Rastogi, president and group head for global business travel at Thomas Cook (India).

'SC Verdict may Hike Tax Burden on OTT Platforms, Gaming Apps'

Anuradha Shukla

New Delhi: The Supreme Court ruling allowing dual taxation on television broadcasters may increase tax burden on over-the-top (OTT) platforms such as Amazon Prime and Netflix and other subscription based digital content and even gaming applications, said experts.

In its May 22 judgment on Asianet Satellite Communications and others, a bench of justices BV Nagarathna and NK Singh ruled that broadcasting involves delivery of service and delivery of entertainment and can be taxed by different authorities.

This means the Centre can impose service tax on the act of broadcasting, while states are allowed to charge entertainment tax on the content consumed by viewers.

"The ruling is mainly premised on the basis that both taxes deal with different aspects of broadcasting activities and hence, there is no overlap in taxing powers of the Centre and state," said Saloni Roy, partner, Deloitte India.

She added that although the case relates to the pre-goods and services tax (GST)era, the judgment could have "significant implications" and that it has created tax uncertainty for the industry.

Experts said it may lead to decentralisation of tax. "By endorsing the 'aspect theory', which permits separate taxation of different elements of the same activity, the court has opened the door to potential dual taxation on digital platforms such as OTT services, gaming apps and social media," said Saurabh Agarwal, partner, EY.

He added the ruling has not only created more confusion for the industry, but also goes against the spirit of the GST, which was designed to unify and replace various indirect taxes, including entertainment tax. "This ruling may pave the way for states or even local bodies—under Entry 62 of the Constitution—to reintroduce such levies under the label of 'entertainment," Agarwal said, adding that this may pose a challenge for the GST Council.

In the pre-GST era, state governments were empowered to levy tax on entertainment.

"With the introduction of GST, state governments are still empowered to levy tax on entertainment and amusement. However, this is permitted through local bodies such as panchayats, municipalities, etc.," Roy said.

For instance, Haryana Municipal Entertainment Duty Act, 2019 permits levy of duties with respect to admission to public entertainments, which includes any exhibition, performance, amusement, game, sport or race to which persons are ordinarily admitted on payment.

Maharashtra Entertainments Duty Act, 2023 provides for the levy of duty in respect to entry to entertainment or exhibition, including direct-to-home broadcasting service, which is to be collected by local bodies.

Similarly, Tamil Nadu charges both GST and entertainment tax on Indian Premier League match tickets. The digital industry under the streamlined tax regime under GST was aware of the taxation burden, but this decision reintroduces uncertainty, with the possibility of more states taxing OTT platforms, content creators and gaming applications in the name of entertainment. "There are many factors which should act against higher taxes for digital media as an indirect impact of this judgment, including the lack of territoriality in delivery of such services," said Shashank Mishra, Partner, Shardul Amarchand Mangaldas & Co.

Screen Tax

In its May 22 judgement, SC ruled that broadcasting involves delivery of service and entertainment which means:

- **The Centre** can impose service tax on the act of broadcasting
- **States can** charge entertainment tax on the content consumed by viewers
- **Ruling on** basis that both taxes deal with different aspects of broadcasting activities

Impact

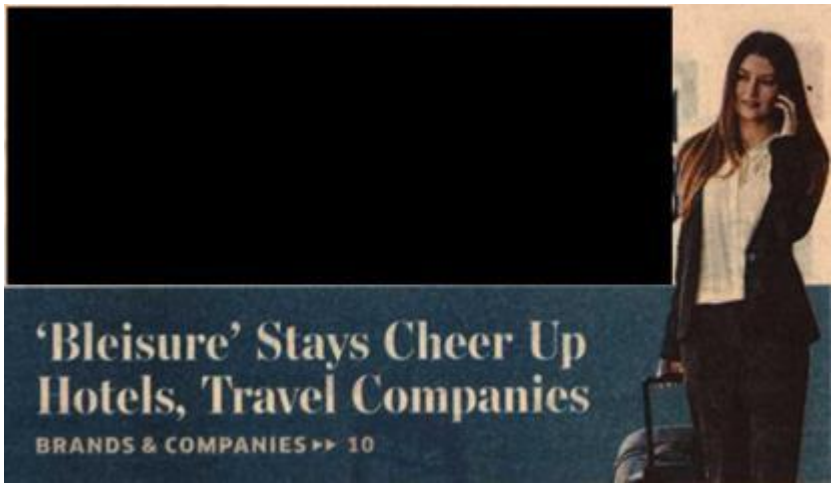

- **Judgement has created tax uncertainty for the industry**
- **Likely to lead to tax decentralisation**
- **Resulting in no overlap in taxing powers**

At Your Service 'Blesiure' Stays Cheer Up Hotel, Travel Cos

New-age firms providing team-level budgets for pros to blend biz and leisure lift weekend occupancies in key destinations

Anumeha Chaturvedi & Prachi Verma

New Delhi: It is business, but mixed with leisure. It is bleisure. And it is booming.

Marketing professional Surabhi Tiwari likes combining her love for travel with her work trips, be it a domestic conference that she recently attended in Hyderabad or an international summit in Japan. She takes about two to three days off exploring nearby places around the destination post her work assignments.

Travellers like Tiwari are now key contributors for travel companies and hotel chains that have seen a considerable rise in bleisure bookings this year, with many companies encouraging employees to mix business with leisure.

At Le Meridien hotel in New Delhi, bleisure bookings, which usually comprise business room nights booked for a conference with a few extended days' stay, have grown by 20-22% this year over the same time last year, according to Meena Bhatia, VP and general manager at the hotel.

For luxury villa rental platform StayVista, bleisure bookings this year are up over 15% from last year. "Additionally, we have seen length of stays doubling as compared to pre-pandemic times. With respect to locations, we have seen a rise in bleisure travel to locations such as Dehradun, Kochi, Pune, Chandigarh and Delhi NCR," its cofounder Amit Damani said. Many companies are encouraging employees to combine work with personal time. They are also facilitating spouse accompaniment, according to Vishal Suri, managing director of SOTC Travel. He said SOTC has responded by curating flexible, dual-purpose travel experiences and itineraries.

VARANI SAHU

Anand Ramanathan, partner and consumer industry leader at Deloitte South Asia, said 29% of corporate travellers now extend their business trips for leisure, with 81% adding one to two days, and 20% adding three to four days. Further, 40% of travellers extending trips for leisure stay in the same accommodation booked for business, offering hotels a direct opportunity to increase revenues through extended stays or upselling of leisure amenities, he said, citing the report titled 'Exploring India's Corporate Travel Market: Understanding Market Dynamics, TMCs, and User Preferences'.

Cleartrip launched its meetings, incentives, conferences and exhibitions (MICE) and offsite travel division in 2022 and witnessed a 3x growth in the first year, its B2B head Sukesh Shetty said.

"We are growing steadily, fuelled largely by demand from ecommerce, tech and fast scaling digital firms. Professionals are increasingly blending work obligations with personal downtime, making destinations like Goa, Coorg, Dubai, and Singapore top choices," Shetty said.

"Many new-age firms now allocate team-level budgets for strategy and bonding retreats for domestic destinations such as Puducherry, Kerala, and Nasik. International picks include Vietnam, Baku, and Sri Lanka," he added.

TRANSITION FROM CAMPUS TO CORPORATE LIFE

Fresh Grads Face Hurdles in Job Market

Intake by top recruiters down by more than half this placement season as India Inc turns cautious

Lijee Philip & Rica Bhattacharyya

Mumbai: Fresh graduates at some of India's top colleges are enduring one of their toughest placement years yet, with intake by prominent recruiters falling by more than half, according to college sources and top company officials.

People said India Inc has turned cautious in fresher hiring due to lower workforce needs amid global geopolitical turmoil and macroeconomic headwinds, crimping business growth this year.

While many companies halted fresher onboarding even after making final offers, some delayed issuing offer letters despite shortlisting candidates. Many candidates are also awaiting their final interviews while some candidates have been kept in the limbo after several rounds of interviews, officials and student placement coordinators at nearly half a dozen undergraduate institutes told ET.

For thousands of final-year students across engineering, management, and other professional courses, a supposed exciting transition from campus to corporate life has transformed into a period of deep uncertainty.

Colleges such as St Xavier's College Mumbai, Jai Hind College, Fr Agnel, and St Francis Institute of Technology, among others, have seen placement percentages drop from last year.

At St Xavier's, among the country's leading UG colleges, placement numbers were lower this year compared to previous years though twice as many companies visited for campus interviews.

"About 89 companies came to campus this year versus 40-42 last year with many mid-sized firms and startups coming for the first time. However, the hiring numbers of big recruiters were 50-70% of last year," said Radhika Tendulkar, placement in-charge at St Xavier's College.

Top recruiters in the college included Accenture, DE Shaw, IDFC, Hindustan Unilever, EY, Bain, ICICI, HSBC, and Deloitte.

Companies, on their part, cite a mix of recessionary trends, AI-driven disruptions, and a perceived lack of preparedness among students. Many recruiters say they now prefer candidates with at least 2-3 years of experience, seeing fresh graduates as risky hires who might quickly leave for further studies.

Fr Agnel's CR College of Engineering in Bandra acknowledged the shift. In an official email, they said, "This year's placement trend has been more challenging. Profiles have shifted from wide-spectrum roles to narrow-spectrum ones. We are introducing laboratory-focused curricula, activity-based learning, and appointing professors of practice to bring industry expertise into classrooms."

ROBUST CONSUMPTION PATTERN VISIBLE

May GST Mopup Shows FY26 Off to a Flying Start

Collections surpass ₹2 lakh crore for second time in a row

Our Bureau

New Delhi: Goods and services tax collections surged 16.4% in May to ₹2.01 lakh crore from a year earlier, signaling robust demand at the start of the fiscal year after a strong close to FY25, data released on Sunday showed.

Separately, high-frequency monthly data also showed strong economic momentum in May. Unified Payments Interface transactions rose 33% year-on-year in the month to 17.8 billion transactions. Mahindra & Mahindra, the country's second-largest automaker, reported 21% higher sales in May, though overall industry sales are likely to be flat on the high base of last year.

India's economy grew at a better-than-expected 7.4% in the March quarter from a year ago, as per data released May 30. Previously released numbers showed HSBC Flash India Composite Output Index for May at 61.2 against 59.7 in April, indicating expansion in private sector activity.

Revenues from Imports Up 25% ▸▸ 12

Revenues from Imports Up 25%

▸▸ From Page 1

"The (GST collection) figures reported for May 2025, which relate to transactions in the first month of FY26, at ₹2.01 lakh crore would provide significant fiscal headroom for the government," said MS Mani, partner, indirect taxes, Deloitte India. "These figures are also in line with the recent GDP growth estimates, which indicate a robust consumption pattern across months."

This is the second time in a row GST has exceeded ₹2 lakh crore. The average monthly gross GST collection in FY25 was ₹1.84 lakh crore.

To be sure, the May figure is down from the high of ₹2.38 lakh crore in April, but analysts said collections in that month are traditionally higher.

"While last month's spike was expected with year-end reconciliations, the consistency this month along with a 16% plus year-on-year growth points to strong underlying momentum and a recovery that is clearly taking hold," said Abhishek Jain, indirect tax head and partner, KPMG.

GST revenues from imports are 25% higher despite tariff headwinds, indicating strength in the economy.

Gross domestic GST collections stood at ₹1.49 lakh crore, up 13.7%. After accounting for refunds, net GST revenue for May was ₹1.73 lakh crore, 20% up from last year.

However, export refunds were down 36.25%.

"This suggests that April's increased exports were primarily on account of companies building their stocks" owing to the tariff threat, said Saurabh Agarwal, tax partner, EY.

Among the large states, Maharashtra, West Bengal, Karnataka and Tamil Nadu reported a 17-25% rise while Gujarat and Telangana clocked a 4-6% increase.

Among the large states, Maharashtra, West Bengal, Karnataka and Tamil Nadu reported a 17-25% rise

"The wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state," Mani said.

Experts also said consistent robust GST collections make a case for rate rationalisation.

"If the growth continues in this range for next couple of months, it might provide the cushion for the government to look at rate rationalisation on which a lot of work has already been done," said Pratik Jain, partner, PwC.

In May, gross central GST revenue stood at ₹35,434 crore, state GST revenue at ₹43,902 crore and integrated GST at ₹1.09 lakh crore. Revenue from cess was ₹12,879 crore.

Hyderabad

Indian Students Move Beyond 'Big 4' Nations for Abroad Dreams

BIGGER STUDY MAP New visa curbs, job woes push students to explore new destinations

Prachi Verma & Neil Ghai

New Delhi: The study abroad map for Indian students is rapidly changing, triggered by new visa rules, reduced post-study job opportunities, stringent protectionist measures, a real estate crisis in Canada and now the tussle between Harvard and the Trump administration.

Many students are preferring Germany, France, Ireland, the Netherlands, Japan, Dubai and South Korea over the 'Big 4' study destinations of the US, UK, Canada and Australia, according to half a dozen consultants ET spoke with. If the top four countries were attracting as much as 85% of the outbound Indian students until two years ago, now every second student is looking for options elsewhere, they said.

Students and parents are increasingly considering the political and policy environments while choosing the study-abroad locations, consultants said. While tuition and living costs have always been key factors in decision-making, the risk of getting deported is a big concern now for many. Nevertheless, the appeal of studying abroad has not diminished.

"Even though the Big 4s dominate, Indian students are realigning their plans by exploring alternatives that offer affordable tuition fees, clear post-study pathways and geopolitical stability," said MSM Group founder Sanjay Laul.

Indian student intakes in Canada decreased by 41% in 2024, while the numbers fell 28% in the UK and 13% in the US compared with 2023.

Meanwhile, enrollments of Indian students in Germany increased to 34,702 in 2024 from 20,684 in 2022; in France, the number rose to 8,536 last year from 6,406 two years earlier, said Laul.

In the past three years, Germany's bbw Hochschule - University of Applied Sciences has seen a 18-20% year-on-year increase in applications from India, primarily for the master's programmes, said Anup Sam Ninan, programme director, International Technology Transfer Management, at the university. These applications are not just from big cities in India, but also from tier-2 and tier-3 cities, he added.

Immigration policies are a major factor when students consider their study-abroad destinations, said Nikhil Jain, founder, ForeignAdmits. "More than 70% were going to the Big 4 and now it's reduced to less than 50%, with Canada and Australia almost being whitewashed," said Jain.

"The US and Canadian numbers have declined over the last 12-18 months. Students are actively looking at emerging destinations like Dubai which are offering similar programmes at similar price points with clearer post study pathways," Leverage Edu founder Akshay Chaturvedi said.

While the traditionally popular destinations may have lost some of the sheen, Saurabh Arora, founder of University Living, said the global student map isn't shrinking. "It's expanding, and India is right at the centre of that story," he said.

Safer Options

STUDENTS' INTAKE FALL IN 2024

CANADA	UK	US
41%	28%	13%

Germany, France, Ireland, the Netherlands, Japan, Dubai and South Korea becomes preference

Germany's Indian student intake rose from **20,684** to **34,702**

France saw increase of Indian students from **6,406** to **8,536**

Pent-up, skills demand pushes hiring: Report

Prachi Verma

New Delhi: The Class of 2025 has higher salary offers across top campuses after a flat 2024, signalling a pickup in hiring activity, according to the Deloitte Campus Workforce Trends: Placement Cycle 2025 report, which analysed placements across 508 institutions.

Median salaries for MBAs and BTechs are expected to rise 8.3% and 4.3% year-on-year, respectively, after declining 9% and 0.1% in 2024.

At the top 10 MBA colleges (according to NIRF rankings), the median package is set to touch ₹26 lakh per annum in 2025, up from ₹24 lakh last year. For the top 10 BTech colleges, it's ₹17 lakh, up from ₹16.3 lakh in 2024.

The report attributes the uptick to pent-up demand after last year's muted hiring, sharper skill-based recruitment, and attrition backfill.

Rise in Variable Pay ▸▸ 12

Rise in Variable Pay

▸▸ From Page 1

Campuses confirmed the trend. "Average salary has risen, and this growth is largely driven by expanding opportunities in high-growth sectors such as private equity, renewable energy and healthcare," Himanshu Rai, director of Indian Institute of Management (IIM) Indore, told **ET**.

He highlighted a significant rise in the variable pay component, particularly in consulting and finance roles, which reflects performance-linked structures and sector-specific demand.

IIM Ahmedabad, the country's leading management institute, is in the process of consolidating data from the previous placement cycle audited, its placement committee chairperson Viswanath Pingali said. "Informal data analysis suggests there is a small increment in the salaries. It is the general trend," he said.

National Institute of Technology (NIT) Jalandhar saw significant improvement both in the number of students placed and salary packages, its director Binod Kumar Kanaujia said. Total placements rose 15% to 1,005 in 2025, from 873 in 2024, "while the most significant hike was seen in the ₹40-50+ lakh per annum range, which jumped from 13 students in 2024, to 24 in 2025," he said.

This is the 5th edition of Deloitte Campus Workforce Trends, which also surveyed 238 organisations across industries. "Engineering degrees are leading YoY compensation growth (4.65%), outpacing the management degrees (2.19%)," said Neelesh Gupta, partner at Deloitte India. BTech students continue to draw the highest pay packages, followed by Bachelor of Law and BBA students.

"The technology sector is the most preferred industry by students for the fifth year in a row," Gupta said.

Highest compensation growth vis-à-vis last year was in manufacturing, followed by the consumer sector, while life sciences/pharmaceuticals trailed.

The variable pay component, referred to as 'pay at risk', has become a default feature at the campus hiring level. "97% of organisations have implemented short-term incentive programmes or bonus or performance-linked incentives," the Deloitte study said.

In addition, there has been a 24% increase in pre-placement offer conversions across all degrees in FY25 vis-à-vis FY24.

For MBAs, the top two roles are management consultant and product manager; for BTechs, they are development engineer and data scientist, and for CAs, audit manager/internal audit and management accountant, among others.

REGULATORY CHANGES MAY BE DISCUSSED

PMO to Meet Today for Creating India's Big Four

Banikinkar Pattanayak

New Delhi: The Prime Minister's Office (PMO) is scheduled to hold a crucial meeting on Friday to deliberate on ways to create large home-grown accountancy firms akin to the so-called 'Big Four', people aware of the details told **ET**.

The meeting—to be chaired by Shaktikanta Das, principal secretary to Prime Minister Narendra Modi—will likely discuss plans to weigh necessary regulatory changes and other interventions to make it easier for domestic accounting firms to scale up, one of the people said. It will be attended by senior officials with the Prime Minister's Office and the corporate affairs ministry, among others.

At present, the Big Four—EY, Deloitte, KPMG, PwC—along with Grant Thornton and BDO dominate the Indian audit ecosystem, with their affiliates having handled assignments of 326 of the 486 Nifty-500 companies as of March 2025, according to a primeinfobase.com report.

The combined revenue of the Indian affiliates of the Big Four, by some industry estimates, may have exceeded as much as Rs 45,000 crore last fiscal.

The meeting comes at a time when the Modi government is making a renewed push to create large home-grown accounting firms.

Panel may be set up for creating local 'Big Fours

5 • PG | 106 • Sqcm | 286415 • AVE | 1.1M • Cir | Middle Left

Mumbai • Kochi • Bengaluru • Delhi • Jaipur • Chandigarh

FRAMEWORK FOR 'ENABLING ECOSYSTEM'

Panel May Be Set Up For Creating Local 'Big Fours'

New Delhi: The government may set up a panel under corporate affairs secretary Deepti Gaur Mukerjee to prepare a framework to build an "enabling ecosystem" to create large home-grown chartered accountancy (CA) firms comparable to the 'Big Four,' people familiar with the development said. The plan follows a meeting by the Prime Minister's Office (PMO) on Friday to deliberate on creating a system where CA firms would be encouraged to pursue expansion and growth, they said.

The meeting was chaired by Shaktikanta Das, principal secretary-2 to Prime Minister Narendra Modi, and attended by senior officials from the PMO and the corporate affairs ministry, among others.

Currently, the Big 4—EY, Deloitte, KPMG, PwC—along with Grant Thornton and BDO dominate the Indian audit ecosystem

The planned panel will likely suggest changes required to the extant policy and regulatory frameworks to enable small firms to scale up through both local and global tie-ups, the people said. It could also review impediments currently discouraging firms to grow in size.

Currently, the Big Four—EY, Deloitte, KPMG, PwC—along with Grant Thornton and BDO dominate the Indian audit ecosystem.

"With policy support, regulatory momentum, and entrepreneurial drive, it is realistic that India could produce its own Big 4 in this decade itself," said Rakesh Nangia, founder & managing partner at Nangia & Co LLP.

"Indian firms must invest in quality, governance, and global presence, while regulators must enable visibility and innovation," added Dinesh Kanabar, chief executive at Dhruva Advisors. – **Banikinkar Pattanayak**

Mumbai

Auto Sector Seeks Govt Help on China Rare Earth Magnet Imports

ISTOCK

PTI

New Delhi: The automobile industry has sought government support in expediting approvals from the Chinese government for importing rare earth magnets used in various applications, including passenger cars.

As per the industry sources, various domestic suppliers have already sought approval from the Chinese government through their local vendors in China.

However, no approvals have been granted so far, sources said. China controls over 90% of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy.

The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets.

In Japan, Suzuki Motor has already suspended production of its Swift car because of China's curbs. Last week, Maruti Suzuki India senior executive officer (corporate affairs) Rahul Bharti said China has asked for an end-user certificate, endorsed by the Indian government and approved by the Chinese government. "So that process is on and industry is in discussion with the government," he stated.

Deloitte India partner and automotive sector leader Rajat Mahajan noted that the shortage is a major supply chain disruption especially for EVs as rare earth metals are used extensively in the electric motor which is a core component.

Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures. "This has been an R&D topic for the industry for a long time but till now other magnetic materials have not seen large scale commercial usage in applications like EV," he noted.

Wellness Breaks Now a Vital Part of Boardroom Strategy

High-flying corporate execs turn to Ayurveda and retreats for rest and renewal

Anumeha Chaturvedi

New Delhi: Things started to give away for a 48-year-old senior consultant at a Big Four firm who had been pushing through the grind for years, dealing with chronic back pain, gut trouble, and stubborn weight issues. "Between the constant travel, client pressure, internal firefighting, and late nights, I could feel my body wearing out," he said.

"I finally took a step back and spent a week at a wellness retreat in Kerala—no screens, no junk, no noise. Just rest, clean food, and some space to think." What really pushed him to go? "I kept seeing friends—people in high-pressure roles—suddenly facing major health scares. That fear stayed with me. I didn't want to wait till it was too late," he added.

From the global chief technology officer of a retail giant to an aviation CEO, more and more CEOs and CXOs are opting for wellness breaks, vipassana sessions and retreats that lead to improving their mental and physical wellbeing.

Kairali Ayurvedic Group has seen an estimated 25-30% increase in visits from CXOs, business founders, and senior professionals to its wellness village in Kerala over the past 18-24 months, said executive director Abhilash K Ramesh. "Today's high-performing professionals often navigate relentless schedules, chronic stress, and lifestyle-related imbalances. Many are turning to Ayurveda not just for recovery, but to sustain performance, build resilience, and prevent long-term health issues," he added.

Mridula Jose, vice president, for product development and marketing at CGH Earth Wellness, said CEOs and CXOs average 8-9 individuals in a month at each clinic. Medical and wellness programmes offered at CGH Earth Ayurveda start at 14 days with most people on a 21-day programme. At Prakriti Shakti, clinic of Natural Medicine by CGH Earth in Kerala, wellness programmes start at 7 days and medical programmes start at 10 days. Most executives are on a 14-day programme.

Leaders are also turning to Vipassana. Nikhil Sharma, MD and COO of South Asia at Radisson Hotel Group said he began practicing Vipassana a few years ago for greater clarity and balance. "In an industry like ours where agility and empathy must go hand in hand, Vipassana has reinforced the importance of being fully present, making decisions with calm objectivity, and connecting with people more authentically. It's not about stepping away from the business, but about showing up with heightened awareness," he added.

Ananda in the Himalayas has seen a 'marked increase' in bookings from corporate leaders over the past year, including established and emerging entrepreneurs and professionals from high-intensity sectors like finance, consulting, tech and law, said a spokesperson.

In January, Niraamaya Retreats, Surya Samudra, Kovalam, in Kerala launched a seven nights sleep retreat programme that integrates Ayurvedic therapies, an Ayurvedic diet, yoga, and personalised consultations to improve sleep quality and mental calm, said Unnikrishnan Mohanadas, yoga and wellness guide at the property that has seen a 10-12% uptick in corporate leaders opting for wellness breaks.

OTT Platforms Script New Strategies to Cut Costs

Industry is embracing financial discipline through content production benchmarking, say execs

VARANI S&HU

Javed Farooqui

Mumbai: India's OTT industry is entering a phase of financial discipline, with leading platforms such as Netflix, Prime Video, JioHotstar and ZEE5 undertaking content production benchmarking exercises to manage costs and bring in fiscal prudence, industry executives said.

Platforms have engaged consultant majors like EY, PWC and Deloitte to create content cost benchmarks – to help them allocate resources for various projects more effectively with a clear reference point to assess production costs in comparison with shows of similar scale on other platforms.

"The move reflects a shift towards profitability and operational efficiency, as platforms look to streamline workflows, reduce wastage, and align with global best practices," said a media executive aware of the development.

The cost optimisation push comes amid a spike in production expenses of OTT content and increased focus on profitability in a competitive market where subscribers are sensitive about charges and the number of advertisements.

"The rising costs of OTT episodic content — which is created in shorter seasons compared to longer-running television shows — combined with a focus on profitability by OTT platforms as they mature out from the growth phase, has led to increased cost-consciousness," said Ashish Pherwani, media and entertainment leader at EY India.

According to a Media Partners Asia report, the streaming industry in India spent over $2 billion on originals between 2018 and 2024. It is projected to spend another $2.2 billion between 2025 and 2028.

Previously driven by aggressive growth targets, the industry is now focusing on structured spending to ensure sustainable growth without compromising on storytelling quality, executives said.

The CEO of a leading media company said the industry has been conducting production audits for years to ensure that content budgets are spent judiciously and wastage is minimised.

Once driven by rapid growth targets, players are now focusing on structured spending without sacrificing storytelling quality, say executives

"Production benchmarking, on the other hand, has been prompted by the realisation that companies need to reduce losses and move towards profitability by optimising content spending, which remains the largest cost component for streamers," he said requesting anonymity.

Amit Goenka, president – digital businesses and platforms at Zee Entertainment, said the company has always been judicious with its content investments.

"When international players entered the market, they approached large production houses that quoted fixed prices and began creating content. Now, these players are looking to optimise costs," he said. "They're asking critical questions: how much is going to talent, how much to line production, and how much to VFX... They're asking for detailed breakups."

Goenka said the presence of big stars in OTT shows should be justified by their value to the script. "If the story holds its own, why would I pay crores to an actor just for being there?" he said.

A media analyst noted that India's OTT industry, still at a relatively nascent stage, is maturing, and these exercises reflect a concerted effort to bring order to rising production costs. "India doesn't yet have a gold standard for what it costs to produce a streaming show," the analyst said. "With boards of entertainment companies asking tougher questions, it has become essential for the industry to develop such a framework."

OTT Platforms Script New Strategies to Reduce Costs

Industry embracing financial discipline through content production benchmarking: Execs

Javed Farooqui

Mumbai: India's OTT industry is entering a phase of financial discipline, with leading platforms such as Netflix, Prime Video, JioHotstar and ZEE5 undertaking content production benchmarking exercises to manage costs and bring in fiscal prudence, industry executives said.

Platforms have engaged consultant majors like EY, PWC and Deloitte to create content cost benchmarks – to help them allocate resources for various projects more effectively with a clear reference point to assess production costs in comparison with shows of similar scale on other platforms. "The move reflects a shift towards profitability and operational efficiency, as platforms look to streamline workflow, reduce wastage, and align with global best practices," said a media executive aware of the development.

The cost optimisation push comes amid a spike in production expenses of OTT content and increased focus on profitability in a competitive market where subscribers are sensitive about charges and the number of advertisements. "The rising costs of OTT episodic content — which is created in shorter seasons compared to longer-running television shows — combined with a focus on profitability by OTT platforms as they mature out from the growth phase, has led to increased cost-consciousness," said Ashish Pherwani, media and entertainment leader at EY India. According to a Media Partners Asia report, the streaming industry in India spent over $2 billion on originals between 2018 and 2024. It is projected to spend another $2.2 billion between 2025 and 2028. Previously driven by aggressive growth targets, the industry is focusing on structured spending to ensure sustainable growth without compromising on storytelling quality, executives said.

OTT Platforms Script New Strategies to Cut Costs

Industry is embracing discipline through content production benchmarking

VARANI SAHU

Javed Farooqui

Mumbai: India's OTT industry is entering a phase of financial discipline, with leading platforms such as Netflix, Prime Video, JioHotstar and ZEE5 undertaking content production benchmarking exercises to manage costs and bring in fiscal prudence, industry executives said.

Platforms have engaged consultant majors like EY, PWC and Deloitte to create content cost benchmarks – to help them allocate resources for various projects more effectively with a clear reference point to assess production costs in comparison with shows of similar scale on other platforms.

"The move reflects a shift towards profitability and operational efficiency, as platforms look to streamline workflows, reduce wastage, and align with global best practices," said a media executive aware of the development.

The cost optimisation push comes amid a spike in production expenses of OTT content and increased focus on profitability in a competitive market where subscribers are sensitive about charges and the number of advertisements.

"The rising costs of OTT episodic content — which is created in shorter seasons compared to longer-running television shows — combined with a focus on profitability by OTT platforms as they mature out from the growth phase, has led to increased cost-consciousness," said Ashish Pherwani, media and entertainment leader at EY India.

According to a Media Partners Asia report, the streaming industry in India spent over $2 billion on originals between 2018 and 2024. It is projected to spend another $2.2 billion between 2025 and 2028.

Previously driven by aggressive growth targets, the industry is now focusing on structured spending to ensure sustainable growth without compromising on storytelling quality, executives said.

The CEO of a leading media company said the industry has been conducting production audits for years to ensure that content budgets are spent judiciously and wastage is minimised.

"Production benchmarking, on the other hand, has been prompted by the realisation that companies need to reduce losses and move towards profitability by optimising content spending, which remains the largest cost component for streamers," he said requesting anonymity.

Amit Goenka, president – digital businesses and platforms at Zee Entertainment, said the company has always been judicious with its content investments.

"When international players entered the market, they approached large production houses that quoted fixed prices and began creating content. Now, these players are looking to optimise costs," he said. "They're asking critical questions: how much is going to talent, how much to line production, and how much to VFX... They're asking for detailed breakups."

Gen Z, Women Employees Lead a Healthy Change at India Inc

Cos go beyond traditional programmes as they work out strategies to get employees fit

Prachi Verma & Brinda Sarkar

New Delhi | Bengaluru: India Inc is increasingly investing in measures that make its workforce fitter and healthier, responding to evolving workforce expectations, especially Gen Z and women employees.

REWARDING EFFORT: Employees get rewards for meeting fitness goals

WIDER NET: Some firms also involve family members, friends, etc in fitness challenges, etc

Some like Deloitte are taking it a notch higher by tracking employee fitness as part of the performance management system. Others, like natural resources and technology conglomerate Vedanta, are introducing digital fitness tracking on a voluntary basis for employees. Accenture has launched "Purple Corridors' programme for in-depth conversations to identify employee well-being needs. Myntra recently launched a meditation space called 'Dhyan Kaksha.' Titan on the other hand, is conducting fitness challenges for employees, like the 21-Day Kummiaatam Dance Challenge at its manufacturing unit, especially for women.

"In the last few years, we have seen a clear shift in employees' attitudes towards health and well-being especially among younger employees and women professionals," said Vedanta CHRO Madhu Srivastava. Over the years, participation in marathons, yoga sessions, and sports tournaments has increased significantly at Vedanta.

The conglomerate is also conducting tailored wellness campaigns based on site-specific needs, Srivastava said.

Professional services firm Deloitte has made completion of annual health assessment a key performance indicator for all employees.

Inculcating Healthy Habits ▸▸ 7

Inculcating Healthy Habits

▸▸ From Page 1

Deloitte runs the FitCheck initiative, which mandates annual health assessments for all employees and their spouses or partners. "We share timely prompts and nudges via emails, leadership messages, and inspiring stories," said its chief happiness officer, Saraswathi Kasturirangan. This is tracked on the performance management dashboard for year-end reviews.

Accenture is running an initiative called 'Prana Pod' led by certified yoga instructors for sessions on mindful movement and breathing. It is also conducting expert-led workshops on fitness activities like Yoga, Tai Chi, and Zumba.

Recently, Accenture launched a "Purple Corridors' programme which involves in-depth conversations to identify employee well-being needs. "The team sets collective goals and implements micro-actions like prioritising annual health check-ups, promoting ergonomic posture, and organising fitness challenges," said its senior managing director and CHRO, Lakshmi C.

Software company Intuit has a well-being hub that offers personalised wellness journeys. It also has an activity programme where employees get rewarded for their healthy habits. "This is also available to spouses or domestic partners, and we are encouraged to challenge friends and coworkers," said its director - talent acquisition, Mohan Kumar.

Intuit also offers a 'Well-being for Life Programme' where one can reimburse up to ₹60,000 per year for physical, emotional, and financial well-being expenses.

Myntra offers wellness activities, including Yoga, Zumba, guided meditation, and mental wellness workshops to employees. It recently inaugurated pickleball courts at its office and inaugurated 'Dhyan Kaksha', a meditation space. The ecommerce platform also arranged regular health check-ups, like quarterly ECG screenings, and awareness initiatives, such as World Heart Day sessions with expert cardiologists, said its CHRO, Govindraj MK.

Tata Group's Titan Company conducts comprehensive health data analysis at its manufacturing facility. Each Titan employee has a Health Score based on 18 critical parameters. "This allows us to track and monitor health trends over time," said its head—human resources, Priya Mathilakath Pillai.

Titan also conducts fitness challenges for employees, like the 21-Day Kummiaatam Dance Challenge (Manufacturing Unit) where women participants underwent a health assessment following which they practiced for two hours each day after work hours.

"An incredible 64% of participants reported significant health benefits by the end of the challenge," according to Pillai.

WTW Wellbeing Diagnostic Survey India findings of 2024 point out that 76% companies plan to connect wellbeing to their human capital strategy. According to Vinod VK, head of health and benefits India, WTW, there is a growing trend of strategic initiatives implemented by Indian employers.

Mumbai • Delhi • Jaipur • Chandigarh

...Yet Auto Industry Set to Roll Out Double-digit Hikes

Cos likely to offer increments of over 10% for FY25 against India Inc's avg of around 8%

Prachi Verma

New Delhi: The automotive industry continues its lead over other sectors in terms of pay hikes, offering double-digit increments, outperforming average single-digit raises for most of India Inc.

Automotive companies will likely issue a 10.1% salary hike for FY25 compared to an average more than 8% for other Indian corporates, according to Deloitte's 'Performance and Rewards Trends Study' for automotive producers, shared exclusively with **ET**.

Some companies have completed the appraisal process for FY25 in March this year while others are in the process of doing so as their financial year ends in June or even later.

Double-digit salary increases are mostly driven by a high in-demand talent pool across job functions like electric vehicles, R&D, product, digitalisation, automation, AI, and ML, said HR heads at Sonalika Group, Hyundai Motor India (HMIL), and Skoda Auto Volkswagen India.

Top performers are likely to get double-digit or higher pay hikes this year, they said.

For the fifth straight year, auto firms will see a double-digit salary increment though the percentage increase will decline for the third year in a row, said Neelesh Gupta, partner at Deloitte India.

Last year, the automotive sector issued a 10.5% pay hike. "Despite the drop, automotive producers continue to outpace the India Inc salary increment number which averages at 8.8% for FY25," said Gupta.

Salary increase expectations for this year is expected to be in the range of 9.5-10.0%, in line with overall auto industry expectations, said Amit Sharma, corporate HR head at Sonalika Group.

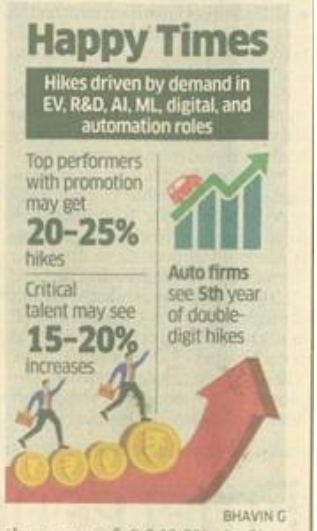

"Key performers and high-impact hires are likely to earn far higher increments, as high as 20-25%, while some specialised positions may receive more substantial salary increases (15-18%) than the average," he said.

Top performers will get significantly higher raises though average salary hikes at VW Group are likely to be in single digits, said Sarma Chillara, chief human resources officer.

VW has identified key areas of emerging expertise such as EV technology, digitalisation, automation, embedded systems, AI, and ML.

HMIL is following a role-based compensation model aligned to 'Pay for Performance and Potential'.

Deloitte noted that the double-digit increments are due to premium pay for talent in EV, R&D, technology, product, and strategic sourcing, besides continuing attrition for key talent at 1.5x of the normal attrition rate.

FPIs ask sebi for more flexibility, closing auction

12 • PG | 299 • Sqcm | 806382 • AVE | 1.1M • Cir | Top Center

Mumbai • Chandigarh • Delhi • Jaipur • Bengaluru • Kolkata • Kochi • Ahmedabad • Bhubaneshwar • Hyderabad

WISH LIST INCLUDES A LONGER LICENCE PERIOD

FPIs Ask Sebi for More Flexibility, Closing Auction

Sugata Ghosh

Mumbai: Several foreign portfolio investors (FPIs) have urged the Indian capital market regulator to increase the tenure of their licence from 3 to 5 years, introduce closing auction session (CAS) which exists in some of the leading markets, spare large private funds from granular disclosures, and review the threshold that triggers the rule to reveal the identities of the last natural persons behind the entities that invest in the funds.

DISCLOSURE REGIME

Every three years offshore funds have to pay a fee and share necessary details to renew their registration with the Securities & Exchange Board of India (Sebi) and trade on the Indian stock exchanges. Given the stricter disclosure regime and the requirement to quickly inform the regulator of all material changes, fund managers and administrators feel that the renewal period should be increased to at least 5 years.

The funds have also put across their views to bring in CAS, which is held after the regular trading hours, to arrive at more representative closing prices for actively traded securities and thus reduce the tracking error for passive funds whose portfolios mirror the indices.

Although not fool-proof, CAS is generally considered a more accurate mechanism than the volume-weighted average price (VWAP) for calculating the closing prices based on the last 30-minute trades. CAS exists in the US, Japan, Hong Kong, and some of the European markets. Last year, Sebi released a consultation paper on CAS.

In VWAP, an odd trade in the last 30 minutes can cause a mismatch between the performance of a fund (whose net asset value or NAV is calculated based on the trade price) and the market's performance based on the closing price (which may end up higher due to a large single trade). Compared with VWAP, the price at which the maximum number of shares of a scrip is traded during CAS is taken as the closing price. The latter, considered less volatile, is not influenced by some large freak trade shortly before the closing bell.

Under the Sebi disclosure norms, FPIs holding more than 50% of their Indian equity assets under management (AUM) in a single Indian corporate group, or funds that individually, or along with their investor group, hold more than ₹50,000 crore of equity AUM in the Indian markets, are required to disclose the last natural persons of all investors in the funds. However, FPIs such as sovereign wealth funds, public retail funds, and certain pooled investment vehicles among a few others are exempted from additional disclosures.

Some of the FPIs in the meeting had said that large private funds should also be freed from extra disclosures. According to Rajesh Gandhi, partner at Deloitte India, "An exemption from providing granular details could be considered for non-retail funds which have a wide investor base similar to the erstwhile broad-based fund concept."

Sharing the view, Richie Sancheti, founder of the law firm Richie Sancheti Associates, said, "If a fund is under credible regulatory supervision and has a wide investor pool, the risk of it being a front for one entity is low. Sebi's own SOP (standard operating procedure) acknowledges this by exempting certain regulated pooled vehicles. Extending this logic, a well-regulated, broadly held private fund could justifiably be given leeway, too. These funds share many characteristics with exempt public funds (wide investor base, regulated status of the fund manager)."

Every 3 years, offshore funds have to pay a fee and share necessary details to renew their registration with Sebi

OTHER REQUESTS

About the other ask from FPIs for a longer validity in renewal cycle, he said the core information that funds must provide at renewal (ownership structure, jurisdiction, etc.,) doesn't typically change drastically in three years—and if it does, regulations require prompt updating of material changes. The savings on regulatory bandwidth and ease-of-doing-business could also help reinforce the image as a well-regulated yet investor-friendly market, said Sancheti.

Fund advisors and intermediaries believe that while the regulator would probably be reluctant in relaxing the 50% threshold criteria for extra disclosures, allowing a longer renewal cycle could be more feasible. According to Prakhar Dua, principal (funds, asset management and regulatory practice) at IC Universal Legal, "While Sebi's objective to prevent violation of the minimum public shareholding is well appreciated, it should provide some flexibility on the concentration criterion. For instance, offshore funds that are not directly registered with their domestic regulators but are deemed to be regulated through their registered advisors/managers, should be allowed exemption from additional disclosure norms."

Compared with VWAP, the price at which the maximum number of shares of a scrip is traded during CAS is taken as the closing price. The latter, considered less volatile, is not influenced by some large freak trade shortly before the closing bell.

Under the Sebi disclosure norms, FPIs holding more than 50% of their Indian equity assets under management (AUM) in a single Indian corporate group, or funds that individually, or along with their investor group, hold more than ₹50,000 crore of equity AUM in the Indian markets, are required to disclose the last natural persons of all investors in the funds. However, FPIs such as sovereign wealth funds, public retail funds, and certain pooled investment vehicles among a few others are exempted from additional disclosures.

Some of the FPIs in the meeting had said that large private funds should also be freed from extra disclosures. According to Rajesh Gandhi, partner at Deloitte India, "An exemption from providing granular details could be considered for non-retail funds which have a wide investor base similar to the erstwhile broad-based fund concept."

Sharing the view, Richie Sancheti, founder of the law firm Richie Sancheti Associates, said, "If a fund is under credible regulatory supervision and has a wide investor pool, the risk of it being a front for one entity is low. Sebi's own SOP (standard operating procedure) acknowledges this by exempting certain regulated pooled vehicles. Extending this logic, a well-regulated, broadly held private fund could justifiably be given leeway, too. These funds share many characteristics with exempt public funds (wide investor base, regulated status of the fund manager)."

Every 3 years, offshore funds have to pay a fee and share necessary details to renew their registration with Sebi

OTHER REQUESTS

About the other ask from FPIs for a longer validity in renewal cycle, he said the core information that funds must provide at renewal (ownership structure, jurisdiction, etc.,) doesn't typically change drastically in three years—and if it does, regulations require prompt updating of material changes. The savings on regulatory bandwidth and ease-of-doing-business could also help reinforce the image as a well-regulated yet investor-friendly market, said Sancheti.

Fund advisors and intermediaries believe that while the regulator would probably be reluctant in relaxing the 50% threshold criteria for extra disclosures, allowing a longer renewal cycle could be more feasible. According to Prakhar Dua, principal (funds, asset management and regulatory practice) at IC Universal Legal, "While Sebi's objective to prevent violation of the minimum public shareholding is well appreciated, it should provide some flexibility on the concentration criterion. For instance, offshore funds that are not directly registered with their domestic regulators but are deemed to be regulated through their registered advisors/managers, should be allowed exemption from additional disclosure norms."

Auto Cos to roll Out Double -digit Salary Increments

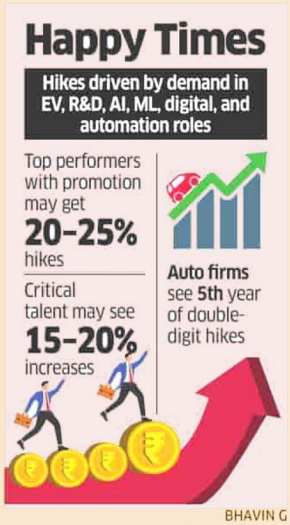

11 • PG | 1612 • Sqcm | 128958 • AVE | 22.84K • Cir | Top Right

Kochi

Auto Cos to Roll Out Double-digit Salary Increments

Industry could give pay hikes of over 10% for FY25 against India Inc's avg of around 8%

Prachi Verma

BHAVIN G

New Delhi: The automotive industry continues its lead over other sectors in terms of pay hikes, offering double-digit increments, outperforming average single-digit raises for most of India Inc.

Automotive companies will likely issue a 10.1% salary hike for FY25 compared to an average more than 8% for other Indian corporates, according to Deloitte's 'Performance and Rewards Trends Study' for automotive producers, shared exclusively with **ET**.

Some companies have completed the appraisal process for FY25 in March this year while others are in the process of doing so as their financial year ends in June or even later.

Double-digit salary increases are mostly driven by a high in-demand talent pool across job functions like electric vehicles, R&D, product, digitalisation, automation, AI, and ML, said HR heads at Sonalika Group, Hyundai Motor India (HMIL), and Skoda Auto Volkswagen India.

Top performers are likely to get double-digit or higher pay hikes this year, they said.

For the fifth straight year, auto firms will see a double-digit salary increment though the percentage increase will decline for the third year in a row, said Neelesh Gupta, partner at Deloitte India.

Last year, the automotive sector issued a 10.5% pay hike. "Despite the drop, automotive producers continue to outpace the India Inc salary increment number which averages at 8.8% for FY25," said Gupta.

Salary increase expectations for this year is expected to be in the range of 9.5-10.0%, in line with overall auto industry expectations, said Amit Sharma, corporate HR head at Sonalika Group.

"Key performers and high-impact hires are likely to earn far higher increments, as high as 20-25%, while some specialised positions may receive more substantial salary increases (15-18%) than the average," he said.

Top performers will get significantly higher raises though average salary hikes at VW Group are likely to be in single digits, said Sarma Chillara, chief human resources officer.

VW has identified key areas of emerging expertise such as EV technology, digitalisation, automation, embedded systems, AI, and ML.

HMIL is following a role-based compensation model aligned to 'Pay for Performance and Potential'.

Deloitte noted that the double-digit increments are due to premium pay for talent in EV, R&D, technology, product, and strategic sourcing, besides continuing attrition for key talent at 1.5x of the normal attrition rate.

Pune

ICAI Panel may Wrap Up Review of IndusInd, Gensol Books in 6 Months

New Delhi: A key panel of the Institute of Chartered Accountants of India (ICAI) could wrap up its review of the books of crisis-ridden Gensol Engineering and IndusInd Bank in about six months, the institute's president Charanjot Singh Nanda said on Wednesday.

While Gensol is facing allegations of fraud, the crisis at IndusInd Bank pertains to discrepancies in its forex derivative portfolio.

Usually, if the ICAI's Financial Reporting Review Board (FRRB) concludes that the financial statements of the entities that are being reviewed are "not true and fair", it refers the matters to the institute's disciplinary committee for subsequent action against the auditors concerned.

Nanda was announcing the Global Capability Centres summit series being hosted by the institute on June 27-28 in NCR.

This summit will be organised in Ahmedabad, Mumbai and Hyderabad between August 2025 and February 2026. Nanda said ICAI, along with capital markets regulator Sebi and the National Stock Exchange, is working towards devising a framework to detect potential fraud or lapses in listed companies early.

As for the government move to facilitate the creation of large homegrown accounting and advisory firms comparable to the 'Big Four', Nanda said this could be realised through tie-ups of Indian firms with the global companies and through merger of some domestic firms.

He said as the country moves forward to create these larger entities, some regulatory support would be required.

Currently, the Big Four—EY, Deloitte, KPMG, PwC—along with Grant Thornton and BDO dominate the Indian audit ecosystem.

"We have the talent pool and we are fully equipped to achieve this," he added. Earlier this month, the Prime Minister's Office held a crucial meeting on facilitating the creation of the domestic 'Big Four'.

Nanda said the institute has set up a group to promote India as a global accounting and finance hub for global capability centres (GCCs).

India currently hosts over 1,800 GCCs that collectively employ more than 1.9 million professionals and contribute over $64 billion a year to the global economy.

"This is not merely a success story of scale; it is a story of value, trust, and leadership," he said. – **Our Bureau**

Big 4, Other Global Firms Decry ICAI's Overseas Network Norms

Big 4, Other Global Firms Decry ICAI's Overseas Network Norms

Cos concerned over disclosures in draft guidelines which they say will impinge on confidentiality

Vinod Mahanta

Mumbai: Top global professional services firms are pushing back against draft guidelines to regulate overseas networks engaged in multi-disciplinary advisory services in India, saying they require excessive disclosures that raise confidentiality concerns and add layers of operational complexity.

The Institute of Chartered Accountants of India's (ICAI) proposed guidelines also use highly ambiguous terminology that creates uncertainty in interpreting the rules, they said, setting the stage for a fresh standoff with the regulator.

ICAI had early this month released draft Guidelines for Overseas Network. The move was meant to create a level playing field, but has ended up throwing up concerns that could hamper working of global accounting firms in India.

Vishesh Chandiok, CEO of Grant Thornton Bharat, minced no words in saying that he had hoped that ICAI's attempt would be more balanced towards enablement. "Unfortunately, it continues to attempt to kill too many birds... I fear the one that will die is the Indian Big4 dream," he said.

Currently, there are more than 170 global networks operating in India, including the Big Four—EY, Deloitte, PwC and KPMG.

One of their key concerns is the draft's sweeping disclosure norms. For example, Form BO requires foreign networks to report all civil, criminal, and disciplinary cases against any partner or CA employee of Indian entities from the past five years. Firms say it adds no value and may force irrelevant disclosures beyond professional competence or network operations.

Global professional services firms are also alarmed by the draft's ambiguous disclosure norms, especially the requirement to report turnover on a "constituent-wise" basis, which could extend to all affiliated firms globally.

"What qualifies as a network? Is it just the Indian firm's arrangement with the global brand, or does it include every associated firm worldwide?" a senior partner at a Big Four firm said. "The term 'constituents' is vague... If taken literally, it could mean reporting for every firm linked to the brand, regardless of relevance to India."

The guidelines mention regulated, unregulated, and overseas entities but don't define boundaries, raising concerns about their scope. The guidelines come as the Prime Minister's Office (PMO) pushes for the creation of India's own 'Big Four', even as EY, Deloitte, PwC, and KPMG collectively crossed ₹45,000 crore in India revenue in FY25—with Rajiv Memani-led EY (June year-end) on the verge of becoming the first to reach $2 billion in gross revenues.

A senior CA noted that the recommendations try to extend ICAI's ethical and operational norms to a network's organisations or divisions that don't come under its ambit, particularly the lucrative and rapidly growing consulting services.

This indicates an effort by ICAI to pull these services into its fold, the person said. "This could disrupt the multidisciplinary firm model by forcing audit firms to build capabilities like IT and valuation independently, raising costs and diluting audit quality," he added.

Perhaps the most problematic aspect for foreign networks is the demand to disclose sensitive financial data of overseas entities. Form DO requires turnover details on a constituent-wise basis, including overseas entities, overlooking how global professional networks work and the confidentiality obligations they have to adhere to, experts said.

This could force firms into a regulatory bind, caught between Indian compliance and legal constraints in their home jurisdictions. The rules also demand three years of detailed financial records, showing all money exchanged between Indian and foreign offices.

"Such detailed financial reporting requirements are typically reserved for fully regulated entities, not network arrangements that may be primarily based on brand sharing or quality control coordination," a partner of a Big Four firm said on condition of anonymity. "These are independent legal entities. Why would a UK firm (which is part of the same network) disclose its revenue figures to the Indian arm?"

Nikhil Singhi, managing partner of Singhi & Co Chartered Accountants, said that ideally, the guidelines, code of ethics, and related regulations should prioritise core responsibilities such as audit quality, ethical compliance, and independence over procedural elements like cost disclosures, capital restrictions, constitution of firms and detailed reporting requirements.

SECTION 54F EXEMPTION

Observe timelines for selling new asset, acquiring another

SANJEEV SINHA

The Delhi High Court recently upheld Lata Goel's claim for a ₹90 crore exemption under Section 54F of the Income Tax Act for the assessment year 2011–12. The exemption was against capital gains from the sale of FITJEE Ltd shares, which she reinvested in purchasing a new residential house. The assessing officer (AO) opposed the claim, citing ownership of more than one residential property.

The AO relied on South Delhi Municipal Corporation records indicating Goel co-owned the basement and second floor of a property in Vasant Vihar, New Delhi, to argue that this disqualified her from being eligible for Section 54F. The court, however, disagreed.

"The Delhi High Court clarified that ownership of multiple floors in the same building constitutes a single residential house under Section 54F of the Income Tax Act, 1961, despite municipal records showing separate units," says Rajarshi Dasgupta, executive director — tax, AQUILAW.

Who can claim

Section 54F benefits are available only to individuals and Hindu Undivided Families (HUFs). "To be eligible, the person must have earned a long-term capital gain — that is, from the sale of a capital asset held for more than 12 or 24 months, depending on the asset type," says Neeraj Agarwala, partner, Nangia & Co.

Section 54F applies to long-term capital gains from the sale of assets other than residential property. "Such assets may include shares, units of mutual funds, land, etc.," says Poorva Prakash, partner, Deloitte India. Gold, unlisted shares and commercial property also qualify.

Reinvestment conditions

The taxpayer must invest the sale proceeds in one residential house in India through either purchase or construction within a specified timeline.

"Individual or HUFs must either purchase one residential house property (new asset) in India, within one year before or two years after the sale of any asset other than a residential house property (original asset) or construct one new asset within three years from the date of sale of the original asset to claim exemption under Section 54F," says Prakash.

The person must own only one property other than the new asset. "The purchase of multiple residential houses will also invalidate the exemption — even if done within the allowed timeline," says Agarwala.

The taxpayer should not purchase another residential house within two years from the date of transfer of original asset, or construct another house within three years.

"If the taxpayer sells the new house within two years from the date of transfer, or constructs another house within three years, the earlier exempt capital gains become taxable in the year of sale of the new house," says Agarwala.

Quantum of exemption

The full amount of capital gains is exempt if the entire net consideration is reinvested. "If only part of it is reinvested, exemption under Section 54F is granted proportionately. From April 1, 2024, the maximum exemption is capped at ₹10 crore," says Dasgupta.

Rupali Singhania, partner, Areete Consultants, says that if the cost of the new asset is equal to or exceeds the net consideration from the sale of the original asset, the entire gain is exempt. "If it is lower, then the exemption is proportionate," she adds.

Common errors

Taxpayers often fail to fulfil key eligibility conditions. "Many fail to reinvest the capital gains or deposit the amount in the Capital Gains Account Scheme (CGAS) before the income tax return (ITR) filing deadline," says Dasgupta. Singhania warns that taxpayers should not invest the proceeds in non-residential property or in commercial assets.

Things to know about CGAS scheme

- CGAS allows taxpayers to park capital gains amount temporarily if they are unable to reinvest it
- Applicable for claiming exemption under Section 54 or 54F
- Deposit must be made in a CGAS account with a designated public-sector bank before the ITR filing due date
- Failure to deposit by the deadline disqualifies the taxpayer from the exemption
- Use the deposited amount within two years for purchase, three years for construction
- File ITR on time with declaration of deposit, maintain documentary proof

Net GST revenue grows 20.4% to ₹1.7 trillion on import taxes

MONIKA YADAV
New Delhi, 1 June

Receipts of goods and services tax (GST) after adjusting for refund grew 20.4 per cent year-on-year (Y-o-Y) to ₹1.73 trillion in May on the back of a sharp increase of 72.9 per cent in Customs-related revenue and a decline of 4 per cent in refund outgo, according to the data released by the finance ministry.

Sequentially, there has been a nearly 17 per cent drop over April's net GST collection, which stood at ₹2.09 trillion.

Gross GST collection in May rose 16.4 per cent to ₹2.01 trillion, with the yield from domestic sources rising 13.7 per cent and import-related revenue going up a sharper 25.2 per cent. Gross GST collection had reached an all-time high of ₹2.4 trillion in April, registering a growth rate of 12.6 per cent.

Abhishek Jain, head, indirect tax, and partner, KPMG, said it was encouraging to see gross GST collection again crossing ₹2 trillion in May. "While April's spike was expected with year-end reconciliations, consistency this month, along with 16 plus per cent Y-o-Y growth, points to strong underlying momentum and a recovery that's clearly taking hold," he added.

Eway bills continue momentum

The generation of eway bills in April had increased to the second-highest level of 119 million, which is reflected in the May GST data, with a year-on-year growth rate of more than 20 per cent for the second consecutive month.

"This (eway bill) robust momentum in goods movement signals sound business activities and is also indicative of stronger GST collection in May," the Monthly Economic Review, released by the finance ministry last week, had said.

M S Mani, partner, Deloitte India, said compared to the FY25 average gross GST collection of ₹1.84 trillion, the ₹2.01 trillion for May, which relates to transactions in the first month of FY26, would provide fiscal headroom for the government. "These figures are also in line with the recent GDP (gross domestic product) growth estimates, which indicate a robust consumption pattern across months," he added.

Mani said a 25 per cent rise in import revenue suggests rising imports despite tariff hikes. However, Saurabh Agarwal, partner, EY, said the 21 per cent dip in gross domestic GST collection suggested a shift in consumer spending.

"While last month's (April) collection likely included year-end business-to-business sales being pushed due to the meeting of targets, this large decrease points to some bit of change in consumer spending possibly due to global uncertainties," Agarwal said.

The data shows smaller states/Union Territories like Manipur (102 per cent), Lakshadweep (445 per cent), and Chandigarh (53 per cent) posted sharp growth in May on an annual basis, while large consumption and industrial states such as Maharashtra (17 per cent), Tamil Nadu (25 per cent), and Karnataka (20 per cent) also reported robust gains.

Eway bills continue momentum

The generation of eway bills in April had increased to the second-highest level of 119 million, which is reflected in the May GST data, with a year-on-year growth rate of more than 20 per cent for the second consecutive month.

"This (eway bill) robust momentum in goods movement signals sound business activities and is also indicative of stronger GST collection in May," the Monthly Economic Review, released by the finance ministry last week, had said.

M S Mani, partner, Deloitte India, said compared to the FY25 average gross GST collection of ₹1.84 trillion, the ₹2.01 trillion for May, which relates to transactions in the first month of FY26, would provide fiscal headroom for the government. "These figures are also in line with the recent GDP (gross domestic product) growth estimates, which indicate a robust consumption pattern across months," he added.

Mani said a 25 per cent rise in import revenue suggests rising imports despite tariff hikes. However, Saurabh Agarwal, partner, EY, said the 21 per cent dip in gross domestic GST collection suggested a shift in consumer spending.

"While last month's (April) collection likely included year-end business-to-business sales being pushed due to the meeting of targets, this large decrease points to some bit of change in consumer spending possibly due to global uncertainties," Agarwal said.

The data shows smaller states/Union Territories like Manipur (102 per cent), Lakshadweep (445 per cent), and Chandigarh (53 per cent) posted sharp growth in May on an annual basis, while large consumption and industrial states such as Maharashtra (17 per cent), Tamil Nadu (25 per cent), and Karnataka (20 per cent) also reported robust gains.

BUSINESS STANDARD POLL

Another 25-bp repo rate cut on the cards

RBI expected to lower inflation projection for FY26

ANJALI KUMARI
Mumbai, 1 June

The Reserve Bank of India's (RBI's) six-member monetary policy committee (MPC) is expected to cut the repo rate by 25 basis points (bps) to 5.75 per cent, nine of the 10 respondents said in a *Business Standard* poll. State Bank of India, however, expects a 50-bp policy repo rate cut.

The committee, which will meet for three days from June 4, is scheduled to announce its policy review on Friday.

All 10 respondents agreed that the RBI would lower its FY26 headline inflation projection from 4 per cent forecast in the April policy review.

The rate-setting panel had reduced the repo rate by 25 bps in April, following a similar cut in February, after keeping it unchanged in 11 consecutive meetings. In the last review, the MPC had shifted the policy stance to accommodative, indicating the RBI's renewed focus on supporting economic growth.

India's economic growth rebound to a four-quarter high of 7.4 per cent in the January-March period of FY25, aligning with the annual growth estimate of 6.5 per cent. The final-quarter performance outpaced expectations, beating the RBI's forecast of 7.2 per cent.

The respondents expect the RBI to maintain its FY26 GDP growth projection at 6.5 per cent, while factoring in the potential impact of tariffs. Bilateral trade negotiations between India and the US are ongoing, with the current pause period set to end in the first week of July.

With Consumer Price Index (CPI)-based inflation expected to remain below 4 per cent for much of FY26, respondents said the MPC was likely to maintain its monetary easing stance. CPI inflation for FY26 is tracking between 3 per cent and 3.5 per cent, suggesting that real interest rates may rise to 2.5-3 per cent if the rate remains at 6 per cent, they said.

Net GST revenue grows 20.4% to ₹1.7 trillion on import taxes

MONIKA YADAV
New Delhi, 1 June

Receipts of goods and services tax (GST) after adjusting for refund grew 20.4 per cent year-on-year (Y-o-Y) to ₹1.73 trillion in May on the back of a sharp increase of 72.9 per cent in Customs-related revenue and a decline of 4 per cent in refund outgo, according to the data released by the finance ministry.

Sequentially, there has been a nearly 17 per cent drop over April's net GST collection, which stood at ₹2.09 trillion.

Gross GST collection in May rose 16.4 per cent to ₹2.01 trillion, with the yield from domestic sources rising 13.7 per cent and import-related revenue going up a sharper 25.2 per cent. Gross GST collection had reached an all-time high of ₹2.4 trillion in April, registering a growth rate of 12.6 per cent.

Abhishek Jain, head, indirect tax, and partner, KPMG, said it was encouraging to see gross GST collection again crossing ₹2 trillion in May. "While April's spike was expected with year-end reconciliations, consistency this month, along with 16 plus per cent Y-o-Y growth, points to strong underlying momentum and a recovery that's clearly taking hold," he added.

Indian digi forensics mkt to reach $1.39 bn by 2030: Report

The Indian digital forensics market is projected to reach $1.39 billion in the next five years, growing at a compound annual growth rate (CAGR) of 40 per cent, compared to the global market size of $14.5 billion over the same period.

The market for digital forensics is recorded at $265.9 million as of financial year 2025 (FY25). In comparison, the global market is valued at $6.5 billion during the same period, according to a joint report by Deloitte and the Data Security Council of India (DSCI).

Major drivers for the sector's growth in India include regulators such as the Reserve Bank of India (RBI), the Securities and Exchange Board of India (Sebi), and cybersecurity agency CERT-In. "The sector presents a significant opportunity for growth, driven by rising enterprise demand, regulatory scrutiny and technological advancement, said said Nikhil Bedi, Leader, Risk, Regulatory & Forensic, Deloitte India.

Panel to chart road map for Indian 'Big Four'

A committee headed by Ministry of Corporate Affairs Secretary Dipti Gaur Mukherjee will examine the way forward and recommend policy interventions required to establish a domestic advisory and audit firm on par with the global Big Four, according to government sources. 6

Panel formed to chart road map for India's 'Big 4'

RUCHIKA CHITRAVANSHI & HARSH KUMAR
New Delhi, 6 June

A committee headed by Ministry of Corporate Affairs (MCA) Secretary Dipti Gaur Mukherjee will examine the way forward and recommend policy interventions required to establish a domestic advisory and audit firm on a par with the global Big Four, according to top government sources.

A first-of-its-kind meeting to discuss this issue was held on Friday by the Prime Minister's Office (PMO). Chaired by Shaktikanta Das, principal secretary to the Prime Minister, the meeting was attended by senior government officials, including Department of Economic Affairs Secretary Ajay Seth, Financial Services Secretary M Nagaraju, Revenue Secretary Arvind Shrivastava, and the MCA Secretary.

Sanjeev Sanyal, a member of the Economic Advisory Council to the Prime Minister, also presented a road map to senior officials for creating an Indian firm of such calibre.

Prior to the meeting, the Institute of Chartered Accountants of India (ICAI) had shared its inputs on the matter with MCA officials, sources said. A major portion of the business for the Big Four firms — Deloitte, PwC, EY, and KPMG — comes from various government ministries and departments. Reducing reliance on these firms and instead promoting a home-grown firm that can take on this mantle has been on the government's agenda. Firms such as Grant Thornton Bharat and BDO India are names that are grouped in Big Six advisory and audit firms.

THE PANEL IS LIKELY TO LOOK INTO REGULATORY BARRIERS THAT PREVENT INDIAN ACCOUNTING AND AUDIT FIRMS FROM EXPANDING GLOBALLY

In June last year, Union Finance Minister Nirmala Sitharaman had said the ICAI should take it as a challenge to establish an Indian Big Four firm and seek global clients. "Why is it that in spite of the large number of high quality CAs in India, respected all over the world, our CAs become leaders, partners in Big Four firms? But you'd rather become a partner in a big four but not form a big four in India," she had said.

Industry experts cite several regulatory hurdles that hinder the setting up of an Indian Big Four firm. The current provisions of the Chartered Accountants Act do not allow revenue or profit sharing with non-CAs, which experts say limits Indian firms' ability to access foreign markets or raise capital. In contrast, global firms are able to fund their members both directly and indirectly.

The committee set up by the PMO is expected to look into these regulatory barriers that prevent Indian accounting and audit firms from expanding globally.

TECHNOLOGY 4.0

An account of AI disruption in finance

The profession prepares for change as technology automates a lot of its work, reports AVIK DAS

14

An account of AI disruption in finance

The profession prepares for change as technology automates a lot of its work, reports **Avik Das**

It's a profession of caution, measured approach and spreadsheets, but even here experts are being pushed to adapt to artificial intelligence (AI) or risk obsolescence. AI is taking over many tasks in finance and accountancy: from bookkeeping to reconciliations and tax compliance.

Just as AI automated writing and testing codes in software engineering, the world of finance and accountancy and risk management is walking the same path with machines doing many of its tasks faster and better.

It is a tectonic shift in a profession not known to move "suddenly". It involves changing the mindset of junior employees, senior executives and even partners who have spent more than three decades with Excel sheets. For many, industry executives said, the shift can be overwhelming.

"It is the fear of the unknown. For someone who is otherwise immersed in taxation or accounting or company law [and] is suddenly told to become familiar with AI — it is unknown territory. At the same time what we are emphasising is that you don't need to become an expert in AI," said Sai Venkateshwaran, global lead partner and a board member of KPMG India.

Many traditional accounting functions such as receivables, payables and bank reconciliation have become easier due to Cloud computing, automation, and AI. Such digital technologies have resulted in increased speed, enhanced accuracy, and fewer human errors.

AI skills needed

And yet, accountants are finding it difficult to keep pace, according to a survey by a global accounting body. More than half of Indian accountants surveyed said they are worried about not being able to develop future skills due to technology changing frequently, said the third annual Global Talent Trends Survey 2025 by the Association of Chartered Certified Accountants (ACCA).

Darshan Varma, partner for financial accounting advisory services at EY India, said it is a challenge to make accountants, tax professionals, and auditors adopt AI as many view it as another technology fad that will pass through. But in the last few years and ever since ChatGPT, Open AI's chatbot that generates human-like text, burst into the scene, people have realised that the technology will upend professional structures.

OVER 50% OF INDIAN ACCOUNTANTS WORRY THEY ARE UNABLE TO DEVELOP SKILLS DUE TO FREQUENTLY CHANGING TECHNOLOGY, ACCORDING TO A SURVEY

"That is why all of us at EY have been trained on prompt engineering. We are used to asking Google a set of questions in a layman's language. But a large language model is like a baby and you need to coach it with specific questions," Varma said, referring to AI programmes trained on vast amounts of text data to understand, generate, and process human language.

The ACCA survey found that 50 per cent of the global respondents are worried that they are not developing skills needed for a future workplace and 38 per cent are not confident about their current knowledge of AI.

Experts associated with India's Big Four accounting firms — Deloitte, EY, KPMG and PwC — said training institutes must make AI part of the curriculum. "Expecting them (new professionals) to be industry ready will be difficult if you do not train them. It will mean that they will be three to six months away from getting a job. The Institute of Chartered Accountants of India, American Institute of Certified Public Accountants, and ACCA need to set up their digital accounting board and make accountants practice on their own model to be technology proficient," said Varma.

Critical areas where AI has made work easier for finance and accountancy professionals include treasury management strategies and de-jargoning complex legal and financial agreements. Both involve going through volumes of data and hundreds of pages of documents. AI agents summarise data and documents into concise information in a short time, helping accountants and finance professionals to focus more on strategy and course of action.

Experts said that AI agents can automate tax compliance and reporting by tracking legal changes, analysing financial data, and identifying potential compliance risks. They can help users in filing taxes, with human intervention required only when there is an aberration.

Asked about areas where AI can make an impact in finance and accountancy, ACCA told *Business Standard* in an email that the focus is on exercising judgement in interpreting data and insights, managing exceptions and preventive action.

'No full automation'

"So we wouldn't want to automate the full decision-making process, such that judgements are being made without consideration from the auditor. For example, we would want to maintain oversight and judgement in how exceptions are handled and which are selected for investigation. And we wouldn't want to automate how we determine the appropriate course of corrective or other actions," it said.

Samir Shah, partner and audit leader at Deloitte Haskins & Sells, said future accountants must focus on technology skills. "One needs a mindset shift. Currently, we have a lot of courses and tools available on AI. There should not be a resistance to learning. You cannot sit back and say that 'I will become redundant', but get up, learn, and be with technology."

As an example, he cited Deloitte accountants and auditors working on going concern analysis by using tools that make the audit process more effective and efficient.

Venkateshwaran, of KPMG, said accountants can become AI specialists later but now they should learn how to work with the technology. "First become AI literate and then learn how you can collaborate with AI and make it work for you and make you more effective. We are not asking you to become an AI expert."

"Expecting them (new professionals) to be industry ready will be difficult if you do not train them. It will mean that they will be three to six months away from getting a job. The Institute of Chartered Accountants of India, American Institute of Certified Public Accountants, and ACCA need to set up their digital accounting board and make accountants practice on their own model to be technology proficient," said Varma.

Critical areas where AI has made work easier for finance and accountancy professionals include treasury management strategies and de-jargoning complex legal and financial agreements. Both involve going through volumes of data and hundreds of pages of documents. AI agents summarise data and documents into concise information in a short time, helping accountants and finance professionals to focus more on strategy and course of action.

Experts said that AI agents can automate tax compliance and reporting by tracking legal changes, analysing financial data, and identifying potential compliance risks. They can help users in filing taxes, with human intervention required only when there is an aberration.

Asked about areas where AI can make an impact in finance and accountancy, ACCA told *Business Standard* in an email that the focus is on exercising judgement in interpreting data and insights, managing exceptions and preventive action.

'No full automation'

"So we wouldn't want to automate the full decision-making process, such that judgements are being made without consideration from the auditor. For example, we would want to maintain oversight and judgement in how exceptions are handled and which are selected for investigation. And we wouldn't want to automate how we determine the appropriate course of corrective or other actions," it said.

Samir Shah, partner and audit leader at Deloitte Haskins & Sells, said future accountants must focus on technology skills. "One needs a mindset shift. Currently, we have a lot of courses and tools available on AI. There should not be a resistance to learning. You cannot sit back and say that 'I will become redundant', but get up, learn, and be with technology."

As an example, he cited Deloitte accountants and auditors working on going concern analysis by using tools that make the audit process more effective and efficient.

Venkateshwaran, of KPMG, said accountants can become AI specialists later but now they should learn how to work with the technology. "First become AI literate and then learn how you can collaborate with AI and make it work for you and make you more effective. We are not asking you to become an AI expert."

Filing ITR 2025? Key tax breaks senior citizens must not overlook

SANJEEV SINHA

The tax-filing season has begun. Senior citizens should take full advantage of the deductions and exemptions available to them. Here's a guide to help them file their tax returns accurately.

Higher deduction limits

Medical deductions: Senior citizens enjoy higher deductions on medical insurance premiums. The deduction limit is ₹25,000 for those below 60 years.

"It is ₹50,000 for senior citizens. And if they pay the premium for a dependent senior parent, they can claim an additional ₹50,000," says Deepak Kumar Jain, founder and chief executive officer (CEO), TaxManager.in. Tax benefits for preventive health check-ups of up to ₹5,000 can be claimed within the ₹50,000 limit under Section 80D.

"If no medical policies have been taken for senior citizens, medical expenses incurred for them (paid other than in cash) can be claimed as a deduction under Section 80D," says Abhishek Soni, co-founder, Tax2Win.

Senior citizens can also claim up to ₹1 lakh under Section 80DDB for specified diseases, compared to ₹40,000 for those aged 59 and below.

Interest income: Under Section 80TTB, senior and super senior citizens can claim a deduction of up to ₹50,000 on interest income from savings accounts, fixed deposits, or recurring deposits held in banks and post offices.

"Providing a higher deduction enables them to have more disposable income for meeting needs such as health care," Sudhakar Sethuraman, partner, Deloitte India. Reverse mortgage proceeds are tax-free under Section 10(43). Senior citizens opting for the new tax regime must forgo many of these deductions. "These include deductions from 80C to 80U, and the higher exemption limits. However, the rebate under Section 87A will still be available," says Soni.

Exempt from filing ITR

The basic exemption limit is ₹2.5 lakh for those aged 59 and below.

"It is ₹3 lakh for senior citizens and ₹5 lakh for super senior citizens under the old tax regime. If their income is below this limit, they are not required to file ITR," says Sethuraman.

Section 194P exempts individuals aged 75 and above from filing tax returns.

Seniors with only pension and interest income from the same bank are not required to file returns.

However, all exempt categories may still have to file ITR if they meet certain conditions.

Points to remember

Senior citizens must carefully report all sources of income. "Include pension, rental income, and capital gains," says Shubham Jain, associate director, Nangia Andersen.

He observes that seniors often miss out on deductions specific to them or claim them incorrectly. Retain payment proofs such as insurance premium receipts, interest certificates, medical bills, and capital gains statements.

"Changes to the capital gain tax regime, especially regarding indexation benefits on the sale of land or building introduced this year, should be followed when reporting income," says Shubham Jain.

Seniors must compare their reported income with details provided in Form 26AS and the annual information statement (AIS) to prevent triggering notices. "Even small interest income, if skipped, can create a mismatch and delay your refund. The portal now highlights mismatches. Use that to your advantage," says Shubham Jain.

Seniors must choose the correct ITR form based on income type and select the tax regime best suited to their income sources and deductions. A thorough review before submission can help avoid errors.

Income within exemption limit? Still file ITR if you...

- Made deposits in savings bank account of over ₹50 lakh
- Made current account deposits above ₹1 crore
- Sales turnover exceeded ₹60 lakh
- Professional income was above ₹10 lakh
- Electricity bill over ₹1 lakh
- TDS/TCS above ₹25,000 (₹50,000 for senior citizens)
- Income from foreign assets or was a beneficiary
- Foreign travel expenses above ₹2 lakh
- Resident taxpayers with overseas assets or signing authority

Note: Conditions apply to financial year; Source: TaxManager.in

Savings on stamp duty draw HFTs to GIFT City

12 • PG | 261 • Sqcm | 91435 • AVE | 101.93K • Cir | Top Left | The Smart Investor

Savings on stamp duty draw HFTs to GIFT City

KHUSHBOO TIWARI
Mumbai, 11 June

Although most high-frequency traders (HFTs) prefer to set up shop close to stock exchanges to enjoy better latency, a few are willing to sacrifice proximity to save a few bucks.

Two HFTs have already established their offices at the GIFT City (Gujarat International Finance Tec-City) IFSC while many more are likely to follow suit. IFSC stands for International Financial Services Centre. These HFTs, which deploy algorithmic and quant strategies, will continue to be regulated by the Securities and Exchange Board of India (Sebi) and trade on domestic exchanges. The shift to GIFT City, according to industry experts, is to save a significant amount on stamp duty paid on broking transactions.

As the number of trades executed by HFTs is higher, the transaction cost also surges. With the stamp duty refund, the benefit can run into crores, an expert said.

Legal and tax experts said that a Gujarat government scheme has prompted this shift. Under this, 100 per cent stamp duty paid on share broking transactions is refunded to eligible brokers. Though tax benefits and the stamp duty benefit were notified nearly five years ago by the Gujarat government, it is only now that it has caught the eye of HFTs.

Gifting gains

- 2 HFTs have already set up offices in Gift City, many more have shown interest
- Streamlining of Gujarat government's policy on refund of 100% stamp duty on transactions has led to the rise in interest
- Such entities mostly prefer setting up closer to exchanges for better latency
- These algorithmic traders continue to be regulated by Sebi and trade on domestic exchanges

"GIFT City provides an opportunity to stockbrokers to save on stamp duty, unless the end client is a foreign investor. This avenue is now becoming popular, considering that the refund mechanism to reclaim stamp duty has become streamlined and appealing to HFT players where stamp duty becomes a key cost component," said Rajesh Gandhi, partner at Deloitte Haskins & Sells LLP.

Jump Trading and Tower Research are two such firms that have set up their offices in the GIFT City. While Jump already has an office in Mumbai, Tower's first office in India was set up in Gurugram, Haryana. Both these HFTs have set up their GIFT City offices in the past year, said experts. Emailed queries to these two HFTs remained unanswered till press time.

Sources said multiple HFTs have shown interest and are considering setting up shops based on their analysis of opportunities and benefits in the financial hub.

"The Government of Gujarat, through multiple notifications and circulars, has introduced a stamp duty refund incentive to encourage share brokers to set up and operate their registered offices in GIFT City. This initiative is part of a broader strategy to develop it as a premier international financial services hub by reducing transaction costs and making it attractive for stockbroking activities," said Suresh Swamy, partner at Price Waterhouse & Co.

To avail themselves of the benefits, HFTs need to register their share-broking offices within GIFT City and carry out actual trading operations. Further, they must employ a minimum number of full-time employees, including those in compliance and operation roles, and maintain connectivity and infrastructure requirements, such as disaster recovery setup.

"All traders and dealers must be physically present within GIFT City. For entities using colocation, the session IDs must be mapped to GIFT City, and all associated trading infrastructure — including terminals, API IDs, and related systems — must also be located within GIFT City," said Gandhi.

Earlier in May, Sebi allowed stockbrokers to operate in GIFT City IFSC without taking its prior approval. Stockbrokers proposing to undertake securities market-related activities there are permitted to do so under a separate business unit of the entity itself.

Big 4 ramping up hiring for tech, biz consulting: Study

RUCHIKA CHITRAVANSHI
New Delhi, 12 June

The advisory practices of the Big 4 consulting firms — which include technology consulting, business consulting, deals and risk management — have been growing at twice the historical growth rates since February 2023, a study has shown.

The Amrop India study also highlighted that technology, business consulting and tax services were among the top growth practices for EY India and Deloitte India.

"There is a huge consistency in this report in terms of focus areas for the big four firms. It is also indicative of where the good opportunity lies for those who want to move to Big Four firms," said Prashant Yadav, partner, Digital & Technology, Amrop.

The study conducted by Amrop, a Leadership Search and Executive Advisory services company, said, "The Big 4 consulting firms have been growing advisory practices — business consulting, technology consulting, deals and risk (management) — at over 2X of historical growth rates. Tax practices have also grown significantly."

The Amrop report shows that hiring and promotions for technology consulting saw the highest growth of 40 per cent at Deloitte, while business consulting was the highest growing vertical with 24 per cent growth at EY India between February 2023 and January 2025.

The study found that Deloitte has invested aggressively in acquiring deals and capabilities and continues to invest more selectively.

"Deloitte has had higher attrition, largely involuntary, since Jan 25. The attrition numbers in 2025 are expected to be much higher than in previous years," Amrop report said. It reported annual attrition below 1 per cent for both the firms.

UTTAR PRADESH

Govt acquires 18K acres for industrial development

VIRENDRA SINGH RAWAT
Lucknow, 13 June

The Uttar Pradesh government recently acquired nearly 18,000 acres of land in the Jhansi district, as part of its ongoing efforts to develop a Noida-like industrial enclave in the Bundelkhand region.

The nodal agency, Bundelkhand Industrial Development Authority (BIDA), is planning to acquire a total of 65,000 acres spanning 33 revenue villages in Jhansi for the same.

Jhansi is also among the six nodes of the UP Defence Industrial Corridor (UPDIC). The other five nodes are Lucknow, Kanpur, Agra, Aligarh and Chitrakoot districts. These two flagship projects are aimed at catalysing the ambitious $1 trillion economy vision of the Yogi Adityanath-led government.

"We have acquired 18,000 acres so far in Jhansi district for industrial development in the composite Bundelkhand region," UP Chief Secretary Manoj Kumar Singh told investors at the UP Global Capability Centres (GCC) Policy 2024 conclave organised by Invest UP in Lucknow on June 10.

He added that the government was promoting investment, manufacturing and industrialisation in tier II and III cities in UP for equitable socio-economic development.

"The state's fast pace of development has made investors from Delhi to Davos take note of the drastic transformation witnessed in UP over the last seven-eight years... Businesses are shifting to emerging urban centers. Few global economies possess the potential to double their size in such a short span," Singh said.

Around 20 companies were a part of the conclave, including Microsoft, TCS, Deloitte, Standard Chartered, HCL and Trident. Several of them have pledged investments in GCC projects.

Invest UP is planning to host roadshows in cities like Bengaluru, Chennai and Hyderabad to promote the state's GCC policy. Leading think tanks from the United States and Europe will be roped in for these events to attract foreign investment from across verticals.

Alok Kumar, principal secretary (infrastructure and industrial development), said, "UP is committed to fostering innovation, expanding its global presence, and creating a thriving business environment for future investments."

FMCG makers wheel out quick commerce specials

Suneera Tandon
NEW DELHI

Your favourite packaged goods might soon look different depending on whether you are buying from a kirana store or online. Some differences, indeed, have already begun to appear.

Large fast-moving consumer goods (FMCG) companies like Marico, Zydus Wellness, and Godrej Consumer Products, even ice-cream makers like Baskin Robbins, are creating special versions of their products for buyers on quick-commerce platforms–from new variants to more premium offerings. Some are even testing new products there based on preferences of the urban online shopper.

For instance, Marico, which sells edible oils, hair oils and oats, will take more gourmet variants of its oats to quick commerce, even as its honcho said it is looking to customise offerings for online platforms "across all brands". Godrej Consumer Products Ltd is experimenting with launching products together on online and offline channels, with online showing better traction.

Then, Zydus Wellness, which makes butter, sugar-free and health drinks, sells its plant-based Nutralite butter exclusively on quick commerce platforms, and more offerings are on the way. And Baskin Robbins has floated ice-cream flavours and combinations that are not available offline.

Quick commerce is now 3% of Marico's India business as of the March quarter. MINT

The move by these companies comes in the backdrop of the surging popularity of quick commerce, even though the channel currently brings in just 2-7% of overall sales for larger companies.

Overall, per data shared by Nielsen IQ, the value share of e-commerce stood at 13% in the top eight metros for the 12-month period ended 31 March. This growth was on account of increasing online shopper penetration, more purchase occasions and increasing basket sizes, NIQ said.

"There will be a wider portfolio due to the growth in quick commerce," said Anand Ramanathan, partner and leader, consumer products and retail sector at Deloitte in South Asia, while pointing out that FMCG has traditionally operated with fewer assortments and a narrow portfolio.

"However, now companies will have to launch and try which products work across which platforms, adding to their complexity," he said. "You will have more frequent product launches; that's a new capability that companies will have to build given this shift."

In an interview with *Mint* last week, Saugata Gupta, managing director and chief executive of Marico Ltd, said the company is designing a channel-wise portfolio.

"The shopper in quick-commerce is different from the (online) marketplace; consequently, the portfolio and the stock-keeping unit mix that goes in these channels should be different," said Gupta, adding that the company could look at new product launches for online channels as well.

"It (e-commerce) is a very good channel to test market

TURN TO PAGE 6

FMCG's digital facelift: Rise of quick commerce exclusives

FROM PAGE 1

some new products," he said. "We will continue to do that; some of the premiumization of the core portfolio could be led via these channels."

Quick commerce is now 3% of Marico's India business as of the March quarter. Between brands such as Plix (supplements), True Elements (foods) and Saffola, the company is investing significantly in quick commerce to drive growth in its foods business.

Mumbai-based GCPL has been pushing more premium products online, both e-commerce and quick commerce, before scaling them up offline. It recently launched its Cinthol range of foam body washes both via quick-commerce as well as general trade stores in Tamil Nadu as an experiment.

Response on quick-commerce was relatively encouraging due to the channel's salience with more affluent shoppers, said the company's management. Last year, it launched its Hit Matic mosquito repelling machine priced around ₹550 only on e-commerce, apart from Park Avenue Deo gift scents.

"Quick commerce is a channel that we are very happy with, because it solves a genuine need of convenience," Sudhir Sitapati, CEO, GCPL, said at the company's media roundtable earlier this month.

Godrej is pushing more premium products online. MINT

Sitapati said quick-commerce has experienced exponential growth over the past two years, particularly benefiting mid-sized product packs that offer higher margins for companies.

For Zydus Wellness, the parent company of Complan drink and Nycil talc, online commerce accounts for 10-11% of its business; of this, the share of quick commerce is 40%. According to its chief executive, the share of large packs across its portfolio has been rising across online platforms. It is ramping up supplies to such packs across these platforms.

"Modern trade is a great place to buy large packs, but there are some specific packs designed for online channels—their share has been going up," said Tarun Arora, chief executive officer at the Ahmedabad-based company, in an interview with *Mint*. "Therefore, we are seeing how best we can serve urban online shoppers with specific stock keeping units whose demand has gone up."

The move by these companies comes in the backdrop of the surging popularity of quick commerce

Even categories like ice cream, where impulse and instant gratification play a big role, are seeing rapid transformation in the way consumers interact with brands.

"With this behaviour in mind, we have been bringing in a range of SKUs that are tailored for this ecosystem," Mohit Khattar, CEO, Graviss Foods, Baskin Robbins, told *Mint*. "These include flavour profiles and formats that appeal to the consumers who frequent these platforms."

Today, nearly a third of the company's business comes from food delivery, of which a significant part can be attributed to quick commerce, he said.

"Apart from the very popular ice cream cones, bars and cups, our range also includes ice cream funwiches, ice cream cake slices, multilayered ice cream doublet bars and bite-sized ice cream rocks," said Khattar. "We have also recently introduced creamy milkshakes in low sugar and no added colours for quick commerce."

India is a large general trade market. Across such stores, consumers buy small sachets of shampoos for single use, family packs of soaps, 1 kg packs of flour, biscuits, colas and chips on a daily basis.

General trade continues to be stressed on account of growth in online and modern trade retail in the top 10 markets; users of general trade are also more burdened by greater inflation and buying smaller packs or switching to cheaper brands.

India's Gen Z bets on skills for growth

Pratishtha Bagai
pratishtha.bagai@hindustantimes.com
MUMBAI

India's youngsters are increasingly prioritizing on-the-job learning and upskilling to grow their careers, as employment opportunities shrink, and college degrees steadily lose relevance due to their outdated curriculums.

According to the Deloitte Global 2025 Gen Z and Millennial Survey, shared by the consulting firm exclusively with *Mint*, 94% of Gen Zs and 97% of millennials surveyed in India prefer picking up relevant skills while working, valuing skill-building and growth opportunities over designations and hierarchy.

"Given the fast-paced change in technology and the related skills, companies these days hire for attitude and aptitude, and focus on imparting the required skills to employees. Hence, the academic curriculums-based skills may not be the key. A candidate may be good at certain skills but there is a need for employers to invest in upskilling of employees," said Saraswathi Kasturirangan, partner, Deloitte India.

There is a time lag between a skill becoming relevant and it being introduced in formal curriculum in universities. Thus, the skillsets of the students are often not in sync with what the industry requires. She said that companies can bridge this gap through on-demand, on-the-job learning, and training these young workers before deploying them on projects.

"The trend is that they hire adaptable candidates and train them for the job role, equipping them with adequate skills rather than relying on their pre-existing knowledge," she added.

Skillsets of the students are often not in sync with the industry needs. ISTOCKPHOTO

Still, some experts believe that formal higher education can't be jettisoned yet.

"In field jobs, on-the-job experiences matter more than academic education, but otherwise you need educational qualification/certifications/professional accreditation. As the job market evolves, though it is difficult to skip the higher education infrastructure altogether, we can expect a shift towards specialized skill-based trainings and courses that enhance performance in these roles," said Upasana Agarwal, partner for professional and financial services at talent advisory firm ABC Consultants.

The survey included inputs from 809 Indian youth, of which 505 were Gen Zs and the rest millennials.

FMCG makers wheel out quick commerce specials

Marico, Zydus, Godrej craft special versions of their products for online buyers

Suneera Tandon
NEW DELHI

Your favourite packaged goods might soon look different depending on whether you are buying from a kirana store or online. Some differences, indeed, have already begun to appear.

Large fast-moving consumer goods (FMCG) companies like Marico, Zydus Wellness, and Godrej Consumer Products, even ice-cream makers like Baskin Robbins, are creating special versions of their products for buyers on quick-commerce platforms–from new variants to more premium offerings. Some are even testing new products there based on preferences of the urban online shopper.

For instance, Marico, which sells edible oils, hair oils and oats, will take more gourmet variants of its oats to quick commerce, even as its honcho said it is looking to customise offerings for online platforms "across all brands". Godrej Consumer Products Ltd (GCPL) is experimenting with launching products together on online and offline channels, with online showing better traction.

Then, Zydus Wellness, which makes butter, sugar-free and health drinks, sells its plant-based Nutralite butter exclusively on quick commerce platforms, and more offerings are on the way. And Baskin Robbins has floated ice-cream flavours and combinations that are not available offline.

The move by these companies comes in the backdrop of the surging popularity of quick commerce, even though the channel currently brings in just 2-7% of overall sales for larger companies.

Overall, per data shared by Nielsen IQ, the value share of e-commerce stood at 13% in the top eight metros for the 12-month period ended 31 March. This growth was on account of increasing online shopper penetration, more purchase occasions, and increasing basket sizes, NIQ said.

"There will be a wider portfolio due to the growth in quick commerce," said Anand Ramanathan, consumer products and retail sector at Deloitte in South Asia, while pointing out that FMCG has traditionally operated with fewer assortments and a narrow portfolio.

"However, now companies will have to launch and try which products work across which platforms, adding to their complexity," he said. "You will have more frequent product launches; that's a new capability that companies will have to build given this shift."

In an interview with Mint last week, Saugata Gupta, managing director and chief executive officer of Marico Limited, said the company is designing a channel-wise portfolio.

"The shopper in quick-commerce is different from the (online) marketplace; consequently, the portfolio and the stock-keeping unit mix that goes in these channels should be different," said Gupta, adding that the company could look at new product launches for online channels as well.

"It (e-commerce) is a very good channel to test market some new products," he said. "We will con-

PSU share of procurement from small cos falls in FY25

There is a push for procurement from MSMEs in a bid to support small businesses

Manas Pimpalkhare & Rituraj Baruah
NEW DELHI

The share of public procurement by central PSUs from micro and small enterprises (MSEs) fell in FY25, for the first time since the pandemic.

In FY25, central government-run firms procured about 35% of their total public procurement from micro and small businesses, the lowest since FY23's 37%.

Public procurement plays a key role in the economy as both central and state governments, and their entities form a significant part of the order-books of businesses.

In a bid to ensure transparency, the Centre has digitized the process of procurement for government departments and companies. Further, in a bid to support small businesses and entrepreneurs, there is a push for procurement from micro, small and medium enterprises (MSMEs).

According to data from the MSME ministry's Sambandh portal, procurement by central public sector enterprises rose in FY25 to ₹2.6 trillion, from ₹1.7 trillion in the previous fiscal.

But the share of public procurement from MSEs did not keep up with this massive growth. While the procurement from MSEs rose in total value to ₹91,343 crore in FY25 from ₹74,728 crore in FY24, its share in total public procurement fell.

According to the central government's public procurement policy, a quarter of the procurement must be from micro and small enterprises. The development assumes importance as public procurement is an integral part of the earnings of MSMEs. The dip in the share came after four years of growth since FY21, data from the portal showed. Due to a slowdown in the economy during the pandemic, the share of public procurement from MSEs fell to 28%. After this, the share saw a steady growth in the following fiscals—33% in FY22, 37% in FY23, and nearly 44% in FY24—before dropping to 35% in FY25. To be sure, the number of central PSUs procuring from MSEs also declined in FY25. According to the Sambandh portal, 141 central PSUs procured from MSEs, lower than 158 such firms in the previous fiscal.

Industry experts attributed the lower share of public procurement from MSEs to the fall in number of PSUs procuring from smaller firms. "One reason for the 35% share in public procurement (from MSEs) may be the number of PSUs which procured from such firms," said Anil Bhardwaj, secretary general, Federation of Indian Micro, Small, and Medium Enterprises.

"Some large PSUs have a larger weight in procurement from MSEs, while other smaller PSUs will have a minuscule weight. A large PSU with a revenue of a few hundred crores of rupees could potentially stand for 10% of the total weightage, while a smaller PSU could account for only 0.1%," he said. Sameer Gogia, executive director, Deloitte, said the dip in public procurement from MSEs is likely to be on account of a delay in procurement due to the general elections in 2024.

During elections, the government is mandated to stop all public procurement.

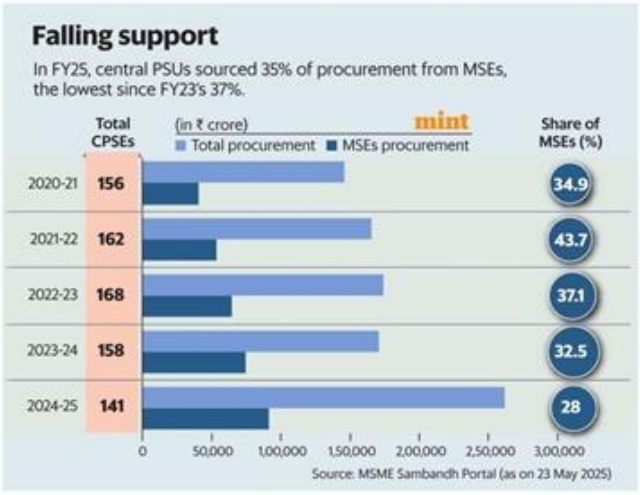

"The dip also indicates that the government chose to procure from larger firms. Larger firms, which have achieved economies of scale, may often provide goods and services to the government at a more competitive price than micro and small enterprises," Gogia said.

While the central government's public procurement policy mandates 25% of the total procurement from micro and small enterprises, it excludes medium enterprises, disincentivisng growth, said a policy paper on the competitiveness of MSMEs by Niti Aayog earlier in May this year. The report also highlighted that not all state governments have taken sufficient steps to enhance the competitiveness of MSME products and services in local or international markets, making central government procurement more important.

There is a push for procurement from MSMEs in a bid to support small businesses

Manas Pimpalkhare & Rituraj Baruah
NEW DELHI

The share of public procurement by central PSUs from micro and small enterprises (MSEs) fell in FY25, for the first time since the pandemic.

In FY25, central government-run firms procured about 35% of their total public procurement from micro and small businesses, the lowest since FY23's 37%.

Public procurement plays a key role in the economy as both central and state governments, and their entities form a significant part of the order-books of businesses.

In a bid to ensure transparency, the Centre has digitized the process of procurement for government departments and companies. Further, in a bid to support small businesses and entrepreneurs, there is a push for procurement from micro, small and medium enterprises (MSMEs).

According to data from the MSME ministry's Sambandh portal, procurement by central public sector enterprises rose in FY25 to ₹2.6 trillion, from ₹1.7 trillion in the previous fiscal.

But the share of public procurement from MSEs did not keep up with this massive growth. While the procurement from MSEs rose in total value to ₹91,343 crore in FY25 from ₹74,728 crore in FY24, its share in total public procurement fell.

According to the central government's public procurement policy, a quarter of the procurement must be from micro and small enterprises. The development assumes importance as public procurement is an integral part of the earnings of MSMEs. The dip in the share came after four years of growth since FY21, data from the portal showed. Due to a slowdown in the economy during the pandemic, the share of public procurement from MSEs fell to 28%. After this, the share saw a steady growth in the following fiscals—33% in FY22, 37% in FY23, and nearly 44% in FY24—before dropping to 35% in FY25. To be sure, the number of central PSUs procuring from MSEs also declined in FY25. According to the Sambandh portal, 141 central PSUs procured from MSEs, lower than 158 such firms in the previous fiscal.

Industry experts attributed the lower share of public procurement from MSEs to the fall in number of PSUs procuring from smaller firms. "One reason for the 35% share in public procurement (from MSEs) may be the number of PSUs which procured from such firms," said Anil Bhardwaj, secretary general, Federation of Indian Micro, Small, and Medium Enterprises.

"Some large PSUs have a larger weight in procurement from MSEs, while other smaller PSUs will have a minuscule weight. A large PSU with a revenue of a few hundred crores of rupees could potentially stand for 10% of the total weightage, while a smaller PSU could account for only 0.1%," he said. Sameer Gogia, executive director, Deloitte, said the dip in public procurement from MSEs is likely to be on account of a delay in procurement due to the general elections in 2024.

During elections, the government is mandated to stop all public procurement.

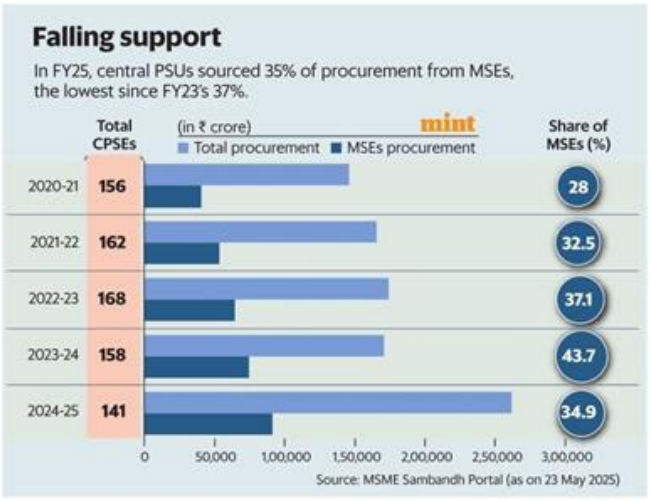

"The dip also indicates that the government chose to procure from larger firms. Larger firms, which have achieved economies of scale, may often provide goods and services to the government at a more competitive price than micro and small enterprises," Gogia said.

While the central government's public procurement policy mandates 25% of the total procurement from micro and small enterprises, it excludes medium enterprises, disincentivisng growth, said a policy paper on the competitiveness of MSMEs by Niti Aayog earlier in May this year. The report also highlighted that not all state governments have taken sufficient steps to enhance the competitiveness of MSME products and services in local or international markets, making central government procurement more important.

PM E-Drive buses may ply on intercity routes, tourist trails

The ₹10,900-crore PM E-Drive scheme rolled out in September 2024 to expand city transport may soon be expanded to intercity routes and tourist trails. On Friday, the government allotted 10,900 buses under the scheme that is targeting 14,028 buses. >P8

PM E-Drive buses may ply on inter-city, tourist routes

Plan to be implemented after competitive bidding for all nine cities is completed

Manas Pimpalkhare & Rituraj Baruah
NEW DELHI

Inter-city routes and tourist trails may open up for electric buses which are now confined to cities under a central scheme, two people familiar with the plans said.

The ₹10,900-crore PM E-Drive scheme rolled out in September 2024 to expand city transport may soon be expanded for this purpose, the people said on the condition of anonymity. On Friday, the government allotted 10,900 buses under the scheme, which aims at a total of 14,028 buses.

"The allotment announced on 22 May will first be tendered, followed by demand generation and tendering of more electric buses to remaining cities," one of the two people cited above said. "Then more buses will be deployed for inter-city purposes, and for some tourist destinations, for instance, hilly areas."

The plan to permit electric buses for inter-city travel and tourism purposes will be implemented after the competitive bidding for all cities is completed, the officials mentioned above said.

Under the scheme, nine cities with over 40 million people are eligible to receive subsidized e-buses, including New Delhi, Mumbai, Bengaluru, Chennai, Hyderabad, Kolkata, Ahmedabad, Surat and Pune. On 22 May, heavy industries minister H.D. Kumaraswamy said Bengaluru will get 4500 electric buses, Hyderabad 2,000, Delhi 2,800, Ahmedabad 1,000, and Surat 600, in the first phase.

Tendering of the first phase of buses allotted on 22 May will begin in 4-6 weeks, the second official said. Competitive bidding for the supply of the first phase of buses allotted on 22 May will begin in 4-6 weeks, the second official said.

Typically, the cost of an electric bus is approximately ₹1 crore. Under the PM E-drive scheme, the Centre is planning to dole out a ₹20-35 lakh incentive for every electric bus sold.

The development assumes importance as nearly 40% of the scheme is set aside for the rollout of 14,028 electric buses till FY26.

Transport-related emissions in cities and along highways currently account for 10-15% of the pollution in our cities, said Viral Thakker, partner & leader - sustainability & climate, Deloitte South Asia.

"There are several advantages of using buses for intercity travel - a large and efficient network of buses can replace cars and provide alternative transportation options to passengers. Electric buses are also a good addition to tourism locations as India looks to develop a number of sustainable tourism destinations," said Thakker.

The PM E-drive scheme, announced in September 2024, subsumed the Electric Mobility Promotion Scheme (EMPS), which ran from April 2024 to September 2024.

The EMPS and PM E-drive scheme came after a decade of electric mobility incentivization under two iterations of the FAME scheme. FAME stands for Faster Adoption and Manufacturing of Electric (and Hybrid) vehicles.

The PM E-drive scheme, set to run for two years till the end of FY26, marked a change in the focus of incentivisation of electric mobility, as it focused on incentivising public transportation to become electric, along with a focus on sunrise sectors such as electric trucks and ambulances. It also incentivised electric two-wheelers and three-wheelers.

The scheme mandates manufacturers to provide electric vehicles to consumers at a lower price. The government then reimburses manufacturers.

Is geopolitics to blame for your missing pay hike?

BY DEVINA SENGUPTA

The fiscal year that went by left a trailing impact on India Inc.'s workforce, who will now have to make peace with poor increments and lower promotions. Even layoffs. The spanner in the works is a sluggish job market. *Mint* decodes what went wrong.

BLOOMBERG

1 What hikes can you expect this year?

Consultants who advise companies on pay structures and increments expect hikes—man firms will announce them in June—to be less than what they had estimated as recently as March. While Deloitte had estimated an average pay hike of 8.8%, Aon had predicted 9.2%. Revisions are likely in businesses feeling the strain of geopolitical crises, tariff disputes and cautious client decision-making. Retail inflation eased to a nearly six-year low of 3.16% in April, but that will not soothe nerves. That is because the hikes, when adjusted against inflation, will lead to little additional money in the hands of employees.

2 What about bonus and variable pay?

This is the tricky part for firms as they have to decide, within a tight budget, how much bonus and variable pay they can disburse. While firms may disburse 70-90% of the variable pay, promotions will certainly be fewer. Some could be mere designation changes without a higher pay slab. Consulting firm Deloitte estimates a 25% drop in the number of promotions in 2025 versus 2024. The bell curve—where performance is plotted on whether employees met, exceeded or did not meet expectations—has become more rigid. Deloitte expects a 25% increase in 'below meets expectations' category this year.

AFP

3 Where do you go from here?

A sluggish job market, coupled with over-hiring in recent years, has led some firms to go easy on recruitment. Companies with significant exposure to the US market are wary of policy changes under Trump. This means that even if one is disappointed with the appraisals, the job opportunities are fewer. By extension, the competition for vacant positions will get tougher.

4 What happens to the high performers?

They will be left disappointed by this appraisal season as the gap between them and others could shrink to one of the lowest levels since the pandemic-impacted season of 2021. While the demand for those skilled in artificial intelligence (AI) will remain high, generalists will find the going tougher. Some companies are offering more employee stock ownership plans and stock appreciation rights to senior executives. Some firms are also paying for management degrees from leading B-schools.

5 What do we know about layoffs?

Companies are retrenching in small batches and some are reshuffling their decks—mid-level roles are becoming redundant in some companies because of AI. Earlier this month, *Mint* reported that tech firms such as Zomato, Cars24 and Gupshup have laid off employees over the last quarter. Beyond startups, employees in larger corporations in sectors as diverse as IT, BFSI and automotive remain concerned. In fact, for the first time in five years, the employee base at Tata Motors fell 3% in 2024-25.

EV makers push to keep hybrids out of benefits

Firms approach Niti Aayog, heavy industries ministry after Delhi govt move

Ayaan Kartik & Nehal Chaliawala
NEW DELHI/MUMBAI

India's leading electric car makers—Tata Motors Ltd, Mahindra and Mahindra Ltd, and Hyundai Motor India Ltd—are up in arms over the Delhi government's draft paper proposing equal incentives for hybrid cars and electric vehicles (EVs), according to four people aware of the matter.

A crucial meeting to discuss the issue is scheduled to be held in Niti Aayog on 30 May, the people cited above said on condition of anonymity. Whether to incentivize hybrid cars on par with EVs will be discussed at the meeting, they said. The Delhi government has proposed road tax and registration fee waivers for both technologies, something available only to pure EVs now.

The EV makers' opposition to sharing the benefits comes at a time of growing preference for hybrids. FY25 saw the sale of 107,000 electric cars which enjoy various benefits and subsidies, against 83,000 strong hybrids, which don't.

What has riled EV makers further is a 2 May advisory by the commission for air quality management in NCR (CAQM) encouraging public departments—of both central and state governments—to buy clean fuel cars, including EVs, hybrid and CNG vehicles, among others. "Strong Hybrid Electric Vehicles (SHEV) offer substantial improvements in fuel efficiency and emission reduction as compared to conventional diesel/petrol vehicles," the advisory reads.

The EV makers have flagged their concern with the Union ministry of heavy industries (MHI), the nodal body for EV schemes, and the central government's think tank Niti Aayog over the policy's proposal, the persons cited above said.

"Hybrid is an old technology. Although customers are free to decide what technology they want to opt for, the automakers do not want hybrids to be incentivised just like EVs," said the first person. "This discourages investments into pure electric vehicles."

Earlier, on 14 May, the carmakers had taken taken up their concerns with Union heavy industries minister H.D. Kumaraswamy. The minister tweeted after the meeting that it was to discuss India's clean mobility roadmap; however, the people cited above said that the agenda was the automakers' objection to inclusion of other technologies under the definition of 'clean vehicles'.

Shailesh Chandra, managing director of Tata Motors Passenger Vehicles and Tata Passenger Electric Mobility, said the company believes government incentives should be directed toward technologies that require support to bridge a funding gap and accelerate innovation.

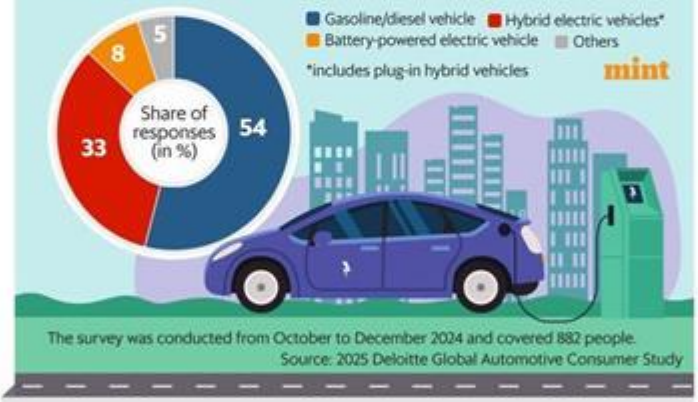

"Incentives are most effective when they help emerging technologies reach scale and maturity—particularly those that contribute meaningfully to long-term sustainability goals of zero emissions, such

as EVs," Chandra said in a statement to *Mint*.

The ministry of heavy industries, Niti Aayog, Hyundai India, Mahindra, Kia, Toyota and Niti Aayog did not respond to *Mint's* emailed queries till press time.

Tata Motors, Mahindra and Hyundai currently offer only pure EVs along with their conventional fuel models.

On the other hand, Maruti Suzuki and Toyota Kirlosokar have hybrid and internal combustion vehicles. Maruti is slated to launch its EVs later this year, but will mostly export its models due to tepid consumer demand in the country.

To be sure, state governments across the country have started introducing special policies focused on increasing EV penetration. So far, Uttar Pradesh, Delhi and Maharashtra have floated their policies, with only Delhi and UP proposing incentives for hybrids as well. While Delhi's policy still remains in draft, Maharashtra and UP have notified their guidelines.

Maruti is slated to launch its EVs later this year. REUTERS

Rahul Bharti, senior executive officer, corporate affairs at Maruti Suzuki, said that the purpose and effect of strong hybrids is to replace pure diesel or petrol vehicles because they increase energy efficiency by 36-44% and reduce CO_2 by 25-31% over petrol vehicles. "Data shows wherever SHEV incentives have been given, EV sales have not reduced but increased," he said. "We want both EV and SHEV sales to grow."

Experts are split over the issue, with some putting their weight behind EVs and others rooting for hybrids on the path to full electrification.

Sharif Qamar, associate director of transport and urban governance at The Energy and Resources Institute (Teri), a non-profit think tank, said incentives should be only for EVs. "When it comes to the emission reduction objective, currently, only zero-tailpipe emission vehicles need to be prioritised. Incentives should be crafted to encourage players to move towards zero emission vehicles."

Others like Nikhil Dhaka, policy lead at Primus Partners, don't agree. "Delhi's proposals in the EV policy are balancing short-term practicalities like charging infrastructure challenges," he said, adding that leveraging hybrids in the short term can offer a realistic path to reducing pollution quickly even as adoption of clean fuel cars picks up. "Manufacturers can invest in a broader mix of clean fuel technologies," Dhaka said.

Big Four tighten promotions, salaries as clients cut spends

Hikes are expected to be in the 5–7% range this year, compared to 7–9% last year

Devina Sengupta
devina.sengupta@livemint.com
MUMBAI

The partnership model in consulting and audit firms is similar to that in law firms. MINT

When India Inc. tightens its purse strings, the consulting and audit firms that advise them follow suit. The group of top such firms called the Big Four—KPMG, EY, PwC and Deloitte—have started reducing promotions, recalibrating salary increases and paring the number of seniors who are made partners.

"Major consulting clients like the IT sector globally have slowed down and there will be a domino effect. Our promotion numbers will go down and even hikes and bonuses, which typically come in August/September, will get impacted," said a senior partner at one of the Big Four firms.

Last week, Deloitte's promotions in India for 2025 were announced. *Mint* learnt that about 4,600 people were promoted compared with about 5,000 last year—effectively an 8% drop. Among them were 74 people who became partners or executive directors compared with 150 last year.

EY announced its partner promotions last week as well. *Mint* learnt that 110 senior executives became partners compared with 124 last year.

Deloitte and PwC did not respond to *Mint*'s queries.

While EY did not comment on last week's partner promotions, Arti Dua, partner and talent leader at EY India, said in an email response to *Mint*: "To serve the growing needs of our clients and their market activity, we maintain our pace of hiring, which is approximately 13,000 people annually. Even though our appraisal cycle is a quarter away, we anticipate that our promotions will largely be in line with previous years."

The partnership model in consulting and audit firms is similar to that in law firms. Equity partners invest in the company, bring in clients and get a chunk of the firm's revenue, while regular partners are seniors who get a fixed compensation and bonus.

There are about 3,000 partners between the Big Four and, according to senior executives in the sector, hikes were in the 7-9% range last year. This time, they may hover in the 5-7% range.

KPMG in India agreed that the impact of external market forces will be accounted for in this hike cycle.

"While external factors and industry trends may influence adjustments in increments, bonuses, and promotions, we continue to prioritise meritocracy, ensuring that high performers are recognized and rewarded competitively," said Reena Wahi, partner and head, people, performance and culture at KPMG in India.

For KPMG, the focus will remain on high performers despite sluggishness in the global business environment.

Professional services firms are restructuring on the back of slower growth and an uptick in regulatory pressure in the global markets, *The Economic Times* reported in April.

Besides layoffs in global IT firms such as Microsoft, which has sent jitters down the pipeline of the sector, the domino effect is seen in other areas, too.

The Big Five of India's IT services sector—Tata Consultancy Services Ltd, Infosys Ltd, HCL Technologies Ltd, Wipro Ltd and Tech Mahindra Ltd—are sending out mixed signals on hiring and pay hikes as they navigate uncertainties resulting from US President Donald Trump's tariff war.

Campus hirings improve in 2025

9 • PG	61 • Sqcm	18326 • AVE	55K • Cir	Bottom Right

Kolkata • Bengaluru • Delhi • Chandigarh • Ahmedabad • Mumbai • Hyderabad • Chennai

'Campus hirings improve in 2025'

Campus hirings bounced back in the 2025 placement season as pre-placement offers (PPOs) rose, with conversions rising by an average of 24% from last year across all degree programmes, Deloitte's Campus Workforce Trends report 2025 showed. The consulting firm analysed inputs from over 200 organizations and reviewed data from over 500 campuses in this study.

In FY25, compensation rose 3.9% compared to the 2024 placement cycle across all degree programmes, the report said. Over the past five years, there has been a 3.1% growth among all degrees. Notably, the MBA programme posted the lowest growth of 1.6% among all degrees.

Additionally, firms increased their campus hiring budgets by 15% to ₹4.41 crore in FY25 compared to FY24. This upward momentum underscores a renewed corporate commitment to harness emerging talent, driven by clear foresight and the needs of industry, Deloitte stated.

Infosys case signals new approach to granting tax benefits for IT firms

Gireesh Chandra Prasad
gireesh.p@livemint.com
NEW DELHI

The move by the Directorate General of GST Intelligence (DGGI) to close ₹32,403-crore of pre-tax proceedings against Infosys Ltd signals the government's acceptance of the fact that business processes of software companies need not necessarily be organized in a way that is convenient for the tax administration, two people familiar with the development said.

The closure of the case, based on a clarification issued by the Central Board of Indirect Taxes and Customs (CBIC) last June and verification of Infosys' transactions for the past five years, is significant as it changes the way GST authorities will examine the transactions of software companies.

It allows officials to view Indian tech businesses making use of offshore branches for exporting services from India at the broadest level, and conclude that the offshore branches' services to the parent are not taxable because the parent can claim credit for any tax paid on it or claim a refund for it, explained one of the persons quoted above.

Credits claimed for the taxes paid on import of service can be utilized for settling any domestic tax liability of the IT firm. MINT

Credits claimed for the taxes paid on import of service can be utilized for settling any domestic tax liability of the IT company. Credit or refund is offered for these taxes, because the value of the service imported from the offshore branch is included in the total software services exported from India.

Most countries refund indirect taxes like GST on goods or services used in exported products or services in order to keep exports competitive.

For India, this is a big departure from the practice so far, which requires software exporters which operate through foreign branches to first raise an invoice on itself for the services rendered by the overseas branch which contributes to the overall export value from India, pay Integrated GST on it, and then either claim a refund or tax credits which can be used to set off the parent's domestic GST liability, added the person.

Queries emailed to the finance ministry and Infosys remained unanswered.

Other large software exporters in India have been doing meticulous paperwork to ensure that they either get tax credit or a refund, making the exports tax exempt.

Hence, its peers did not face the tax complication Infosys did, explained the person. However, the new approach benefits them too, said the person.

The DGGI decision closing the tax proceedings is a welcome move, said M.S. Mani, partner indirect taxes, Deloitte India.

"Ensuring that field staff do not initiate tax proceedings without a sound basis and resolving any pending disputes quickly where clarifications are issued by the government are crucial for fostering investor confidence," said Mani.

Mint had reported on 3 August last year that the Central government was likely to accept Infosys' plea that GST does not apply to the services it avails from its offshore branch offices.

Let us exploit the full potential of collaborative lending

14 • PG | 435 • Sqcm | 152249 • AVE | 125K • Cir | Bottom Center

Bengaluru • Delhi • Chandigarh • Ahmedabad • Mumbai • Hyderabad • Kolkata

GUEST VIEW

Let us exploit the full potential of collaborative lending

VIJAY MANI

is partner, banking and capital markets leader, Deloitte India

India's financial ecosystem is evolving fast, driven by digitization and the need for inclusive credit. Within this landscape, collaborative lending has emerged as a promising way to bridge traditional credit gaps and bring formal finance closer to retail borrowers as well as small and medium businesses, especially the historically underserved. Among the various collaborative lending models available to banks and non-bank financial companies (NBFCs), two are most popular. One, co-lending arrangements between banks and NBFCs; and two, partnerships involving digital Lending Service Providers (LSPs). Though these models currently represent a small portion of India's total outstanding advances, their growth is far outpacing that of conventional lending.

Synergy is at the heart of collaborative lending. Traditional banks and large NBFCs bring capital strength, regulatory compliance and reach. On the other hand, smaller NBFCs, fintech firms and digital platforms are agile, well connected to niche borrower segments and often excel in technology-driven origination and underwriting.

For example, a rural-focused NBFC that understands the borrowing behaviour of dairy farmers or small kirana shop owners in Tier 3 towns may have high-quality leads and underwriting insights, but may lack capital or the regulatory headroom to scale up. Joining forces with a larger bank or NBFC through co-lending would benefit both entities, while the borrower gets faster credit.

LSP-based models are another key component. These digital platforms do not carry credit risk themselves, but play a vital role in onboarding, assessing and servicing customers. Their ability to use alternative data such as digital transaction patterns allows for the credit evaluation of customers outside the formal credit score system.

Collaborative lending models typically involve a risk-sharing structure. In the bank-NBFC model, the bank usually funds 80% of the loan and the NBFC the rest. The NBFC often leads the origination and customer engagement process, while the bank brings capital and risk oversight. This structure aligns incentives aptly, provided that underwriting standards are agreed upon at the outset. In contrast, in LSP collaborations, the lending entity retains full credit exposure. The LSP's value lies in lowering acquisition and processing costs, improving the customer experience and enabling faster disbursement using digital workflows.

In both models, borrowers benefit from quicker credit decisions, less rigid scorecard-based lending and better servicing.

To scale up collaborative lending models responsibly, stakeholders must address a few challenges.

Short-term operational hurdles include aligning the partners. Misalignment is a practical challenge, especially in co-lending arrangements. Differences in underwriting practices, exposure norms or documentation standards can create delays or even disqualify creditworthy borrowers. For example, a co-lender may enforce stricter income verification than the originator, creating friction. Such misalignment can reduce credit flows and lead to provisioning surprises.

Customer service accountability is another operational hurdle. Regulations assign clear responsibility to the lender for grievance redressal, but the on-ground execution becomes complex when multiple entities interact with the borrower. This is especially true in rural or semi-urban areas where borrowers may not be able to distinguish between a bank and its LSP or NBFC partner. Without systems that clearly define servicing roles, response timelines and customer experience can deteriorate.

A longer-term systematic concern is data security and governance. Collaborative lending involves sharing sensitive borrower data across systems. This becomes especially concerning when lightly regulated entities are involved. Strong data encryption, consent protocols and audit trails must be in place.

To realize the full potential of collaborative lending, several developments are necessary. In the regulatory context, it would help to have more detailed guidance on co-lending governance, data-sharing protocols and customer-servicing standards. A framework that outlines shared responsibilities and escalation norms could improve execution and accountability.

Technological innovation will also be key. Innovations such as real-time co-lending APIs, AI-driven underwriting and distributed ledger technology hold the potential to increase the speed of disbursement, reduce operating costs as well as underwriting errors, and increase confidence among co-lenders. Industry-level standardization—for example, common onboarding protocols or interoperable APIs between regulated entities—would help further reduce onboarding friction and enhance scale.

The potential for collaborative lending in India goes well beyond credit expansion—it is about enabling financial dignity and access for millions of people and small businesses. For banks, it is an opportunity to grow without building new last-mile infrastructure. For fintech firms and smaller NBFCs, it offers access to capital and credibility. For borrowers, it means faster and fairer credit. We must not view these partnerships as mere business arrangements. They are ecosystems that thrive when all participants are aligned with the purpose.

QUICK READ

Tie-ups between regular banks, non-bank lenders and digital platforms bring diverse strengths together for optimal operations and can bridge India's credit gaps without risks going out of control.

Collaborative lending would do even better with a finely detailed framework for co-lending governance. We need clear data-sharing protocols and customer servicing standards.

WHY EV MAKERS ARE SUFFERING RANGE ANXIETY

China's magnet curbs and poor sales in the domestic market are threatening to halt India's EV revolution

Ayaan Kartik & Nehal Chaliawala
NEW DELHI/MUMBAI

Bajaj Auto's earnings call on the evening of 29 May, replete with revenue and profits and margins and ratios, was trundling along the way such calls usually trundle. And then, as the discussion veered towards electric vehicles (EV), the leadership dropped a bombshell. "It's a threat to the entire EV business," executive director Rakesh Sharma intoned sombrely. "There is no short-term solution. Alternatives exist, but they will take time to develop."

Sharma was referring to China's restrictions on the export of rare earth magnets, imposed the previous month. Rare earth metals are crucial to make the motors that turn the wheels of EVs and China is estimated to control over 90% of the world's production.

Aside from conventional bikes, Bajaj makes e-scooters under the Chetak brand, e-rickshaws under the Gogo brand, and also manufactures small e-bikes for EV company Yulu.

While the drama at the Bajaj call was playing out, about 20-30 grim-faced representatives from the automotive industry huddled together in a conference room on the first floor of Udyog Bhawan in New Delhi. They had assembled there at short notice to discuss the challenges posed by the rare earths crisis with the union government's secretary of heavy industries.

The executives warned that their production lines, which churn out about 6% of India's GDP, could grind to a halt within weeks if China did not resume the supply of rare earth materials, including permanent magnets and electronic components. EVs were particularly vulnerable to the supply chain crisis, they warned.

The meeting ran into the evening. In the end, the heavy industries secretary assured the executives that he would take the matter up with his counterpart in the foreign ministry.

For India's automobile industry, particularly the EV segment, the Chinese restrictions are a clear and present danger. They threaten to derail the government's ambitions making the country an electric vehicle manufacturing hub, an aspiration on which it has bet over ₹60,000 crore through various promotion schemes over the last six years.

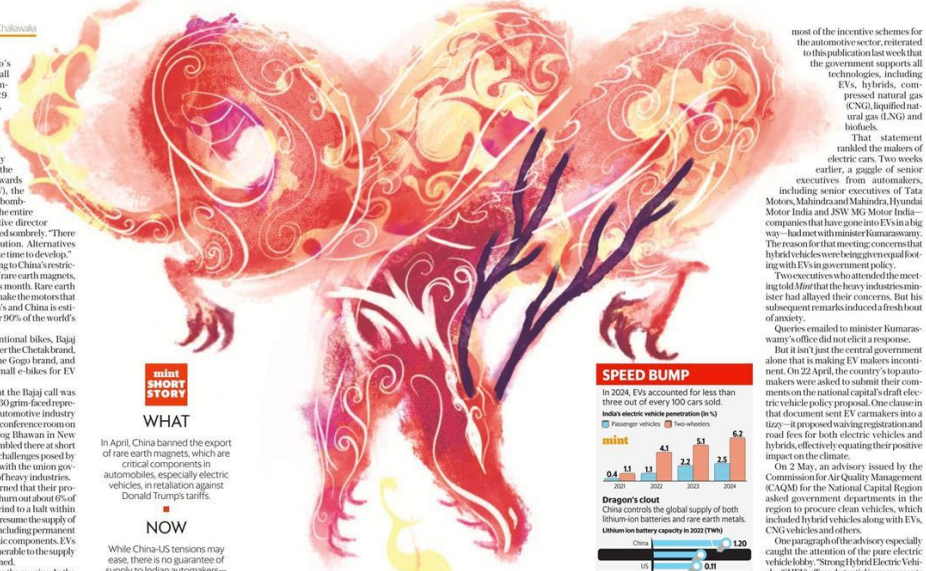

But the rare earths crisis is not the sole reason automakers who have invested billions of dollars in this technology have become nervous. They have also been hobbled by myriad other factors, such as cumbersome procedures and stringent eligibility criteria for aid programmes. Amid all this, the fact that EV adoption in India has not reached the levels they envisioned is adding to their anxiety.

EVs accounted for less than three out of every 100 cars and about six out of every 100 two-wheelers sold in India in FY25, according to Hemal Thakkar, senior practice leader and director at Crisil Intelligence. "This is relatively below the estimates the industry had made two-three years ago," he said.

An industry report from 2021 prepared by Catapult, a clean transport promotion agency, predicted that electric two-wheeler penetration would reach 15% by 2025 while passenger vehicle penetration would be at 5%.

Consequently, some legacy automakers have begun questioning their decision to bet on the technology. "Globally, electric vehicle adoption has slowed down. In that background, there is a realization that we need to de-risk. All eggs in one basket may not be the right approach," said a top executive at a domestic carmaker. He didn't want to be identified.

In a letter to the ministry of heavy industries, on 4 June, Rajan Wadhera, former president of the Society of Indian Automobile Manufacturers, called for a diversified approach. "Pursuing an aggressive EV-only strategy without securing robust and diversified supply chains may inadvertently deepen our strategic dependence on a nation that has often taken positions adverse to India's geopolitical and economic interests," he wrote. "India is uniquely positioned to harness alternative technologies like biofuels, strong hybrids, CNG, LNG, and even hydrogen," he added.

mint SHORT STORY

WHAT

In April, China banned the export of rare earth magnets, which are critical components in automobiles, especially electric vehicles, in retaliation against Donald Trump's tariffs.

NOW

While China-US tensions may ease, there is no guarantee of supply to Indian automakers—about 30 applications for a licence to access rare earth magnets are awaiting clearance.

AND

The Indian industry faces other hurdles, such as stringent eligibility criteria for government schemes and slow pace of adoption—EV car penetration in India is currently less than 3%.

Mint takes a look at each of the issues plaguing the EV industry and how they have played a role in sparking the existential crisis it faces today.

RARE EARTH, COMMON CHALLENGE

The world has US President Donald Trump to thank for the Chinese action on rare earths. The Communist regime imposed export restrictions on seven rare earth elements in retaliation for the 145% tariffs the US had slapped on China, escalating the trade war between the two sides.

> The government has always maintained that it supports all technologies, including EVs, hybrids, compressed natural gas, liquified natural gas and biofuels.

In India, the impact of China's curbs became even more real on Tuesday (10 June), when news agency *Reuters* reported that Maruti Suzuki, a late entrant in the EV market, had slashed production targets for the e-Vitara, its first electric vehicle, by two-thirds because of the rare earths shortages.

However, a spokesperson for Maruti Suzuki claimed that while the situation was uncertain, there has been no disruption to operations so far due to the rare earth crisis.

The other companies making four-wheeler EVs, and likely to be affected, are Tata Motors, Mahindra and Mahindra, MG Motor, Kia and Hyundai. The two- and three-wheeler EV segment includes Ola Electric, Bajaj Auto, TVS Motor, Hero Motocorp, Greaves Electric and the Murugappa Group.

"Currently Mahindra has inventory for the affected parts to meet production needs. We are actively de-risking our supply chain...We are closely collaborating with our suppliers to ensure there is no disruption to production," said a Mahindra and Mahindra spokesperson.

Two weeks on from the meeting in Udyog Bhavan, little progress has been made to mitigate the crisis. About 30 applications from Indian automotive companies for a licence to access rare earth magnets await clearance from the Chinese authorities, according to two people directly aware of the matter. A delegation of the automotive industry is waiting with packed bags to visit China, they said, but authorities from the Middle Kingdom are yet to grant them an appointment.

Meanwhile, top political leaders from the West including US President Trump, have held talks with the Chinese political leadership and wrangled concessions. On Tuesday, the US and China reached an agreement on a framework that will ease trade tensions and that may help in resuming exports of rare earth magnets. But, there is no guarantee of supply to Indian automakers.

"This is a major supply chain disruption," said Rajat Mahajan, partner and automotive sector leader at Deloitte India.

If the crisis escalates, could this deter investments in EVs? Mahajan thinks so. "This situation will hopefully get resolved via diplomatic channels, but if it continues then we may see a shift towards other powertrains for large original equipment manufacturers (OEMs)," he added.

The dependence on China is not only for rare earths, which go into the electric motor. The world also relies on India's neighbour for lithium-ion batteries, which power EVs—China controls about 80% of the global supply of these batteries.

This over-reliance on one source for critical components is making automakers jittery. "The dependence on China has now been outed as a vulnerability for the entire ecosystem. It is going to have a damaging effect on the industry's thinking on EVs," said Abhishek Saxena, a former policy expert at Niti Aayog.

ELECTRIC VS HYBRID

Another issue that has caused much heartburn in the Indian EV industry is the apparent shift in policymakers' perception of hybrid vehicles, which combine a gasoline-powered engine and electric motor and have far lower emissions than ICE vehicles. A pure electric vehicle is only powered by batteries.

China's control over key EV inputs, and the crippling impact any curbs can have on production in India, will make policymakers proceed cautiously, as the government will not be willing to give the Chinese the upper hand. And that may be good news for hybrid makers, who have long sought to be treated at par with EV companies.

Currently, Maruti Suzuki, Toyota Kirloskar and Honda are the only companies offering hybrid vehicles in India.

While the government has always maintained that it supports all technologies, companies that invested in EVs took comfort from the fact that it was only zero emission vehicles that enjoyed sops under the production-linked incentive scheme for the sector, indicating a policy preference.

For hybrid makers, another huge bone of contention was the 5% goods and service tax rate on EVs, against the effective tax rate of 43%, including compensation cess, on hybrids.

Union heavy industries minister H.D. Kumaraswamy, whose ministry oversees most of the incentive schemes for the automotive sector, reiterated to this publication last week that the government supports all technologies, including EVs, hybrids, compressed natural gas (CNG), liquified natural gas (LNG) and biofuels.

That statement rankled the makers of electric cars. Two weeks earlier, a gaggle of senior executives from automakers, including senior executives of Tata Motors, Mahindra and Mahindra, Hyundai Motor India and JSW MG Motor India—companies that have gone into EVs in a big way—had met with minister Kumaraswamy. The reason for that meeting: concerns that hybrid vehicles were being given equal footing with EVs in government policy.

Two executives who attended the meeting told *Mint* that the heavy industries minister had allayed their concerns. But his subsequent remarks induced a fresh bout of anxiety.

Queries emailed to minister Kumaraswamy's office did not elicit a response.

But it isn't just the central government alone that is making EV makers incontinent. On 22 April, the country's top automakers were asked to submit their comments on the national capital's draft electric vehicle policy proposal. One clause in that document sent EV carmakers into a tizzy—it proposed waiving registration and road fees for both electric vehicles and hybrids, effectively equating their positive impact on the climate.

On 2 May, an advisory issued by the Commission for Air Quality Management (CAQM) for the National Capital Region asked government departments in the region to procure clean vehicles, which included hybrid vehicles along with EVs, CNG vehicles and others.

One paragraph of the advisory especially caught the attention of the pure electric vehicle lobby. "Strong Hybrid Electric Vehicles (SHEV) offer substantial improvements in fuel efficiency and emission reduction as compared to conventional diesel/petrol vehicles," the advisory read.

The Tatas and Mahindras are concerned that official endorsements and incentives to hybrids could drive prospective EV buyers towards this technology, risking their investments.

Automakers have publicly disagreed over policy support for EVs and hybrids. Shailesh Chandra, managing director of Tata Motors Passenger Vehicles and Tata Passenger Electric Mobility, said in a written statement to *Mint* that the company believes government incentives should be directed toward technologies that require support to bridge a funding gap and accelerate innovation.

"Incentives are most effective when they help emerging technologies reach scale and maturity—particularly those that contribute meaningfully to long-term sustainability goals of zero emissions, such as EVs," Chandra said.

Although it has taken baby steps towards the EV lane, Maruti Suzuki is on the other side of the debate. Rahul Bharti, senior executive officer of corporate affairs at Maruti Suzuki, told *Mint* that EV penetration in India is currently less than 3%. "While all efforts are to maximize this 3%, we cannot say we will do nothing about the balance 97%," said Bharti. He added that the purpose and effect of strong hybrids is to replace pure diesel or petrol vehicles because they increase energy efficiency by 36-44% and reduce CO2 by 25-31% over petrol vehicles.

But those who have invested in the new technology for years believe that incentivising hybrids, which have tailpipe emissions, will discourage further investments in EVs. "Equating hybrids and EVs for disbursal of incentives is effectively disincentivizing investments into EVs. If the goal is to transition to cleaner technologies, it doesn't make sense to give both EVs and hybrids incentives. The government should back one technology," a senior executive at a carmaker said.

Queries emailed to Hyundai Motor India, Toyota Kirloskar Motor, JSW MG Motor India, Kia Motors India, Bajaj Auto, TVS Motor, Ola Electric and Ather Energy did not elicit a response.

A PYRRHIC VICTORY?

Meanwhile, the flagship production-linked Incentive (PLI) scheme for the automotive sector is struggling to deliver on its stated objective: to foster a domes-

tic manufacturing ecosystem.

The scheme, with a fiscal outlay of ₹25,938 crore, got the union cabinet's nod in September 2021. The money was to be disbursed over the following five fiscal years to automakers and component makers in an effort to incentivize investments in the EV ecosystem. One of the goals of the scheme was to facilitate deep localization, and thereby avoid situations like the one playing out now, where auto manufacturing lines risk coming to a halt because China has restricted exports of one component.

The ministry of heavy industries, which oversaw the scheme, focused on making the rules airtight so that no company could game the system and take taxpayer money without adding sufficient value domestically. There was a minutely detailed standard operating procedure (SOP) for every applicant company to declare its domestic value addition.

The ministry's cautious approach is understandable, as another scheme, Faster Adoption and Manufacturing of (Hybrid and) Electric Vehicles in India (FAME-India), saw many companies take subsidies from the government while selling vehicles largely imported from China.

Those who have invested in the new tech for years believe that incentivising hybrids will discourage investments in EVs. AP

This time around, the ministry appears to have succeeded in preventing companies from gaming the system. But it's a Pyrrhic victory—of the 115 applicants, only four have managed to receive incentives as of 2024-25. Out of the total kitty of ₹25,938 crore, only ₹322 crore have been disbursed, as per government disclosures.

> Currently, Maruti Suzuki, Toyota Kirlosokar and Honda are the only companies offering hybrid vehicles in India

The government also recently halved the incentives given to electric vehicle sellers under the Prime Minister e-Drive scheme. Another PLI scheme for cells used in EVs is yet to take off.

In private conversations, automakers blame the cumbersome application process of the flagship PLI scheme for its low disbursal level.

Industry observers agree that the confusion over subsidies should be cleared to help automakers plan their products better. "Long-term policy clarity on subsidies, though on a reducing basis, will lead to the industry making investments in product development," Crisil's Thakkar said.

Most of all, says Saxena, a former Niti Aayog expert, the ambiguity over EV adoption needs to end. "The concern over China's dominance of supply chains and slow adoption of vehicles is weighing on policymakers and the corporate sector," he said. "However, there is no technology with zero tailpipe emissions like EVs that can be scaled up for mass use for now. All the stakeholders have to choose whether to back it or not."

For now, automakers have not publicly indicated a change in stance. But the rumblings within their strategy rooms should set alarm bells ringing in the corridors of power.

GUEST VIEW

Let us exploit the full potential of collaborative lending

VIJAY MANI

is partner, banking and capital markets leader, Deloitte India

India's financial ecosystem is evolving fast, driven by digitization and the need for inclusive credit. Within this landscape, collaborative lending has emerged as a promising way to bridge traditional credit gaps and bring formal finance closer to retail borrowers as well as small and medium businesses, especially the historically underserved. Among the various collaborative lending models available to banks and non-bank financial companies (NBFCs), two are most popular. One, co-lending arrangements between banks and NBFCs; and two, partnerships involving digital Lending Service Providers (LSPs). Though these models currently represent a small portion of India's total outstanding advances, their growth is far outpacing that of conventional lending.

Synergy is at the heart of collaborative lending. Traditional banks and large NBFCs bring capital strength, regulatory compliance and reach. On the other hand, smaller NBFCs, fintech firms and digital platforms are agile, well connected to niche borrower segments and often excel in technology-driven origination and underwriting.

For example, a rural-focused NBFC that understands the borrowing behaviour of dairy farmers or small kirana shop owners in Tier 3 towns may have high-quality leads and underwriting insights, but may lack capital or the regulatory headroom to scale up. Joining forces with a larger bank or NBFC through co-lending would benefit both entities, while the borrower gets faster credit.

LSP-based models are another key component. These digital platforms do not carry credit risk themselves, but play a vital role in onboarding, assessing and servicing customers. Their ability to use alternative data such as digital transaction patterns allows for the credit evaluation of customers outside the formal credit score system.

Collaborative lending models typically involve a risk-sharing structure. In the bank-NBFC model, the bank usually funds 80% of the loan and the NBFC the rest. The NBFC often leads the origination and customer engagement process, while the bank brings capital and risk oversight. This structure aligns incentives aptly, provided that underwriting standards are agreed upon at the outset. In contrast, in LSP collaborations, the lending entity retains full credit exposure. The LSP's value lies in lowering acquisition and processing costs, improving the customer experience and enabling faster disbursement using digital workflows.

In both models, borrowers benefit from quicker credit decisions, less rigid scorecard-based lending and better servicing.

To scale up collaborative lending models responsibly, stakeholders must address a few challenges.

Short-term operational hurdles include aligning the partners. Misalignment is a practical challenge, especially in co-lending arrangements. Differences in underwriting practices, exposure norms or documentation standards can create delays or even disqualify creditworthy borrowers. For example, a co-lender may enforce stricter income verification than the originator, creating friction. Such misalignment can reduce credit flows and lead to provisioning surprises.

Customer service accountability is another operational hurdle. Regulations assign clear responsibility to the lender for grievance redressal, but the on-ground execution becomes complex when multiple entities interact with the borrower. This is especially true in rural or semi-urban areas where borrowers may not be able to distinguish between a bank and its LSP or NBFC partner. Without systems that clearly define servicing roles, response timelines and customer experience can deteriorate.

A longer-term systematic concern is data security and governance. Collaborative lending involves sharing sensitive borrower data across systems. This becomes especially concerning when lightly regulated entities are involved. Strong data encryption, consent protocols and audit trails must be in place.

To realize the full potential of collaborative lending, several developments are necessary. In the regulatory context, it would help to have more detailed guidance on co-lending governance, data-sharing protocols and customer-servicing standards. A framework that outlines shared responsibilities and escalation norms could improve execution and accountability.

Technological innovation will also be key. Innovations such as real-time co-lending APIs, AI-driven underwriting and distributed ledger technology hold the potential to increase the speed of disbursement, reduce operating costs as well as underwriting errors, and increase confidence among co-lenders. Industry-level standardization—for example, common onboarding protocols or interoperable APIs between regulated entities—would help further reduce onboarding friction and enhance scale.

The potential for collaborative lending in India goes well beyond credit expansion—it is about enabling financial dignity and access for millions of people and small businesses. For banks, it is an opportunity to grow without building new last-mile infrastructure. For fintech firms and smaller NBFCs, it offers access to capital and credibility. For borrowers, it means faster and fairer credit. We must not view these partnerships as mere business arrangements. They are ecosystems that thrive when all participants are aligned with the purpose.

QUICK READ

Tie-ups between regular banks, non-bank lenders and digital platforms bring diverse strengths together for optimal operations and can bridge India's credit gaps without risks going out of control.

Collaborative lending would do even better with a finely detailed framework for co-lending governance. We need clear data-sharing protocols and customer servicing standards.

Mid-sized firms may struggle as Sebi raises bar on ESG debt

Neha Joshi
neha.joshi@livemint.com
MUMBAI

The capital market regulator's new rules for continuous monitoring and third-party verification of ESG-labelled bonds could raise compliance burden and deter participation of mid-sized firms, experts said.

The Securities and Exchange Board of India's (Sebi's) circular, effective 5 June, aims to combat "purpose-washing" or the misrepresentation or exaggeration of the social or environmental intent behind ESG bond proceeds. The framework to ensure such debt issuances remain aligned with clearly stated and measurable goals brings India's regulatory stance closer to global standards.

"By incorporating factors like third-party verification, comprehensive disclosures about the issuer decision-making process, project selection and deployment, brings a lot of accountability on the issuer of these securities and acts as a much-needed confidence-building measure for investors," said Swati Agrawal, CEO and president at CareEdge Advisory. "Mandatory requirement of third-party review/certification is the right step to address growing concerns on green-washing of claims made by issuers."

Agrawal, however, warned that the capacity to meet such detailed obligations is uneven across India Inc., with mid-sized firms still finding them difficult. "While large companies are well-positioned to understand these concepts and requirements around them, mid-size companies still find these tasks onerous and less value-accretive."

The compliance requirements, especially for sustainability-linked bonds (SLBs), tied to key performance indicators (KPIs) and sustainability performance targets (SPTs) are perceived as both technically complex and financially burdensome for smaller firms. "This trade-off needs to be balanced by a regulator," Agrawal said, advocating a consultative process with market participants for continuous review to make the instruments attractive.

The State Bank of India raised over ₹30,000 crore through social bonds in 2024, placing it among the top global non-sovereign issuers, according to the Climate Bonds Initiative. Continuum Green Energy (₹56.8 trillion), REC Ltd (₹4,300 crore), DME Development Ltd (₹775 crore), and Pimpri Chinchwad Municipal Corporation (₹200 crore) also raised funds via green bonds last year, showed data provided by Icra Ltd.

Legal experts warn only large companies with ESG capacity will be able to participate meaningfully. REUTERS

Separately, Sebi data as of 30 April showed that L&T Infrastructure Finance raised ₹667 crore via green bonds, while municipal corporations of Vadodara and Ahmedabad issued green bonds worth ₹100 crore and ₹200 crore, respectively.

Shriram Finance ($500 million) and Indiabulls Housing ($350 million) tapped the global markets for social bonds, Icra data showed, reflecting growing private sector participation in ESG-linked funding.

Legal experts warn that while the new framework elevates the integrity of ESG claims, it may inadvertently lead to a bifurcated market—where only large companies with ESG capacity can participate meaningfully.

"The standards to be followed by entities for investing in green and ecologically sustainable technology are prohibitively expensive," said Radhika M. Dudhat, partner at Shardul Amarchand Mangaldas & Co. "This financial barrier incentivized companies to claim ESG alignment without making the necessary investments, leading to purpose-washing."

Regulatory diligence needs to be matched with rigorous scrutiny, Dudhat said. "While an entity may be ESG compliant 'on-paper', it is important to ascertain whether or not they are creating a false narrative of complying with the applicable regulatory framework."

Sebi's circular aims to prevent misrepresenting the social or environmental intent behind ESG bond proceeds

To mitigate this, she emphasized the role of lending institutions like banks and investment firms in reviewing and verifying compliance with a complete chain of data and documentation.

The new circular also mandates quantification of negative externalities and early redemption provisions in case of deviation from stated ESG objectives. Issuers will have to appoint independent third-party reviewers to verify alignment.

While this strengthens governance, experts believe regulatory guidance must be paired with ecosystem-level support.

"Emphasis can be given on capacity building at the industry associations level, sharing of best practices and guidance at knowledge forums and regular review of these frameworks and their effectiveness," said Agrawal.

Sebi's framework could also serve as a guidebook for issuers if supported with targeted assistance, ESG assessment firms said. "Having clear guidance on which ESG debt instrument suits their fund requirements will help in aligning with their corporate ESG strategies or objectives," said Amishi Kapadia, partner at Deloitte India.

"For a fundraise, issuers may need support for selection of eligible projects or key performance indicators (KPIs) or sustainability performance targets (SPTs) to ensure alignment with the global frameworks," she said.

Accenture India to promote 15k

SAIKAT DAS & JENNIFER CREERY
May 21

ACCENTURE WILL PROMOTE almost 50,000 people worldwide, including 15,000 in India, in June as the company tries to boost morale after a six-month delay to weather a slump in demand for consulting services.

The Dublin-based technology giant told staff Tuesday that the promotions will include 11,000 in the Europe, Middle East and Africa region, and 10,000 across the Americas, according to internal memos seen by *Bloomberg News*.

The move comes as the New York-listed company grapples with a pullback in client spending and greater scrutiny of US government contracts under President Donald Trump, who wants to prove taxpayers are getting value for their money. Accenture abandoned its diversity targets after Trump ordered his administration to push firms to end such practices.

The company employs about 801,000 people, according to its latest earnings statement, meaning the promotions in June will include about 6% of its total workforce. The firm didn't respond to a request for comment. Accenture had already pushed the bulk of promotions to June, rather than the usual month of December. Like rivals McKinsey and Ernst & Young, the firm went on a pandemic-era hiring spree in response to a surge in demand. But a slowdown in business led it to cut 19,000 roles from 2023.

Deloitte is planning to lay off employees on its government consulting team, *Bloomberg News* reported in April.

Continued on Page 7

APPRAISAL SEASON

- Total **50,000** people will be promoted worldwide in June
- These will include **11,000** in the Europe, Middle East and Africa region, and **10,000** across the Americas
- The delay was to weather a slump in demand for consulting services
- The move comes as the New York-listed company grapples with a pullback in client spending

Accenture to promote 15,000 in India

LAST YEAR "OUR operating margin — how we measure profitability as a percentage of revenue — contracted compared to adjusted operating margin for the second quarter last year," Accenture said in the memos.

"We are also seeing an elevated level of uncertainty in the global economic and geopolitical environment." It added there will be some base pay increases in core growth areas, which are based on current market conditions, while bonus and performance equity decisions will be made in December.

High cost of fast fashion

HIGH LOGISTICS & USER ACQUISITION COSTS ARE WEIGHING ON CLOTHING BRANDS' Q-COMMERCE BET

GEETIKA SRIVASTAVA

ON A SULTRY Delhi morning, 27-year-old Tashi realised she had nothing light or breezy to wear to her cousin's *haldi* ceremony to be hosted on the other side of town. By 9:15 am though, she had identified a pastel *kurta* set on a quick commerce platform; by 9:27, it was at her doorstep.

In the world of instant groceries and blink-speed burgers, fashion is finally catching up. The segment is all set to ride the q-commerce wave, which is projected to grow at a 67% CAGR through 2030 and is currently estimated at over $5 billion.

While average order values remain modest — ₹400-₹700 versus ₹1,000-plus on traditional platforms — there is value beyond margins for Q-commerce platforms. "Fashion brings in new users and encourages cross-category exploration," says Devendra Meel, chief business officer, Zepto. "Someone buying a *kurta* might add cosmetics or festive décor."

For Zepto, the appeal is clear. "Fashion is getting more occasion-led and last-minute," says Meel. "Be it someone who has forgotten about a *puja* invite or about one who has a *sangeet* ceremony to attend that night, we offer a robust portfolio of fashion essentials and occasion wear they can pick from."

In other words, what started its innings as a safe way to access daily needs during the COVID-pandemic-led disruptions is rapidly morphing into the go-to platform to resolve wardrobe emergencies, last-minute gifting and impulse exigencies. Seeing the opportunity, Libas, a fashion brand known for its ethnic wear, has partnered with Zepto to deliver its signature styles across 50 cities in under 12 minutes.

"We've seen a clear shift in consumer behaviour," says Sidhant Keshwani, founder & CEO of the four-decade-old women's wear brand. "Today, fashion is impulse-led and occasion-driven, with speed of acquisition a key expectation." Needless to say, quick commerce felt like the way to go. Among its fastest movers on Q-commerce are loungewear, trousers and *kurtas*, styles that prioritise utility over extravagance and fit snugly into Zepto's slim, high-velocity supply chain.

It's still early days for Q-commerce fashion but the category is picking up speed. Myntra's M-Now, which launched in December 2024 with the promise to deliver over 10,000 styles in 30 minutes, sees strong demand for products ranging from shampoos and skincare to fragrances and lipsticks. Brands such as Adidas, Pepe Jeans, Enamor, and Manyavar are already available on platforms such as Zepto, Instamart and Blinkit. "In Q-commerce, the most promising fashion categories are those that are easy to fit, frequently bought, and low on returns. Basics like t-shirts, socks, and innerwear work well," says Somdutta Singh, founder and CEO of Assiduus Global.

For women's innerwear brand Enamor, quick commerce is not just another route, but a growing opportunity. "We've seen a 70–80% demand spike over the past six-seven months," says Sandra Daniels, the brand's CMO and category head. "Consumers are increasingly prioritising convenience, time, and reliability, even in fashion."

That said, apparel brings a unique set of challenges to the 10-minute delivery model. There are size, fit, and return issues to deal with, point out experts. Inventory complexity, unpredictable trends, and return logistics make it investment heavy.

To counter that, brands are prioritising standard silhouettes, bestselling fits, and limited assortments. "We have curated a focused, fast-moving assortment that works for Q-commerce with availability in 50 cities, including key metropolitan hubs such as Delhi, Mumbai, Bengaluru, Chennai, and Hyderabad," says Zepto's Meel. Its selection highlights ready-to-wear with standard fits, high appeal and low return intent. The company says its dark stores are optimised for SKU rotation and inventory agility, which allows it to hyper-localise. The company has onboarded limited size ranges that align with high-demand clusters. It can refine the selection using real-time platform data.

Experts say that return rates, often as high as 25–30% in traditional e-commerce, are lower on Q-commerce, thanks to the high intent- and urgency-led purchases. Some traditional horizontal Q-commerce players are experimenting with 10-minute returns and offering 72-hour exchanges for damaged items, points out Praveen Govindu, partner at Deloitte India.

Even as more players throw their hats into the ring, high logistics and customer acquisition costs, combined with large inventory investments and potential reverse logistics, continue to strain Q-commerce margins. Long-term profitability is achievable through scale, repeat purchases, efficient inventory planning, and optimised delivery systems, notes Govindu.

Jury out on pay-per-view service for *Sitaare Zameen Par*

Aamir Khan tests economics of digital film distribution

URVI MALVANIA
Mumbai, May 25

IN A CLASSIC high-risk, high-reward play, actor Aamir Khan is rolling the dice in a way few Bollywood stars have dared to.

At a time when streaming giants rule the digital roost, Khan is pushing boundaries by choosing YouTube's pay-per-view service for the digital distribution of his next title – *Sitaare Zameen Par*.

The jury is out on the move to skip the streaming platforms, with some trade experts hailing it as audacious and visionary, while others are terming it as too risky a bet.

One of the biggest pay-offs of this strategy could be a longer theatrical run since users will have to pay to watch the movie, one way or another. When a film is sold to a streaming platform, it becomes part of its library, often available for free under a subscription or ad-supported model. "In this case, people will have to pay anyway, and if the movie does well, it could drive more people to the theatres," says Komal Nahata, leading film trade analyst, editor of film trade magazine 'Film Information' and host of popular podcast 'Game Changers'.

Box office collections of films have been suffering because of streaming platforms as people prefer to watch movies, especially those without any visual spectacle (like superhero films or those with a 3D/4D release), in the comfort of their homes on subscribed OTT platforms at the time of their choosing. However, if the film is not available as part of a subscription or membership on digital, people may just feel inclined to go to the movies in the traditional way.

Continued on Page 5

NEW WATERS

- Aamir Khan is pushing boundaries by choosing YouTube's pay-per-view service for the digital distribution of his next title – *Sitaare Zameen Par*

- Box-office collections of films have been suffering because of streaming platforms as people prefer to watch movies at home
- Taking the movie to YouTube also allows Khan, who has also produced the film, to cast a wider net in terms of audience
- One of the biggest pay-offs of this strategy could be a longer theatrical run since users will have to pay to watch the movie, one way or another

FROM THE FRONT PAGE

Aamir Khan tests economics of...

TAKING THE MOVIE to YouTube also allows Khan, who has also produced the film, to cast a wider net in terms of audience.

"The platform's massive reach — over 2.5 billion users globally and 460 million in India — makes it the most accessible digital distribution channel available today, far outpacing standalone OTT services," Chandrashekhar Mantha, partner, media and entertainment sector leader, Deloitte India, says.

He adds that while YouTube's Transactional Video on Demand (TVOD) model has been used before, its adoption for a major Bollywood release marks a significant first -- an ambitious, yet important experiment for the industry.

An experiment that experts agree, only big banner films can afford to undertake, though if successful, could further help democratise film distribution.

"For many independent filmmakers and producers, getting a theatrical or digital release is a huge challenge. Often, they do not have the resources to broker lucrative deals. The YouTube TVOD model, given it is performance driven, could be a good option for such films," Ashish Pherwani, leader, media and entertainment sector at EY India, says.

Under YouTube TVOD, the content producer typically retains 70% of the revenue, while the platform takes a 30% share. This reduces traditional distribution overheads, which can account for 25% of a film's revenue, but the cost advantage is moderate due to the share a producer pays to the platform.

There is a flipside as well. While the promise of the strategy is real, so is the peril. And perhaps the biggest of them all is the dreaded menace of piracy, ever-prevalent in the Indian cyberspace. Although the threat of piracy is comparable between YouTube and OTT platforms, the financial fallout lands more squarely on the producer with the YouTube model, Nahta observes.

"With upfront OTT deals, the producer has banked the cheque and the headache of piracy (loss of viewership on its service) is the platform's. With the YouTube model, it impacts the paid consumption of the title, resulting in tangible, and potentially significant, revenue loss for the producer," he explains.

The most obvious disadvantage of the strategy, of course, is that if the movie fails to hit a chord with the audience, the producers are left in a bind. "Unlike OTT platforms that offer upfront licensing deals — often ranging between ₹100 crore to ₹300 crore — the model to release on YouTube will be performance-driven. This means earnings depend entirely on audience engagement and content quality, adding a layer of commercial risk for producers," Mantha says.

US' earnings from India far surpass trade deficit: GTRI

FE BUREAU
New Delhi, May 26

WHILE US PRESIDENT Donald Trump targets India for his country's trade deficit with India and made it a basis for reciprocal tariffs, if all commercial exchanges between the two countries are taken into consideration, America actually runs a huge surplus with India, according to a study.

The US trade deficit with India is close to $45 billion annually but the US rakes in $80-85 billion every year from India through education, digital services, financial operations, intellectual property royalties, and arms sales resulting in $35-40 billion surplus, the study by Global Trade Research Initiative said.

"Even as Washington pressures India to cut tariffs and open markets, America is already reaping huge economic rewards from India. India can and should negotiate the free trade agreement from a position of strength — rejecting hollow deficit arguments and demanding fair, balanced, and reciprocal terms," founder of GTRI, Ajay Srivastava said.

In 2024-25, trade between India and the US reached $186 billion, as per the commerce ministry data. India exported $86.5 billion in goods to the US while importing $45.3 billion, creating a goods trade surplus of $41 billion.

In services, India exported an estimated $28.7 billion and imported $25.5 billion, adding $3.2 billion to the surplus. Altogether, India ran a total trade surplus of about $44.4 billion

Beyond trade, Indian students studying in the US spend over $25 billion every year — about $15 billion on tuition and another $10 billion on living expenses, making education one of America's biggest "exports" to India.

US tech giants like Google, Meta, Amazon, Apple, and Microsoft bring in another $15–20 billion a year in sales from India's market.

American banks and consulting firms — including Citibank, JPMorgan, Goldman Sachs, McKinsey, BCG, Deloitte, PwC, and KPMG — earn an estimated $10–15 billion revenue annually from their work in India's financial sector.

Kolkata • Hyderabad • Pune • Delhi • Kochi • Ahmedabad • Chennai • Chandigarh • Mumbai • Bengaluru

REVENUE FROM DOMESTIC TRANSACTIONS UP 13.7%

GST keeps up tempo in May, grows 16.4%

FE BUREAU
New Delhi, June 1

GROSS GOODS AND services tax (GST) collections rose 16.4% on year to ₹2.01 lakh crore in May, reflecting April transactions, indicating an uptick in goods shipments and consumption in the first month of 2025-26.

The collections had reached a record high of ₹2.37 lakh crore in April 2025, as March saw the year-end rush of shipments from factories and better compliance.

According to official data, GST revenue from domestic transactions grew 13.7% to ₹1.5 lakh crore, while revenue from imported goods saw a sharp 25.2% rise to ₹51,266 crore, signaling a pickup in external demand despite recent tariff-related uncertainties.

The gross collection includes central GST receipts of ₹35,434 crore, state GST receipts of ₹43,902 crore, and Integrated GST (IGST) receipts of ₹1.09 lakh crore. Cess collection stood at ₹12,879 crore in May.

"Compared to the FY25 average monthly GST collections of ₹1.84 lakh crore, the figures reported for May, which relate to transactions in the first month of FY26, at ₹2.01 lakh crore, would provide significant fiscal headroom for the government," said M S Mani, partner at Deloitte India.

The GST revenues from imports are 25% higher compared with the same month last year indicates a notable acceleration in inbound trade, even amid global tariff headwinds.

With refunds showing an annual decline of 4%, the net GST revenue rose 20.4% to about ₹1.74 lakh crore in May. Total tax refunds stood at ₹27,210 crore compared with ₹28,357 crore in the year-ago month.

Continued on Page 11

POSITIVE OUTLOOK

■ Cess collection stands at ₹12,879 cr

■ Revenue from imported goods rises 25.2% to ₹51,266 cr

GST grows 16.4% to ₹2.01 lakh cr

"A 16% year-on-year increase in GST collections marks a return to strong momentum, after a few months of 11–12% growth," said Pratik Jain, Partner, Price Waterhouse & Co LLP.

"If this trend continues over the next few months, it could provide the government the fiscal cushion to look at GST rate rationalisation which has already seen significant groundwork."

However, the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state, Mani said.

While states like Maharashtra, Karnataka, Tamil Nadu, and West Bengal recorded impressive collection growth ranging from 17% to 25%, other large states such as Gujarat, Andhra Pradesh, and Telangana lagged behind reporting increases of just -2% to 6%.

States like Madhya Pradesh, Haryana, Punjab, and Rajasthan posted mid-range growth of around 10%.

Hence the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data-based analysis.

As India enters FY26, strong GST performance—both in domestic consumption and imports—will be closely watched for signals on economic resilience, consumption patterns, and fiscal capacity.

Upswing in thermal power investments after long stagnation

A RENEWED PUSH to thermal power seems to have finally ended a decade-long phase of sluggishness in the sector. While the pace of construction has accelerated for a clutch of units, state-run NTPC and private players such as Adani Power and Tata Power have scaled up their thermal portfolios, reports **Arunima Bharadwaj.** ■ PAGE 2

NTPC, TATA, ADANI LEAD THE TREND

Investments in thermal power improve after long sluggishness

ARUNIMA BHARADWAJ
New Delhi, June 2

A RENEWED PUSH to thermal power seems to have finally ended sluggishness in the sector. While the pace of construction has accelerated for a clutch of units including ultra super critical ones, state-run NTPC and leading private players such as Adani Power, Tata Power have scaled up their thermal portfolios.

The turnaround is significant as it comes after a decade-long phase of relative stagnation in the sector. Several thermal plants, particular gas-fired ones, had got stranded after or in the midst of construction, and many turned insolvent, since the "twin balance sheet problem" (rising NPAs) gripped both the corporate and banking sectors.

Since that crisis, which saw banks saddled with high NPAs and over-leveraged corporations, the RBI did a salvaging act, but the lenders have never really turned upbeat about the sector. The current reversal of the trend stems from the Union power ministry's prodding, but the steep rise in power demand too boosted the investors' confidence. The government has set a target to add nearly 95 GW of thermal power generation capacity by 2032 to meet the rising power demand.

According to sources, the country is working on several major thermal power projects, including greenfield units and brownfield expansions. One of the key greenfield projects is the Nabinagar Super Thermal Power Project in Bihar, which involves adding three ultra-supercritical units of 800 MW each, totaling 2,400 MW, with an investment of ₹29,947 crore. Another major project is the Yadadri Thermal Power Plant in Telangana, a 4,000 MW project with five units of 800 MW each, costing around ₹25,099 crore. In Tamil Nadu, the Uppur Thermal Power Project is also under way, with two 800 MW units adding up to 1,600 MW. For brownfield developments, NTPC is planning to increase its coal-based power capacity by more than 10,000 MW. This will be done by expanding existing plants at locations like Talcher, Darlipali, Lara, Sipat, Singrauli, and Meja.

The state-owned company has charted out plans to add 30 giga watt (GW) of coal-based capacity by the year 2031-32, upwards from its earlier target of 26 GW, a senior executive of the company who did not wish to be identified had told *FE*.

Tata Power, which has been planning its exit from the coal-based power business, is now re-evaluating its strategy and will look at new thermal projects depending on the opportunities and returns they offer.

"The opportunities should be good and must align with our long-term objective," the company's CEO Praveer Sinhatold reporters during the Q4FY25 earnings conference. As per reports, the company is eyeing its first coal power capacity expansion in six years by boosting capacity at a plant in northern India.

Adani Power too sees the demand for thermal power to remain strong and expects merchant power demand to be robust in FY26, with higher demand and lower thermal capacity addition, its CEO SB Khyalia has said in an investor call recently.

The company plans to increase its thermal capacity to 30.7 GW by FY30 from 17.5 GW in FY25, with addition of 12.5 GW capacity organically, it said in its annual report for FY25. "All new organic additions would be based on ultra-supercritical technology, which will ensure high thermal efficiency and lower carbon emissions," it said.

The financing landscape for thermal power projects is also undergoing a significant shift. "The financing appetite for thermal projects is evolving, not retreating. While global capital is increasingly chasing green assets, India's unique energy realities have ensured continued interest in well-run, future-ready thermal infrastructure," said Avantika Gupta, CEO, OPG Power.

State-owned REC also recently revealed its plans of increasing conventional thermal power projects financing.

Lenders, including non-banking financial institutions and banks, are showing greater selectivity, but not reluctance, especially toward assets that are technically sound, environmentally compliant and viable for the long-term energy goal, Gupta noted.

"Renewable sources of power are variable and diurnal in nature. On the other hand meeting peak power demand requires firm and predictable sources of generation. Other contributing factors include shorter gestation period of thermal projects and lower capital cost of coal-based plants compared to hydro and nuclear plants," said Anujesh Dwivedi, partner at Deloitte India.

THE TURNAROUND

- Nabinagar Super Thermal Power Project in Bihar involves adding three ultra-supercritical units of 800 MW each
- Total invest is ₹29,947 cr

- Tamil Nadu's Uppur Thermal Power Project is also under way, with two 800 MW units adding up to 1,600 MW

Reimagining plastic as a sustainability solution

4 • PG | 669 • Sqcm | 160596 • AVE | 49.87K • Cir | Top Left

Reimagining plastic as a sustainability solution

Plastic is viewed as an environmental threat due to our misuse despite its vital contributions to packaging, auto, medicine and food and preservation industries, and even climate solutions

PLASTIC, NAMED after the Greek word plastikos meaning something which can be moulded or shaped, was once a hallmark of human invention, but today it is seen as a symbol of environmental harm – not because of its nature, but due to our inability to use it responsibly and innovatively.

While harmful effects of plastic usage are widely known, it's time to recognise its contribution in the fields of medicine and food preservation, and even tackling global warming.

Viral Thakker, Partner and Leader – Sustainability and Climate, Deloitte South Asia, says, "Plastic, when designed for reuse and properly managed, can significantly support both ecological resilience and economic growth—especially as global populations rise, and resource pressures intensify."

Food industry

According to a report by LyondellBasell, Public Policy UN (United Nations) Plastics Agreement, plastic packaging helps enhance food items life span considerably depending on the type of food, thereby helping in tackling one of the biggest problems of global food waste which apart from human cost also contributes almost 10% of greenhouse emissions, according to United Nations Environment Programme.

K Ganesh, Director - Sustainability & Corporate Affairs, Bisleri International, says, "Plastic is a wonderful material if managed responsibly. In the beverage industry, especially for packaged drinking water companies, plastic packaging plays an indispensable function. The food-grade PET bottles maintain product purity, prevent contamination, increase the product shelf life, and ensure safe consumption across India's diverse climatic conditions and distribution networks.

Automobile industry

Plastic has completely transformed the automobile industry through the various benefits that can cut costs and at the same time improve vehicle performance, which is a win- win situation for the industry. Being lighter than metals, plastic usage makes vehicles lighter, increases fuel efficiency and thereby reduces emissions.

Avesh Memon, Founder & CEO of Rilox EV, says, "The transition to lighter vehicles through the integration of high-performance plastics is more than just a design choice—it's a strategic move towards greater energy efficiency. In the EV space, where every gram matters, reducing vehicle weight directly improves range and reduces energy consumption. What many overlook is that this also lessens the environmental load even at the electricity generation level, especially in countries still transitioning away from fossil fuels. Lightweight engineering is enabling us to build smarter, cleaner, and more accessible electric mobility solutions for the future."

According to a paper, published in Science Direct, a journal, Fuel consumption and CO2 emissions from passenger cars in Europe – Laboratory versus real-world emissions a 100 kg reduction represents fuel savings of 0.3–0.5 l/100 km (6%–10% for a fuel consumption of 5 l/100 km).

Packaging industry

Packaging industry is the one which has benefitted the most from the invention of plastic. Plastic has made packaging cost effective, increased the shelf life of products and again its property of being moulded into any shape has helped in creating packaging for any type of products at a very cost effective price point.

The challenge is to achieve the goal of reaching a stage where all plastic that is manufactured is biodegradable, recyclable and which causes minimal harm to the environment if not zero harm.

Jeevaraj Gopal Pillai, Director - Sustainability, President - Flexible Packaging and New Product Development, UFlex, says plastic is crucial for modern development since it propels growth in numerous aspects of daily life and the economy. Given that there are 8.2 billion people on the planet, we cannot overlook the importance of flexible packaging in providing goods for consumers like food and medications while maintaining their durability, safety, and capacity to prevent contamination.

He adds, "A McKinsey report found that in five of six flexible packaging categories, plastic had lower greenhouse gas emissions than non-plastic alternatives. In contrast, materials like glass, rigid PET, and steel require significantly more water and fossil fuels to produce. The problem isn't plastic itself, but how we manage its lifecycle."

Medical field

One of the fields that has benefited the most with the invention of plastic is the medical field. Plastic can be easily sterilised and its single use property has helped immensely in reducing contamination cases and considerably reduced cases of deadly diseases like HIV and Hepatitis. Experts point out that its property of being easily moulded into any shape has helped the medical field to make new devices, thereby helping millions of people through new innovations in a much more cost effective way as plastic is comparatively much cheaper compared to metals or other alternatives.

Medical grade plastics are biocompatible and are used particularly in medical components that interface with the circulatory system in addition to machines used for MRI, syringes and even assistive products like prosthetics.

Electronics and construction

The very fact that plastic does not corrode or rust is a game changer for the electronics and construction industry. The durability and the lightweight of plastic helps in easier handling and faster turnaround time for projects and is easier to handle for the labour, too. Today recycled plastic is being used in making roads, brick, tiles, insulation and so on. There is no doubt that plastic has been one of the most important inventions of mankind and it is actually driving the world today. What the world needs is the policies and actions to take the recycled plastic percentage to as high as possible, arrange awareness campaigns amongst people making them understand how to rightly use and dispose off plastic products.

Suresh Bansal, Founder & CEO, DCGpac, says, "When reused, recycled, and repurposed intelligently, plastic contributes to circular economy and can significantly reduce carbon footprint. It's not about eliminating plastic, it's about using it wisely, designing smarter systems, and holding ourselves accountable for its life cycle. Let's stop calling plastic the problem and start being the solution. Innovation must meet intention. That's the future we need to build."

Plastic industry is growing worldwide at an exponential rate and all they need is to keep innovating and inventing new ways to make plastic more environmentally friendly.

Ajeet Sharma *is a contributor to the Sustainability Karma podcast, which broadcasts on All India Radio*

India's landmark EPR regulations- ambitious yet pragmatic-have placed the nation at the forefront of a global recycling revolution. In April 2025, India became the first major nation to mandate and enforce the use of recycled plastics in packaging. Since 2014, Banyan Nation has pioneered innovations tailored for India's unique needs, consistently aligning with the country's evolving sustainability and regulatory landscape.

We've placed over 2 billion recycled bottles back on store shelves, proving waste can become high-quality, traceable materials. As we scale to 50,000 tonnes per year and launch recycled flexible packaging - addressing nearly 70% of plastic waste - our partnerships with Unilever, Shell, Reckitt, and ITC show how recycling fuels growth and stewardship. By integrating kabadiwallas and gig workers, we drive inclusive circular economy solutions that are unique to the Indian waste ecosystem.

With AI-driven traceability and advanced washing tech, Banyan Nation is ready for the exponential demand EPR will bring. This is Bharat's moment. On World Environment Day, let's make recycled packaging the norm.

Mani Vajipey
CEO, Banyan Nation

Kochi • Delhi • Hyderabad • Pune • Chandigarh • Mumbai • Kolkata • Chennai • Lucknow • Ahmedabad • Bengaluru

PMO meet on creating Indian 'Big Four' firms

THE PRIME MINISTER'S Office (PMO) on Friday held a meeting with key government officials on creating Indian advisory firms that can compete with the Big Four – EY, KPMG, PwC, and Deloitte, reports **Manu Kaushik.** ■ PAGE 2

India's Big 4: PMO forms panel led by MCA secy

MANU KAUSHIK
New Delhi, june 6

IN A MEETING held by Prime Minister's Office (PMO) on Friday with senior officials, the government has decided to form a committee headed by corporate affairs secretary Deepti Gaur Mukherjee to examine the policy interventions required, and pave the way to create large Indian advisory firms capable of competing with the Big Four — EY, KPMG, PricewaterhouseCoopers, and Deloitte.

The key agenda of the meeting was to give a push to the PM's vision of creating big advisory firms out of India.

Chaired by Shaktikanta Das, principal secretary to the PM, the meeting saw participation of corporate affairs secretary Mukherjee; Arvind Shrivastava, revenue secretary; M. Nagaraju, secretary at the department of financial services; Ajay Seth, secretary at the department of economic affairs; and Sanjeev Sanyal, member of the economic advisory council to the Prime Minister (EAC-PM).

Sources said that the key agenda of the meeting was to identify and eliminate barriers while creating an enabling environment for Indian chartered accountancy (CA) firms to scale up and compete globally in the audit and advisory space.

In 2017, Prime Minister Narendra Modi had called for establishing four big Indian accounting firms that can make up the world's 'Big 8'. The idea of creating global Indian advisory firms is to counter the growing dominance of Big Four firms who control a large chunk of the audit and advisory business in India.

For instance, the top audit firms cemented their position in FY25 with corporate India preferring to get their audit work done by Big 6 firms. As per the primeinfobase.com, the top six audit firms handled 326 assignments of the 483 Nifty-500 companies as on March 2025. Their dominance has continued from FY24 when they also audited 67% of the Nifty 500 universe.

Experts said that India CA firms are subject to a lot of restrictions currently. For example, if an Indian CA firm has to become a global firm, it would have to do partnerships with overseas firms because it can't set up its own audit firm in the UK or in the US because it needs to give 51% voting to the locally-qualified CAs in those countries. However, that's not possible today as it violates the ICAI's rules that mandate all partners to be Indians in the firm.

COMPETING GLOBALLY

- Meeting was chaired by Shaktikanta Das, principal secretary to the PM
- The key agenda is to identify and eliminate barriers for CA firms
- Also to create an enabling environment for the firms to scale up and compete globally
- Indian CA firms are subject to a lot of restrictions currently, experts say
- Steps are taken to accelerate the growth of domestic CA firms

A late bloomer, India has to sprint ahead

ARUNIMA BHARADWAJ
& NITIN KUMAR
New Delhi, June 8

CHINA'S EXPORT RESTRICTIONS on rare earth magnets have had a sudden impact on India's burgeoning electronics manufacturing, as the country doesn't manufacture them.

Assorted critical minerals and rare earth elements are the cornerstones of the high-tech manufacturing sector that India is focusing on to accelerate growth and create jobs. These minerals serve as the building blocks for power windows, electric vehicle (EV) batteries, renewable energy storage systems, semiconductor manufacturing, defence production, and much more.

That is why globally, critical minerals are the most sought-after resources now and are even defining geopolitics. In fact, China's move in April to tighten export restrictions on a host of rare earth elements has hit supply chains across many parts of the world, and the US, seemingly a prime target, is seriously impacted. For India, the China episode, however, has also exposed how under-prepared the country is in ensuring the supplies of these resources.

Of course, India started an auction for critical mineral blocks in November 2023, and five rounds have already taken place. The National Critical Mineral Mission (NCMM) was launched in January this year with a public-sector outlay of ₹34,300 crore over seven years.

Continued on Page 5

SOUGHT-AFTER RESOURCES

	Annual domestic production	Import

RARE EARTHS SHORTAGE
PART-I

The first of a two-part series examines why India's critical minerals strategy isn't yielding swift results

India's rare earths push can't afford a delay now

COAL INDIA, NTPC, AND others have announced overseas ventures to explore battery minerals, while plans are afoot to enter into bilateral pacts with mineral-rich African and Latin American countries. According to industry sources and experts, these policy initiatives have come a bit late. Many countries, including some Asian peers, have moved much ahead of India in this area. While the response to India's auction process has been lukewarm, potential investors want the policy regime to be tweaked to produce better outcomes. Last week, the mines secretary VL Kantha Rao hinted at further changes in policy to bolster the NCMM.

Currently, India remains 100% import-dependent for most critical minerals, including lithium, nickel, cobalt and germanium. Import of copper, also a key input for high-tech industry, has skyrocketed in recent years (up 10 times in a decade), with domestic production declining.

Even as demand for these minerals surges, industry remains cautious about making large-scale investments due to uncertainties in resource viability, infrastructure, and regulatory clarity. "The current auction regime treats critical minerals in almost the same manner as bulk minerals. Auctions may not be the best way to operationalise

critical mineral blocks," said Arun Misra, CEO, Hindustan Zinc, and ED at Vedanta.

Sector experts say that the lack of detailed resource data has hampered the government's plans to achieve self-sufficiency in critical minerals.

Under the United Nations Framework for Classification of Resources (UNFC), mineral exploration follows four stages: G4 (reconnaissance), G3 (prospecting), G2 (general exploration), and G1 (detailed exploration). The G4 and G3 stages provide low-confidence resource estimates, while the G2 stage represents moderate confidence. The G1 stage offers high-confidence estimates, derived from detailed investigations and direct sampling. In India, only 10% of mineral blocks are designated for mining leases, and are typically auctioned at the G2 level, while G1 auction is almost non-existent.

"The reluctance among experienced private and foreign players is because the recovery rate for these minerals in India is very low, and requires extensive investments in exploration, refining, production facilities and technology," Misra explained. He also noted that companies with no demonstrated expertise in mineral processing are entering the critical mineral segment.

Apart from limited exploration and mining, the non-availability of beneficiation technologies is also a problem. "Geopolitical risks and dearth of funding opportunities due to adverse risk perception are challenges," according to Suvendu Bose, partner, Grant Thornton Bharat.

"Mining projects usually take over a decade to start commercial production. The government must act swiftly by offering incentives and ensuring pre-embedded clearances for critical mineral blocks," BK Bhatia, director general, Federation of Indian Mineral Industries, said. On average, it takes over 16 years to develop lithium mines from the discovery stage to the first production. However, the actual time frame can vary significantly based on factors like mine type (hard rock versus brine) and location.

The Geological Survey of India has undertaken 368 exploration projects for critical minerals over the past three years, with 195 projects underway in FY25, and plans to initiate 227 projects for various critical minerals in FY26.

Overall, while the policy push might have started creating an enabling environment, further focus on auction efficiency, investor confidence, and infrastructure will be crucial, said an analyst.

The scale and speed still need to catch up with the surging demand for EVs and energy storage, says Rajat Verma, founder and CEO, Lohum. "Only a fraction of India's large mineral reserves have been explored and utilised, leaving significant potential untapped, especially for lithium, copper, and cobalt," Verma said.

India's pursuit of minerals is also likely to face challenges due to China's significant presence on the continent. Adding to India's woes, China's export controls have forced the importing countries to look for alternative sources, squeezing the supplies available for India.

A trade deal with Africa will assist India in meeting its mineral requirements, industry players feel. However, here too, there are possible impediments. "The Centre may face challenges in navigating any trade alliances with Africa, particularly in view of the prevailing local socio-political issues. China's dominance in African countries may also impede our progress," Bhatia said. "We need to address these issues at the government-to-government level before entering into such alliances," he added.

Rajib Maitra, partner, Deloitte India, said India's heavy import dependence makes it vulnerable not only to trade disruptions but also to price shocks and supply bottlenecks. Analysts suggest incentivising the setting up of processing plants by providing capital incentives, tax holidays and viability gap funding. "A clear-cut policy for critical minerals needs to be developed, with a focused approach to encourage exploration, processing and downstream value addition," said Bose.

(Tomorrow: Is auction the best way to lure investors?)

Why startups prefer to take the confidential pre-filing route

6 • PG | 619 • Sqcm | 426811 • AVE | 176.59K • Cir | Bottom Left

Delhi • Kochi • Chennai • Pune • Bengaluru • Chandigarh • Mumbai • Ahmedabad • Hyderabad • Bhubaneshwar • Kolkata • Lucknow

What is confidential pre-filing?

CONFIDENTIAL FILING OF the draft red herring prospectus (DRHP) allows companies planning to go for a public float to submit their DRHP to the Securities and Exchange Board of India (Sebi) and the relevant stock exchanges (NSE and BSE) in a non-public or confidential manner. Simply put, a company files a DRHP, but it is not made public until a later stage when it decides to proceed with its initial public offer (IPO). Confidential filings are very common in the US, the UK and Canada, particularly among high-growth and tech-led companies.

Tata Play (formerly called Tata Sky) was the first company in India to take the confidential pre-filing route for its IPO in December 2022 after Sebi introduced confidential pre-filing of IPO documents as an optional alternative tool. Some other companies that followed suit include Groww, Shiprocket, boAt, PhysicsWallah, Swiggy, Vishal Mega Mart, and more recently, Aequs. The share of total confidential pre-filings in total filings has increased from 2% in 2023 to 10% in 2025, as of May 2025, per Sebi and other public data.

LISTING ON THE EXCHANGES

Why startups prefer to take the confidential pre-filing route

A number of startups have taken the confidential pre-filing route since the markets regulator introduced it in 2022. The ability to gauge qualified investors' interest without disclosing sensitive business information to the public make it a preferred option for startups, explains ***S Shanthi***

STARTUPS SUCH AS GROWW, SHIPROCKET, PHYSICSWALLAH, BOAT & SWIGGY HAVE CHOSEN THE CONFIDENTIAL PRE-FILING ROUTE

10%

OF TOTAL FILINGS IN 2025 ARE CONFIDENTIAL PRE-FILINGS AGAINST JUST 2% IN 2023

What are the strategic advantages?

CONFIDENTIAL PRE-FILING ALLOWS firms to balance regulatory compliance with strategic discretion. They can quietly fix compliance or disclosure gaps based on Sebi's observations without reputational risk. "It gives companies early visibility into Sebi's feedback. This allows them to refine disclosures and address issues privately," Kartikeya Prakash, partner, Khaitan & Co, said. It also gives more time to prepare and market the issue, enabling firms to better align with market conditions. Sebi has allowed an 18-month window post initial observations for an IPO via the pre-filing route and 12 months to launch an IPO after final observations under the regular route. More importantly, by deferring public disclosure, firms can shield sensitive financial and operational data from competitors, maintaining confidentiality until the IPO is announced.

Why more startups go for it

STARTUPS OFTEN HAVE unique or evolving business models and may not be sure of how Sebi will view them. "The confidential filing allows them to gauge qualified investor interest while keeping sensitive business information such as KPIs and operational disclosures confidential. It allows firms to start parallel road-shows with qualified institutional buyers (QIBs) to get a sense of the demand and valuations," says Adeepto Saha, executive director, Deloitte India. This way, if investor interest doesn't match expectations or if the markets fall, firms can choose not to go ahead with an IPO while still keeping sensitive business information confidential. Analysts say legacy firms tend to differentiate themselves on their ability to better others at execution and/or deploy capital effectively. "Such differentiators take time and expertise to develop, thus, public disclosures pose limited risk of competitors emulating their strengths quickly," he adds.

How is the process different?

SEBI SCRUTINY AND compliance expectations remain the same—issuers must still address all regulatory comments. "The confidential filing process begins with submitting a draft prospectus to Sebi, akin to public filings. The regulatory review remains rigorous, ensuring compliance with all applicable standards," says Ramakrishnan Subramaniam, managing director, capital markets advisory, PwC India. Pre-filing, however, introduces another layer in the process, with extra documentation and an interim filing before the final offer document is made public. Another difference is the requirement for a 21-day public notice period during which a confidentially filed offer document must be made available publicly for comments, say experts. "This is done to allow members of the public, including competitors and vendors, to review and comment on the offer documents. This is a necessary step before companies are allowed to publicly raise funds and is aimed at protecting all groups of public market investors," Saha said.

Are there any disadvantages?

THE PRE-FILING MECHANISM does have some disadvantages. For instance, adjustments based on Sebi's feedback can lead to delays in progression, requiring patience and adaptability. Limited early public sentiment is another challenge as when compared to a regular filing process, here the offer documents are not available for public review and comments from the day of filing a DRHP. "Absence of early public data can hinder preliminary investor sentiment analysis, limiting broader market visibility until the offering is ready to be unveiled," Subramaniam says. Again, during the confidential stage, firms can only approach a limited number of QIBs, and all communication must be strictly within the boundaries of the filed draft. Pre-filing also introduces another layer in the process, with extra documentation and an interim filing. "This additional step may lead to costs, including legal, banking, and compliance expenses, increasing and may marginally extend the IPO timeline," Prakash says.

CA firms urge easing of rules in Big Four push

DOMESTIC CA FIRMS are seeking relaxed norms as the government pursues PM Modi's vision of building India's own 'Big Four' advisory firms, reports **Manu Kaushik.** ■ PAGE 3

Local CA firms seek relief in Big 4 push

MANU KAUSHIK
New Delhi, June 13

NEED FOR CHANGE

- Key obstacles cited include capital constraints, a ban on advertising, and limited government support
- As per the CA Act, ICAI membership is mandatory to own and operate a CA firm in the country

- The law indirectly precludes non-ICAI members from holding a stake in CA firms
- Code of Ethics prevents CAs from entering into a partnership with a person who is not an ICAI member

DOMESTIC CHARTERED ACCOUNTANT (CA) firms are seeking relaxation of existing norms even as the government works toward Prime Minister Narendra Modi's vision of creating India's own "Big Four" advisory firms. The firms have raised concerns over current regulations under the Chartered Accountants Act, 1949, and the Code of Ethics, which they say are hindering their ability to scale. Key obstacles cited include capital constraints, a ban on advertising, and limited government support.

"Many small and mid-tier firms want to grow in size, but the regulations are not supportive. Unlike the US and the UK, where the audit firms are allowed to raise public and private capital, the Indian firms are restricted from doing so by the CA Act," said the head of an audit firm.

As per the CA Act, the Institute of Chartered Accountants of India (ICAI) membership is mandatory to own and operate a CA firm in the country. The law also indirectly precludes non-ICAI members, including public or private investors, from holding a stake in CA firms, thereby preventing any capital infusion from non-CA firms. Similarly, the Code of Ethics prevents CAs from entering into a partnership with a person who is not an ICAI member.

The Prime Minister's Office (PMO) recently held a meeting with senior officials from the ministry of corporate affairs (MCA) and the finance ministry to discuss necessary policy interventions and chart a path for creating large Indian advisory firms capable of competing with the Big Four — EY, KPMG, PwC, and Deloitte.

A senior partner with a mid-tier firm told *FE* that there's a lack of a level playing field for the domestic firms, who are not allowed to advertise their services under the law. "The big audit firms get to advertise through their consulting arms, but for us, it's strictly not allowed. We believe that certain relaxation pertaining to advertisement should be there within the broader purview of regulations," he said.

The part-I of the First Schedule to the Act prohibits a CA from soliciting clients or professional work either directly or indirectly by circular, advertisement, personal communication or interview or by any other means.

The local firms said that India needs to follow the "China model" of promoting domestic firms, wherein the Chinese government has informally told its state-owned companies to stop renewing contracts with the Big Four firms, and prefer local auditors, to put a check on the growing influence of foreign audit firms.

Just like China, India also aspires to counter the rising dominance of the Big Four. In FY25, the top audit firms cemented their position within corporate India as more firms engaged with Big 6 firms to get their audit work done.

GST rate on sin goods and cars may increase

1,12 • PG | 449 • Sqcm | 397585 • AVE | 175K • Cir | Top Center,Top Left

TAX HIKE SUBJECT TO 40% RATE CAP

GST rate on sin goods and cars may increase

- Compensation levy likely to go in March 2026, but other cesses may take effect

PRASANTA SAHU
New Delhi, June 15

THE PROPOSED REVISION in the structure of the Goods and Services Tax (GAT) slabs may not raise the weighted average levy but is likely to keep the tax incidence on "demerit and luxury goods" at roughly the current levels.

While the compensation cess levied on these goods is likely to be dispensed with, effective FY27, other imposts like health or clean energy cess may be applied, sources said.

A higher tax rate on items like tobacco products, aerated drinks and cars, up from the current 28%, subject to a 40% rate cap mandated under the GST Act, is under consideration in official circles.

Currently, the tax incidence on these items is the result of the combined effect of the 28% slab rate and the compensation cess and ranges between 29-50%.

The need for a rate hike on demerit and luxury goods arises, as the removal of the compensation cess will otherwise reduce the tax incidence on them.

The other cesses that are being considered will be of lesser magnitude than the compensation levy.

According to the sources, the GST Council is expected to meet in June-July with a heavy agenda to discuss the much-awaited rate rationalisation/simplification, and the future of the compensation cess.

Continued on Page 12

UNDER CONSIDERATION

- A higher tax rate on items like tobacco products, aerated drinks and cars, up from the current 28%, subject to a **40%** rate cap mandated under the GST Act, is under consideration
- Currently, the tax incidence on these items is the result of the combined effect of the **28%** slab rate and cess
- Of the gross GST revenues, the **18% slab contributes 65%**, followed by **28% (16%), 5% (10%)** and **12% slabs (18%)**
- The remaining 1% comes from other special rates being applied on gold, etc
- The GST Council is expected to meet in June-July with a heavy agenda to discuss the rate rationalisation
- The discussions are focused on whether the 28% slab rate should be increased to 35% or 40%

GST rate on sin goods, cars may go up

THE OBJECTIVE IS to ensure that consumers, government, and industry benefit from the cessation of the compensation cess and the rate rationalisation process.

There are four major GST slabs at present —5%, 12%, 18% and 28%. The central and state GST officers are currently deliberating a reduction in the number of slabs to two, possibly by abolishing the 12% slab. Several goods, including some food items, could move to the 5% slab, if the 12% rate is done away with, while some could shift to the higher slab of 18%.

Of the gross GST revenues, the 18% slab contributes around 65%, followed by the 28% slab (16%), 5% (10%) and 12% slabs (18%). The remaining 1% comes from other special rates being applied on rate for gold, jewellery and precious stones. The discussions, sources said, are focused on whether the 28% slab rate should be increased to 35% or 40% after the compensation cess comes to an end, latest by March 2026.

Sources said various panels on rate rationalisation are discussing the options, with inputs from industry. No final view has been taken by them on GST rates, slabs and the future of compensation cess. The way forward on cess will be decided once a consensus is worked out on tax rates and slab restructuring, the sources added.

The clean energy cess, which was introduced in 2010, is applied on coal at a rate of ₹400 per tonne. This cess was renamed to clean environment cess and was later merged into the GST cess meant to compensate the states for GST revenue losses. Currently, health and education cess are payable at 4% on income tax. The clean energy cess and health cess, if collected, could be channelised for welfare programmes to be implemented.

The GoM on GST rates rationalisation, headed by Bihar deputy chief minister Samrat Chaudhary, submitted its report in December 2024. On the table, at the next Council meeting would also be a proposal to reduce the health and life insurance tax rate to 5% from 18% while retaining the input tax credit. "While insurance companies are keen on a lower rate of 5% with full ITC on health cover and term plans, the auto sector would be awaiting a confirmation on the cessation of the compensation cess on automobiles from April 1, 202," said M S Mani , Partner- Indirect Taxes, Deloitte India. Businesses would expect that the rate rationalisation committees' report should lead to a reduction in the number of rate slabs, which will simply GST, Mani said. The GoM on compensation cess, headed by minister of state for finance Pankaj Chaudhary, is looking into the future of the levy beyond March 2026. As of now, the cess is being levied on luxury and sin goods but is being utilised only for paying back loans taken during the Covid period to bridge the cess kitty in the initial five years of GST when the states enjoyed a revenue guarantee.

As per calculations, the interest and principal of the ₹2.69 lakh crore loan would be repaid by January 2026. The collection from the compensation cess in February and March 2026, estimated to be ₹40,000 crore, could be distributed equally between the Centre and states.

How CFOs can drive personal branding

8 • PG | 243 • Sqcm | 38926 • AVE | 105K • Cir | Bottom Left

Lucknow

How CFOs can drive personal branding

THE ROLE OF a chief financial officer (CFO) has been redefined after evolving at an unprecedented pace. Chief executive officers (CEOs) and board members now expect CFOs to act as strategic leaders, with a forward-looking perspective on technological innovations, societal transformation, and environmental challenges. The modern CFO is called to move beyond traditional financial stewardship and embrace a broader mandate. In a world where macro forces are reshaping value creation, the CFO must become an exponential leader, driving innovation, resilience, and long-term impact.

Personal branding becomes a critical strategic asset for CFOs in this magnified leadership landscape. As they step beyond the confines of finance into broader enterprise leadership, a well-crafted personal brand can amplify their influence, attract top talent, and drive transformation. A strong personal brand positions the CFO as a trusted voice, solidifying credibility with boards, investors, employees, and external stakeholders. This visibility is essential for CFOs leading cross-functional change initiatives and fostering organisational alignment.

NANDITA PAI PALLAV CHATURVEDI

Partner and CFO program leader & partner, Deloitte India

CFOs who establish themselves as thought leaders can attract high-performing talent. Their brand reflects the organisation's leadership philosophy and cultural aspirations that resonate with the modern workforce.

Authenticity and clarity in one's personal brand make it easier to lead innovation, champion digital transformation, and advocate sustainability. Moreover, personal branding can serve as a stepping stone for CFOs aspiring to the CEO role, strengthening their visibility and influence across all enterprise levels.

How CFOs can build a compelling personal brand

Clear, confident, and consistent communication: A compelling personal brand is not built easily. It is shaped, refined, and revealed through the stories CFOs choose to tell. It begins with clarity: a deep understanding of one's strategic strengths, financial acumen, and the impact one is determined to create. It is essential to have answers to questions such as "what do you stand for when no one's watching?" and "what do you want to be remembered for in rooms you have not yet entered"?

Strategic and intentional networking: Relationships are the currency of leadership. Networking grounded in authenticity and not an agenda builds trust that no great pitch ever could. From industry panels to meaningful one-on-one dialogues, these are the spaces where reputations are born and alliances are forged.

Authentic sense of self: At the heart of it all lies character. Leadership is nothing but having a set of values. Authenticity, humility, and emotional intelligence speak louder than business forecasts. A leader demonstrating integrity sends a message stronger than any strategy slide: leadership can be both smart and human.

Thought leadership: Thought leadership is no longer optional. It is a core responsibility. The CFO who contributes ideas helps shape the financial future of industries. Whether through bold articles, forward-looking blogs, or strategic commentary, thought leadership turns expertise into influence and foresight into credibility.

Being future-ready: The most powerful brands are forward-facing. A future-ready CFO does not merely adapt; they anticipate. By leaning into ESG, digital transformation, talent strategy, and AI, they become architects of change — leaders who do not just survive disruption but define what comes next.

Practising mindfulness: Mindfulness equips CFOs to manage their thoughts and emotions with clarity and composure. This enhances their ability to lead with empathy and influence those around them. In high-pressure environments, a mindful leader brings calm, focus, and presence to every decision.

In today's dynamic business landscape, personal branding is no longer optional for an exponential CFO. It is a key enabler of leadership, influence, and impact. CFOs have long been recognised for their ability to drive business performance. Now, it is time for them to be equally acknowledged for the strength of their personal brand, which is a potential differentiator between a good CFO and a genuinely great one.

New Delhi eyes critical minerals

MUKESH JAGOTA
New Delhi, June 18

THE RESUMPTION OF negotiations on the free trade agreement and efforts towards normalisation of ties between India and Canada provides New Delhi an opportunity to tap another source of critical minerals as it seeks to diversify its supply base.

The recent curbs by China on supplies of some key minerals like Rare Earth Magnets has added urgency to the task. As Prime Minister Narendra Modi met Canada's Prime Minister Mark Carney to reset the ties after more than 20 months of estrangement, the discussions were also held on opportunities for future collaboration in critical minerals.

"A trade pact could pave the way for structured cooperation in mineral exploration, joint ventures, and technology sharing, helping India build a more resilient and secure supply chain. This could be the beginning of enhanced energy cooperation, access to advanced technologies, and defence partnership between the two nations," economist at Deloitte India Rumki Majumdar said.

Canada has significant deposits of critical minerals. It is also a significant exporter of these minerals in the world with exports exceeding $50 billion in 2023.

The US remains its biggest market taking in almost 80% of the production. The recent US tariff measures - including those on critical minerals - have prompted Canada to seek new trade opportunities.

LIFETIME ACHIEVEMENT AWARD: N SRINIVASAN

Work remains worship for this turnaround veteran

FE CFO awards 2025

NARAYANAN V
Chennai, June 18

NATARAJAN SRINIVASAN doesn't believe in firefighting. Yet, his leadership career spanning over three decades has been defined by just that. As managing director of Cholamandalam Investment and Finance Company (then Cholamandalam DBS Finance), Srinivasan was instrumental in steering the shadow lender back from the brink in the aftermath of the 2008 global financial crisis.

His call to exit the risky unsecured business, negotiate the withdrawal of joint venture partner DBS Bank, and execute a large-scale restructuring resulted in the dramatic turnaround of Chola Finance. A company once saddled with nearly ₹4,000 crore in non-performing assets transformed into a financial powerhouse managing over ₹1-lakh crore in assets — and, today, a crown jewel of the Murugappa Group.

The FE CFO Awards2025 jury had no hesitation in declaring Srinivasan to be one of the top financial minds in India's corporate sector and selecting him for the Lifetime Achievement award.

Indeed, Srinivasan has been the Murugappa Group's go-to person for complex restructurings, tough negotiations, and high-stakes legal battles.

SHYAM KR PRASAD

Whether it's representing group firms in court or hammering out terms with global investors, Srinivasan's deep financial insights have made him indispensable. The behind-the-scenes negotiations with Japan's Mitsui Sumitomo to increase its stake in Cholamandalam MS General Insurance from 26% to 40% is one such example.

His business acumen and grasp of legal and regulatory frameworks even caught the attention of the government. In 2018, amid one of India's most high-profile financial collapses, Srinivasan was appointed an independent director in the newly reconstituted board of IL&FS — tasked with resolving its ₹1-lakh-crore debt crisis under the leadership of Uday Kotak.

But it was the turnaround of CG Power and Industrial Solutions that truly tested Srinivasan's resolve. He calls it the "most challenging and satisfying experience" of his career.

Deloitte.

Work remains worship for this turnaround veteran

WHEN A MURUGAPPA Group firm acquired the troubled CG Power under the insolvency resolution process in November 2020, the company was under investigation by multiple agencies and its financial records were being scrutinised by courts for falsification. "I didn't even have a reliable balance sheet to understand the company's net worth or negotiate terms with investors," recalls Srinivasan, who was roped in as MD to turn around CG Power. He quickly assembled a team to reconstruct five years' worth of financial statements covering over 180 accounts.

The team completed the task within a record 8–9 months, against their own deadline of one-year. When the Murugappa Group took over, CG Power's market capitalisation was just ₹5,000 crore. In less than three years, it crossed ₹1-lakh crore while the company's profit also crossed ₹1,000 crore -- a recovery credited as one of the fastest turnaround stories in modern corporate India.

"My blood pressure really shot up those days. Every day, I would write this line to myself — 'Learn to manage stress without getting stressed'," Srinivasan recalls of his early days at CG Power. "Now, no matter what the problem is, I

don't let it affect me. That's the biggest lesson CG Power taught me." It wasn't just self-assurance that helped him cope.

Srinivasan is a "meticulous walker." He never misses his hour-long morning walks, often accompanied by the soothing strains of Carnatic music by favourites like Maharajapuram Santhanam, devotional chants like the Narayaneeyam or Vishnu Sahasranamam by MS Subbulakshmi. He also hums along to the tunes of old Tamil melodies by TM Soundararajan.

A stickler for time management, Srinivasan begins his day at 3:45 am every day. While he works Monday through Saturday, he sets aside Sundays to quietly reflect and plan major strategies without interruption — reserving the afternoon for family outings to nearby temples or restaurants. "I used to play chess," he says with a wry smile. "But now, there's no one on the other side of the board." His two daughters are living in the US and Singapore.

For Srinivasan, work-life balance is more about the work than the balance. "If you set out to achieve big things, some amount of compromise in personal life may be required," he says. Yet, he doesn't see it as a sacrifice — he genuinely enjoys working, a value instilled by his father, who believed that "work is worship."

When monotony occasionally creeps in — which, he insists, is rare — Srinivasan finds comfort in the quiet hills of Kodaikanal, revisiting classic Roger Federer matches, or simply unwinding with music at home. "That itself will take care of everything," he says.

After a five-year stint in Mumbai to revive CG Power, Srinivasan is now moving to Hyderabad to steer Coromandel International as its Executive vice chairman. "I've been fortunate to hold an executive position at 67," he says.

His retirement plans are no less ambitious — from mentoring startups aiming for IPOs to studying the Vedas and Upanishads, and supporting underprivileged priests with financial aid, Srinivasan has already chalked out a meaningful next chapter. But that's still some distance away.

ROUNDTABLE ON GEN NEXT IN FAMILY BUSINESS

Sebi chair chief guest at FE CFO Awards today

FE CFO awards 2025

FE BUREAU
Mumbai, June 19

TUHIN KANTA PANDEY, chairman of the Securities and Exchange Board of India (Sebi), will be the chief guest at the eighth edition of the FE CFO Awards function in Mumbai on Friday. As the Sebi chief, Pandey has demonstrated a keen understanding of the country's capital markets and has shown he can be both firm and pragmatic. "Over-regulation will kill innovation. The art of modern regulation is to ease the compliance burden while making regulation more effective," Pandey had observed soon after taking over the reins at Sebi on March 1 this year.

Indeed, the veteran administrator has reassured the markets that the regulator will not rush to roll out new rules at the cost of the development of the market. "Regulation can't be an end in itself, it should be a means to an end," is his mantra. Even as an administrator Pandey had proved his mettle. On his watch as secretary, DIPAM, central public sector enterprises (CPSEs) created an enormous amount of wealth, even outperforming the private sector. In his keynote address and subsequent fireside conversation, Pandey is expected to enlighten the audience on his vision for the country's capital markets and some of Sebi's recent initiatives.

There will also be a roundtable discussion on "Gen Next in Family Business" with Dinesh Khara, former chairman of State Bank of India; Manish Kejriwal, founder & managing partner, Kedaara Capital; Rashesh Shah, chairman, Edelweiss Group and Nilesh Shah, managing director, Kotak Mahindra Asset Management.

Sebi chair chief guest at FE CFO Awards

THE FE CFO Awards recognise the efforts of chief financial officers (CFO) across India Inc, acknowledging their untiring efforts behind the scenes. Applauding the winners of the latest round of awards will be the who's who of the country's corporate sector -- CEOs and CFOs et al.

In the individual category, Natarajan Srinivasan, executive vice chairman, Coromandel International, will take home the award for Lifetime Achievement while Atul Daga, Group CFO, Ultratech will be honoured with the CFO of the Year award.

Srinivasan has been with the Murugappa Group for many decades, working with different companies. Indeed, he has been the Murugappa Group's go-to person for complex restructurings, tough negotiations and high-stakes legal battles.

Whether it's representing group firms in court or hammering out terms with global investors, Srinivasan's deep financial insights made him indispensable.

Daga started out in a small unit of the Aditya Birla Group where he worked on financial models that nobody paid any attention to. Later, however, his work on identifying and plugging inefficiencies across plants drew the attention of the late Aditya Vikram Birla and there was no looking back. Daga rose from within the ranks to become one of the most valuable leaders in the group.

The achievements of CFOs across a host of companies — manufacturing and services — will also be rewarded. All winners were selected by a jury comprising Keki Mistry, former vice chairman and CEO, HDFC (jury chair); Ashu Suyash, former MD & CEO, Crisil; Vishakha Mulye, chief executive officer, Aditya Birla Capital; Pradip Shah, chairman, IndAsia Fund Advisors and Rajeev Gupta, founding partner, Arpwood Capital.

CHANGE MAKER awards
RECOGNISING HUMAN CATALYSTS

It is yet again the time to celebrate the unsung heroes amongst us, those who — through their actions and deeds — have deeply influenced change in society, communities, mindsets or in physical spaces to make the world a better place to live in. The *businessline* (*bl*) Changemaker Awards 2025 is open for nominations.

Change is not easy. While most among us prefer *status quo*, there are those who seek change without wanting to contribute to it.

But there are a few who actually take the plunge to bring about change quietly. It is these silent crusaders who need to be supported and celebrated.

If you, the reader, know of those people who have brought about change in your community or in society at large, please support them by nominating them for the bl Changemaker Awards 2025.

They are the people who need to be felicitated for their pathbreaking efforts to positively impact the world. Individuals who have been change agents can also nominate themselves.

Six editions of the awards have been held since 2018, the year *The Hindu businessline* stepped into its 25th year of publishing.

The 2021 edition could not be held due to the pandemic. Now, work on the 2025 edition of the Changemaker Awards has begun. The nomination window is open till June 30 midnight.

FIVE CATEGORIES

Nominations can be made across five categories of awards — Changemaker: Social Transformation; Changemaker: Digital Transformation; Changemaker: Financial Transformation; Young Changemaker; and Iconic Changemaker. One flagship award goes to the Changemaker of the Year, which is awarded to a person or an organisation that has ushered in far-reaching change.

THE PROCESS

Once the nomination window closes, the applications will be screened and evaluated by *businessline* along with our knowledge partners (Deloitte and Ashoka).

The shortlisted nominees will be validated by our validation partner (Niiti Consulting) before the list is sent to an independent jury to pick the winners in each category.

2024 WINNERS

In 2024, the Integral Coach Factory (ICF) in Chennai, the world's largest railway coach manufacturer that has redefined Indian rail travel with the Vande Bharat trains, setting new benchmarks in speed, comfort and safety, was awarded Changemaker of the Year.

The Iconic Changemaker of the Year award went to Prof Ashok Jhunjhunwala, a visionary innovator, who transformed communication, mobile payments, energy and entrepreneurship in India, pioneering impactful solutions and fostering a thriving ecosystem at the IIT-Madras Research Park that has empowered scores of entrepreneurs.

For Financial Transformation, the award went to Mann Deshi Bank, which has become a powerful force for change, economically and socially empowering rural women across Maharashtra, transforming a quest for justice in Mhaswad into a movement of widespread empowerment.

The award for Digital Transformation went to Molbio Diagnostics which, through its Truenat platform, revolutionised healthcare by delivering lifesaving, low-cost diagnostics to resource-limited areas with timely and accurate disease detection.

The Changemaker: Social Transformation award went to the Wildlife Trust for India. The Young Changemaker award was given to D Gukesh, the youngest Indian Grandmaster to break the 2750 Elo rating.

The awards for 2024 were given away by Finance Minister Nirmala Sitharaman.

Defining the award, Raghuvir Srinivasan, Editor, *businessline*, said, "The Changemaker Awards exemplify the fact that we are always looking for change in a positive manner, either in business or society. These awards can be a great inspiration and recognition for those whose work has positively impacted communities and society."

If you know of a Changemaker who needs to be celebrated, now is the time to send in your nomination.

Living paycheck to paycheck

A new report by Deloitte describes how financial insecurity is widespread among India's young workforce, half of whom live paycheck to paycheck. The 14th edition of Deloitte's Gen Z and Millennial Survey 2025 which looks at the aspirations, challenges and priorities of India's young workforce shows how much work organisations need to do to meet the expectations of their people. For instance, 62 per cent of Indian Gen Z and 56 per cent millennials want more guidance from their managers, but only 44 per cent and 47 per cent, respectively, feel they receive it. It also finds that 85 per cent of the young workforce is already using GenAI in daily work. For the younger workforce, there is a strong desire for purpose and meaning in their careers and many reject employers based on personal values, finds the report.

India's PE success story

PE deals have soared in recent years

Nishesh Dalal

India surged ahead as the only country with double-digit growth in both deal value and count, driven by an evident investor tilt towards control deals.

Buyout deals in India have grown fourfold since 2010. In 2024 alone, buyouts in India accounted for more than half of the PE activity in the country.

This shift reflects investors' increasing focus on driving value creation, overseeing financial activities and reducing risks of fraud or mismanagement, amid macroeconomic uncertainties.

BUYOUT DEALS. Surging ahead

GETTY IMAGES

THE DRIVERS

Desire for operational control and value creation: PE investors prefer buyout/control deals to actively manage portfolio companies, implement improvements and drive strategic growth to offer stability.

The need for exit clarity: Control deals provide PEs with a structured framework and greater certainty around the timing and terms and conditions of their exit, often with "drag along" rights. This helps them plan their exit strategies more effectively and manage risks associated with valuation and market conditions.

Institutionalisation of family-run businesses: We have a new generation of entrepreneurs that are open to external investment, often driven by succession issues and the need for professional expertise.

A shared investment model: Domestic LPs are co-investing with GPs, enabling risk-sharing on large deals. This strategy encourages PE firms to pursue bigger, more complex investments.

India's current economic stability and growth: India's stable GDP growth and controlled inflation have created a favourable macroeconomic environment, encouraging PE firms to pursue control deals for long-term value.

Regulatory reforms and ease of doing business: Continuous reforms in regulations, including the Companies Act, SEBI regulations and FDI policies, coupled with a marked decline in red tape, have simplified investment approvals.

Multi-sectoral opportunities: Large-scale infrastructure assets (e.g. telecom towers), tech platforms and financial services firms offer attractive platforms for consolidation and expansion through control investments.

Cross-border investment appeal: India's growing global influence and openness to foreign capital have attracted international PE funds seeking controlling stakes to capitalise on market potential.

THE NEW PE STRATEGY

From minority investment to balancing control and risks: PE control deals give firms majority ownership, enabling them to drive value creation, mitigate risks and professionalise businesses, but they come with higher costs (control premium), longer commitments and execution and integration challenges. These risks highlight the importance of thorough due diligence, careful post-acquisition management, structured governance and robust risk mitigation strategies in control deals.

From single bets to scalable platforms: PE firms are increasingly backing platform plays — acquiring a strong core company and building around it through strategic add-ons. The goal is to enhance market share, capabilities and reach.

From financial engineering to operational value creation: PE firms are now more inclined to form operating teams. The focus is on sector depth, active risk management and sustainable value creation — not merely capital structuring.

India's PE market should remain cautiously optimistic in 2025. Macroeconomic stability and a strong services sector will fuel consumption, while integration into global value chains — especially in electronics, semiconductors and pharma — will strengthen trade.

Despite global uncertainties, a stabilising interest rate environment, narrowing valuation gaps and Asia-Pacific's abundant dry powder stockpile position PE firms to seize high-growth opportunities with confidence and the scope to scale.

India stands out as a potential destination for high-impact buyout deals.

FUTURE FOCUS

PMO charts strategy to develop advisory firms

New Delhi: The Prime Minister's Office convened a high-level meeting to discuss fostering the growth of homegrown accounting, auditing and advisory firms, enabling them to better compete with global giants such as the Big Four — EY, PwC, KPMG and Deloitte. Chaired by Principal Secretary to the PM Shaktikanta Das, the meeting saw the participation of key officials and Sanjeev Sanyal, Member of the Prime Minister's Economic Advisory Council. p9

PMO brainstorms strategy to develop India's own global scale advisory firms

TALENT HUNT. A key rationale behind empowering domestic firms is to retain talented Indian partners who currently hold senior positions in global firms both in India and abroad

Shishir Sinha
New Delhi

The Prime Minister's Office (PMO) convened a high-level meeting on Friday to discuss fostering the growth of homegrown accounting, auditing and advisory firms, enabling them to better compete with global giants such as the big four — EY, PwC, KPMG and Deloitte.

Chaired by Principal Secretary to the Prime Minister Shaktikanta Das, the meeting saw the participation of key officials, including Secretaries from the Finance and Corporate Affairs Ministries, and Sanjeev Sanyal, Member of the Prime Minister's Economic Advisory Council.

While details of the discussions remain under wraps, sources indicated that the agenda likely focused on the overall business landscape for Indian firms, potential incentives and capacity development initiatives. It is anticipated that domestic firms will soon be invited to share their perspectives.

SUPPORT MEASURES

The government is expected to introduce changes to regulatory mechanisms and offer incentives and preferences to bolster Indian firms. Currently, the Indian advisory and consulting market is largely dominated by the 'Big 4' global giants, who secure the majority of government contracts, significantly influencing policy formulation and implementation. Though Indian firms like Nangia & Co, Dhruva, and Grant Thornton Bharat are performing well, they require additional support to scale up.

The government is expected to introduce changes to regulatory mechanisms and offer incentives and preferences to bolster Indian firms

A key rationale behind empowering domestic firms is to retain talented Indian partners, who currently hold senior positions in global firms both in India and abroad. Strengthening homegrown capabilities would also reduce reliance on foreign consultants, particularly in sensitive areas of policy and governance, ensuring stronger domestic contributions to policymaking and implementation.

The combined revenue of the Indian arms of Deloitte, PwC, EY and KPMG reportedly reached ₹38,800 crore in FY24, with projections to exceed ₹45,000 crore in FY25. This significant revenue growth is largely driven by government projects encompassing project management, financial advice, PSU stake sale and disinvestment support.

ICAI drafts overseas network norms for CA firms

3 • PG | 132 • Sqcm | 13212 • AVE | 5K • Cir | Top Right

Pune • Hyderabad • Kochi • Bengaluru • Kolkata • Delhi • Mumbai • Chennai

ICAI drafts overseas network norms for CA firms

Shishir Sinha
New Delhi

In a strategic move to bolster India's homegrown audit, accounting, and advisory firms, the Institute of Chartered Accountants of India (ICAI) has drafted 'Overseas Network' guidelines. This aims to create a regulatory framework that fosters the development of professional networks for chartered accountancy (CA) firms, enabling them to compete more effectively on both domestic and international fronts.

The ICAI emphasises the necessity of this framework, stating, "There is a need to open up the profession of CA to a more globalised environment where India could not afford to get itself isolated."

These proposed guidelines will allow ICAI member firms to collaborate with overseas networks, both within India and abroad. The draft outlines key aspects such as registration, changes in constitution, and annual return filings, and mandates that each overseas network designates a nodal officer responsible for compliance with ICAI guidelines. This push for global competitiveness is part of a broader effort to help firms stand against international giants like EY, PwC, KPMG, and Deloitte. Complementing the overseas network guidelines are revised rules for the merger and demerger of CA firms and new guidelines for the aggregation of Limited Liability Partnerships (LLPs).

MERGER RULES

The aggregation guidelines, issued in January, allow an LLP (Indian CA firm) to partner with another LLP or CA firm. This enables firms to expand capabilities, market presence, and achieve operational efficiencies by combining resources and diversifying services.

The ICAI's revised merger and demerger guidelines aim to streamline processes and remove practical obstacles that previously hindered CA firms from pursuing such strategic consolidations. The regulator is also developing a dedicated networking portal to help members connect, share resources, and leverage complementary strengths through networking, mergers, partnerships, and collaborations.

REBOOTING INDIAN IT

Tech firms bet on AI to offset slowdown

BUILDING RESILIENCE. To stay competitive, IT firms invest in digital transformation, upskilling, and new partnerships and acquisitions

Sanjana B
Venkatesha Babu

GOLDEN MEAN. The IT services industry faces the need to balance short-term caution with long-term bets on AI ISTOCK

For 39-year-old Samir Kumar (name changed on request), a software architect, April this year was a roller coaster. In the first week, he and his wife joyfully welcomed their second child, a daughter. Less than a fortnight later, he was laid off by the leading electronics system design and manufacturing firm he was working at for the past seven years, as part of a "global restructuring of operations".

Kumar says, in the regular scheme of things, he would have found another job within days. But nearly six weeks after he was "let go", things have been tough and he blames it on the aggressive adoption of artificial intelligence (AI). He believes that a huge chunk of his erstwhile role has been automated. To a large extent, his suspicions are not unfounded, say experts.

Earlier this year, in February, Bangladeshi-British tech entrepreneur Emad Mostaque, founder of Stability AI, had warned of the impending destruction of Indian IT and business process management (BPM) sector due to AI. He said at an event that economies such as India would be impacted due to large-scale adoption of AI. Some of this is already playing out in the IT sector, but at a much smaller scale for the present, experts says.

A TIME FOR RECALIBRATION

Facing headwinds and fierce competition, India's IT services industry is undergoing a strategic recalibration — balancing short-term caution with long-term bets on AI, innovation, and global expansion. As discretionary tech spending remains tight and service commoditisation (interchangeability between providers) intensifies, experts say firms must double down on workforce upskilling, digital transformation, and the creation of IP-led, AI-driven offerings to stay relevant and resilient in a rapidly evolving global market.

According to Nasscom, the Indian IT industry was projected to close FY25 with revenues of $282.6 billion, reflecting a 5.1 per cent year-on-year increase. Growth hotspots include sub-sectors like engineering R&D and global capability centres (GCCs). This follows a four per cent revenue growth in FY24, with an anticipated acceleration to over six per cent in FY26.

Rajesh Ranjan, managing partner, Everest Group, acknowledged that IT services were grappling with macroeconomic pressures and uncertainty, tightening discretionary spending, attempts to leverage in-house models via GCCs, and demand for AI-led higher productivity.

DD Mishra, VP Analyst, Gartner, observed that as automation spreads, reliance on manual labour decreases, enhancing operational efficiency. This leads to cost reductions and creative disruptions in existing businesses.

During Wipro's Q4FY25 earnings call, CEO and MD Srini Pallia noted that the global industry environment remained largely uncertain throughout the year, compounded by recent tariff announcements. "We are speaking to clients across sectors to understand how things are playing out on the ground. Even though the underlying demand for tech reinvention remains strong, clients are approaching it more cautiously. They are focused on cost, speed, and AI-led efficiency," he commented.

"Leading IT firms are investing in building AI capabilities to enhance efficiency and client value," Mishra said.

IT firms battle AI headwinds

Annual revenue growth (CC)	FY19-20	FY20-21	FY21-22	FY22-23	FY23-24	FY24-25
TCS	7.1	-0.8	15.4	13.7	3.4	4.2
Infosys	9.8	5	19.7	15.4	1.4	4.2
HCLTech	16.7	1.1	12.7	13.7	5	4.7
Wipro	-0.4	-2.3	26.9	11.5	-4.4	-2.3

All figures are in per cent; source: company reports

MUTED GROWTH AHEAD

Joseph Anantharaju, co-Chairman and CEO of Happiest Minds Technologies, remarked that Indian IT services is recalibrating, as growth is expected to be muted in the short term. "The industry must focus on delivering business outcomes, helping customers automate their processes and workflows, leveraging AI and GenAI to create new revenue streams and optimise costs, and proactively use code automation tools to reduce IT costs and accelerate roadmaps."

He said IT firms are investing in AI research, talent, and platforms, embedding AI across the service stack — from intelligent operations to AI-powered software engineering. "To truly reinvent, the industry must move from being service providers to strategic AI partners — helping clients reimagine business models, not just processes."

Ashutosh Sharma, VP and Research Director, Forrester, added that firms can stay competitive by delivering cost-efficient solutions, meeting immediate client needs, and guiding them toward future opportunities. A similar shift played out during the early days of the digital era, when global players like Accenture, IBM, and Deloitte gained an edge by acquiring digital firms early. A deeper understanding of client requirements eventually demanded a broader transformation of systems, operations, and processes. Indian IT service providers caught up and grew significantly as digital became mainstream.

"We are in an AI-driven phase. Accenture has done fairly well because they were among the first to spot the trend. Indian IT services tend to be more cautious in catching up. Sometimes, a lack of vision may hold them back," he said.

Salil Parekh, CEO and MD, Infosys, reiterated this, saying AI is part of all discussions on new deals. During the company's Q4 earnings call, he highlighted that Infosys is embedding AI across several existing initiatives. "We see AI bringing new opportunities and projects... we saw a 4.2 per cent increase in revenue... We are seeing a growing demand from clients, who are moving from a use-case approach to an AI-led transformation approach."

K Krithivasan, CEO and MD of Tata Consultancy Services, also noted that the company's pipeline of AI and GenAI engagements has grown, with a notable rise in deal wins across both 'AI for IT' and 'AI for business' segments.

FOCUS ON OUTCOMES

FY25 witnessed a noticeable shift in the cloud market with a significant growth in sovereign cloud requirements (ensuring data is stored, processed, and governed within national borders), AI infrastructure investments, and accelerated upgrading of outdated IT systems, he observed. These trends are driven by privacy, the need for instant AI-driven decisions from live data, and demand for technological currency.

"There is evident maturity in the request for GenAI pilots, with a sharper focus on business outcomes rather than mere experimentation. We try to deploy AI in every project," commented Krithivasan during TCS' Q4 earnings call.

Everest Group's Ranjan said that while a full reboot will take time, IT service players will focus on developing an AI-trained workforce, creating more IP-led solutions, moving into tier-2/-3 locations, developing GCC-specific offerings, and targeting geographies beyond the US and UK.

"Investment in AI is increasing but is uneven and conservative compared to publicly announced GenAI commitments by global heritage providers. While there is growth in IP platforms, most are still tools to accelerate services, not standalone revenue generators. Further, most are largely undifferentiated. With agentic AI expected to play a significant role in the future, the big opportunity is to help organisations become ready to adopt the future defined by 'systems of action' (AI-driven, context-aware actions with little human intervention)," he concluded.

The Hindu Business Line • 09 Jun • Deloitte

Future-ready talent

7 • PG | 82 • Sqcm | 34824 • AVE | 63.5K • Cir | Middle Left

Mumbai • Hyderabad • Kolkata • Pune • Chennai • Bengaluru • Kochi • Delhi

Future-ready talent

According to Deloitte's Campus Workforce Trends, placement cycle 2025 reveals a rising confidence in future-ready talent, marked by a 3.91 per cent hike in campus salaries, a 15 per cent increase in hiring budgets and a 38 per cent uptick in GenAI adoption across recruitment. Employers are doubling down on skill-first strategies, fuelled by technology and purpose, from smarter screening to stronger retention. As a result, campus attrition has dropped by 300 basis points in FY25, reflecting more substantial alignment between talent potential and business needs.

The trends report says organisations are recalibrating how they engage and retain young talent in a tech-forward world to minimise the campus-to-corporate acclimatisation period. Internships are being reimagined through behavioural assessments, learning agility, technical assessments, cultural alignment, and digital DNA as pivots to early-career development. As a result, pre-placement offer conversions have surged by 24 per cent in FY25.

The report reveals a strategic shift in early-career hiring, favouring a skills-first, AI-enhanced and outcome-centric approach over conventional credentials. Cybersecurity and robotics are the top-paying tech skills in campus placements.

India must reframe US trade talks

4 • PG | 715 • Sqcm | 303901 • AVE | 63.5K • Cir | Top Center

Mumbai • Hyderabad • Kolkata • Delhi • Bengaluru • Chennai • Kochi • Pune

NARROW THE SCOPE. India should cut tariffs on 90% of US exports to India, but exclude agriculture and autos

GETTY IMAGES/ISTOCKPHOTO

AJAY SRIVASTAVA

On February 13, 2025, Prime Minister Narendra Modi and President Donald Trump launched formal talks for a Free Trade Agreement (FTA). Now, as the negotiations reach final stages, India must pause and introspect: Does this deal even qualify as an FTA? Is it a rushed deal that risks giving away too much for too little in return?

Worldwide, over 375 FTAs are currently in force. Under these agreements, all partner countries reduce their Most-Favoured-Nation (MFN) tariffs on a significant portion of their trade, as mandated by Article XXIV of the General Agreement on Tariffs and Trade (GATT) under WTO rules. MFN tariffs are the standard customs duties a country applies equally to all WTO members unless lower preferential rates are offered through an FTA. The India-US deal will not meet this criterion. While India plans to reduce its MFN tariffs to benefit thousands of US products, the US is not offering MFN tariff cuts. Instead of cutting standard MFN tariffs, the US may only reduce its special "Liberation Day" tariffs on Indian goods. These were country-specific duties it imposed on April 2 across 57 nations. For India, that tariff was set at 26 per cent.

The extra "Liberation Day" tariffs the US added on top of its MFN tariffs go beyond the WTO-bound rates — the maximum duty levels the US promised not to exceed. This makes the "Liberation Day" tariffs a clear breach of the US's WTO commitments.

Trump paused these extra tariffs on April 9 for 90 days (until July 8) to pressure countries into making quick concessions. However, even after the US tariff cut, Indian goods will still face an additional 10 per cent tariff on top of the regular US MFN tariffs. This kind of arrangement does not qualify as an FTA under WTO rules.

But incompatibility with WTO rules is not the only issue — the "Liberation Day" tariffs also break US law. Trump invoked the International Emergency Economic Powers Act (IEEPA), a law meant for national security emergencies, to impose the "Liberation Day" tariffs. However, on May 28, the US Court of International Trade ruled them illegal, finding that trade deficits are just an economic issue — not an "unusual and extraordinary threat" that justifies using IEEPA. In short, Trump overstepped the powers granted to him by Congress.

Although the US Court of Appeals has paused the ruling and given the administration until June 9 to respond, the signal is clear: the "Liberation Day" tariffs breach WTO rules and are likely to collapse under US law. Yet, Washington is using the promise of lifting these likely illegal tariffs to pressure India and others into making swift, permanent trade concessions — racing to secure deals before the tariffs' legal shelf-life runs out.

The US-UK trade deal signed on May 8 provides a sobering preview. Under that agreement, the UK slashed tariffs on over 2,500 US products, removed duties on American ethanol, and increased purchases of Boeing aircraft — while the US offered tariff cuts on fewer than 100 British products, most capped at 10 per cent. It was not a balanced FTA. Was this done hurriedly to pressure other countries to follow suit?

India must challenge the misleading US narrative that frames the bilateral trade relationship solely through the lens of goods trade deficits. While India ran a trade surplus of $44.4 billion with the US in FY2025 (Table 1), US quietly earns $80-85 billion (Table 2) annually from India through education exports, financial services, intellectual property royalties, digital operations, and arms sales. When these flows are included, the US enjoys a $35-40 billion surplus *vis-à-vis* India — hardly the picture of a disadvantaged partner.

US quietly earns $80-85 billion annually from India through education exports, financial services, intellectual property royalties, digital operations, and arms sales.

US earnings from India other than trade

Source	Estimated annual amount ($ billion)
Indian student spending in US higher education	**25** (tuition + living expenses)
Revenues of US tech giants (Google, Meta, Apple, Microsoft)	**15–20** (ads, cloud, software)
Revenues of US banks and consulting firms (Citibank, JPMorgan, McKinsey, BCG, Deloitte, PwC, KPMG)	**15–20** (financial services, corporate advisory)
Profits of Global Capability Centers (Dell, IBM, Cisco, Morgan Stanley)	**15–20**
Revenues from US pharma and auto companies (Pfizer, Merck, Ford, GM)	**2.3–3.2** (patents, licensing)
Hollywood and US streaming income (including Netflix)	**1–1.5** (box office, subscriptions)
US defence equipment	Confidential
Total estimated US earnings from India	**80–85+ annually**

GTRI estimates

RUSHING TO APPEASE

Yet, rather than assert this reality, India has rushed to appease. Since January, India has unilaterally cut import duties on bourbon whiskey, fish feed, motorcycles, satellite parts, and mobile components. It has removed a 6 per cent digital tax on US tech giants and is preparing to revise its nuclear liability law to facilitate the sale of US reactors. This pattern of concessions without reciprocal gains has emboldened Washington's negotiating stance.

Reports suggest that New Delhi is preparing to cut tariffs on sensitive sectors, such as autos and agriculture, open its government procurement market, ease intellectual property and data rules to favour US tech and pharmaceutical companies, and clear foreign access for players like Elon Musk's Starlink. These shifts would have wide-reaching effects across India's economy.

The risks of going too far are real. India's recent agreement with the UK, for example, included an unprecedented cut in car import tariffs from 100 per cent to 10 per cent, even covering electric and hybrid vehicles where India is just starting to build capacity. Such moves when followed in FTAs with the US and EU could discourage foreign investment in local manufacturing, as global firms may export directly rather than set up factories in India.

India's best bet is to reframe the negotiation. Instead of a broad FTA covering goods, services, digital trade, and regulations, India should propose a narrow, goods-only "zero-for-zero" deal: cut tariffs on 90 per cent of US exports to India but exclude sensitive sectors such as agriculture and autos. This would meet Washington's primary demand on tariffs, deliver clear wins for US exporters, and protect India's regulatory space. It would also mirror the approach taken by the EU, which has proposed zero-for-zero tariff deals on industrial goods with the US.

If India accepts US terms, the cost will be heavy. One-sided tariff cuts, rule changes, and market openings would give US exporters long-term benefits, while the temporary "Liberation Day" tariffs would vanish on their own. These US tariffs won't last, but India's concessions would. Instead of rushing into an unequal deal, India should aim for a narrow, fair agreement focused on industrial goods to protect its core economic and strategic interests. If the US won't agree to fair, reciprocal terms, India should walk away. No deal is better than a bad deal — and right now, what's on offer is a bad deal.

Deloitte launches APAC CoE for Agentic AI

Our Bureau
Bengaluru

Deloitte has launched an Asia Pacific Agentic AI Centre of Excellence (CoE) to help organisations across the region harness agentic AI at scale. The CoE leverages Deloitte's alliances and platforms to help clients design, build and deploy digital workforces at scale.

Located in India, Malaysia and Singapore, the CoE brings together over 6,000 practitioners across the Asia Pacific region, supporting a pipeline of AI implementations valued at more than $1 billion.

"The launch of the Asia Pacific Agentic AI CoE represents a significant step forward in how we approach human-AI collaboration in India. This centre positions us to help clients reimagine the very nature of work, going beyond automation and efficiency to unlock entirely new sources of value. Our focus is to help clients navigate this shift responsibly, building an AI-powered future that is innovative and resilient," said Sathish Gopalaiah, President, Technology & Transformation, Deloitte South Asia.

The company also stated that the new CoE would offer organisations a combination of deep industry insight and cutting-edge technology to drive meaningful AI transformation.

The move comes at a time when the global accounting firm is targeting a 4x growth in its revenue from the India business to $5 billion or ₹40,000 crore by 2030.

Hyderabad • Pune • Mumbai • Delhi • Kochi • Kolkata • Bengaluru

Sikkim HC orders refund of ITC on closure of business

Shishir Sinha
New Delhi

In a significant ruling with far-reaching policy implications, the Sikkim High Court has allowed the refund claim of accumulated input tax credit (ITC) upon the closure of a business. This decision addresses a critical gap in the current goods and services tax (GST) legislation as the law does not explicitly specify business closure as a reason for allowing such refunds.

Justice Meenakshi Madan Rai, in a ruling pronounced on Tuesday, emphasised, "Section 54(3) of the CGST Act deals only with two circumstances where refunds can be made; however, the statute also does not provide for retention of tax without the authority of law. Consequently, I am of the considered view that the petitioners are entitled to the refund of unutilised ITC claimed by them and it is ordered so."

LIMITED OPTIONS

The existing Section 54(3) of the CGST Act permits ITC refunds only in two specific scenarios — one, zero-rated supplies made without payment of tax; and two, where credit has accumulated due to the rate of tax on inputs being higher than the rate on output supplies (excluding nil-rated or fully exempt supplies), except when notified by the government.

KEY ORDER. Court ruled in favour of the petitioner who had accumulated over ₹4.37 crore in unutilised ITC due to the closure of its manufacturing unit and claimed refund

The petitioner, SICPA India Pvt Ltd, had accumulated over ₹4.37 crore in unutilised ITC due to the closure of its manufacturing unit in Sikkim and claimed refund of the unutilised ITC balance.

However, its appeal was rejected by the tax administration as the CGST Act permits refund of accumulated ITC only in specific cases. Refund of ITC balance upon business closure is not covered under Section 54(3). Aggrieved by the rejection, the company approached the High Court.

The court relied on principles from the erstwhile indirect tax regime like the Karnataka High Court's decision in M/s Slovak India on CENVAT credit rules. It observed that there is no restriction expressed in Sections 49(6) or 54 of the CGST Act that bars refund of accumulated ITC on business closure and accordingly allowed the appeal. It is expected now that the Revenue Department will move the higher court in appeal.

'SETS A PRECEDENT'

Commenting on the ruling, Harpreet Singh, Partner, Indirect tax at Deloitte, said, "The above decision is the first-of-its-kind under the GST regime, where the court referred to Section 49(6) of the CGST Act and jurisprudence from the erstwhile regime to allow refund of accumulated ITC on account of business closure. This sets an important precedent for entities winding up operations with unutilised ITC."

Indian audit firms must raise the bar

PUSH FORWARD. To challenge multinationals, Indian CA firms need to focus on knowledge sharing, detailed documentation and tie-ups with global accounting networks

PS KUMAR

Newspapers recently reported that the Prime Minister's Office (PMO) is looking at creating large home-grown consulting and audit firms that can rival the multinational 'Big 4' firms. In audits, multinational firms (MNFs) operate through network firms in various countries under a common name. For those who are not aware, the Big 4 are: Deloitte, PWC, EY and KPMG. The other MNFs are smaller than the Big 4, but vastly larger than purely Indian firms and therefore, logically should also be taken into account.

Incidentally, the issue of a few MNFs dominating the marketplace is not peculiar to India. In the UK, the top 100 companies listed in the FTSE Exchange are/were all audited by the Big 4 and the regulators have pondered over the acceptability of oligopolistic dominance in the marketplace. Interestingly, some of the MNFs outside the Big 4 (also present in India) have themselves vociferously argued against the dominance of the Big 4 in the US and European markets.

About three decades ago, there were the Big 8, which became the Big 5 through mergers. And then one of the firms went out of business on account of a major audit failure, thus becoming the Big 4. The dominance of the Big 4 is the direct result of the economy opening up in 1990 to foreign investment.

BRAND POWER

The discussion is not about pulling down the MNFs, rather, to enable Indian accounting firms evolve into challenger-firms that would offer healthy competition. The MNFs enjoy a high degree of trust in the global marketplace, something that they have earned over the years. While Indian firms have also commanded recognition for their trustworthiness and quality of work, it tended to be local and unknown abroad.

As the Indian economy globalised, the governance practices, the accounting frameworks, etc., became aligned with global practices. The overseas investors and lenders naturally preferred a system which provided them with a degree of comfort in key functions such as accounting and audit of financial statements.

RISK OF DE-SKILLING

Depriving the Indian profession of opportunities would mean de-skilling lakhs of chartered accountants just when the growing economy needed them. There is a historic precedent. Over five or six decades ago, audit of banks and insurance companies was dominated by a handful of firms. Once these entities were nationalised, by way of a collateral benefit, the skills and the knowledge required for audit of these entities were disseminated to a vast number of professionals.

The Indian accounting qualification is world-class and it would be a colossal national waste if it were to be neglected.

JOINT AUDIT, A SOLUTION?

In practice, very often, where overseas investment comes in, the shareholders agreements and the loan documents insist on appointment of the Big 4. Whether the Competition Act, 2002, which is designed to prevent anti-competitive practices, is violated is a question that requires examination. However, this is not an ideal solution since it is time-consuming.

One possible solution is that, as was contemplated about five or six years ago, the top companies could be asked to have joint-auditors comprising one MNF auditor and one Indian auditor.

Faced with competition and client-expectations, Indian firms are enhancing their technology resources on a continuous basis

However, as a corollary, it must be ensured that the audit fee should be shared equally and not skewed in favour of the MNF firm as usually happens.

GROUP AUDITS

Group company audits — that is, where a parent company's financial statements are consolidated with its subsidiaries, associates and joint ventures — are required to be conducted in a seamless manner. Generally and in some jurisdictions specifically, the parent company auditors bear the responsibility for the overall group consolidated statements with the result that the parent company auditors are reluctant to share group audits. While Indian firms do not have the resources and the reach that the MNFs have in global group audits, one way to encourage the distribution of audits of is by appointing Indian firms for auditing the local subsidiaries, etc.

The National Financial Reporting Authority (NFRA) recently enhanced the oversight of the parent company's auditors over the auditors of subsidiaries, associates, and joint ventures where other auditors are involved. This has enhanced the involvement of parent companies' auditors.

Years ago, a view had gained currency that the size and the magnitude of resources controlled by the Big 4 give them a high degree of independence and an invulnerability to being influenced by clients. However, this is a specious argument.

As has been said time and again, independence and integrity, the key attributes required in auditing profession, are a state of mind that no one group can claim ownership of.

Undoubtedly, the contribution by the Big 4 to the Indian auditing profession is immense. Faced with competition and client-expectations, Indian firms are enhancing their technology resources on a continuous basis.

What the Big 4 does extremely well is that, knowledge gained is valued, stored and the accessibility within the firms is ensured. This coupled with the need for detailed documentation is another area in which Indian firms have invested substantially and have enhanced quality control mechanisms.

The Institute of Chartered Accountants of India (ICAI) has been guiding all the way. Recently, the ICAI approved a draft regulatory framework for Indian CA firms to tie up with global accounting networks. The proposal to build Indian firms that could face up to the Big 4 and other MFNs is not a day too soon. It needs a level-playing field which is where the Central Government can play a major role. And so the message to the Indian professionals — please heed the clarion call.

Delhi

Urban consumers spend 50% on packaged foods

TBG NETWORK
NEW DELHI

Urban consumers allocate nearly 50 per cent of their food budgets to packaged and prepared foods, giving a significant boost to the FMCG sector, said a recent Deloitte-FICCI report. The report further adds that the rural Fast-Moving Consumer Goods (FMCG) volumes experienced a 6 per cent growth in the third quarter of the financial year 2024 (Q3 FY24). "Urban elites increasingly spend 50 per cent of their food budget on packaged foods, dining out and deliveries, while rural consumption is shifting from cereals to beverages and processed foods," the report added.

The agriculture and food processing sector, representing nearly 30 per cent of the national food market, is gaining momentum due to rising rural demand, digital advancements and strong policy support. The report adds that with a valuation of about USD 160 billion, the agriculture and food processing sector reflects India's economic rise, marked by the country's rank as the fifth-largest economy and a doubling of per capita income to Rs 1.97 lakh over the past nine years. With consumption trends aligning across urban and rural India, Tier-2 and Tier-3 cities are fast becoming engines of economic growth, the report said.

With consumption trends aligning across urban and rural India, Tier-2 and Tier-3 cities are fast becoming engines of economic growth, the report said. Observing the trends, Anand Ramanathan, Partner & Consumer Industry Leader, Deloitte South Asia, said, "India's agri and food processing sector is on the brink of a transformative leap, where tradition meets cutting-edge technology.

P2

Urban consumers

to build a future-ready food ecosystem. Consumer demand is shifting towards clean-label, protein-rich and gut-friendly foods, driving a structural evolution in how India consumes food." He added that India is poised to lead the global narrative on health-driven, tech-enabled and inclusive food systems, fuelled by advancements in AI, IoT and blockchain. "The way forward lies in purposeful collaboration among policymakers, industry players and innovators to build resilient supply chains, empower farmers and entrepreneurs, and cater to a conscious, global consumer," Ramanathan added. The report says that the premiumisation of products is also an emerging trend, with higher-income consumers driving growth through demand for quality, convenience and indulgence. There is also a rising curiosity around global cuisines and regional flavours, marking a convergence of heritage and innovation in consumer preferences. The Deloitte-FICCI report observed that global research and development (R&D) hubs and startups are reformulating products for Indian tastes, focusing on health-conscious features such as clean labels, protein enrichment and gut health.

Delhi

India's digital forensics to hit $1.39B by FY30

TBG NETWORK
NEW DELHI

India's digital forensics market is expected to grow more than triple the global average of 11 per cent to hit USD 1.39 billion (Rs 11,829 crore) by the financial year 2029-30, according to a joint report by Deloitte-DSCI. As per the report, the Indian digital forensic market will grow at a Compounded Annual Growth Rate (CAGR) of 40 per cent. The digital forensics market refers to the collection and analysis of digital evidence for legal or investigative purposes. The report said that the rise of the forensic market signals a pivot in India's digital crime and cybersecurity readiness approach. Mobile forensics now dominates the sector, accounting for about 51 per cent of the market, driven by the boom in smartphone usage, digital payments and mobile-centric cybercrime. With 81 per cent of demand coming from the public sector, particularly law enforcement, the report highlights the growing reliance on forensic tech to combat sophisticated digital threats.»As India's digital economy rapidly expands, so too does the scale and complexity of cyber threats. In this evolving landscape, from financial fraud and data breaches to sophisticated cross-border attacks, digital forensics has moved from a reactive tool to a strategic capability," said Nikhil Bedi, Leader, Risk, Regulatory & Forensic, Deloitte India. "With growing public sector demand and emerging private sector participation, the potential to shape a globally competitive forensic industry is within reach. While we are witnessing the cyber security industry ecosystem maturing, we need to emulate similar for the digital forensics industry," said Vinayak Godse, CEO, Data Security Council of India (DSCI). The report recommended a strategic roadmap centred on boosting Indigenous Research & Development (R&D). The R&D, as per the report, is critical to reducing import dependence. Expansion of education and certification programmes will bridge the projected shortfall of 90,000 forensic professionals. The report also recommended modernisation of national infrastructure with advanced labs and regional Centres of Excellence. Strengthening public-private partnerships, streamlining procurement and introducing unified regulatory standards will be critical to improving cross-border investigation capabilities and digital crime response, the report recommended.

DELOITTE REPORT

Indian GCCs emerge as hubs for complex tax operations

CORRESPONDENT

NEW DELHI

Global companies are now using their India-based Global Capability Centres (GCCs) to run complex tax operations, covering corporate tax, indirect tax, transfer pricing, and litigation, according to a whitepaper report released by Deloitte, a multinational professional services firm.

The whitepaper said that GCCs in India have emerged as strategic hubs for tax-related functions, offering a unique blend of expertise, technology and cost efficiency.

"GCCs have become an integral part of the global tax ecosystem, providing organisations with a competitive edge in managing their tax functions," Deloitte's white paper, titled Transforming Global Tax Functions: The GCC Advantage, added.

The Indian GCC landscape has witnessed significant growth, with many organisations establishing their tax Centres of Excellence (CoEs) in the country, according to the paper, which was prepared by Manisha Gupta, Partner, Deloitte India.

Global Capability Centres, or GCCs, also known as captive centres or in-house centres, are strategically located facilities established by multinational corporations (MNCs) to provide specialised functions and services to their parent organisations.

The report adds that about 26 per cent of participants indicated they already undertake global tax processes from India.

"As more organisations pursue centralising tax functions, many have already established a tax CoE. The focus was on key tenets and building blocks to establish and expand a successful tax CoE," the report added. India has emerged as a major destination for the global players.

As per the official data, India is home to over 1,200 GCCs, employing 1.9 million professionals and generating USD 64.6 billion in revenue as of 2024. Key GCC hubs are located in Bengaluru, Hyderabad, Pune, Chennai, Mumbai, and the National Capital Region (NCR).

The sector is projected to expand to USD 105 billion by 2030, with around 2,400 GCCs employing over 2.8 million people, solidifying India's role as a global hub for enterprise operations and innovation.

With 40 per cent of digital transformation projects in GCCs, India is now a center for high-value technology-driven solutions.

Gen Zs, millennials prioritise learning, growth in job decisions

Workplace continues to evolve with automation, GenAI

CONTINUOUS LEARNING

- With 85% engaged in weekly upskilling
- Strong preference for on-the-job learning,
- They're building agile, purpose-driven careers
- Aligned with technologies like GenAI

MUMBAI

AS the workplace continues to evolve with automation, GenAI, and changing expectations, a Deloitte survey on Thursday revealed that career progression and learning opportunities are among the top factors driving job decisions of India's young workforce.

"India's Gen Zs and millennials are not just adapting to the future of work, they're shaping it. With 85 per cent engaged in weekly upskilling and a strong preference for on-the-job learning, they're building agile, purpose-driven careers aligned with technologies like GenAI," says Saraswathi Kasturirangan, Chief Happiness Officer, Deloitte India. For employers, this is a call to build cultures anchored in growth, innovation, and continuous learning, she said, quoting the 2025 Deloitte Global Gen Z and Millennial Survey.

The survey further found that career progression and learning opportunities are among the top factors that are driving job decisions for the young workforce. However, there is a mentorship shortfall as around half respondents who seek active mentorship from managers but far fewer receive it, the survey stated. The 2025 Deloitte Global Gen Z and Millennial survey is based on insights from a global lens, with responses from 809 Indian professionals - 505 Gen Zs and 304 millennials.

Hyderabad

Digital forensics market to reach ₹11,829 cr

More than triple global average of 11%, a report showed

Digi Forensic Era

- It's driven by the boom in smartphone usage
- Increased digital payments usage, mobile-centric cybercrime
- Certification programmes to bridge projected shortfall of 90K forensic professionals
- Modernising national infra with advanced labs, regional Centres of Excellence

NEW DELHI

INDIA'S digital forensics market is projected to skyrocket at a compound annual growth rate (CAGR) of nearly 40 per cent to reach Rs11,829 crore ($1.39 billion) by FY 2029-30, more than triple the global average of 11 per cent, a report showed on Thursday.

Mobile forensics now dominates the sector, accounting for about 51 per cent of the market, driven by the boom in smartphone usage, digital payments and mobile-centric cybercrime.

With 81 per cent of demand coming from the public sector, particularly law enforcement, the report by Deloitte India, in collaboration with the Data Security Council of India (DSCI), highlights the growing reliance on forensic tech to combat sophisticated digital threats. The message is clear: India is ramping up investment in digital forensics not just as a response mechanism, but as a critical pillar of national security and digital trust. To unlock the sector's full potential, rgw report recommends a strategic roadmap centred on boosting indigenous research and development (R& D). This is critical to reducing import dependence, expanding education and certification programmes to bridge the projected shortfall of 90,000 forensic professionals and modernising national infrastructure with advanced labs and regional Centres of Excellence.

"In this evolving landscape, from financial fraud and data breaches to sophisticated cross-border attacks, digital forensics has moved from a reactive tool to a strategic capability. It is essential for safeguarding digital trust, securing critical infrastructure and supporting compliance," said Nikhil Bedi, Leader, Risk, Regulatory and Forensic, Deloitte India.

SCCL ready to foray into critical minerals

CMD N Balaram announces at Ministry of Mines conference

Bizz Buzz Bureau
Kothagudem

Notably, 14 types of elements including Cerium, Lanthanum, Neodymium, Praseodymium, Gadolinium, Dysprosium, and Lutetium were identified. Research conducted by the NGRI, also discovered Vanadium, Strontium, and Zirconium in the Ramagundam Open Cast Mine-II

SINGARENI Collieries Company Limited (SCCL) is fully prepared to enter the field of critical mineral production, either independently or through joint ventures with other organizations, as part of its efforts to meet national needs and expand its business, said SCCL Chairman and Managing Director N Balaram.

Speaking at the national-level conference on critical minerals organised by the Ministry of Mines in New Delhi on Friday, Balaram outlined SCCL's future plans. He emphasised that the company is set to play a prominent role in the critical minerals sector and pointed out that preliminary studies have indicated the presence of Rare Earth Elements (REEs) in coal and overburden layers within Singareni mines. These findings present opportunities for critical mineral production.

He stated that fly ash generated from power production at the Singareni Thermal Power Plant was analyzed at the IMMT laboratories in Bhubaneswar, which confirmed the presence of REEs. Additionally, critical minerals and REEs have been observed in forest areas of Kalluru in Khammam district. Carbonatites are believed to be the primary source of rare earth elements and niobium, he added.

In Ramagundam Open Cast Mine-II and the Singareni Thermal Power Plant, both fly ash and bottom ash samples revealed the presence of light and heavy REEs. Notably, 14 types of elements including Cerium, Lanthanum, Neodymium, Praseodymium, Gadolinium, Dysprosium, and Lutetium were identified. Research conducted by the National Geophysical Research Institute (NGRI), Hyderabad, also discovered Vanadium, Strontium, and Zirconium in the Ramagundam Open Cast Mine-II.

Balaram said the Telangana State Government has been providing full support and encouragement to SCCL's move into the critical minerals sector. In this context, SCCL plans to soon establish a Geoscience Laboratory to identify and analyze the presence of critical minerals.

He further revealed that SCCL has already held discussions with NMDC and other organisations to pursue this goal. Talks were also held with a delegation from the Queensland Government, Australia, on jointly participating in critical mineral production. In line with the nation's objective of self-reliance in this sector, SCCL is open to collaborating with both public and private sector organisations and is willing to form joint ventures.

To support this initiative, SCCL has appointed Deloitte as a consultant for strategic advice and planning. The company also expressed readiness to participate in the upcoming critical minerals auctions being organised by the Central Government.

Why Gen Z is rewriting rules of global economy

Ritika Rao Veerisetti

RARELY has a generation entered the global economy with as much scepticism, technological prowess, and purchasing power as Generation Z. Born between the late 1990s and early 2010s, this cohort is poised to transform the very foundations of how economies and societies function. According to the Bank of Better America, by 2030, their collective income is expected to exceed 33 trillion dollars, accounting for more than a quarter of global GDP, overtaking even the Millennials. To put this into perspective, their income would account for over one-fourth of the world's GDP and surpass that of the Millennial generation by 2031.

Cultural Reset & Digital Nativity

Although the eldest amongst Gen Z are now only in their late 20s, they have already initiated a substantial cultural reset as the first digitally native generation. The jokes that Baby Boomers crack in WhatsApp groups about how the new generation comes out of the womb with a mobile phone in their hands may not be as insulting as they think.

This is evident through the plethora of tech and social media-related career options that are now viable when compared to a few decades ago. Consider the concept of NFTs, which have the potential to radicalise ease of trade and ownership rights or the pursuance of a career as a 'Social Media Influencer'.

Gen Z has effectively created an entirely new industry and, with it, a wholly new set of economic opportunities.

Labour Market Disruption

Gen Z is characterized by an unwillingness to tolerate unfair working conditions. According to Adobe's Future Workforce Study, 85% of interviewed Gen Zers reported being less likely to apply for a job if the company does not disclose the salary range in its job posting. Echoing the spirit of Labour Unions from the Industrial Revolution, Gen Z leans on online communities for support, such as the Reddit forum 'r/antiwork.'

Notably, Gen Z made history in 2021 by trouncing major hedge fund players through a short squeeze on GameStop's stock, coordinating online with fellow small investors — a striking example of their collective action and digital dexterity.

The Gen Z are not willing to compromise on their ideals – and they're just getting started. Whether this new trend of ethical consumerism, greater sustainability, and transparency in business and social media will prove to be a lasting transformation or merely a passing phase remains to be seen

Work Ethic & Flex Culture

Contrary to popular belief that the newer Generations aren't as assiduous as the previous ones, Gen Z has been found to be extremely hardworking. According to a survey by Deloitte, Approximately 75% of the Gen Z population is willing to take up an additional job in order to supplement their income. Gen Z is the trailblazers of a new form of 'Flex Culture', recontextualizing Veblen's ideas of conspicuous consumption. This urge to show the world that they live a luxurious life through social media is a double-edged sword. Although it has negative repercussions and can lead to toxicity in their relationship with the online world, it also acts as a driving force in their ambition, leading to greater success when these desires are channelled productively.

Mental Health & Economic Resilience

One of Gen Z's largest contributions to society is the alleviation of the taboo surrounding mental health. The destigmatisation of 'reaching out for help' means that in times of hardship, Gen Z is less hesitant to ask for aid. For example, economic aid from parents when in an economically dire situation. This gives an advantage to Gen Z over prior generations, whose values leaned towards self-reliance even in trying times. This pattern does not indicate laziness as Gen Z has been thrust into a difficult economy to survive in. According to The Bank of America Institute, younger consumers are getting squeezed the most by higher rent inflation, with median rent payments up by 16% year over year for Gen Z, compared to just 3% for Baby Boomers.

Purchasing Power of Gen Z and CSR

According to Bloomberg, Gen Z is poised to soon hold the largest purchasing power of all generations, forcing brands to listen to their concerns. Gen Z places value on investing in and purchasing from companies that are socially ethical and environmentally friendly, causing more brands to restructure and innovate their products and services. Case in point, leading tech companies like Apple, Dell, Amazon, and Google have pledged to reduce their carbon footprint. In fulfilment of this policy, Amazon has launched a $2 billion climate pledge, and Apple has agreed to go 100% carbon neutral by 2030.

The Gen Z are not willing to compromise on their ideals – and they're just getting started. Whether this new trend of ethical consumerism, greater sustainability, and transparency in business and social media will prove to be a lasting transformation or merely a passing phase remains to be seen. What is undeniable, however, is that Gen Z's collective voice is louder and more influential than any generation before it.

मई में शुद्ध जीएसटी संग्रह 20.4 फीसदी बढ़ा

मोनिका यादव
नई दिल्ली, 1 जून

मई में शुद्ध वस्तु एवं सेवा कर (जीएसटी) प्राप्तियां पिछले साल के समान महीने की तुलना में 20.4 फीसदी बढ़कर 1.73 लाख करोड़ रुपये रहीं। वित्त मंत्रालय द्वारा जारी आंकड़ों के अनुसार सीमा शुल्क संबंधित राजस्व में तेज बढ़ोतरी और रिफंड में कमी के कारण शुद्ध जीएसटी संग्रह बढ़ा है। हालांकि अप्रैल की तुलना में मई में जीएसटी प्राप्तियों में 17 फीसदी की गिरावट आई है।

मई में सकल जीएसटी संग्रह 16.4 फीसदी बढ़कर 2.01 लाख करोड़ रुपये रहा। इसमें घरेलू लेनदेन से कर संग्रह में 13.7 फीसदी और आयात संबंधी शुल्क में 25.2 फीसदी का इजाफा हुआ है। अप्रैल में जीएसटी संग्रह 12.6 फीसदी बढ़कर 2.4 लाख करोड़ रुपये के सर्वकालिक उच्च स्तर पर पहुंच गया था। केपीएमजी में अप्रत्यक्ष कर के प्रमुख और पार्टनर अभिषेक जैन ने कहा कि सकल जीएसटी संग्रह एक बार फिर 2 लाख करोड़ रुपये के पार पहुंचना उत्साहजनक है। उन्होंने कहा, 'अप्रैल में वित्त वर्ष के समाप्त होने (मार्च के लेनदेन के आधार पर) के कारण कुल जीएसटी संग्रह बढ़ा था मगर मई में भी 16 फीसदी से ज्यादा की वृद्धि आर्थिक गतिविधियों में तेजी को दर्शाती है।'

अप्रैल में 11.9 करोड़ ई-वे बिल जेनरेट किए गए, जो किसी भी महीने का दूसरा सबसे अधिक आंकड़ा है और मई के जीएसटी संग्रह में यह परिलक्षित हुआ। वित्त मंत्रालय द्वारा पिछले हफ्ते जारी मासिक आर्थिक समीक्षा में कहा गया था, 'ज्यादा ई-वे-बिल जेनरेट होने से संकेत मिलता है कि कारोबारी गतिविधियां अच्छी हैं और मई में जीएसटी संग्रह के आंकड़े अच्छे रह सकते हैं।'

डेलॉयट इंडिया में पार्टनर एमएस मणि ने कहा कि वित्त वर्ष 2025 में हर महीने सकल जीएसटी संग्रह औसतन 1.84 लाख करोड़ रुपये रहा था मगर मई में 2.01 लाख करोड़ रुपये का जीएसटी राजस्व सरकार को राजकोषीय सहूलियत प्रदान करेगा। उन्होंने कहा, 'यह आंकड़ा सकल घरेलू उत्पाद की वृद्धि के अनुमान के अनुरूप भी है जिसमें बेहतर खपत रुझान का संकेत मिलने की बात कही गई है।'

वित्त वर्ष 2025 की चौथी तिमाही में सकल घरेलू उत्पाद (जीडीपी) की वृद्धि दर विश्लेषकों के अनुमान से बेहतर 7.4 फीसदी रही।

ईवाई में पार्टनर सौरभ अग्रवाल ने कहा कि अप्रैल की तुलना में सकल जीएसटी संग्रह में 21 फीसदी की गिरावट ग्राहकों के कम खर्च को दर्शाती है।

अग्रवाल ने कहा, 'अप्रैल के उच्च संग्रह में संभवतः वित्त वर्ष के अंत में बिजनेस-टू-बिजनेस बिक्री में वृद्धि की बदौलत तेजी आई थी लेकिन मई में कमी वैश्विक अनिश्चितताओं के कारण उपभोक्ता खर्च में कुछ बदलाव की ओर इशारा करती है।'

जीएसटी संग्रह का ब्योरा

मद	रकम	वृद्धि
घरेलू	1.40	13.7
आयात	0.51	25.2
सकल संग्रह	2.01	16.4
कुल रिफंड	0.28	-4.0
शुद्ध संग्रह	1.73	20.4

भारत में भी बनेगी वैश्विक ऑडिट कंपनी

रुचिका चित्रवंशी और हर्ष कुमार

भारत भी दुनिया की चार दिग्गज परामर्श एवं ऑडिट कंपनियों को टक्कर देने वाली कंपनी बनाने की तैयारी कर रहा है। कंपनी मामलों के मंत्रालय की सचिव दीप्ति गौर मुखर्जी की अध्यक्षता में एक समिति ऐसी देसी कंपनी बनाने के लिए जरूरी कदमों पर विचार करेगी। यह समिति जरूरत पड़ने पर नीतिगत उपाय भी सुझाएगी।

इस सिलसिले में पहली बैठक शुक्रवार को प्रधानमंत्री कार्यालय (पीएमओ) में शुक्रवार को हुई थी। प्रधानमंत्री के प्रमुख सलाहकार शक्तिकांत दास की अध्यक्षता में हुई इस बैठक में आर्थिक मामलों के विभाग के सचिव अजय सेठ, वित्तीय सेवा विभाग के सचिव एम नागराज, राजस्व सचिव अरविंद श्रीवास्तव और गौर मुखर्जी समेत शीर्ष सरकारी अधिकारी शामिल हुए थे। प्रधानमंत्री की आर्थिक सलाहकार परिषद के सदस्य संजीव सान्याल ने इन शीर्ष अधिकारियों के समक्ष वैश्विक स्तर की एक ऐसी भारतीय कंपनी तैयार करने का खाका पेश किया। सूत्रों ने कहा कि इस बैठक से पहले भारतीय सनदी लेखाकार संस्थान (आईसीएआई) ने भी इस विषय पर अपनी सलाह कंपनी मामलों के मंत्रालय के अधिकारियों को दी थी।

चार बड़ी कंपनियों डेलॉयट, पीडब्ल्यूसी, ईवाई और केपीएमजी को विभिन्न सरकारी मंत्रालयों एवं विभागों से काफी काम मिलता है। अब सरकार चाहती है कि ऐसी

दीप्ति गौर मुखर्जी

कंपनियों पर निर्भरता कम कर देश में ही एक कंपनी तैयार की जाए, जो ये काम कर सके। ग्रांट थॉर्नटन भारत, बीडीओ इंडिया दो बड़े नाम हैं, जो परामर्श सेवा देने वाली छह बड़ी कंपनियों में शामिल हैं।

वित्त मंत्री निर्मला सीतारमण ने पिछले साल जून में कहा था कि आईसीएआई को एक भारतीय कंपनी स्थापित करने का जिम्मा चुनौती समझकर लेना चाहिए और वैश्विक कंपनियों एवं सरकारों से ठेका हासिल करना चाहिए।

वित्त मंत्री ने कहा था, 'आखिर ऐसा क्यों है कि भारत में बड़ी संख्या में बेहतरीन चार्टर्ड अकाउंटेंट (सीए) हैं, जिनकी पूरी दुनिया में साख है मगर वे इन चार बड़ी कंपनियों में लीडर, पार्टनर ही बनकर रह जाते हैं। पार्टनर बनना ही है तो इन कंपनियों के बजाय भारती की कंपनी में क्यों नहीं बनते।' उद्योग जगत पर नजर रखने वाले लोगों का कहना है कि नियामकीय बाधाओं के कारण भारत में ऐसी दिग्गज कंपनियां कंपनियां स्थापित नहीं हो पा रही है।

भारत में भी बनेगी वैश्विक ऑडिट कंपनी

रुचिका चित्रवंशी और हर्ष कुमार

दीप्ति गौर मुखर्जी

भारत भी दुनिया की चार दिग्गज परामर्श एवं ऑडिट कंपनियों को टक्कर देने वाली कंपनी बनाने की तैयारी कर रहा है। कंपनी मामलों के मंत्रालय की सचिव दीप्ति गौर मुखर्जी की अध्यक्षता में एक समिति ऐसी देसी कंपनी बनाने के लिए जरूरी कदमों पर विचार करेगी। यह समिति जरूरत पड़ने पर नीतिगत उपाय भी सुझाएगी।

इस सिलसिले में पहली बैठक शुक्रवार को प्रधानमंत्री कार्यालय (पीएमओ) में शुक्रवार को हुई थी। प्रधानमंत्री के प्रमुख सलाहकार शक्तिकांत दास की अध्यक्षता में हुई इस बैठक में वित्तीय मामलों के विभाग के सचिव अजय सेठ, वित्तीय सेवा विभाग के सचिव एम नागराज, राजस्व सचिव अरविंद श्रीवास्तव और गौर मुखर्जी समेत शीर्ष सरकारी अधिकारी शामिल हुए थे।

प्रधानमंत्री की आर्थिक सलाहकार परिषद के सदस्य संजीव सान्याल ने इन शीर्ष अधिकारियों के समक्ष वैश्विक स्तर की एक ऐसी भारतीय कंपनी तैयार करने का खाका पेश किया। सूत्रों ने कहा कि इस बैठक से पहले भारतीय सनदी लेखाकार संस्थान (आईसीएआई) ने भी इस विषय पर अपनी सलाह कंपनी मामलों के मंत्रालय के अधिकारियों को दी थी।

चार बड़ी कंपनियों डेलॉयट, पीडब्ल्यूसी, ईवाई और केपीएमजी को विभिन्न सरकारी मंत्रालयों एवं विभागों से काफी काम मिलता है। अब सरकार चाहती है कि ऐसी कंपनियों पर निर्भरता कम कर देश में ही एक कंपनी तैयार की जाए, जो वे काम कर सके। डॉट थर्नटन भारत, बीडीओ इंडिया दो बड़े नाम हैं, जो परामर्श सेवा देने वाली छह बड़ी कंपनियों में शामिल हैं।

वित्त मंत्री निर्मला सीतारमण ने पिछले साल जून में कहा था कि आईसीएआई को एक भारतीय कंपनी स्थापित करने का जिम्मा चुनौती समझकर लेना चाहिए और वैश्विक कंपनियों एवं सरकारों से ठेका हासिल करना चाहिए।

वित्त मंत्री ने कहा था, 'आखिर ऐसा क्यों है कि भारत में बड़ी संख्या में बेहतरीन चार्टर्ड अकाउंटेंट (सीए) हैं, जिनकी पूरी दुनिया में साख है मगर वे इन चार बड़ी कंपनियों में लीडर, पार्टनर ही बनकर रह जाते हैं। पार्टनर बनना ही है तो इन कंपनियों के बजाय भारती की कंपनी में क्यों नहीं बनते?'

उद्योग जगत पर नजर रखने वाले लोगों का कहना है कि नियामकीय बाधाओं के कारण भारत में ऐसी दिग्गज कंपनियां कंपनियां स्थापित नहीं हो पा रही है। चार्टर्ड अकाउंटेंट अधिनियम के मौजूदा प्रावधान भी सीए के अलावा किसी और के साथ राजस्व का मुनाफा साझा करने की इजाजत नहीं देते हैं। इन विशेषज्ञों के अनुसार इससे भारतीय कंपनियों को विदेशी बाजारों में जाने और पूंजी जुटाने की क्षमता प्रभावित करते हैं। बड़ी वैश्विक ऑडिट कंपनियां अपने सदस्यों को सीधे या परोक्ष रूप से रकम मुहैया कराती हैं।

पीएमओ द्वारा स्थापित समिति उन बाधाओं पर विचार एवं उनके समाधान सुझाने की कोशिश करेगी जो भारतीय कंपनियों को वैश्विक स्तर पर विस्तार करने से रोकती हैं।

वाहन उद्योग ने चीन से मैग्नेट के आयात में तेजी लाने के लिए सरकार से मदद मांगी

वाहन उद्योग ने यात्री कारों सहित विभिन्न अनुप्रयोगों में इस्तेमाल होने वाले मैग्नेट के आयात के लिए चीन की सरकार से मंजूरी में तेजी लाने के लिए सरकार से मदद मांगी है। उद्योग के सूत्रों के अनुसार, विभिन्न घरेलू आपूर्तिकर्ताओं ने पहले ही चीन में अपने स्थानीय विक्रेताओं के माध्यम से चीनी सरकार से मंजूरी मांगी है।

सूत्रों ने कहा कि अभी तक कोई मंजूरी नहीं दी गई है। मैग्नेट के वैश्विक प्रसंस्करण क्षमता के 90 प्रतिशत से अधिक पर चीन का नियंत्रण है। इनका इस्तेमाल वाहन, घरेलू उपकरणों और स्वच्छ ऊर्जा सहित कई क्षेत्रों में किया जाता है। चीनी सरकार ने 4 अप्रैल से सात दुर्लभ खनिजों और मैग्नेट के लिए विशेष निर्यात लाइसेंस अनिवार्य करते हुए प्रतिबंध लगा दिए हैं। चीन के प्रतिबंधों के चलते जापान में

सुजूकी मोटर ने पहले ही अपनी स्विफ्ट कार का उत्पादन रोक दिया है। पिछले सप्ताह मारुति सुजूकी इंडिया के वरिष्ठ कार्यकारी अधिकारी (कॉरपोरेट मामले) राहुल भारती ने कहा था कि चीन ने कंपनी से भारत सरकार द्वारा समर्थित और चीनी सरकार द्वारा अनुमोदित अंतिम उपयोगकर्ता प्रमाणपत्र मांगा है।

डेलॉइट इंडिया के पार्टनर और वाहन क्षेत्र के प्रमुख रजत महाजन ने कहा कि यह कमी विशेष रूप से ईवी के लिए आपूर्ति श्रृंखला में एक बड़ी बाधा है। *भाषा*

बिग 4 में सलाहकार प्रथाओं की दोगुना से अधिक वृद्धि

रुचिका चित्रवंशी
नई दिल्ली, 12 जून

चार बड़ी कंसल्टिंग फर्मों में सलाहकार प्रैक्टिस फरवरी 2023 के बाद से ऐतिहासिक वृद्धि दर के मुकाबले दोगुनी वृद्धि हुई है। एक अध्ययन से इसका खुलासा हुआ है। इनमें प्रौद्योगिकी से जुड़ी सलाह, कारोबारी सलाह, सौदे और जोखिम प्रबंधन जैसे क्षेत्र शामिल हैं।

एम्रोप इंडिया के अध्ययन से पता चला है कि प्रौद्योगिकी, कारोबारी सलाह और कर सेवाएं ईवाई इंडिया और डेलॉयट इंडिया की सबसे बड़ी वृद्धि प्रैक्टिस में से एक थी। एम्रोप इंडिया के पार्टनर (डिजिटल ऐंड टेक्नॉलजी) प्रशांत यादव ने कहा, 'चार बड़ी फर्मों के लिए फोकस क्षेत्रों के मामले में इस रिपोर्ट में काफी निरंतरता है। इससे यह भी संकेत मिलता है कि उनके लिए अच्छे अवसर कहां है, जो चार बड़ी कंपनियों में जाना चाहते हैं।'

लीडरशिप सर्च और कार्यकारी सलाहकार सेवा कंपनी एम्रोप द्वारा किए गए अध्ययन में कहा गया है, 'चार बड़ी कंसल्टिंग कंपनियों की सलाहकार प्रैक्टिस ऐतिहासिक वृद्धि दर के मुकाबले दोगुने से अधिक तेजी से बढ़ रही हैं। इनमें कारोबार से जुड़े सलाह, प्रौद्योगिकी सलाह और सौदे एवं जोखिम प्रबंधन शामिल हैं। इसके अलावा कर प्रैक्टिस भी काफी तेजी से बढ़ी हैं।'

Bengaluru

Mid-tier IT cos expand GCC playbook

Smaller Cos Tap GCC Growth, Offering End-To-End Services, Deep Local Engagement

Veena.Mani@timesofindia.com

Bengaluru: Mid-tier IT firms are increasing their focus on the global capability centres (GCC) segment as part of a renewed strategic playbook. The shift includes targeting opportunities with enterprises establishing or expanding GCCs, leveraging cost advantages, talent pools, and client proximity. Mid-tier IT firms are intensifying their focus on GCCs, expanding their scope and engagement like their larger peers.

Industry experts note that whilst previously they collaborated with global executives of these companies, they now engage directly with local counterparts to accelerate the tech roadmap by captives in India. Several firms strategically positioned unit leaders to provide specialised technical assistance to these captives. "Large clients in the retail or banking sector might have their own GCCs and their own best practices. Our firm can help them with this. We can tell them what their peers are doing and guide them. We can also tie up with consulting firms and provide them with industry-specific guidance. Who is going to get into the rigmarole of understanding legal and real estate requirements? We have a system set up for that. These are some of the pitches we make with captives," said Maddee Hegde, EVP, head of BPS and GCCat Coforge.

These organisations are expanding into recruitment support. Hegde indicates that GCCs are increasingly receptive to recruitment assistance, an area the company is actively pursuing. Some recruits will work on Coforge's projects, while others will be directly employed by GCCs. "Smart IT services firms know what it takes and that most of these GCCs will achieve an unsustainable cost structure. Eventually, most, not all, GCCs will 'outsource' capabilities they need to be cost-effective with. With that in mind, consider a wide portfolio from real estate to regulatory compliance to financial services to tax, and beyond. Those early relationships will pay off with other opportunities," says Ray Wang, principal analyst and Founder at Constellation Research.

Happiest Minds emphasises that skill provision is key to securing additional projects alongside regulatory and logistical support. "We do not want to become a staffing company. So, we will begin by providing skills. Many GCCs do not have a lot of skilled people in AI and data. We can bridge that gap for their immediate needs," said Joseph Anantharaju, CEO of Happiest Minds. Ashok Soota-led Happiest Minds is focusing on strengthening this vertical this year.

According to Rohan Lobo, partner, GCC leader, Deloitte Asia Pacific and South Asia, 30% to 40% of GCCs in India prefer the build-operate-transfer model, creating opportunities for IT service providers. With over 5,000 GCC leaders based in India, dedicated focus on captives becomes essential, explaining the appointment of GCC heads. Lobo provides additional context regarding these partnerships' growing significance through mid and small-sized GCC statistics. He notes that 30% of last year's captive establishments were in the sub $1 billion category. "These companies need end-to-end services to stand up their centres quickly and realise their ROI. Such services include registration and legal, real estate, tax and compliance requirements, leadership hiring, relevant talent, infrastructure, etc. IT services providers and consulting firms, together with specialist partners in the ecosystem, work closely with these GCCs and play a vital role. Companies across the world are turning to partners to quickly help navigate complexities and get things done," Lobo said.

GCCs SEEK SKILLS AND SUPPORT

- Mid-tier IT firms are ramping up services to GCCs
- Focus on enterprise clients expanding or setting up captives in India

Deeper local engagement

- Engagement now includes local decision-makers, not just global tech leaders
- Unit leaders placed near GCCs to offer technical support and strategic insights

Comprehensive support portfolio

Services offered:

- Legal & real estate
- Tax & regulatory compliance
- Talent acquisition
- Financial & industry-specific consulting

BoT model rising

- 30–40% of GCCs in India prefer this model

Skills over staffing

- Happiest Minds focuses on providing AI and data talent
- **Aim:** Fill skill gaps without becoming a staffing agency

Smaller GCCs, bigger opportunity

- 30% of 2024's GCCs were from sub-$1bn companies

Institute Sets Benchmark with 102 Startups Valued at ₹500 crore

At a time when the nation is championing Atmanirbhar Bharat and Startup India, GL Bajaj Institute of Technology and Management, Greater Noida, has arisen as a crucible of innovation, making waves across India's entrepreneurial landscape. The institution has incubated Around 102 startups, valued at somewhere around 500 crore—an extraordinary feat unmatched by most academic institutions across the country.

What sets this achievement further apart is that over 50% of these ventures are founded by women, reflecting gender parity and inclusive growth.

These startups are purpose-driven enterprises tackling challenges across diverse sectors, including healthcare technology, renewable energy, agritech, edtech, fintech, AI and machine learning, cybersecurity, social impact, and mobility solutions. From mobile apps that assist visually impaired users in navigation to AI-powered platforms enhancing remote healthcare diagnostics, GL Bajaj's innovation engine is solving problems that matter to millions.

Pankaj Agarwal, Vice Chairman, GL Bajaj Educational Institutions, Greater Noida/ Mathura, honoured by Nitin Gadkari, Hon'ble Minister of Road Transport and Highways of India, for his contribution in the field of Electric Vehicles

Placements That Set Benchmarks

GL Bajaj's innovation journey is matched by its strong placement record, with over 2000 recruiters visiting its campus annually. Some of the prestigious companies like Amazon, Capgemini, Deloitte, TCS, Infosys, Cognizant, Zscaler, Wipro, and Palo Alto Networks continue to handpick talent from the institution, year after year.

Global Stage: International Conferences at GL Bajaj

GL Bajaj has become a booming epicenter for global academic discourse, regularly hosting international conferences, that unite researchers, industry pioneers, policymakers, and students. The recent IEEE-sponsored International Conference on Power, Energy, Environment, and Intelligent Control (PEEIC 2024) showcased research in sustainable technologies.

Other marquee conferences have explored themes such as Disruptive Technologies in the 21st Century, Multidisciplinary Concepts in Management & Innovation, Artificial Intelligence in Healthcare, Smart Cities, IoT & Mobility, and Women in Leadership & Tech.

These forums are knowledge-sharing platforms.

Mental Wellness: A Priority, not a Privilege

Understanding that success stems from overall development, GL Bajaj hosts annual Mental Health Conclaves, inviting Spiritual and thought leaders. Names like Sadhguru and Gaur Gopal Das have graced the institution to share wisdom.

The institution has taken a visionary approach to ensuring that students evolve emotionally and spiritually.

Hackathons That Drive Disruption

Innovation at GL Bajaj goes beyond labs. It succeeds in its competitive hackathon ecosystem. Students participate in and frequently win national and international hackathons, including Kavach (Cybersecurity Challenge by MoE & MHA), SuperNova. These events torch the creative and critical minds of tomorrow, producing ideas and solutions.

Visionary Visits: Wisdom That Transforms

What makes GL Bajaj's learning atmosphere even more unique is its regular engagement with icons, celebrities, cricketers, and changemakers from various walks of life. Over the past few years, the institution has welcomed Shrikant Bolla, Bill Gates, Chief Minister of Uttar Pradesh- Yogi Aditya Nath, K. Sivan, Ashutosh Rana, Chris Gayle, Brett Lee, Vishwa Hindu Parishad National Secretary Alok Kumar, Sunidhi Chauhan, Kumar Vishwas, Tripti Dimri, Kumar Vishwas, Vicky Kaushal, Sanya Malhotra and many many more. These interactions have left an unforgettable impact on students.

Labs That Lead: Tech Hubs of the Future

GL Bajaj's infrastructure is an embodiment of its futuristic vision. The institution has specialized Centers of Excellence, including Cisco Cybersecurity Lab – recently inaugurated, and one of the first in North India, Palo Alto Cybersecurity Lab. These centers are the grounds where the next generation of technologists are built.

In its pursuit of academic brilliance and societal transformation, GL Bajaj is a movement that empowers dreamers to become doers, ideas to become enterprises, and students to become global citizens.

Blending Urban Advantage with Academic Distinction

In an era where higher education is rapidly evolving to match the pace of global industry demands and technological innovation, SRM Institute of Science and Technology (SRMIST), Vadapalani campus, is steadily gaining traction as a high-impact urban university.

Strategically located in the heart of Chennai — right next to the Vadapalani Metro Station — the campus is becoming one of the preferred destination for students seeking academic rigour, international exposure, and strong career outcomes.

With over 8,000 students currently enrolled, More than 2000 recruiters engaged, and approximately 80 international collaborations in place, SRMIST Vadapalani is emerging as more than just a regional education hub — it is increasingly being recognised as a launchpad for global careers.

Comprehensive Industry Linkages & Strong Placement Performance

SRMIST Vadapalani's one of the most compelling strength lies in its career-focused ecosystem. The campus maintains remarkable placement track record across all major disciplines — Engineering, Management, Science, and Humanities.

- The highest CTC recorded by students from SRMIST has reached an impressive ₹52 LPA (as per LinkedIn data), with another notable package of ₹34.62 LPA offered to a CSE student from the 2016-2020 batch
- The average CTC stands at approximately ₹7.5 LPA, although it varies across departments
- Placement achievement is consistent, with placement rates depending on the stream and programme

Over 2,000 companies have visited the SRM Group campuses for recruitment over the years. The Vadapalani campus continues to attract industry giants such as:

- EY, TCS, Cognizant, Accenture, IBM, Amazon, Google, Wipro, Deloitte, Infosys, and KPMG, among others

This industry engagement extends beyond recruitment. SRMIST offers students regular exposure to guest lectures, internships, case competitions, and hands-on training aligned with real-world business and engineering challenges.

National Accreditations and Global Rankings

SRMIST Vadapalani holds a firm place in national and internatjonal rankings, validating the academic and institutional quality it offers.

- Accredited with NAAC A++, the highest possible grade, valid until 2031
- All programmes are fully approved by UGC and AICTE, ensuring academic compliance and standardisation
- Ranked in the Top 30 in Engineering and Pharmacy under the National Institutional Ranking Framework (NIRF)
- According to QS World University Rankings, SRMIST is placed in the 1001-1200 bracket globally, and is notably ranked 17th in India for sustainability performance, a rare honour for private institutions in the country

Such credentials reflect a consistent commitment to academic quality and socially responsible development.

Research, Innovation, and National Recognition

Research and innovation are at the core of SRMIST Vadapalani's ethos. The university has received multiple honours under the Atal Ranking of Institutions on Innovation Achievements (ARIIA) — a prestigious indicator of innovation output in Indian higher education.

- Ranked 2nd in 2020, 3rd in 2019, and 4th in 2021 among all private institutions in India for innovation

SRMIST has also earned a spot on the Nature Index Ranking, which highlights institutions contributing significantly to quality scientific research. Areas of special focus include:

- Chemistry
- Life Sciences
- Environmental Studies

In 2024, the Vadapalani campus celebrated its students' victory at the Smart India Hackathon, a national competition backed by the Government of India that recognises innovation and problem-solving at scale. This win speaks volumes about the campus's research culture and mentorship support.

International Collaborations and Global Exposure

SRMIST Vadapalani places significant emphasis on creating global citizens. The university has fostered more than 80 international collaborations with reputed institutions and research centres around the world.

The International Advisory Board (IAB) features faculty and thought leaders from universities such as:

- Harvard University
- Massachusetts Institute of Technology (MIT)
- Stanford University
- University of Cambridge

Students benefit from the Semester Abroad Programme (SAP), which provides opportunities to study or intern at global institutions, equipping them with international experience, cross-cultural skills, and industry-aligned learning.

These collaborations further enhance curriculum delivery, facilitate joint research, and expose students to international standards of academic delivery and assessment.

Comprehensive Academic Offerings

SRMIST Vadapalani delivers a diverse academic portfolio across undergraduate, postgraduate, diploma, and doctoral levels. All programmes are tailored with an emphasis on industry relevance and emerging technology trends.

Faculty of Engineering & Technology

- **B.Tech:**
  - Computer Science & Engineering (General and Honours)
  - CSE with Artificial Intelligence & Machine Learning
  - CSE with Big Data Analytics
  - CSE with Cyber Security
  - Computer Science and Business System
  - Electronics & Communication Engineering (ECE with Data Science)
  - Electronics Engineering (VLSI Design & Technology)
  - Mechanical Engineering (including AI/ML specialisation)
  - Working Professional formats available in select streams
- **M.Tech:**
  - CSE with AI & ML
  - VLSI Design

Faculty of Management

- **Undergraduate:**
  - BBA (General and Specialised Tracks)
  - Postgraduate:
  - MBA in Marketing, Finance, HRM, Analytics, and Operations
  - MBA in Banking and Financial Services
  - MBA for Working Professionals

Faculty of Science & Humanities

- **B.Com** specialisations in:
  - General, Accounting & Finance, International Finance, Computer Applications, Finance & Taxation (with Chartered Accountancy coaching)
- **BCA and BCA with Data Science**
- **B.Sc programmes in:**
  - Cyber Security
  - Psychology
  - Visual Communication
  - Hotel & Hospitality Administration
- **Postgraduate options include:**
  - M.Com
  - MCA
  - Master of Social Work (MSW)
  - Diploma in Hotel Management & Catering Science

Each programme is supported by value-added training, skill certification modules, and career guidance services, ensuring students are industry-ready from day one.

Campus Infrastructure & Health Partnerships

While being compact at 5 acres, the Vadapalani campus maximises its location and layout:

- Digitally enabled classrooms and fully equipped laboratories for hands-on learning
- Campus-wide high-speed Wi-Fi
- Access to modern computing tools and cloud-based platforms
- A dedicated tie-up with SIMS Hospital, located adjacent to the campus, ensuring access to quality healthcare for students and staff

The campus is also accessible via the Chennai Metro, making daily commute convenient for day scholars and faculty.

Cultural Activities and National Representation

SRMIST Vadapalani places equal importance on co-curricular development. The annual Margazhi Vaibhavam event brings together students and faculty in celebration of Tamil culture through traditional music, dance, and art forms.

The campus is also home to student-athletes of national repute:

- Prithviya Tondaiman, Olympian and national-level shooter
- Nethra Kumanan, India's first female sailor to qualify for the Olympics

Both are products of SRM's support for sports and flexible academic planning that accommodates rigorous training schedules.

Student-Centric Governance and Safety

SRMIST enforces a strict anti-ragging policy. In line with UGC regulations, any student found guilty of ragging or abetting it faces strict disciplinary action, including possible expulsion.

Support services include:

- Academic counselling
- Mental health support
- Mentorship programmes
- Career advisory cells

This student-first approach fosters a respectful, inclusive, and supportive campus culture.

SRM INSTITUTE OF SCIENCE & TECHNOLOGY
Deemed to be University u/s 3 of UGC Act, 1956
VADAPALANI

Admissions Open for 2025-26

Applications are now being accepted for the 2025-2026 academic year. The admission process is open for all UG, PG, and diploma programmes across the three faculties.

A TRENDSETTER IN NEW-AGE EDUCATION, INNOVATION, AND IMPACT

SRM University-AP, Amaravati: Driven by Knowledge, Defined by Purpose

SRM University-AP, Amaravati, is carving a distinct identity in India's higher education landscape as a new-age, multidisciplinary, research-intensive force, driven by a strong commitment to academic quality, innovation, and societal impact.

Established in 2017 in the heart of Amaravati—India's envisioned global capital—the university is spread across a 100-acre, eco-friendly campus built on principles of sustainable development, aligning seamlessly with the broader vision of Amaravati as a futuristic greenfield city in Andhra Pradesh.

In just a few years, SRM-AP, Amaravati has achieved remarkable progress, gaining prominence for its innovative research, global partnerships, entrepreneurial spirit, and community-driven initiatives. Its international collaborations and outreach programmes continue to serve as catalysts for regional transformation.

Consistently ranked the #1 University across multiple rankings and recently awarded an AAAAA rating by Careers360 among the Top Engineering Colleges in India, SRM-AP stands as a beacon of modern education and innovation.

> "SRM University-AP, Amaravati, has a community working together towards a model for the future of higher education in India, Asia, and globally. A university like SRM-AP, Amaravati, promises to build on the best of the past while creating new models for the future."
>
> *- Prof. Nicholas B Dirks, Honorary Pro-Chancellor and Member of the Governing Body, SRM University-AP, Amaravati*

Leading with a Future-Focused Academic Model

SRM University-AP, Amaravati aligns its academic structure with both industry needs and student aspirations through a progressive Outcome-Based Education (OBE) framework enhanced by the Choice-Based Credit System (CBCS). The academic offerings span three broad verticals: Engineering Technologies, Management, and Liberal Arts.

Students are encouraged to craft personalised learning journeys through interdisciplinary major-minor combinations and open electives. The curriculum is anchored in active, experiential learning- including case studies, simulations, industry projects, internships, and continuous assessments designed for a holistic development, building core competencies such as critical thinking, communication, and problem-solving.

From undergraduate to doctoral levels, the university offers new-age, application-driven programmes that equip students with both global exposure and practical expertise.

Ensuring Latest Knowledge, through Global Collaboration

A standout feature of SRM-AP, Amaravati's academic ecosystem is its focus on future-oriented, modern domains such as Artificial Intelligence. With more than 100 affiliations across the globe, it has fortified its research and pedagogy with landmark collaborations, like one with the School of Computer Science at Carnegie Mellon University (CMU SCS), USA - one of the world's premier AI research hubs.

Partnerships like this enable joint research, student internships, AI lab development, curriculum enrichment, and faculty development initiatives, collectively enhancing the university's technological edge and academic rigour.

Strong Placement Record with Global Impact

SRM-AP, Amaravati has built a robust academia-industry interface that supports exceptional student placements. Recognised by FICCI for 'Excellence in Creating Employment' and by World Education Summit 2025 as one of the 'Best Universities with Excellent Placement of the Year', the university continues to foster strong corporate partnerships.

Programs such as alumni mentorship, skill training and a structured mentor-mentee ecosystem prepare students for evolving market dynamics. The Industry-Institute Interaction platform further facilitates exposure to industry leaders through workshops, webinars, and training sessions.

Students have secured prestigious roles in some of the top-tier companies including Oracle, IBM, Philips, Deloitte, Samsung, PayPal, Amazon, Flipkart, JPMorgan Chase, and Volvo, among others, with approximately 850 recruitment partners, some of the top packages ranging from ₹45-₹55 LPA, and ~5% of students placed internationally. Despite being young, SRM-AP, Amaravati has emerged as a hub for placements. Moreover, some of its students gain admission to QS Top 50 universities globally, often with scholarships, for higher studies.

P Sathyanarayanan, Pro-Chancellor, SRM University-AP

Pro-Chancellor P. Sathyanarayanan summarises his vision as:

> **"At SRM University-AP, Amaravati, we don't just educate—we inspire and provide a launchpad for future aspirants. Rooted in innovation and research, and guided by a bold vision, we equip students with the knowledge, purpose, and skills to shape their path and create a better world. Here, education is not mere learning—it's a real-world experience and a lifelong catalyst for personal growth and societal transformation."**

Creating a Culture of Innovation and Research Eminence

With a strong focus on entrepreneurship and innovation, SRM-AP, Amaravati has developed Innovative research infrastructure including eight Centres of Excellence and a comprehensive digital and physical library. Recognised by ASSOCHAM for Excellence in Enabling Research Environment (Science), the university prides to have set-up 80+ Labs for research and boasts over 2,193 research publications (more than 40% in Q1 journals), over 480 patents filed, 55 granted, and two successful technology transfers. With a Scopus H-index of 67, it ranks third among private Indian universities in the Nature Index 2023, and five of its faculty are listed among Stanford University's top 2% scientists worldwide.

The entrepreneurial spirit is supported by Hatchlab Research Centre, which has incubated over 40 startups. The university's flagship rural entrepreneurship initiative—ADITRI has empowered nearly 100 women entrepreneurs across AP.

Holistic Development of a Global Citizen

SRM-AP, Amaravati's inclusive and nurturing environment has enabled students to thrive in academics, athletics, and adventure. Olympians Deepthi Jeevanji- a Bronze medallist at the Paralympics 2024, and Jyothika Sri Dandi, who represented India in the Women's Relay at Paris Olympics 2024, are stellar examples of the university's sporting legacy.

It is also the first private university in India to send a student expedition to the Everest Base Camp, underscoring its commitment to developing leadership, resilience, and global awareness. Among a student body of over 9,000 learners from almost every Indian State and 28 nationalities internationally, supported by 800 university staff, SRM University-AP, Amaravati offers a culturally rich, intellectually vibrant, and globally aligned educational experience.

A Vision defining Future: Educating to drive change

Guided by a noble vision, SRM-AP, Amaravati is poised to set newer benchmarks ahead. 21st century course spread, an expanding campus, an Industrial Research Park, state-of-the-art AI Labs with capable faculty & passionate talents, will cumulatively curate an ecosystem that drives collaboration between academia and industry. SRM-AP's roadmap is firmly aligned with building a globally respected, future-ready institution that delivers holistic, high-impact education.

> "SRM University-AP, Amaravati, challenges the boundaries of scientific knowledge and research acquisition. The university embraces application-oriented teaching and learning methodologies, nurturing students to be industry-ready professionals with 21st century skillsets.
>
> *- Prof. Manoj K Arora, Vice Chancellor*

Redefining Engineering Education with Global Vision and Local Impact

In an era where the demands of the engineering profession are rapidly evolving, Chitkara University has emerged as a flagbearer of innovation, quality, and global relevance in engineering education. From academic distinction to strong industry linkages and meaningful international collaborations, the university continues to redefine the parameters of what makes an engineering institution truly modern. With a blend of futuristic pedagogy, real-world exposure, and global integration, Chitkara University is preparing students not just for jobs, but for lifelong success and leadership in a dynamic global economy.

The university's impact on India's higher education landscape is reflected in its growing recognition across national rankings. In Rankings 2024, by one of the leading magazine, Chitkara University's engineering programs secured great position nationally—an achievement that places it among the top engineering institutions in the country. Its 10th rank in the Employability Index one of the leading magazines for T-School Rankings 2024 further underscores the university's strong emphasis on making students career-ready from day one.

The foundation of Chitkara's success lies in its forward-looking, industry-aligned curriculum. The university offers a wide range of undergraduate engineering programs, including B.E. CSE with specialisations in Artificial Intelligence & Machine Learning in collaboration with Microsoft, Cloud Computing and Virtualisation Technology in collaboration with AWS, Civil Engineering with specialisation in AI & ML as well as niche disciplines like Mechatronics, and Electronics & Communication with specialised tracks in IoT, VLSI and Embedded Systems. Automobile Engineering with specialisation in Electric and Hybrid Vehicles (EV & HEV) is offered in collaboration with ARAI. These programs build strong academic foundations while encouraging critical thinking, interdisciplinary collaboration, and practical learning through labs, projects, and live simulations. This emphasis on experiential learning equips graduates to solve complex, real-world challenges across industries.

A standout feature of Chitkara University's approach is its focus on global exposure. Collaborations with some of the prestigious institutions such as Arizona State University (ASU), USA—ranked #1 in the U.S. for innovation—enable the university to offer a Dual Degree in B.E. Computer Science and Technology. Students complete two years at Chitkara and two years at ASU, earning a globally recognised degree. Similarly, 2+2 pathway programs in Software Engineering and Artificial Intelligence & Machine Learning are offered in academic mentorship with Deakin University, Australia, which ranks among the top 1% of universities worldwide. These collaborations provide cross-cultural experiences and boost global employability, preparing students for multicultural professional environments.

Research and innovation are integral to Chitkara's engineering ecosystem. The university has seen a steady increase in research output, with publications gaining visibility in reputed international journals. Faculty and students are involved in research projects supported by government bodies, industry leaders, and international agencies. Research areas range from AI and cybersecurity to sustainable infrastructure and automation, with undergraduate students encouraged to contribute from early stages.

Industry collaboration remains another cornerstone of Chitkara University's success. These partnerships influence the curriculum, drive pedagogy, and provide real-world mentorship and project opportunities. Centres such as the Code Experience Centre powered by Capgemini, and the iOS Student Development Centre supported by Apple and Infosys, keep students in sync with the latest technological trends. This has translated into remarkable placements with some of the top recruiters like Microsoft, Deloitte, Infosys, Capgemini, and Tata Technologies. The highest package offered has exceeded ₹1 crore per annum, highlighting the international value of a Chitkara engineering degree.

Chitkara University also takes pride in its modern infrastructure, with advanced labs, Centres of Excellence, simulation environments, and smart classrooms. Students are encouraged to participate in national and international hackathons, join innovation clusters, and explore entrepreneurship through campus-based incubators.

Chitkara University is not just awarding degrees—it is shaping future-ready engineers who are technically skilled, adaptable, creative, and capable of leading in a globalised world. With academic rigour, real-world relevance, and strategic international collaborations, the university is transforming engineering education in India.

In a world driven by innovation and defined by global collaboration, Chitkara University continues to stand tall. Its Achievements are a testament to visionary leadership and a resolute belief in creating not just engineers, but change-makers who are equipped to shape the future.

Chennai

Blending Urban Advantage with Academic Distinction

In an era where higher education is rapidly evolving to match the pace of global industry demands and technological innovation, SRM Institute of Science and Technology (SRMIST), Vadapalani campus, is steadily gaining traction as a high-impact urban university.

Strategically located in the heart of Chennai — right next to the Vadapalani Metro Station — the campus is becoming one of the preferred destination for students seeking academic rigour, international exposure, and strong career outcomes.

With over 8,000 students currently enrolled, More than 2000 recruiters engaged, and approximately 80 international collaborations in place, SRMIST Vadapalani is emerging as more than just a regional education hub — it is increasingly being recognised as a launchpad for global careers.

Comprehensive Industry Linkages & Strong Placement Performance

SRMIST Vadapalani's one of the most compelling strength lies in its career-focused ecosystem. The campus maintains remarkable placement track record across all major disciplines — Engineering, Management, Science, and Humanities.

- The highest CTC recorded by students from SRMIST has reached an impressive ₹52 LPA (as per LinkedIn data), with another notable package of ₹34.62 LPA offered to a CSE student from the 2016-2020 batch
- The average CTC stands at approximately ₹7.5 LPA, although it varies across departments
- Placement achievement is consistent, with placement rates depending on the stream and programme

Over 2,000 companies have visited the SRM Group campuses for recruitment over the years. The Vadapalani campus continues to attract industry giants such as:

- EY, TCS, Cognizant, Accenture, IBM, Amazon, Google, Wipro, Deloitte, Infosys, and KPMG, among others

This industry engagement extends beyond recruitment. SRMIST offers students regular exposure to guest lectures, internships, case competitions, and hands-on training aligned with real-world business and engineering challenges.

National Accreditations and Global Rankings

SRMIST Vadapalani holds a firm place in national and international rankings, validating the academic and institutional quality it offers.

- Accredited with NAAC A++, the highest possible grade, valid until 2031
- All programmes are fully approved by UGC and AICTE, ensuring academic compliance and standardisation
- Ranked in the Top 30 in Engineering and Pharmacy under the National Institutional Ranking Framework (NIRF)
- According to QS World University Rankings, SRMIST is placed in the 1001–1200 bracket globally, and is notably ranked 17th in India for sustainability performance, a rare honour for private institutions in the country

Such credentials reflect a consistent commitment to academic quality and socially responsible development.

Research, Innovation, and National Recognition

Research and innovation are at the core of SRMIST Vadapalani's ethos. The university has received multiple honours under the Atal Ranking of Institutions on Innovation Achievements (ARIIA) — a prestigious indicator of innovation output in Indian higher education.

- Ranked 2nd in 2020, 3rd in 2019, and 4th in 2021 among all private institutions in India for innovation

SRMIST has also earned a spot on the Nature Index Ranking, which highlights institutions contributing significantly to quality scientific research. Areas of special focus include:

- Chemistry
- Life Sciences
- Environmental Studies

In 2024, the Vadapalani campus celebrated its students' victory at the Smart India Hackathon, a national competition backed by the Government of India that recognises innovation and problem-solving at scale. This win speaks volumes about the campus's research culture and mentorship support.

SRM INSTITUTE OF SCIENCE & TECHNOLOGY
Deemed to be University u/s 3 of UGC Act, 1956
VADAPALANI

International Collaborations and Global Exposure

SRMIST Vadapalani places significant emphasis on creating global citizens. The university has fostered more than 80 international collaborations with reputed institutions and research centres around the world.

The International Advisory Board (IAB) features faculty and thought leaders from universities such as:

- Harvard University
- Massachusetts Institute of Technology (MIT)
- Stanford University
- University of Cambridge

Students benefit from the Semester Abroad Programme (SAP), which provides opportunities to study or intern at global institutions, equipping them with international experience, cross-cultural skills, and industry-aligned learning.

These collaborations further enhance curriculum delivery, facilitate joint research, and expose students to international standards of academic delivery and assessment.

Comprehensive Academic Offerings

SRMIST Vadapalani delivers a diverse academic portfolio across undergraduate, postgraduate, diploma, and doctoral levels. All programmes are tailored with an emphasis on industry relevance and emerging technology trends.

Faculty of Engineering & Technology

- B.Tech:
  - Computer Science & Engineering (General and Honours)
  - CSE with Artificial Intelligence & Machine Learning
  - CSE with Big Data Analytics
  - CSE with Cyber Security
  - Computer Science and Business System
  - Electronics & Communication Engineering (ECE with Data Science)
  - Electronics Engineering (VLSI Design & Technology)
  - Mechanical Engineering (including AI/ML specialisation)
  - Working Professional formats available in select streams
- M.Tech:
  - CSE with AI & ML
  - VLSI Design

Faculty of Management

- Undergraduate:
  - BBA (General and Specialised Tracks)
  - Postgraduate:
  - MBA in Marketing, Finance, HRM, Analytics, and Operations
  - MBA in Banking and Financial Services
  - MBA for Working Professionals

Faculty of Science & Humanities

- B.Com specialisations in:
  - General, Accounting & Finance, International Finance, Computer Applications, Finance & Taxation (with Chartered Accountancy coaching)
- BCA and BCA with Data Science
- B.Sc programmes in:
  - Cyber Security
  - Psychology
  - Visual Communication
  - Hotel & Hospitality Administration
- Postgraduate options include:
  - M.Com
  - MCA
  - Master of Social Work (MSW)
  - Diploma in Hotel Management & Catering Science

Each programme is supported by value-added training, skill certification modules, and career guidance services, ensuring students are industry-ready from day one.

Campus Infrastructure & Health Partnerships

While being compact at 5 acres, the Vadapalani campus maximises its location and layout:

- Digitally enabled classrooms and fully equipped laboratories for hands-on learning
- Campus-wide high-speed Wi-Fi
- Access to modern computing tools and cloud-based platforms
- A dedicated tie-up with SIMS Hospital, located adjacent to the campus, ensuring access to quality healthcare for students and staff

The campus is also accessible via the Chennai Metro, making daily commute convenient for day scholars and faculty.

Cultural Activities and National Representation

SRMIST Vadapalani places equal importance on co-curricular development. The annual Margazhi Vaibhavam event brings together students and faculty in celebration of Tamil culture through traditional music, dance, and art forms.

The campus is also home to student-athletes of national repute:

- Prithviya Tondaiman, Olympian and national-level shooter
- Nethra Kumanan, India's first female sailor to qualify for the Olympics

Both are products of SRM's support for sports and flexible academic planning that accommodates rigorous training schedules.

Student-Centric Governance and Safety

SRMIST enforces a strict anti-ragging policy. In line with UGC regulations, any student found guilty of ragging or abetting it faces strict disciplinary action, including possible expulsion.

Support services include:

- Academic counselling
- Mental health support
- Mentorship programmes
- Career advisory cells

This student-first approach fosters a respectful, inclusive, and supportive campus culture.

Admissions Open for 2025-26

Applications are now being accepted for the 2025-2026 academic year. The admission process is open for all UG, PG, and diploma programmes across the three faculties.

A TRENDSETTER IN NEW-AGE EDUCATION, INNOVATION, AND IMPACT

SRM University-AP, Amaravati: Driven by Knowledge, Defined by Purpose

SRM University-AP, Amaravati, is carving a distinct identity in India's higher education landscape as a new-age, multidisciplinary, research-intensive force, driven by a strong commitment to academic quality, innovation, and societal impact.

Established in 2017 in the heart of Amaravati—India's envisioned global capital—the university is spread across a 100-acre, eco-friendly campus built on principles of sustainable development, aligning seamlessly with the broader vision of Amaravati as a futuristic greenfield city in Andhra Pradesh.

In just a few years, SRM-AP, Amaravati has achieved remarkable progress, gaining prominence for its innovative research, global partnerships, entrepreneurial spirit, and community-driven initiatives. Its international collaborations and outreach programmes continue to serve as catalysts for regional transformation.

Consistently ranked the #1 University across multiple rankings and recently awarded an AAAAA rating by Careers360 among the Top Engineering Colleges in India, SRM-AP stands as a beacon of modern education and innovation.

> "SRM University-AP, Amaravati, has a community working together towards a model for the future of higher education in India, Asia, and globally. A university like SRM-AP, Amaravati, promises to build on the best of the past while creating new models for the future."
>
> *- Prof. Nicholas B Dirks, Honorary Pro-Chancellor and Member of the Governing Body, SRM University-AP, Amaravati*

Leading with a Future-Focused Academic Model

SRM University-AP, Amaravati aligns its academic structure with both industry needs and student aspirations through a progressive Outcome-Based Education (OBE) framework enhanced by the Choice-Based Credit System (CBCS). The academic offerings span three broad verticals: Engineering Technologies, Management, and Liberal Arts.

Students are encouraged to craft personalised learning journeys through interdisciplinary major-minor combinations and open electives. The curriculum is anchored in active, experiential learning- including case studies, simulations, industry projects, internships, and continuous assessments designed for a holistic development, building core competencies such as critical thinking, communication, and problem-solving.

From undergraduate to doctoral levels, the university offers new-age, application-driven programmes that equip students with both global exposure and practical expertise.

Ensuring Latest Knowledge, through Global Collaboration

A standout feature of SRM-AP, Amaravati's academic ecosystem is its focus on future-oriented, modern domains such as Artificial Intelligence. With more than 100 affiliations across the globe, it has fortified its research and pedagogy with landmark collaborations, like one with the School of Computer Science at Carnegie Mellon University (CMU SCS), USA - one of the world's premier AI research hubs.

Partnerships like this enable joint research, student internships, AI lab development, curriculum enrichment, and faculty development initiatives, collectively enhancing the university's technological edge and academic rigour.

Strong Placement Record with Global Impact

SRM-AP, Amaravati has built a robust academia-industry interface that supports exceptional student placements. Recognised by FICCI for 'Excellence in Creating Employment' and by World Education Summit 2025 as one of the 'Best Universities with Excellent Placement of the Year', the university continues to foster strong corporate partnerships.

Programs such as alumni mentorship, skill training and a structured mentor-mentee ecosystem prepare students for evolving market dynamics. The Industry-Institute Interaction platform further facilitates exposure to industry leaders through workshops, webinars, and training sessions.

Students have secured prestigious roles in some of the top-tier companies including Oracle, IBM, Philips, Deloitte, Samsung, PayPal, Amazon, Flipkart, JPMorgan Chase, and Volvo, among others, with approximately 850 recruitment partners, some of the top packages ranging from ₹45–₹55 LPA, and ~5% of students placed internationally. Despite being young, SRM-AP, Amaravati has emerged as a hub for placements. Moreover, some of its students gain admission to QS Top 50 universities globally, often with scholarships, for higher studies.

Creating a Culture of Innovation and Research Eminence

With a strong focus on entrepreneurship and innovation, SRM-AP, Amaravati has developed Innovative research infrastructure including eight Centres of Excellence and a comprehensive digital and physical library. Recognised by ASSOCHAM for Excellence in Enabling Research Environment (Science), the university prides to have set-up 80+ Labs for research and boasts over 2,193 research publications (more than 40% in Q1 journals), over 480 patents filed, 55 granted, and two successful technology transfers. With a Scopus H-index of 67, it ranks third among private Indian universities in the Nature Index 2023, and five of its faculty are listed among Stanford University's top 2% scientists worldwide.

The entrepreneurial spirit is supported by Hatchlab Research Centre, which has incubated over 40 startups. The university's flagship rural entrepreneurship initiative—ADITRI has empowered nearly 100 women entrepreneurs across AP.

P Sathyanarayanan, Pro-Chancellor, SRM University-AP

Pro-Chancellor P. Sathyanarayanan summarises his vision as:

> "At SRM University-AP, Amaravati, we don't just educate—we inspire and provide a launchpad for future aspirants. Rooted in innovation and research, and guided by a bold vision, we equip students with the knowledge, purpose, and skills to shape their path and create a better world. Here, education is not mere learning—it's a real-world experience and a lifelong catalyst for personal growth and societal transformation."

Holistic Development of a Global Citizen

SRM-AP, Amaravati's inclusive and nurturing environment has enabled students to thrive in academics, athletics, and adventure. Olympians Deepthi Jeevanji- a Bronze medallist at the Paralympics 2024, and Jyothika Sri Dandi, who represented India in the Women's Relay at Paris Olympics 2024, are stellar examples of the university's sporting legacy.

It is also the first private university in India to send a student expedition to the Everest Base Camp, underscoring its commitment to developing leadership, resilience, and global awareness. Among a student body of over 9,000 learners from almost every Indian State and 28 nationalities internationally, supported by 800 university staff, SRM University-AP, Amaravati offers a culturally rich, intellectually vibrant, and globally aligned educational experience.

A Vision defining Future: Educating to drive change

Guided by a noble vision, SRM-AP, Amaravati is poised to set newer benchmarks ahead. 21st century course spread, an expanding campus, an Industrial Research Park, state-of-the-art AI Labs with capable faculty & passionate talents, will cumulatively curate an ecosystem that drives collaboration between academia and industry. SRM-AP's roadmap is firmly aligned with building a globally respected, future-ready institution that delivers holistic, high-impact education.

> "SRM University-AP, Amaravati, challenges the boundaries of scientific knowledge and research acquisition. The university embraces application-oriented teaching and learning methodologies, nurturing students to be industry-ready professionals with 21st century skillsets.
>
> *- Prof. Manoj K Arora, Vice Chancellor*

Institute Sets Benchmark with 102 Startups Valued at Rs 500 vote

1 • PG | 305 • Sqcm | 738851 • AVE | 500.33K • Cir | Middle Center

Pune

Institute Sets Benchmark with 102 Startups Valued at ₹500 crore

At a time when the nation is championing Atmanirbhar Bharat and Startup India, GL Bajaj Institute of Technology and Management, Greater Noida, has arisen as a crucible of innovation, making waves across India's entrepreneurial landscape. The institution has incubated Around 102 startups, valued at somewhere around 500 crore—an extraordinary feat unmatched by most academic institutions across the country.

What sets this achievement further apart is that over 50% of these ventures are founded by women, reflecting gender parity and inclusive growth.

These startups are purpose-driven enterprises tackling challenges across diverse sectors, including healthcare technology, renewable energy, agritech, edtech, fintech, AI and machine learning, cybersecurity, social impact, and mobility solutions. From mobile apps that assist visually impaired users in navigation to AI-powered platforms enhancing remote healthcare diagnostics, GL Bajaj's innovation engine is solving problems that matter to millions.

Placements That Set Benchmarks

GL Bajaj's innovation journey is matched by its strong placement record, with over 2000 recruiters visiting its campus annually. Some of the prestigious companies like Amazon, Capgemini, Deloitte, TCS, Infosys, Cognizant, Zscaler, Wipro, and Palo Alto Networks continue to handpick talent from the institution, year after year.

Global Stage: International Conferences at GL Bajaj

GL Bajaj has become a booming epicenter for global academic discourse, regularly hosting international conferences that unite researchers, industry pioneers, policymakers, and students. The recent IEEE-sponsored International Conference on Power, Energy, Environment, and Intelligent Control (PEEIC 2024) showcased research in sustainable technologies.

Other marquee conferences have explored themes such as Disruptive Technologies in the 21st Century, Multidisciplinary Concepts in Management & Innovation, Artificial Intelligence in Healthcare, Smart Cities, IoT & Mobility, and Women in Leadership & Tech.

These forums are knowledge-sharing platforms.

Pankaj Agarwal, Vice Chairman, GL Bajaj Educational Institutions, Greater Noida/ Mathura, honoured by Nitin Gadkari, Hon'ble Minister of Road Transport and Highways of India, for his contribution in the field of Electric Vehicles

Mental Wellness: A Priority, not a Privilege

Understanding that success stems from overall development, GL Bajaj hosts annual Mental Health Conclaves, inviting Spiritual and thought leaders. Names like Sadhguru and Gaur Gopal Das have graced the institution to share wisdom.

The institution has taken a visionary approach to ensuring that students evolve emotionally and spiritually.

Hackathons That Drive Disruption

Innovation at GL Bajaj goes beyond labs. It succeeds in its competitive hackathon ecosystem. Students participate in and frequently win national and international hackathons, including Kavach (Cybersecurity Challenge by MoE & MHA), SuperNova. These events torch the creative and critical minds of tomorrow, producing ideas and solutions.

Visionary Visits: Wisdom That Transforms

What makes GL Bajaj's learning atmosphere even more unique is its regular engagement with icons, celebrities, cricketers, and changemakers from various walks of life. Over the past few years, the institution has welcomed Shrikant Bolla, Bill Gates, Chief Minister of Uttar Pradesh- Yogi Aditya Nath, K. Sivan, Ashutosh Rana, Chris Gayle, Brett Lee, Vishwa Hindu Parishad National Secretary Alok Kumar, Sunidhi Chauhan, Kumar Vishwas, Tripti Dimri, Kumar Vishwas, Vicky Kaushal, Sanya Malhotra and many many more. These interactions have left an unforgettable impact on students.

Labs That Lead: Tech Hubs of the Future

GL Bajaj's infrastructure is an embodiment of its futuristic vision. The institution has specialized Centers of Excellence, including Cisco Cybersecurity Lab – recently inaugurated, and one of the first in North India, Palo Alto Cybersecurity Lab. These centers are the grounds where the next generation of technologists are built.

In its pursuit of academic brilliance and societal transformation, GL Bajaj is a movement that empowers dreamers to become doers, ideas to become enterprises, and students to become global citizens.

Pune

WHERE DREAMS GET WINGS TO FLY

In a world being rapidly transformed by emerging technologies like Artificial Intelligence, Data Science, and the Internet of Things, the Institute of Technical Education and Research (ITER) in Bhubaneswar stands as a beacon of academic eminence, innovation, and holistic development.

Part of the renowned Siksha 'O' Anusandhan (SOA), Deemed to be University, ITER has carved a niche for itself by nurturing young minds to meet the challenges of tomorrow with skill, vision, and integrity.

Founded in 1996-97 with just 118 students in a modest rented facility, ITER is the manifestation of the visionary dream of Prof. Manojranjan Nayak, an alumnus of both NIT Rourkela and IIT Kharagpur. His goal was clear—democratize access to modern technical education in Odisha. Nearly three decades later, that dream has blossomed into one of India's most distinguished engineering institutions, backed by state-of-the-art infrastructure, world-class faculty, and an unrelenting pursuit of excellence.

ITER is now a proud and integral part of SOA, which has seen meteoric growth in India's academic landscape. Ranked 14th nationally in the NIRF Rankings 2024, SOA has also received A++ accreditation from NAAC (2022) and Category-I Graded Autonomy by the UGC. Its international reputation is reflected in its strong performance in the QS and Times Higher Education (THE) World University Rankings 2025. ITER specifically features in the 501–600 band globally in Engineering and Technology, and in the 601–800 band in Computer Science (THE 2025). It also appears in the 401–450 (Engineering) and 751–850 (Computer Science and Information Systems) bands in the QS Subject Rankings 2025.

"ITER is the tiny seed sown years ago that has grown into a vast educational edifice where quality education and focused research converge to create global citizens ready to shine in every sphere of life," reflects Prof. Nayak, Founder President of SOA.

The growth of ITER is mirrored by the expansive SOA ecosystem, which today includes institutions for medical, dental, pharmaceutical, legal, agricultural, management, hospitality, and veterinary sciences. SOA also operates two medical and nursing colleges, the SUM Ultimate Medicare—delivering modern healthcare—and a 200-bed SUM Hospital in Berhampur.

At the core of ITER's prowess is its wide range of academic offerings. Ranked 26th in India in the NIRF Engineering Rankings 2024, the institute offers undergraduate, postgraduate, and doctoral programs in engineering, technology, and applied sciences. Flagship B.Tech programs span traditional streams like Mechanical, Electrical, Civil, and Electronics & Communication Engineering, as well as high-demand specializations such as AI, Cyber Security, Data Science, and IoT. Postgraduate offerings include M.Tech, MCA, M.Sc, and Ph.D. programs designed to bridge academic theory with real-world application.

ITER provides students with a dynamic learning environment powered by smart classrooms, high-tech laboratories, and specialized infrastructure. Dedicated labs—like those for VLSI and Embedded Systems, Design and Manufacturing, and IoT—enable hands-on learning and innovation. Beyond academics, the campus also supports an active sports culture with top-tier facilities for cricket, football, basketball, badminton, tennis, and more. A well-equipped gym with professional trainers and a hygienic multi-cuisine cafeteria promotes student well-being.

Safety and inclusivity are prioritized, with 24/7 CCTV surveillance and a strictly enforced anti-ragging policy. Importantly, ITER maintains an accessible and affordable fee structure, opening doors for students from diverse socioeconomic backgrounds.

The central library is a hub of knowledge and research, offering access to some of the leading repositories including IEEE, Springer, and Elsevier. ITER also fosters entrepreneurship through its Center for Innovation and Incubation (SOA-CII) and the Atal Incubation Center (AIC-SOA Foundation), helping student-led startups grow from idea to execution.

Perhaps most impressively, ITER boasts an enviable placement record. Its students have secured roles at top global companies including Microsoft, Infosys, IBM, Accenture, TCS, HCL, EY, Deloitte, Tata Technologies, PwC, Capgemini, Siemens, Akamai, J.P. Morgan, Samsung, CISCO, and many others. These outcomes reflect the institute's commitment not just to employability, but to shaping well-rounded professionals who contribute meaningfully to industry and society.

As the world continues to evolve at an unprecedented pace, ITER remains steadfast in its mission: to prepare future-ready leaders, innovators, and changemakers.

Morgan, Samsung, CISCO, and many others. These outcomes reflect the institute's commitment not just to employability, but to shaping well-rounded professionals who contribute meaningfully to industry and society.

As the world continues to evolve at an unprecedented pace, ITER remains steadfast in its mission: to prepare future-ready leaders, innovators, and changemakers.

Institute Sets Benchmark with 102 Startups Valued at Rs500 crone

13 • PG | 118 • Sqcm | 266694 • AVE | 2.78M • Cir | Middle Right | Delhi Times

Delhi

Institute Sets Benchmark with 102 Startups Valued at ₹500 crore

At a time when the nation is championing Atmanirbhar Bharat and Startup India, GL Bajaj Institute of Technology and Management, Greater Noida, has arisen as a crucible of innovation, making waves across India's entrepreneurial landscape. The institution has incubated Around 102 startups, valued at somewhere around 500 crore—an extraordinary feat unmatched by most academic institutions across the country.

What sets this achievement further apart is that over 50% of these ventures are founded by women, reflecting gender parity and inclusive growth.

These startups are purpose-driven enterprises tackling challenges across diverse sectors, including healthcare technology, renewable energy, agritech, edtech, fintech, AI and machine learning, cybersecurity, social impact, and mobility solutions. From mobile apps that assist visually impaired users in navigation to AI-powered platforms enhancing remote healthcare diagnostics, GL Bajaj's innovation engine is solving problems that matter to millions.

Placements That Set Benchmarks

GL Bajaj's innovation journey is matched by its strong placement record, with over 2000 recruiters visiting its campus annually. Some of the prestigious companies like Amazon, Capgemini, Deloitte, TCS, Infosys, Cognizant, Zscaler, Wipro, and Palo Alto Networks continue to handpick talent from the institution, year after year.

Global Stage: International Conferences at GL Bajaj

GL Bajaj has become a booming epicenter for global academic discourse, regularly hosting international conferences that unite researchers, industry pioneers, policymakers, and students. The recent IEEE-sponsored International Conference on Power, Energy, Environment, and Intelligent Control (PEEIC 2024) showcased research in sustainable technologies.

Other marquee conferences have explored themes such as Disruptive Technologies in the 21st Century, Multidisciplinary Concepts in Management & Innovation, Artificial Intelligence in Healthcare, Smart Cities, IoT & Mobility, and Women in Leadership & Tech.

These forums are knowledge-sharing platforms.

Pankaj Agarwal, Vice Chairman, GL Bajaj Educational Institutions, Greater Noida/ Mathura, honoured by Nitin Gadkari, Hon'ble Minister of Road Transport and Highways of India, for his contribution in the field of Electric Vehicles

Mental Wellness: A Priority, not a Privilege

Understanding that success stems from overall development, GL Bajaj hosts annual Mental Health Conclaves, inviting Spiritual and thought leaders. Names like Sadhguru and Gaur Gopal Das have graced the institution to share wisdom.

The institution has taken a visionary approach to ensuring that students evolve emotionally and spiritually.

Hackathons That Drive Disruption

Innovation at GL Bajaj goes beyond labs. It succeeds in its competitive hackathon ecosystem. Students participate in and frequently win national and international hackathons, including Kavach (Cybersecurity Challenge by MoE & MHA), SuperNova. These events torch the creative and critical minds of tomorrow, producing ideas and solutions.

Visionary Visits: Wisdom That Transforms

What makes GL Bajaj's learning atmosphere even more unique is its regular engagement with icons, celebrities, cricketers, and changemakers from various walks of life. Over the past few years, the institution has welcomed Shrikant Bolla, Bill Gates, Chief Minister of Uttar Pradesh- Yogi Aditya Nath, K. Sivan, Ashutosh Rana, Chris Gayle, Brett Lee, Vishwa Hindu Parishad National Secretary Alok Kumar, Sunidhi Chauhan, Kumar Vishwas, Tripti Dimri, Kumar Vishwas, Vicky Kaushal, Sanya Malhotra and many many more. These interactions have left an unforgettable impact on students.

Labs That Lead: Tech Hubs of the Future

GL Bajaj's infrastructure is an embodiment of its futuristic vision. The institution has specialized Centers of Excellence, including Cisco Cybersecurity Lab – recently inaugurated, and one of the first in North India, Palo Alto Cybersecurity Lab. These centers are the grounds where the next generation of technologists are built.

In its pursuit of academic brilliance and societal transformation, GL Bajaj is a movement that empowers dreamers to become doers, ideas to become enterprises, and students to become global citizens.

Delhi

WHERE DREAMS GET WINGS TO FLY

In a world being rapidly transformed by emerging technologies like Artificial Intelligence, Data Science, and the Internet of Things, the Institute of Technical Education and Research (ITER) in Bhubaneswar stands as a beacon of academic eminence, innovation, and holistic development.

Part of the renowned Siksha 'O' Anusandhan (SOA), Deemed to be University, ITER has carved a niche for itself by nurturing young minds to meet the challenges of tomorrow with skill, vision, and integrity.

Founded in 1996-97 with just 118 students in a modest rented facility, ITER is the manifestation of the visionary dream of Prof. Manojranjan Nayak, an alumnus of both NIT Rourkela and IIT Kharagpur. His goal was clear—democratize access to modern technical education in Odisha. Nearly three decades later, that dream has blossomed into one of India's most distinguished engineering institutions, backed by state-of-the-art infrastructure, world-class faculty, and an unrelenting pursuit of excellence.

ITER is now a proud and integral part of SOA, which has seen meteoric growth in India's academic landscape. Ranked 14th nationally in the NIRF Rankings 2024, SOA has also received A++ accreditation from NAAC (2022) and Category-I Graded Autonomy by the UGC. Its international reputation is reflected in its strong performance in the QS and Times Higher Education (THE) World University Rankings 2025. ITER specifically features in the 501-600 band globally in Engineering and Technology; and in the 601-800 band in Computer Science (THE 2025). It also appears in the 401-450 (Engineering) and 751-850 (Computer Science and Information Systems) bands in the QS Subject Rankings 2025.

"ITER is the tiny seed sown years ago that has grown into a vast educational edifice where quality education and focused research converge to create global citizens ready to shine in every sphere of life," reflects Prof. Nayak, Founder President of SOA.

The growth of ITER is mirrored by the expansive SOA ecosystem, which today includes institutions for medical, dental, pharmaceutical, legal, agricultural, management, hospitality, and veterinary sciences. SOA also operates two medical and nursing colleges, the SUM Ultimate Medicare—delivering modern healthcare—and a 200-bed SUM Hospital in Berhampur.

At the core of ITER's prowess is its wide range of academic offerings. Ranked 26th in India in the NIRF Engineering Rankings 2024, the institute offers undergraduate, postgraduate, and doctoral programs in engineering, technology, and applied sciences. Flagship B.Tech programs span traditional streams like Mechanical, Electrical, Civil, and Electronics & Communication Engineering, as well as high-demand specializations such as AI, Cyber Security, Data Science, and IoT. Postgraduate offerings include M.Tech, MCA, M.Sc, and Ph.D. programs designed to bridge academic theory with real-world application.

ITER provides students with a dynamic learning environment powered by smart classrooms, high-tech laboratories, and specialized infrastructure. Dedicated labs—like those for VLSI and Embedded Systems, Design and Manufacturing, and IoT—enable hands-on learning and innovation. Beyond academics, the campus also supports an active sports culture with top-tier facilities for cricket, football, basketball, badminton, tennis, and more. A well-equipped gym with professional trainers and a hygienic multi-cuisine cafeteria promotes student well-being.

Safety and inclusivity are prioritized, with 24/7 CCTV surveillance and a strictly enforced anti-ragging policy. Importantly, ITER maintains an accessible and affordable fee structure, opening doors for students from diverse socioeconomic backgrounds.

The central library is a hub of knowledge and research, offering access to some of the leading repositories including IEEE, Springer, and Elsevier. ITER also fosters entrepreneurship through its Center for Innovation and Incubation (SOA-CII) and the Atal Incubation Center (AIC-SOA Foundation), helping student-led startups grow from idea to execution.

Perhaps most impressively, ITER boasts an enviable placement record. Its students have secured roles at top global companies including Microsoft, Infosys, IBM, Accenture, TCS, HCL, EY, Deloitte, Tata Technologies, PwC, Capgemini, Siemens, Akamai, J.P. Morgan, Samsung, CISCO, and many others. These outcomes reflect the institute's commitment not just to employability, but to shaping well-rounded professionals who contribute meaningfully to industry and society.

As the world continues to evolve at an unprecedented pace, ITER remains steadfast in its mission: to prepare future-ready leaders, innovators, and changemakers.

A TRENDSETTER IN NEW-AGE EDUCATION, INNOVATION, AND IMPACT

SRM University-AP, Amaravati: Driven by Knowledge, Defined by Purpose

SRM University-AP, Amaravati, is carving a distinct identity in India's higher education landscape as a new-age, multidisciplinary, research-intensive force, driven by a strong commitment to academic quality, innovation, and societal impact.

Established in 2017 in the heart of Amaravati—India's envisioned global capital—the university is spread across a 100-acre, eco-friendly campus built on principles of sustainable development, aligning seamlessly with the broader vision of Amaravati as a futuristic greenfield city in Andhra Pradesh.

In just a few years, SRM-AP, Amaravati has achieved remarkable progress, gaining prominence for its innovative research, global partnerships, entrepreneurial spirit, and community-driven initiatives. Its international collaborations and outreach programmes continue to serve as catalysts for regional transformation.

Consistently ranked the #1 University across multiple rankings and recently awarded an AAAAA rating by Careers360 among the Top Engineering Colleges in India, SRM-AP stands as a beacon of modern education and innovation.

> "SRM University-AP, Amaravati, has a community working together towards a model for the future of higher education in India, Asia, and globally. A university like SRM-AP, Amaravati, promises to build on the best of the past while creating new models for the future."
>
> *- Prof. Nicholas B Dirks, Honorary Pro-Chancellor and Member of the Governing Body, SRM University-AP, Amaravati*

Leading with a Future-Focused Academic Model

SRM University-AP, Amaravati aligns its academic structure with both industry needs and student aspirations through a progressive Outcome-Based Education (OBE) framework enhanced by the Choice-Based Credit System (CBCS). The academic offerings span three broad verticals: Engineering Technologies, Management, and Liberal Arts.

Students are encouraged to craft personalised learning journeys through interdisciplinary major-minor combinations and open electives. The curriculum is anchored in active, experiential learning- including case studies, simulations, industry projects, internships, and continuous assessments designed for a holistic development, building core competencies such as critical thinking, communication, and problem-solving.

From undergraduate to doctoral levels, the university offers new-age, application-driven programmes that equip students with both global exposure and practical expertise.

Ensuring Latest Knowledge, through Global Collaboration

A standout feature of SRM-AP, Amaravati's academic ecosystem is its focus on future-oriented, modern domains such as Artificial Intelligence. With more than 100 affiliations across the globe, it has fortified its research and pedagogy with landmark collaborations, like one with the School of Computer Science at Carnegie Mellon University (CMU SCS), USA - one of the world's premier AI research hubs.

Partnerships like this enable joint research, student internships, AI lab development, curriculum enrichment, and faculty development initiatives, collectively enhancing the university's technological edge and academic rigour.

Strong Placement Record with Global Impact

SRM-AP, Amaravati has built a robust academia-industry interface that supports exceptional student placements. Recognised by FICCI for 'Excellence in Creating Employment' and by World Education Summit 2025 as one of the 'Best Universities with Excellent Placement of the Year', the university continues to foster strong corporate partnerships.

P Sathyanarayanan, Pro-Chancellor, SRM University-AP

Programs such as alumni mentorship, skill training and a structured mentor-mentee ecosystem prepare students for evolving market dynamics. The Industry-Institute Interaction platform further facilitates exposure to industry leaders through workshops, webinars, and training sessions.

Students have secured prestigious roles in some of the top-tier companies including Oracle, IBM, Philips, Deloitte, Samsung, PayPal, Amazon, Flipkart, JPMorgan Chase, and Volvo, among others, with approximately 850 recruitment partners, some of the top packages ranging from ₹45-₹55 LPA, and ~5% of students placed internationally. Despite being young, SRM-AP, Amaravati has emerged as a hub for placements. Moreover, some of its students gain admission to QS Top 50 universities globally, often with scholarships, for higher studies.

Creating a Culture of Innovation and Research Eminence

With a strong focus on entrepreneurship and innovation, SRM-AP, Amaravati has developed Innovative research infrastructure including eight Centres of Excellence and a comprehensive digital and physical library. Recognised by ASSOCHAM for Excellence in Enabling Research Environment (Science), the university prides to have set-up 80+ Labs for research and boasts over 2,193 research publications (more than 40% in Q1 journals), over 480 patents filed, 55 granted, and two successful technology transfers. With a Scopus H-index of 67, it ranks third among private Indian universities in the Nature Index 2023, and five of its faculty are listed among Stanford University's top 2% scientists worldwide.

The entrepreneurial spirit is supported by Hatchlab Research Centre, which has incubated over 40 startups. The university's flagship rural entrepreneurship initiative—ADITRI has empowered nearly 100 women entrepreneurs across AP.

Pro-Chancellor P. Sathyanarayanan summarises his vision as:

> "At SRM University-AP, Amaravati, we don't just educate—we inspire and provide a launchpad for future aspirants. Rooted in innovation and research, and guided by a bold vision, we equip students with the knowledge, purpose, and skills to shape their path and create a better world. Here, education is not mere learning—it's a real-world experience and a lifelong catalyst for personal growth and societal transformation."

Holistic Development of a Global Citizen

SRM-AP, Amaravati's inclusive and nurturing environment has enabled students to thrive in academics, athletics, and adventure. Olympians Deepthi Jeevanji- a Bronze medallist at the Paralympics 2024, and Jyothika Sri Dandi, who represented India in the Women's Relay at Paris Olympics 2024, are stellar examples of the university's sporting legacy.

It is also the first private university in India to send a student expedition to the Everest Base Camp, underscoring its commitment to developing leadership, resilience, and global awareness. Among a student body of over 9,000 learners from almost every Indian State and 28 nationalities internationally, supported by 800 university staff, SRM University-AP, Amaravati offers a culturally rich, intellectually vibrant, and globally aligned educational experience.

A Vision defining Future: Educating to drive change

Guided by a noble vision, SRM-AP, Amaravati is poised to set newer benchmarks ahead. 21st century course spread, an expanding campus, an Industrial Research Park, state-of-the-art AI Labs with capable faculty & passionate talents, will cumulatively curate an ecosystem that drives collaboration between academia and industry. SRM-AP's roadmap is firmly aligned with building a globally respected, future-ready institution that delivers holistic, high-impact education.

> "SRM University-AP, Amaravati, challenges the boundaries of scientific knowledge and research acquisition. The university embraces application-oriented teaching and learning methodologies, nurturing students to be industry-ready professionals with 21st century skillsets.
>
> *- Prof. Manoj K Arora, Vice Chancellor*

Delhi

Blending Urban Advantage with Academic Distinction

In an era where higher education is rapidly evolving to match the pace of global industry demands and technological innovation, SRM Institute of Science and Technology (SRMIST), Vadapalani campus, is steadily gaining traction as a high-impact urban university.

Strategically located in the heart of Chennai — right next to the Vadapalani Metro Station — the campus is becoming one of the preferred destination for students seeking academic rigour, international exposure, and strong career outcomes.

With over 8,000 students currently enrolled, More than 2000 recruiters engaged, and approximately 80 international collaborations in place, SRMIST Vadapalani is emerging as more than just a regional education hub — it is increasingly being recognised as a launchpad for global careers.

Comprehensive Industry Linkages & Strong Placement Performance

SRMIST Vadapalani's one of the most compelling strength lies in its career-focused ecosystem. The campus maintains remarkable placement track record across all major disciplines — Engineering, Management, Science, and Humanities.

- The highest CTC recorded by students from SRMIST has reached an impressive ₹52 LPA (as per LinkedIn data), with another notable package of ₹34.62 LPA offered to a CSE student from the 2016-2020 batch
- The average CTC stands at approximately ₹7.5 LPA, although it varies across departments
- Placement achievement is consistent, with placement rates depending on the stream and programme

Over 2,000 companies have visited the SRM Group campuses for recruitment over the years. The Vadapalani campus continues to attract industry giants such as:

- EY, TCS, Cognizant, Accenture, IBM, Amazon, Google, Wipro, Deloitte, Infosys, and KPMG, among others

This industry engagement extends beyond recruitment. SRMIST offers students regular exposure to guest lectures, internships, case competitions, and hands-on training aligned with real-world business and engineering challenges.

National Accreditations and Global Rankings

SRMIST Vadapalani holds a firm place in national and international rankings, validating the academic and institutional quality it offers.

- Accredited with NAAC A++, the highest possible grade, valid until 2031
- All programmes are fully approved by UGC and AICTE, ensuring academic compliance and standardisation
- Ranked in the Top 30 in Engineering and Pharmacy under the National Institutional Ranking Framework (NIRF)
- According to QS World University Rankings, SRMIST is placed in the 1001-1200 bracket globally, and is notably ranked 17th in India for sustainability performance, a rare honour for private institutions in the country

Such credentials reflect a consistent commitment to academic quality and socially responsible development.

Research, Innovation, and National Recognition

Research and innovation are at the core of SRMIST Vadapalani's ethos. The university has received multiple honours under the Atal Ranking of Institutions on Innovation Achievements (ARIIA) — a prestigious indicator of innovation output in Indian higher education.

- Ranked 2nd in 2020, 3rd in 2019, and 4th in 2021 among all private institutions in India for innovation

SRMIST has also earned a spot on the Nature Index Ranking, which highlights institutions contributing significantly to quality scientific research. Areas of special focus include:

- Chemistry
- Life Sciences
- Environmental Studies

In 2024, the Vadapalani campus celebrated its students' victory at the Smart India Hackathon, a national competition backed by the Government of India that recognises innovation and problem-solving at scale. This win speaks volumes about the campus's research culture and mentorship support.

International Collaborations and Global Exposure

SRMIST Vadapalani places significant emphasis on creating global citizens. The university has fostered more than 80 international collaborations with reputed institutions and research centres around the world.

The International Advisory Board (IAB) features faculty and thought leaders from universities such as:

- Harvard University
- Massachusetts Institute of Technology (MIT)
- Stanford University
- University of Cambridge

Students benefit from the Semester Abroad Programme (SAP), which provides opportunities to study or intern at global institutions, equipping them with international experience, cross-cultural skills, and industry-aligned learning.

These collaborations further enhance curriculum delivery, facilitate joint research, and expose students to international standards of academic delivery and assessment.

Comprehensive Academic Offerings

SRMIST Vadapalani delivers a diverse academic portfolio across undergraduate, postgraduate, diploma, and doctoral levels. All programmes are tailored with an emphasis on industry relevance and emerging technology trends.

Faculty of Engineering & Technology

- B.Tech:
  - Computer Science & Engineering (General and Honours)
  - CSE with Artificial Intelligence & Machine Learning
  - CSE with Big Data Analytics
  - CSE with Cyber Security
  - Computer Science and Business System
  - Electronics & Communication Engineering (ECE with Data Science)
  - Electronics Engineering (VLSI Design & Technology)
  - Mechanical Engineering (including AI/ML specialisation)
  - Working Professional formats available in select streams
- M.Tech:
  - CSE with AI & ML
  - VLSI Design

Faculty of Management

- Undergraduate:
  - BBA (General and Specialised Tracks)
  - Postgraduate:
  - MBA in Marketing, Finance, HRM, Analytics, and Operations
  - MBA in Banking and Financial Services
  - MBA for Working Professionals

Faculty of Science & Humanities

- B.Com specialisations in:
  - General, Accounting & Finance, International Finance, Computer Applications, Finance & Taxation (with Chartered Accountancy coaching)
- BCA and BCA with Data Science
- B.Sc programmes in:
  - Cyber Security
  - Psychology
  - Visual Communication
  - Hotel & Hospitality Administration
- Postgraduate options include:
  - M.Com
  - MCA
  - Master of Social Work (MSW)
  - Diploma in Hotel Management & Catering Science

Each programme is supported by value-added training, skill certification modules, and career guidance services, ensuring students are industry-ready from day one.

Campus Infrastructure & Health Partnerships

While being compact at 5 acres, the Vadapalani campus maximises its location and layout:

- Digitally enabled classrooms and fully equipped laboratories for hands-on learning
- Campus-wide high-speed Wi-Fi
- Access to modern computing tools and cloud-based platforms
- A dedicated tie-up with SIMS Hospital, located adjacent to the campus, ensuring access to quality healthcare for students and staff

The campus is also accessible via the Chennai Metro, making daily commute convenient for day scholars and faculty.

Cultural Activities and National Representation

SRMIST Vadapalani places equal importance on co-curricular development. The annual Margazhi Vaibhavam event brings together students and faculty in celebration of Tamil culture through traditional music, dance, and art forms.

The campus is also home to student-athletes of national repute:

- Prithviya Tondaiman, Olympian and national-level shooter
- Nethra Kumanan, India's first female sailor to qualify for the Olympics

Both are products of SRM's support for sports and flexible academic planning that accommodates rigorous training schedules.

Student-Centric Governance and Safety

SRMIST enforces a strict anti-ragging policy. In line with UGC regulations, any student found guilty of ragging or abetting it faces strict disciplinary action, including possible expulsion.

Support services include:

- Academic counselling
- Mental health support
- Mentorship programmes
- Career advisory cells

This student-first approach fosters a respectful, inclusive, and supportive campus culture.

SRM INSTITUTE OF SCIENCE & TECHNOLOGY VADAPALANI

Admissions Open for 2025–26

Applications are now being accepted for the 2025-2026 academic year. The admission process is open for all UG, PG, and diploma programmes across the three faculties.

Delhi

Redefining Engineering Education with Global Vision and Local Impact

In an era where the demands of the engineering profession are rapidly evolving, Chitkara University has emerged as a flagbearer of innovation, quality, and global relevance in engineering education. From academic distinction to strong industry linkages and meaningful international collaborations, the university continues to redefine the parameters of what makes an engineering institution truly modern. With a blend of futuristic pedagogy, real-world exposure, and global integration, Chitkara University is preparing students not just for jobs, but for lifelong success and leadership in a dynamic global economy.

The university's impact on India's higher education landscape is reflected in its growing recognition across national rankings. In Rankings 2024, by one of the leading magazine, Chitkara University's engineering programs secured great position nationally—an achievement that places it among the top engineering institutions in the country. Its 10th rank in the Employability Index one of the leading magazines for T-School Rankings 2024 further underscores the university's strong emphasis on making students career-ready from day one.

The foundation of Chitkara's success lies in its forward-looking, industry-aligned curriculum. The university offers a wide range of undergraduate engineering programs, including B.E. CSE with specialisations in Artificial Intelligence & Machine Learning in collaboration with Microsoft, Cloud Computing and Virtualisation Technology in collaboration with AWS, Civil Engineering with specialisation in AI & ML as well as niche disciplines like Mechatronics, and Electronics & Communication with specialised tracks in IoT, VLSI and Embedded Systems. Automobile Engineering with specialisation in Electric and Hybrid Vehicles (EV & HEV) is offered in collaboration with ARAI. These programs build strong academic foundations while encouraging critical thinking, interdisciplinary collaboration, and practical learning through labs, projects, and live simulations. This emphasis on experiential learning equips graduates to solve complex, real-world challenges across industries.

A standout feature of Chitkara University's approach is its focus on global exposure. Collaborations with some of the prestigious institutions such as Arizona State University (ASU), USA—ranked #1 in the U.S. for innovation—enable the university to offer a Dual Degree in B.E. Computer Science and Technology. Students complete two years at Chitkara and two years at ASU, earning a globally recognised degree. Similarly, 2+2 pathway programs in Software Engineering and Artificial Intelligence & Machine Learning are offered in academic mentorship with Deakin University, Australia, which ranks among the top 1% of universities worldwide. These collaborations provide cross-cultural experiences and boost global employability, preparing students for multicultural professional environments.

Research and innovation are integral to Chitkara's engineering ecosystem. The university has seen a steady increase in research output, with publications gaining visibility in reputed international journals. Faculty and students are involved in research projects supported by government bodies, industry leaders, and international agencies. Research areas range from AI and cybersecurity to sustainable infrastructure and automation, with undergraduate students encouraged to contribute from early stages.

Industry collaboration remains another cornerstone of Chitkara University's success. These partnerships influence the curriculum, drive pedagogy, and provide real-world mentorship and project opportunities. Centres such as the Code Experience Centre powered by Capgemini, and the iOS Student Development Centre supported by Apple and Infosys, keep students in sync with the latest technological trends. This has translated into remarkable placements with some of the top recruiters like Microsoft, Deloitte, Infosys, Capgemini, and Tata Technologies. The highest package offered has exceeded ₹1 crore per annum, highlighting the international value of a Chitkara engineering degree.

Chitkara University also takes pride in its modern infrastructure, with advanced labs, Centres of Excellence, simulation environments, and smart classrooms. Students are encouraged to participate in national and international hackathons, join innovation clusters, and explore entrepreneurship through campus-based incubators.

Chitkara University is not just awarding degrees—it is shaping future-ready engineers who are technically skilled, adaptable, creative, and capable of leading in a globalised world. With academic rigour, real-world relevance, and strategic international collaborations, the university is transforming engineering education in India.

In a world driven by innovation and defined by global collaboration, Chitkara University continues to stand tall. Its Achievements are a testament to visionary leadership and a resolute belief in creating not just engineers, but change-makers who are equipped to shape the future.

7.4% GDP growth in Jan-March pushes FY25 figure to 6.5%

1,17 • PG | 341 • Sqcm | 826784 • AVE | 500.33K • Cir | Middle Center,Top Center

Pune

7.4% GDP growth in Jan-March pushes FY25 figure to 6.5%

Slowest In 4 Years, But Fastest Among Major Economies

TIMES NEWS NETWORK

New Delhi: India's economy grew faster than expected at 7.4% in the Jan-March quarter, led by robust growth in agriculture and construction. The strong quarterly showing — the fastest in the fiscal year — pushed overall growth in 2024-25 to 6.5%, according to data released by the National Statistics Office.

The Jan-March figure outperformed the upwardly revised 6.4% in the Oct-Dec period, and pointed to robust momentum in the fourth quarter amid global uncertainty. India remained the fastest growing major economy in the March quarter, followed by China at 5.4% and Indonesia at 4.9%.

The full-year growth estimate was in line with expectations and the second advance estimate, but the lowest in 4 years, on the back of 9.2% expansion in the previous year.

Chief economic adviser V Anantha Nageswaran on Friday said robust domestic demand has supported GDP growth and private consumption share has risen to the highest level since FY04. "Govt retains its outlook on FY26 growth at 6.3-6.8%, with private consumption, especially the rural rebound, and resilient services exports as the key drivers," Nageswaran said in a presentation after the data was released. Multiple agencies project India's growth to be in the range of 6.3-6.7% this year, he said.

The Jan-March quarter data showed the farm sector remaining robust with growth of 5.4% while the construction sector grew 10.8% in the same period. The services sector remained steady at 7.3% in the March quarter compared with an expansion of 7.8% in the same year earlier quarter.

▶Agriculture sector, P 17

Agriculture sector boosts growth

▶Continued From Page 1

The 6.5% growth for 2024-25 was attributed to a pickup in private consumption and investment while the acceleration in investment demand led to the sharp jump in the fourth quarter performance. "In line with expectations, real GDP registered 6.5% growth in fiscal 2025, elevating the Indian economy's size to $3.9 trillion from $3.6 trillion in fiscal 2024," said DK Joshi, chief economist at ratings agency Crisil.

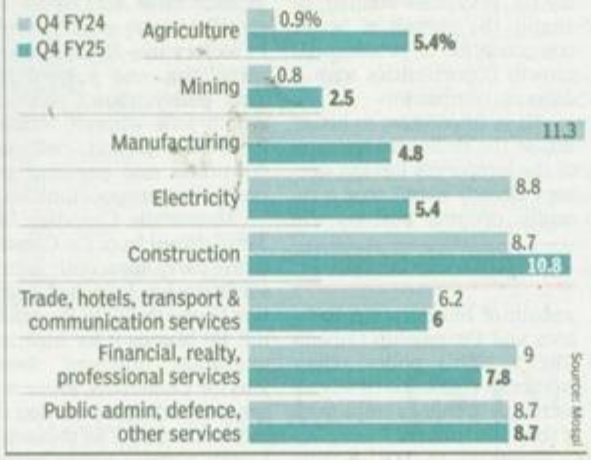

Rumki Majumdar, Economist, Deloitte India, said agriculture has emerged as a bright spot in FY2024-25, growing at a robust 4.6 per cent compared to 2.7% in the previous year.

With the monsoon arriving on time and food inflation easing, rural households are likely to see improved purchasing power. This comes on the back of already strong rural consumption trends over the last few quarters (as seen in the FMCG sector growth), and the momentum is expected to continue, providing a solid tailwind to overall domestic demand.

Ranen Banerjee, Partner and Leader, Economic Advisory, PwC India, opined the GDP estimate at 6.5% growth for FY25 is a strong print in view of the global headwinds facing the economy.

Transforming engineering education through innovative practices and impactful strategies

ISBM College of Engineering, Pune - Empowering Efficient and Innovative Technocrats to fit into Global Competency

In the ever-evolving landscape of technical education in India, ISBM College of Engineering (ISBM COE), Pune, stands out as one of the promising and rapidly emerging institution. Established in 2010 under the aegis of the People Empowerment Group, ISBM COE is affiliated with Savitribai Phule Pune University and is approved by AICTE.

In a short span, the college has carved a niche for itself as a hub of academic quality and innovation. Located amidst the lush green surroundings of Nande village near Pune, the campus offers an ideal environment for focused learning and holistic personal development.

Pramod Kumar, Founder President, ISBM Group

The college's vision of nurturing globally competent engineers is supported by a structured academic framework and a vibrant campus life, maintaining a healthy balance between academics and extracurricular engagement.

With a NAAC accreditation, ISBM COE is gradually gaining recognition for its student-centric approach, industry integration, and outcome-based learning model.

The college offers new-age undergraduate programs not only in traditional fields like Computer, Mechanical, and Electronics Engineering, but also in emerging domains such as Artificial Intelligence and Data Science, AI and Machine Learning, and VLSI & Design Technology. These programs are meticulously designed to align with the demands of future industries, emphasizing practical knowledge and technical skill development.

ISBM COE features state-of-the-art laboratories, a comprehensive digital library, a team of experienced faculty, strong and active industry collaborations. To foster innovation and entrepreneurship among its students, the institution frequently hosts seminars, workshops, and hackathons. With a strong placement record involving companies like TCS, Infosys, and Wipro, ISBM COE demonstrates a firm commitment to employability and career development.

TRANSITION FROM CAMPUS TO CORPORATE LIFE

Fresh Grads Face Hurdles in Job Market

Intake by top recruiters down by more than half this placement season as India Inc turns cautious

LIjee Philip & Rica Bhattacharyya

Mumbai: Fresh graduates at some of India's top colleges are enduring one of their toughest placement years yet, with intake by prominent recruiters falling by more than half, according to college sources and top company officials.

People said India Inc has turned cautious in fresher hiring due to lower workforce needs amid global geopolitical turmoil and macroeconomic headwinds, crimping business growth this year.

While many companies halted fresher onboarding even after making final offers, some delayed issuing offer letters despite shortlisting candidates. Many candidates are also awaiting their final interviews while some candidates have been kept in the limbo after several rounds of interviews, officials and student placement coordinators at nearly half a dozen undergraduate institutes told ET.

For thousands of final-year students across engineering, management, and other professional courses, a supposed exciting transition from campus to corporate life has transformed into a period of deep uncertainty.

Colleges such as St Xavier's College Mumbai, Jai Hind College, Fr Agnel, and St Francis Institute of Technology, among others, have seen placement percentages drop from last year.

At St Xavier's, among the country's leading UG colleges, placement numbers were lower this year compared to previous years though twice as many companies visited for campus interviews.

"About 89 companies came to campus this year versus 40-42 last year with many mid-sized firms and startups coming for the first time. However, the hiring numbers of big recruiters were 50-70% of last year," said Radhika Tendulkar, placement in-charge at St Xavier's College.

Top recruiters in the college included Accenture, DE Shaw, IDFC, Hindustan Unilever, EY, Bain, ICICI, HSBC, and Deloitte.

Companies, on their part, cite a mix of recessionary trends, AI-driven disruptions, and a perceived lack of preparedness among students. Many recruiters say they now prefer candidates with at least 2–3 years of experience, seeing fresh graduates as risky hires who might quickly leave for further studies.

Fr Agnel's CR College of Engineering in Bandra acknowledged the shift. In an official email, they said, "This year's placement trend has been more challenging. Profiles have shifted from wide-spectrum roles to narrow-spectrum ones. We are introducing laboratory-focused curricula, activity-based learning, and appointing professors of practice to bring industry expertise into classrooms."

May GST kitty up 16%, highest rise since Oct '22

GST collections rose 16.4% to ₹2,01,050 crore in May, the fastest since Sept 2022. GST from imports rose 25.2% to ₹51,266 crore in May (for transactions in April), while mop-up from domestic sources, which is almost three-fourths of the overall kitty, was 13.7% higher at just under ₹1.5 lakh crore. P15

GST collections up 16%, fastest since Oct 2022

Get Boost From Jump In Taxes On Imports

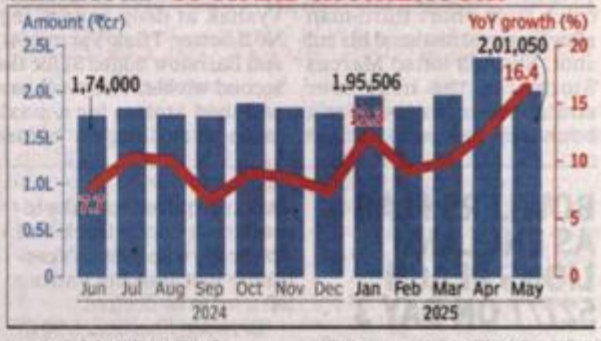

TIMES NEWS NETWORK

New Delhi: Goods and services tax (GST) collections rose 16.4% to Rs 2,01,050 crore in May, the fastest pace of expansion since Oct 2022, on the back of a jump in taxes on imports.

Latest data estimated that during May (for transactions in April), GST collections from imports rose 25.2% to Rs 51,266 crore, while the mop-up from domestic sources, which is almost three-fourths of the overall kitty, was 13.7% higher at just under Rs 1.5 lakh crore.

Imports during April had shot up 19% to nearly $65 billion due to a spike in crude oil and fertiliser shipments, among other things. "A 16% growth in GST collections shows a renewed upward momentum after few months of growth in the range of 11% to 12%. If the growth continues in this range for next couple of months, it might provide the cushion for govt to look at rate rationalisation on which a lot of work has already been done," said Pratik Jain, partner at consulting firm PwC.

RENEWED UPWARD MOMENTUM

Last week, govt sources indicated that the finance ministry is working with the states to rationalise GST rates with a review of the slabs on the table. On a net basis, collections were 20.4% higher at Rs 1,73,841 crore as refunds were 4% lower at Rs 27,210 crore, despite domestic refunds soaring 53.7% to Rs 18,314 crore.

There was, however, wide variation among the states. Arunachal Pradesh (53%), Nagaland (46%) and Delhi (38%) topped the growth charts, with Tamil Nadu (25%), Kerala (24%), Bihar (23%) and Karnataka (20%) in the middle. At the other end, were Andhra (2% dip), Uttarakhand (13% decline) and Mizoram (26% fall) which reported lower collections.

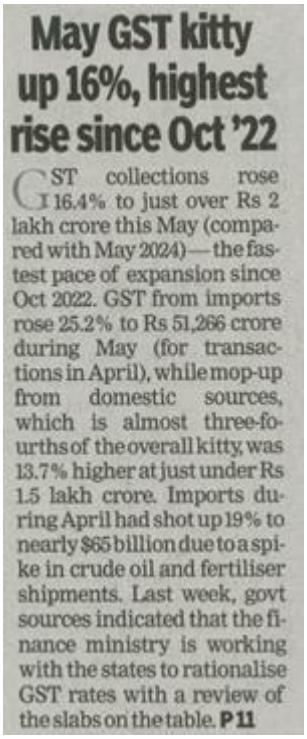

"The average growth across the country does not appear to be uniformly reflected across states, possibly due to sectoral or seasonal factors, which require a deeper data based analysis, said M S Mani, partner for indirect taxes at Deloitte India.

Why smart, sustainable, and user-friendly products truly matter

12 • PG | 119 • Sqcm | 144448 • AVE | 2.78M • Cir | Top Right | Education Times

Delhi

Why smart, sustainable, and user-friendly products truly matter

Product designers are no longer just makers of physical goods but strategic thinkers, writes **Divya Saxena Hiran**

In the rapidly evolving world driven by technology, sustainability, and innovation, industrial design is emerging as a vital career option that merges aesthetics, functionality, and a deeply user-centric approach. Globally, industrial designers are reimagining how medical devices, transportation systems, home furniture, consumer electronics, and smart packaging will shape the future of human use. As products become smarter, more customised, sustainable, and increasingly user-focused, companies are no longer viewing designers solely as creators of aesthetically pleasing objects, but as professionals who understand how and why their designs matter. Product designers are no longer just makers of physical goods; they are strategic thinkers, problem-solvers, and agents of change.

That is why product designers are trained to lead not only in design studios but also as business impact makers, policy builders, and reformers. According to Grand View Research, the global enterprise networking market was valued at $189.40 billion in 2022 and is expected to grow at a CAGR of 5.8% from 2023 to 2030, driven by advancements in smart manufacturing, technology, smart product experiences, and design-led innovation, all of which directly impact business growth. Companies such as Apple, IKEA, Dyson, and Tesla exemplify how industrial design can directly influence brand value and customer loyalty.

> The shift from employment to entrepreneurship is growing, with Gen Z and millennials increasingly driven to start their own ventures

Modular solutions

The industrial design sector in India is witnessing a similar rise. Government initiatives such as 'Make in India', 'Startup India', and 'Atmanirbhar Bharat' have paved the way for product development and design, while startups and established firms alike are realising the value of design and its potential to create impact. Emerging sectors such as electric vehicles, medical devices, agro-tech, urban modular solutions, and affordable housing, offer significant opportunities for industrial design. According to Circular Economy principles, over 90% of a product's environmental impact is determined during the design phase, making sustainability a critical design consideration.

The industrial design curriculum encourages students to tackle design problems through the lens of environmental responsibility and social impact. Real-world challenges through live industry projects include working on inclusive product development and impactful, user-centric, eco-conscious design and packaging. Workshops and collaborations help students understand the real-life implications of their design solutions. Students are also trained in the latest digital design tools and have access to fabrication labs and rapid prototyping facilities, enabling them to bring ideas to life quickly and iteratively.

Furthermore, when considering the cultural shift from working for others to creating one's own organisation, thereby generating multiple opportunities and jobs as design entrepreneurs, this trend is particularly strong in India. Gen Z and millennials prefer to establish their own mark and sense of purpose, according to a 2023 Deloitte survey. Courses such as Creative Entrepreneurship, Professional Practice, and Social Innovation aim to develop students as disruptive change-makers with the business acumen needed to thrive.

As the world navigates unprecedented social, environmental, and technological shifts, product design is emerging as a career of both creative freedom and global responsibility. With the Indian design ecosystem rapidly aligning with global standards and expectations, the future of industrial product design looks not just promising but exciting too.

Bhubaneshwar

ICAI plans norms for overseas networks to aid Indian cos' growth

Sidhartha@timesofindia.com

New Delhi: The Institute of Chartered Accountants of India is preparing guidelines for overseas networks, focusing on the consulting services offered by firms.

The aim is to establish a framework for homegrown firms to join a network and expand their global presence. The detailed norms will be discussed by the ICAI Council, the apex decision-making and rule-setting body, towards end of this month.

The institute, which regulates auditors, has already issued revised merger and demerger guidelines and those for the aggregation of limited liability partnership firms in the audit business. This is to enable them to partner with other firms and support their expansion.

The institute has already issued revised merger & demerger guidelines and those for the aggregation of limited liability partnership firms in the audit business

However, the latest norms could become a point of contention with global audit and consulting firms, especially the Big Four, who oppose any such move as they currently operate in a regulatory vacuum. While foreign investment is not permitted, the Big Four, which includes ET, PwC, Deloitte, and KPMG, have several Indian firms that are part of their network and are used for providing audit services.

These global firms fear that the new guidelines will necessitate some form of registration, including for their overseas partners, and subject them to other norms such as a ban on advertising and sponsorships. The operation of networks controlled by overseas giants is an area on which ICAI has strong views and has argued over the years that there should be checks.

In contrast, there is hardly any large Indian firm that can operate on the scale of the Big Four. The govt and ICAI are keen to devise norms and a regulatory framework that allows large domestic firms to not only compete with foreign rivals but also establish a global presence.

Campus pre-placement offers up 24% in FY25

9 • PG | 233 • Sqcm | 859183 • AVE | 1.78M • Cir | Top Left

Bengaluru

Campus pre-placement offers up 24% in FY25

Report Says Modest Upturn In Employer Confidence, 3.9% Rise In Starting Salaries For Freshers

TIMES NEWS NETWORK

Bengaluru: Deloitte India's Campus Workforce Trends 2025 survey revealed a modest upturn in employer confidence, with a 3.9% rise in starting salaries for freshers during the 2025 financial year, following the previous year's slowdown. Nearly 15% growth in hiring budgets and a 24% jump in pre-placement offers (PPOs) reflects renewed employer confidence.

The analysis, which includes feedback from over 200 organisations and information from more than 500 campuses, reflects the growing impact of AI on entry-level recruitment. There has been a 38% rise in the use of GenAI for recruitment activities such as CV assessment and applicant testing, underlining the shift towards technology-driven talent acquisition.

Cybersecurity and robotics are identified as the highest paying technology skills in campus placements, attracting pay premiums of 10% to 20%. In the management domain, social selling and agile skills also bring similar pay advantages. Despite this focus, 1 in 3 organisations state that their employees have limited understanding of the skills necessary for career progression.

'FOCUS ON SKILL-BASED RECRUITMENT'

	Change in FY25
Campus salary hike	Up by 3.9%
Hiring budget growth	Up by 15%
Increase in pre-placement offers (PPOs)	Up by 24%
Expected increase in GenAI usage in hiring	Up by 38%
Drop in campus attrition	Down by 3%

"Campus hiring is no longer about ticking boxes—it's about embedding purpose, adaptability, and trust across the early-career journey," said Neelesh Gupta, partner at Deloitte India. "Employers are transforming into enablers of continuous learning, focusing on long-term talent sustainability over short-term acquisition."

According to the study, 87% of engineering students are upgrading their expertise in AI, ML, and data science, which has resulted in compensation that is 15-20% higher. Management students who specialise in social selling and agile methodologies receive similar salary advantages.

In terms of placements, cybersecurity and robotics roles offer premium pay, while software development and data science positions continue to be highly competitive for emerging technology professionals. MBA graduates show a preference for product management and consultancy roles. Internship programmes are now placing greater emphasis on behavioural assessments, learning potential, and organisational fit, leading to a 24% increase in pre-placement offers (PPOs).

Bengaluru retains its status as the most favoured work location among campus graduates for the fifth straight year, with Hyderabad overtaking Delhi-NCR for the second spot this year.

AI agents boost developer productivity

7 • PG | 273 • Sqcm | 1008105 • AVE | 1.78M • Cir | Bottom Left

Bengaluru

AI agents boost developer productivity

Veena.Mani@timesofindia.com

Bengaluru: AI tools have boosted developer productivity by 30% in their daily tasks. Many tech companies are actively exploring ways to further enhance developer efficiency using GenAI tools.

Stack Overflow CEO Prashant Chandrasekar believes that AI is freeing up developers for more meaningful work. "From our perspective, AI agents don't replace developers. They free them up to focus on higher-order tasks—creative, strategic, or architectural work. The best agentic AI tools give developers back time and energy, helping them learn new technologies and make a greater impact," he said.

According to Thejesh G N, an independent technologist, researcher, and hacker, AI agents are helping programmers grasp business concepts, leading to more efficient code writing. "It helps identify logic behind code. It helps us identify a business case of a line of code and tweak it accordingly," he said.

SUPERCHARGING DEV WORK WITH AI

Automate Repetitive Tasks
- AI handles routine jobs like writing test cases, generating reports, and managing access
- Developers save 10-30% of their time

Assist in Coding
- Developers can describe a problem, and AI generates working code
- Helps juniors write functional code faster

Make Work More Meaningful
- AI frees up time for high-level tasks—like strategy, design, and architecture.
- Lets developers focus on innovation

Understand Business Needs
- AI helps relate code to business goals
- Teams use it instead of relying solely on product managers

Improve Team Efficiency
- AI tools generate summaries, explain code, and help teams collaborate
- Speeds up onboarding for new team members

Generative AI has become popular amongst developers as a comprehensive solution. "Explain a problem and it fetches the best possible outcome unlike a Google search where we have to dig out information. One can ask the agent to write code for a particular functionality," Sujit Sharma, senior director, Software Engineering Management at ServiceNow, said.

These tools are quickly becoming popular among developers, offering a more comprehensive solution. Sharma said that his team increasingly relies on AI agents instead of product managers to understand business processes. These agents generate code summaries, streamlining the development process further.

Beyond coding, AI tools are also taking over routine and operational tasks. Bebi Negi, senior lead data scientist at Happiest Minds, uses generative AI for generating weekly reports and managing access permissions. "Currently, these tools handle 10% to 20% of tasks, freeing up a similar portion of my time by eliminating repetitive work," she notes. For developers, AI is automating traditionally manual tasks such as writing test cases.

AI is proving especially helpful for senior developers overseeing junior teams. "GenAI is extremely beginner-friendly. Most freshers struggle to write proper code, but with AI, they can generate functional code and get the job done," said Thejesh. However, he cautions that beginners may not fully grasp the reasoning behind AI-generated code. A deeper understanding of programming logic, he says, still requires real-world experience.

AI is also emerging as a quality assurance and management tool. Arindam Ray, vice-president at Maveric Systems, who leads the company's North America engagements, emphasizes that most AI agent deployments are still in the pilot phase. "They haven't taken over technology-related work yet. Right now, it's mainly about boosting internal productivity," he says.

Chhavi Sharma, a product manager and AnitaB.org India community member, uses GenAI for large-scale data analysis. According to her, success with AI hinges on crafting precise prompts. The evolution of agentic workflows is leading to smarter orchestration across the development lifecycle. Jitendra Dulhani, a manager and developer at Deloitte India, explains how agents now understand their roles within complex tasks and can coordinate among themselves. "For instance, in a migration case, one agent could identify the source and target languages, create a detailed migration plan, and delegate tasks to other agents—one handling the actual migration, another validating the output. The entire orchestration is becoming more dynamic and intelligent," he said.

Delhi

EPL under strain despite record £6.3 bn revenues

London: The combined revenue of Premier League clubs rose to a record £6.3 billion in the 2023/24 season, but fan unrest and worsening competitive balance are cause for concern, according to financial experts Deloitte. The rise in income for England's 20 top-flight clubs was fuelled by commercial income surpassing £2 billion for the first time and a rise in matchday revenue beyond £900 million.

Spain's La Liga, the second highest revenue-generating league, earned just over half that amount at 3.8 billion euros, almost 50 percent of which came from Real Madrid and Barcelona.

However, fan protests have become a common sight at Premier League stadiums over rising ticket prices and the squeezing out of local supporters to make way for more tourists willing to spend more for a special matchday experience. "There can be no doubt that the system in English football is under strain," said Tim Bridge, the lead partner in the Deloitte Sports Business Group.

"Repeated reports of fan unrest at ticket price and accessibility demonstrate the challenge in the modern era of balancing commercial growth with the historic essence of a football club's role and position in society: as a community asset." AFP

Identifying models to eliminate waste

Eco-friendliness is the new operating system for businesses, writes **Hemango Kishore Dutta**

In an era defined by climate crises, social inequality, and resource scarcity, businesses are no longer judged solely by their profits but by their commitment to the planet and people. The age of superficial sustainability, such as token recycling programmes or annual CSR checkboxes, is over. Today, a transformation is underway as companies embrace holistic sustainability, a philosophy that weaves environmental and social responsibility into their strategies, operations, and cultures. This shift is a survival strategy in a world where consumers, investors, and regulators demand accountability.

Symbiotic Exchange

ITs and IIMs collectively drive cutting-edge research on renewable energy, waste management, and climate solutions. The ecosystem thrives on collaboration. This symbiotic exchange drives economic resilience and social equity, proving that sustainability succeeds when academia and stakeholders co-create solutions.

Numbers Speak Volumes

A 2023 Deloitte report revealed that 91% of Indian CXOs have increased sustainability investments, with climate change now eclipsing AI and economic volatility as their top concern. The push for sustainability is driven by three powerful forces converging simultaneously: First, a consumer revolution with 66% of global shoppers preferring sustainable brands (Nielsen data). Second, an investment paradigm shift - ESG-focused funds now control over $40 trillion in assets worldwide. Third, tightening regulations, exemplified by mandates like India's BRSR requirements.

This perfect storm of market demand, financial incentives, and compliance pressures makes sustainable transformation imperative for businesses. But holistic sustainability transcends compliance. As Harvard economist Michael Porter argues in his Shared Value theory, solving societal challenges—whether reducing emissions or bridging inequality—can unlock untapped markets and efficiencies. Take Unilever: its Sustainable Living Brands grew 69% faster than the rest of its portfolio, proving that purpose and profit are symbiotic. At the heart of this movement lies circular economy, which is a $4.5 trillion opportunity that shifts away from traditional "take-make-waste" model toward systems designed to eliminate waste entirely. These efforts are shaped by frameworks such as the Triple-Layered Business Model Canvas, which integrates economic, environmental, and social value creation.

Evolving Mindset

The path towards corporate sustainability and community engagement is being pioneered by businesses and educational institutions. India's premier institutions are embedding sustainability into their core academic and research missions. IITs and IIMs collectively drive research on renewable energy, waste management, and climate change solutions. The ecosystem thrives on collaboration. This symbiotic exchange drives economic resilience and social equity, proving that sustainability thrives when academia and local stakeholders co-create solutions. Yet sustainability is not just about materials, it is about people. Holistic sustainability thrives on collaboration. It is not a trend; it is the new operating system for business. Companies and institutions that embrace this ethos are not just surviving, they are redefining success. Because in the 21st century, there are no profits on a dead planet.

Bhubaneshwar

Cos tap chief artificial intelligence officers to lead transformation

Shilpa.Phadnis
@timesofindia.com

Bengaluru: As the technology landscape in India evolves swiftly, there is a discernible increase in the appointment of chief AI officers (CAIO) to supervise AI initiatives and strategy. The advent of such roles highlights the importance of embedding AI within core operations and an increased focus on AI-driven transformation. Firms are presently navigating the transition towards reducing friction and overlaps among leadership positions within the CDO, CTO, and CIO offices.

Recently, LinkedIn announced the appointment of Deepak Agarwal as their new chief AI officer. Last year, Yotta Data Services roped in Anil Pawar as their chief AI officer, entrusting him with the responsibility of directing strategic initiatives in the AI cloud business unit, with a particular focus on leveraging AI, cloud, and platform technologies to deliver significant value to customers. Jindal Steel and Power brought in former BharatPe chief data officer Ritesh Mohan Srivastava as their CAIO. In another recent move, Motilal Oswal Financial Service selected Siddharth Sureka for the CAIO position, while asset management entity Mirae Asset Global Investments appointed Nishant Pradhan as their chief AI officer.

SAP Labs India named Sudhakar Singh as chief AI security officer, with a remit to lead trustworthy AI initiatives for SAP Business AI. Singh's focus will be on cybersecurity, data privacy, AI regulations, and compliance within the SAP Business AI portfolio. AI unicorn Fractal Analytics appointed Ajoy Singh as its chief AI officer. Singh commented, "While there is a CEO and board-level recognition about the transformative power of AI, it is also true that the field of AI is rapidly changing and there is a talent gap across levels, especially at senior levels. We are seeing more and more companies creating AI leadership roles like CAIO or Head of AI. The role of CAIO is still evolving and there are some overlaps with roles of CDO, CIO, CTO."

According to Singh, the primary responsibility of the CAIO includes setting the AI roadmap in line with business strategy, developing a pipeline of use cases, defining architectural decisions regarding foundation models, GenAI platforms and tools, and collaborating with the CDO/CIO to create a data foundation for AI/GenAI. CAIOs are also crucial in AI governance and responsible AI. Singh added, "In Fractal's context, the CAIO is focused on bringing all the elements of the role to create impact in Fractal's client organisation."

Phil Fersht, CEO of US-based IT advisory HfS Research, observed that most Indian heritage service providers are treating AI as another technology implementation, rather than a more extensive and meaningful business transformation. He noted, "The core issue is the providers are too grounded in the walls of the CIO's office and are struggling to develop the capabilities to support C-Suite leaders that are hugely impacted by AI, such as the CFO and CMO. Creating more fancy job titles only works if these executives can broaden their engagement beyond the legacy IT business."

Jayant Saran, partner at Deloitte India, noted that although CIOs and CISOs are both linked to IT, their main responsibilities vary substantially. "Similarly, regarding AI, the position of an AI officer is likely to become distinct. This mirrors the historical progression where cybersecurity, initially supervised by the chief information officer, evolved into a distinct role with the CISO previously being part of the CIO's organisational structure. Currently, whilst there is substantial discussion about responsible AI and trustworthy AI frameworks, these responsibilities primarily fall under the Chief AI Officer's purview, encompassing areas of experimentation, innovation, and ensuring the reliability and responsibility of AI platforms."

Anurag Malik, partner and leader – people consulting at EY India, said, "My sense is that it's still fairly early-stage in most organisations. The idea starts with identifying sharp accountability for AI — whether you're calling it a chief AI officer or placing it under the chief data officer. But there's another very interesting dimension we're seeing around AI, especially when it comes to roles. A lot of organisations today are asking: Can I cluster my entire workforce into four AI personas? These personas are based on the role people are expected to play when it comes to AI."

Malik has classified these roles as AI Ambassadors, who are the most senior executives, often at the CXO level, sponsoring AI initiatives and steering strategic direction. The second category is AI champions. "Can I identify a few people in every functional area who are champions for AI implementation? For instance, Who's my AI champion for finance? Who are the AI champions for supply chain? These aren't necessarily data scientists, but they understand both AI and the function well enough to identify relevant use cases and drive implementation locally. Think of them as translators between business needs and AI potential," said Malik. AI specialists originate from diverse technology backgrounds, necessitating additional training to specialise in AI deployment. These individuals undergo focused re-skilling or upskilling programmes to build expertise in AI implementation. General AI practitioners possess fundamental knowledge of AI concepts. Their training enables them to collaborate effectively with AI systems, even if they are not creating AI models themselves. Malik explained, "The goal of defining these personas is twofold: to break AI implementation out of silos, and to create a culture where everyone—from leadership to the shop floor—has a role to play in AI adoption. It also helps with reskilling. Instead of a one-size-fits-all training approach, you tailor capability building based on the persona."

WHO'S THE BOSS OF AI?

- More firms are appointing chief AI officers to steer AI strategy and governance
- CAIOs now collaborate with CIOs, CTOs, and CDOs — roles are overlapping but evolving
- CAIOs = AI Strategists + Change Agents
- These execs blend deep tech knowledge with business acumen to push responsible, scalable AI

CAIO key duties
- Set AI roadmap
- Develop use cases
- Choose AI platforms
- Drive responsible AI
- Align with business needs

Corporate examples
- LinkedIn | Deepak Agarwal
- Fractal Analytics | Ajoy Singh
- Mirae Asset | Nishant Pradhan
- Jindal Steel | Ritesh M Srivastava
- Motilal Oswal | Siddharth Sureka

Why all curricula must reflect the demands and expectations of industry

A focus on tools such as Python can enable students to cultivate real-world skills FILE/HT

Raju Poddar
letters@hindustantimes.com

The global technological landscape is witnessing significant disruption thanks to the emergence of transformative technologies such as Artificial Intelligence (AI), Machine Learning, and more.

According to the recent report "Advancing India's AI Skills: Interventions and Programmes Needed" by Nasscom and Deloitte India, the AI market in the country is poised to grow at 25-35% CAGR through 2027, especially after the advent of Generative AI. Today, employers in the IT domain are increasingly looking for graduates with a substantial understanding and hands-on experience of these technologies and their applications. This enables them to contribute effectively to innovative projects and drive technological advancements. AI is revolutionising vital sectors such as healthcare, finance, manufacturing, and cybersecurity, creating new opportunities and solutions to key challenges. These include sustainability, access to healthcare, secure communication, disaster management, among others. To meet the rising demand for highly skilled professionals in these promising technologies, educational institutions must incorporate them into their curricula to ensure that students are well-prepared for the future job market.

Specialised learning modules

Engineering education institutions should include courses specifically focused on AI. These courses should cover both the fundamentals and real-world applications, providing students with a comprehensive understanding of their usage. Furthermore, consistent updates to the curriculum will ensure it stays relevant with technological advancements. It is essential for technology education institutions to collaborate with AI-oriented and prominent research organizations, enabling students to participate in collaborative research projects. In addition, student exchange programmes with globally acclaimed education institutions can foster innovation and critical thinking.

A substantial focus on tools such as Python, AI libraries like TensorFlow and PyTorch can enable students to cultivate real-world skills and promote innovation. Moreover, organising hackathons and coding competitions can also boost creativity and problem-solving abilities of students.

Industry collaboration

Engineering education institutions should also collaborate with prominent technology companies and invite industry experts to classrooms. Lectures by guest faculty, internships, and live projects can bridge the industry academia gap. Additionally, regular industry feedback can help update the curriculum to meet the contemporary requirements.

Regular upskilling of educators is crucial for preparing students for Industry 4.0. In this regard, workshops, certifications, and hands-on training will enable teachers to effectively guide their students to navigate the complexities of the digital age. They will also allow educators to embrace industry best practices and stay updated with the latest trends.

Conducive government policies and support

Supportive government policies can aid the transformation of engineering education. This includes allocating funds for cutting-edge research, scholarships, and innovation centers to bolster development in AI and other cutting-edge technologies. In addition, offering incentives for institutions adopting these technologies can further accelerate integration. It is also important to mention that including topics like AI bias and data privacy will help in creating responsible professionals. Furthermore, analysing case studies on ethical dilemmas can offer valuable practical insights. Besides AI and Machine Learning, highly advanced technologies like Quantum Computing and Robotics are redefining the future of engineering. Quantum Computing has the potential to decipher complex problems and optimise processes in diverse domains that are beyond the reach of conventional computers.

Robotics on the other hand is transforming industries via automation, intelligent systems, and human-machine collaboration. Incorporating these domains into engineering curricula will empower students to lead innovation and create disruptive solutions.

The integration of emerging technologies into engineering education will yield significant long-term benefits and will establish India as a leading technology hub on the global platform. This strategic move will also generate high-value, future-proof jobs that will not only contribute to the economic development of the country but also address critical challenges in diverse sectors.

Incorporating emerging technologies into engineering curricula is not just an option but a necessity for the country to meet the ambitious vision of Viksit Bharat 2047. The future of engineering education lies in its ability to adapt and evolve, and by doing so, India can emerge as the beacon of technological excellence.

GST COLLECTION HITS ₹2.01L-CRORE IN MAY, RECORDS 16.4% INCREASE

Rajeev Jayaswal
letters@hindustantimes.com

NEW DELHI: Gross goods and services tax revenues rose about 16.4% to cross ₹2.01 lakh crore in May, compared to last year, registering the third-highest monthly collection of taxes, which according to experts provides a cushion to the GST Council for rationalising tax rates.

Gross GST collections rose to ₹2,01,050 crore in May 2025, compared to ₹1,72,739 crore in the same month of 2024.

After refunds of ₹27,210 crore in May 2025, net GST revenue stood at ₹1,73,841 crore, registering a growth of 20.4% growth compared to ₹1,44,381 crore net collection in May 2024, according to the data released on Sunday. →P10

GST revenue rises 16% to ₹2 lakh cr in May

letters@hindustantimes.com

NEW DELHI: Gross goods and services tax revenues rose about 16.4% to cross ₹2.01 lakh crore in May, compared to last year, registering the third-highest monthly tax collection, which according to experts provides a cushion to the GST Council for rationalising tax rates.

Gross GST collections rose to ₹2,01,050 crore in May 2025, compared to ₹1,72,739 crore in the same month of 2024. After refunds of ₹27,210 crore in May 2025, net GST revenue stood at ₹1,73,841 crore, a 20.4% growth compared to ₹1,44,381 crore in May 2024, as per government data released on Sunday.

Sequentially, collections of over ₹2 lakh crore in May 2025 came close to the record ₹2.37 lakh crore April 2025 revenue, reflecting resilience of the economy. To be sure, the revenue of May reflects business activities in April. GST collections in April reflect business transactions made in March, the closing month of the previous financial year and hence collections may also include backlogs of previous months. Experts however, see a robust trend here.

Net GST revenue stood at ₹1,73,841 crore in May 2025. REUTERS

"Compared with FY25 average gross GST collections of ₹1.84 lakh crore, the figures reported for May 25'—which relate to transactions in the first month of FY 26—at ₹2.01 lakh crore would provide significant fiscal headroom for the government," said MS Mani, partner, indirect taxes, at Deloitte India.

Experts say consistency in collections would see the government rationalising tax rates and slabs. "If growth continues in this range for the next couple of months, it might provide the cushion to look at rate rationalisation on which a lot of work has already been done," said Price Waterhouse & Co LLP partner Pratik Jain.

On May 24, *Hindustan Times* reported that the GST Council would consider a comprehensive tax reform package covering rate rationalisation, procedure simplification and compensation cess issues. The Council is expected to meet either in June or July, an official said, requesting anonymity.

Saurabh Agarwal, tax partner at consultancy firm EY, is, however, apprehensive of the impact of geopolitical developments and Trump's tariffs on tax collections. "GST collections are about what we expected, showing a 15% drop from last month. However, domestic GST collections fell nearly 21% compared to last month, suggesting a shift in how much consumers are spending. While last month's higher collections likely included year-end business-to-business sales pushed due to targets, this large decrease points to some bit of change in consumer spending possibly due to global uncertainties," he said. "Also, export refunds are down significantly, by 36.25%, which suggests last month's increased exports were on account of companies building stock at US level due to imposition of tariff," he added.

Mani differs. "These figures are in line with recent GDP growth estimates, which indicate robust consumption across months. GST revenues from imports are 25% higher compared with the same month last year indicating imports accelerated despite tariff headwinds," he said. He, however, stressed on the need to analyse statewise data due to variations. While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu reported collection increases of 17% to 25%, similar large states like Gujarat, Andhra Pradesh and Telangana showed single-digit growth.

"GST collections are about what we expected, showing a 15% drop from last month. However, domestic GST collections fell nearly 21% compared to last month, suggesting a shift in how much consumers are spending. While last month's higher collections likely included year-end business-to-business sales pushed due to targets, this large decrease points to some bit of change in consumer spending possibly due to global uncertainties," he said. "Also, export refunds are down significantly, by 36.25%, which suggests last month's increased exports were on account of companies building stock at US level due to imposition of tariff," he added.

Mani differs. "These figures are in line with recent GDP growth estimates, which indicate robust consumption across months. GST revenues from imports are 25% higher compared with the same month last year indicating imports accelerated despite tariff headwinds," he said. He, however, stressed on the need to analyse statewise data due to variations. While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu reported collection increases of 17% to 25%, similar large states like Gujarat, Andhra Pradesh and Telangana showed single-digit growth.

Chandigarh

GST revenue rises 16% to ₹2 lakh cr in May

Rajeev Jayaswal
letters@hindustantimes.com

NEW DELHI: Gross goods and services tax revenues rose about 16.4% to cross ₹2.01 lakh crore in May, compared to last year, registering the third-highest monthly tax collection, which according to experts provides a cushion to the GST Council for rationalising tax rates.

Gross GST collections rose to ₹2,01,050 crore in May 2025, compared to ₹1,72,739 crore in the same month of 2024. After refunds of ₹27,210 crore in May 2025, net GST revenue stood at ₹1,73,841 crore, a 20.4% growth compared to ₹1,44,381 crore in May 2024, as per government data released on Sunday.

Sequentially, collections of over ₹2 lakh crore in May 2025 came close to the record ₹2.37 lakh crore April 2025 revenue, reflecting resilience of the economy. To be sure, the revenue of May reflects business activities in April. GST collections in April reflect business transactions made in March, the closing month of the previous financial year and hence collections may also include backlogs of previous months. Experts however, see a robust trend here.

Net GST revenue stood at ₹1,73,841 crore in May 2025. REUTERS

"Compared with FY25 average gross GST collections of ₹1.84 lakh crore, the figures reported for May 25'—which relate to transactions in the first month of FY 26—at ₹2.01 lakh crore would provide significant fiscal headroom for the government," said MS Mani, partner, indirect taxes, at Deloitte India.

Experts say consistency in collections would see the government rationalising tax rates and slabs. "If growth continues in this range for the next couple of months, it might provide the cushion to look at rate rationalisation on which a lot of work has already been done," said Price Waterhouse & Co LLP partner Pratik Jain.

On May 24, *Hindustan Times* reported that the GST Council would consider a comprehensive tax reform package covering rate rationalisation, procedure simplification and compensation cess issues. The Council is expected to meet either in June or July, an official said, requesting anonymity.

Saurabh Agarwal, tax partner at consultancy firm EY, is, however, apprehensive of the impact of geopolitical developments and Trump's tariffs on tax collections. "GST collections are about what we expected, showing a 15% drop from last month. However, domestic GST collections fell nearly 21% compared to last month, suggesting a shift in how much consumers are spending. While last month's higher collections likely included year-end business-to-business sales pushed due to targets, this large decrease points to some bit of change in consumer spending possibly due to global uncertainties," he said. "Also, export refunds are down significantly, by 36.25%, which suggests last month's increased exports were on account of companies building stock at US level due to imposition of tariff," he added.

Mani differs. "These figures are in line with recent GDP growth estimates, which indicate robust consumption across months. GST revenues from imports are 25% higher compared with the same month last year indicating imports accelerated despite tariff headwinds," he said. He, however, stressed on the need to analyse statewise data due to variations. While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu reported collection increases of 17% to 25%, similar large states like Gujarat, Andhra Pradesh and Telangana showed single-digit growth.

Jaipur

May GST revenue up 16.4% to ₹2.01 lakh cr

Press Trust of India

feedback@livemint.com

NEW DELHI: Gross Goods and Services Tax (GST) collections rose by 16.4% to more than ₹2.01 lakh crore in May, as per government data released on Sunday.

This comes after a record GST collection in April.

At that time, the revenues touched an all-time high of ₹2.37 lakh crore.

In May, gross revenues from domestic transactions rose by 13.7% to about ₹1.50 lakh crore.

Meanwhile, GST revenue from imports grew by 25.2% to ₹51,266 crore.

In May, the gross Central GST revenues stood at ₹35,434 crore, State GST revenues at ₹43,902 crore and Integrated GST at about ₹1.09 lakh crore.

Revenues from Cess was at ₹12,879 crore.

In May, 2024, the mop up was ₹1,72,739 crore.

Meanwhile, total refunds during the month fell 4% to ₹27,210 crore.

Net GST mop-up stood at about ₹1.74 lakh crore, a 20.4% year-on-year growth.

Deloitte India Partner M S Mani said that the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states such as Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of anywhere between 17% to 25%, similar large states such as Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6%.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10%.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said.

In May, gross GST revenues from domestic transactions alone rose by 13.7% to about ₹1.50 lakh crore. REUTERS

Big Four promotions drop, clients tighten spending

Devina Sengupta
devina.sengupta@livemint.com

MUMBAI: When India Inc. tightens its purse strings, the consulting and audit firms that advise them follow suit. The coterie called the Big Four – KPMG, EY, PwC and Deloitte – have started reducing promotions, recalibrating salary increases and paring the number of seniors made partners.

"Major consulting clients like the IT sector globally slowed down and there will be a domino effect. Our promotion numbers will go down and even hikes and bonuses, which come in August/September, will get impacted," said a senior partner in one of the Big Four firms.

Last week, Deloitte's promotions in India were announced. *Mint* learnt about 4,600 people were promoted compared to about 5,000 last year—an 8% drop. Among them were 74 people who became partners or executive directors compared with 150 last year.

EY announced its partner promotions last week as well. *Mint* learnt that 110 senior executives became partners compared with 124 last year.

Deloitte didn't respond to queries. EY didn't comment on last week's partner promotions.

"To serve the growing needs of our clients and their market activity, we maintain our pace of hiring which is approximately 13,000 people annually. Even though our appraisal cycle is a quarter away, we anticipate that our promotions will largely be in line with previous years," Arti Dua, partner and talent leader at EY India, said in an email response to *Mint*.

The partnership model in consulting and audit firms is similar to that in law firms. Equity partners invest in the company, bring in clients and get a chunk of the firm's revenue, while regular partners are seniors who get a fixed compensation and bonus.

For the Big Four, there may be salary revisions due to geopolitical crises, tariff disputes and cautious clients. ISTOCKPHOTO

There are about 3,000 partners between the Big Four and according to senior executives, hikes were in the 7-9% range last year. This time, they may hover in the 5-7% range.

KPMG in India agreed that the impact of external market forces will be accounted for in this hike cycle. "While external factors and industry trends may influence adjustments in increments, bonuses, and promotions, we continue to prioritise meritocracy, ensuring that high performers are recognised and rewarded competitively," said Reena Wahi, partner and head, people, performance and culture at KPMG in India.

For KPMG, the focus will remain on high performers despite sluggishness in the global business environment.

"While the global economic slowdown has led to cautious spending and budget adjustments across industries, KPMG in India remains committed to investing in our people, fostering innovation, and driving value for our clients," Wahi said.

PwC did not respond to *Mint*'s queries on promotions and pay increases.

Professional services firms are restructuring on the back of slower growth and an uptick in regulatory pressure in the global markets, *The Economic Times* reported in April.

Besides layoffs in global IT firms such as Microsoft, which has sent jitters down the pipeline of the sector, the domino effect is seen in other areas too. The Big Five of India's IT services sector—Tata Consultancy Services Ltd, Infosys Ltd, HCL Technologies Ltd, Wipro Ltd and Tech Mahindra Ltd—are sending out mixed signals on hiring and pay hikes as they navigate uncertainties resulting from US President Donald Trump's tariff war.

For the Big Four, there may be salary revisions on the back of geopolitical crises, tariff disputes and cautious client decision-making. For India Inc, Deloitte estimated an average pay hike of 8.8% and Aon had predicted 9.2%.

Follow the trail of clues to find the news

An influencer was detained; a distress call was sent. Toys are on the menu; a trophy was renamed. A space mission; a reunion and several surprising connections. Read on to take our weekly quiz

Natasha Rego

This artwork, Everydays: The First 5000 Days, sold for $69.3 million in 2021. Now it's worth only $20K. What medium is it in?

1 It's a term used as distress signal. The phrase originates from m'aider, French for "help me". It can be used by crafts facing engine failure, severe weather, or medical emergencies. Air India flight AI-171 sent out one soon after take-off. What's the signal called?

2 Deloitte employees in the US can now spend their $1,000 well-being allowance on toys. Specifically Danish toys. They can buy bricks, minifigures, or the most expensive and coveted Millennium Falcon Star Wars set, which costs only $850. From which toy company?

3 Beeple made Everydays: The First 5000 Days, a digital artwork that sold for $69.3 million in 2021, the most expensive at that time. MetaKovan, a Singapore-based cryptocurrency investor, bought it. Now it's worth only $20K. What kind of artwork was it?

4 14 million units were sold last year. Between 8% and 10% of households have one. Close to 50% will, by 2037. The Bureau of Energy Efficiency now wants users to cap temperatures between 20 and 28 , to reduce power consumption. It's got everyone hot and bothered. Which gadget?

5 The world's most popular TikToker is a man of few words. An Italian citizen of Senegalese origin, he was detained by immigration in the US. He then went to Brazil, and stayed with AC Milan player Emerson Royal. Imagine his iconic hands-out shrug at the situation and tell us who?

6 This trophy was introduced in 2007 to commemorate 75 years of India's first Test series in England. It was named for a pair of father-son cricketers – both nawabs, one a Tiger. It's been renamed as the Anderson-Tendulkar Trophy. Not exactly a royal send-off. Give its original name?

7 Indian Air Force Group Captain Shubhanshu Shukla is going where no Indian has gone before. He'll meet other astronauts there and conduct research. Shukla will pilot the Axiom 4 mission, making him the second Indian in space, after Rakesh Sharma. But he is the first to visit what?

8 RM and V are back home. Jimin and Jungkook were discharged from mandatory military service. Jin was released in June last year; J-Hope in October. Suga will wrap up service in June. A reunion is in order. It's going to be Dynamite. The ARMY is waiting. For whom?

9 Zohran Mamdani is running for mayor of NYC. His father Mahmood Mamdani was a professor at Columbia. His mother is an Oscar-nominated filmmaker. If he wins, he'll be the first South Asian and Muslim mayor. If he's A Suitable Boy, then who's his famous mother?

10 The DIGIPIN breaks the Indian landmass into a 4x4 square meter grid. It's a ten-digit geocoded number based on latitude and longitude. Essentially, it will be easier to find your home on the map. It was built by India Post, ISRO & IIT Hyderabad to replace what?

₹3k annual toll pass to be rolled out on Aug 15

Soumya Chatterjee
letters@hindustantimes.com

NEW DELHI: The Union government is introducing a FASTag-based annual pass priced at ₹3,000, from August 15 for private non-commercial vehicles in a move to facilitate cheaper, congestion-free highway travel. This pass has to be renewed every year from the date of activation or after 200 trips—whichever comes first.

Officials said that every exit of toll stretches will be counted as one trip for all highways except controlled access expressways, for which the entire travel can be counted as one trip.

The announcement comes at a time when the government has rolled out a pilot for ANPR (automatic number plate recognition) -based barrier-free tolling systems in select stretches, and a satellite-based highway toll collection system is in the works.

According to official studies commissioned by the National Highways Authority of India (NHAI), adoption of the FASTag system has reduced the average waiting time at toll plazas from 12 minutes 14 seconds to 47 seconds for the financial year 2022-23.

For this annual pass, union minister for road transport and highways Nitin Gadkari said a dedicated link for activation and renewal will soon be made available on the Rajmarg Yatra App as well as on the official websites of NHAI and MoRTH.

He said the policy addresses long-standing concerns regarding toll plazas located within a 60 km range and simplifies toll payments through a single, affordable transaction. By reducing wait times, easing congestion, and minimisng disputes at toll plazas, it will benenfit millions of private vehicle owners. Officials said this will not dampen the revenue streams through toll collection as at least 75% of toll revenue is collected from commercial vehicles.

Kushal Kumar Singh, partner, Deloitte India, said this initiative empowers private vehicle owners with predictable toll costs, reduced congestion, and seamless mobility. "It directly addresses long-standing issues like toll plaza overlaps, fostering smoother journeys across National Highways."

Delhi

Reimagining plastic as a sustainability solution

Plastic is viewed as an environmental threat due to our misuse despite its vital contributions to packaging, auto, medicine and food and preservation industries, and even climate solutions

PLASTIC, NAMED after the Greek word plastikos meaning something which can be moulded or shaped, was once a hallmark of human invention, but today it is seen as a symbol of environmental harm – not because of its nature, but due to our inability to use it responsibly and innovatively.

While harmful effects of plastic usage are widely known, it's time to recognise its contribution in the fields of medicine and food preservation, and even tackling global warming.

Viral Thakker, Partner and Leader – Sustainability and Climate, Deloitte South Asia, says, "Plastic, when designed for reuse and properly managed, can significantly support both ecological resilience and economic growth—especially as global populations rise, and resource pressures intensify."

Food industry

According to a report by LyondellBasell, Public Policy UN (United Nations) Plastics Agreement, plastic packaging helps enhance food items life span considerably depending on the type of food, thereby helping in tackling one of the biggest problems of global food waste which apart from human cost also contributes almost 10% of greenhouse emissions, according to United Nations Environment Programme.

K Ganesh, Director - Sustainability & Corporate Affairs, Bisleri International, says, "Plastic is a wonderful material if managed responsibly. In the beverage industry, especially for packaged drinking water companies, plastic packaging plays an indispensable function. The food-grade PET bottles maintain product purity, prevent contamination, increase the product shelf life, and ensure safe consumption across India's diverse climatic conditions and distribution networks.

Automobile industry

Plastic has completely transformed the automobile industry through the various benefits that can cut costs and at the same time improve vehicle performance, which is a win- win situation for the industry. Being lighter than metals, plastic usage makes vehicles lighter, increases fuel efficiency and thereby reduces emissions.

Avesh Memon, Founder & CEO of Rilox EV, says, "The transition to lighter vehicles through the integration of high-performance plastics is more than just a design choice—it's a strategic move towards greater energy efficiency. In the EV space, where every gram matters, reducing vehicle weight directly improves range and reduces energy consumption. What many overlook is that this also lessens the environmental load even at the electricity generation level, especially in countries still transitioning away from fossil fuels. Lightweight engineering is enabling us to build smarter, cleaner, and more accessible electric mobility solutions for the future."

According to a paper, published in Science Direct, a journal, Fuel consumption and CO2 emissions from passenger cars in Europe – Laboratory versus real-world emissions a 100 kg reduction represents fuel savings of 0.3–0.5 l/100 km (6%–10% for a fuel consumption of 5 l/100 km).

Packaging industry

Packaging industry is the one which has benefitted the most from the invention of plastic. Plastic has made packaging cost effective, increased the shelf life of products and again its property of being moulded into any shape has helped in creating packaging for any type of products at a very cost effective price point.

The challenge is to achieve the goal of reaching a stage where all plastic that is manufactured is biodegradable, recyclable and which causes minimal harm to the environment if not zero harm.

Jeevaraj Gopal Pillai, Director - Sustainability, President - Flexible Packaging and New Product Development, UFlex, says plastic is crucial for modern development since it propels growth in numerous aspects of daily life and the economy. Given that there are 8.2 billion people on the planet, we cannot overlook the importance of flexible packaging in providing goods for consumers like food and medications while maintaining their durability, safety, and capacity to prevent contamination.

He adds, "A McKinsey report found that in five of six flexible packaging categories, plastic had lower greenhouse gas emissions than non-plastic alternatives. In contrast, materials like glass, rigid PET, and steel require significantly more water and fossil fuels to produce. The problem isn't plastic itself, but how we manage its lifecycle."

Medical field

One of the fields that has benefited the most with the invention of plastic is the medical field. Plastic can be easily sterilised and its single use property has helped immensely in reducing contamination cases and considerably reduced cases of deadly diseases like HIV and Hepatitis. Experts point out that its property of being easily moulded into any shape has helped the medical field to make new devices, thereby helping millions of people through new innovations in a much more cost effective way as plastic is comparatively much cheaper compared to metals or other alternatives.

Medical grade plastics are biocompatible and are used particularly in medical components that interface with the circulatory system in addition to machines used for MRI, syringes and even assistive products like prosthetics.

Electronics and construction

The very fact that plastic does not corrode or rust is a game changer for the electronics and construction industry. The durability and the lightweight of plastic helps in easier handling and faster turnaround time for projects and is easier to handle for the labour, too. Today recycled plastic is being used in making roads, brick, tiles, insulation and so on. There is no doubt that plastic has been one of the most important inventions of mankind and it is actually driving the world today. What the world needs is the policies and actions to take the recycled plastic percentage to as high as possible, arrange awareness campaigns amongst people making them understand how to rightly use and dispose off plastic products.

Suresh Bansal, Founder & CEO, DCGpac, says, "When reused, recycled, and repurposed intelligently, plastic contributes to circular economy and can significantly reduce carbon footprint. It's not about eliminating plastic, it's about using it wisely, designing smarter systems, and holding ourselves accountable for its life cycle. Let's stop calling plastic the problem and start being the solution. Innovation must meet intention. That's the future we need to build."

Plastic industry is growing worldwide at an exponential rate and all they need is to keep innovating and inventing new ways to make plastic more environmentally friendly.

Delhi

SRM IST Delhi-NCR

Empowering Innovation, Inspiring Futures

ESTABLISHED in 1997, SRM Institute of Science and Technology (SRM IST), Delhi-NCR Campus in Modinagar, Ghaziabad, is a hub of academic excellence and innovation. With over 5,000 students, the campus offers a harmonious blend of serene surroundings and state-of-the-art infrastructure, creating an ideal environment for interdisciplinary learning and holistic development.

SRM IST embraces an interdisciplinary, experiential, and active learning model, encouraging students to immerse themselves in hands-on experiences that foster critical thinking, creativity, and leadership. This dynamic approach ensures that students graduate not only with strong academic foundations but also with the practical skills needed to thrive in today's fast-evolving world. Many SRM IST students earn prestigious international scholarships, pursue higher studies at globally renowned universities, or embark on entrepreneurial journeys—transforming ideas into successful startups that shape the future.

SRM IST boasts an impressive placement record, attracting top recruiters such as JP Morgan Chase & Co, Microsoft, booking holdings India, Amazon, Electronic Art, FVC Japan, ZS Associates, Barclays, Philips, NATWEST, IBM, Deloitte, Bank of America, Dell Technologies, HP, Airtel, Ratebot AI, TCS, Infosys, Cognizant, KPIT, and many more. Its Career Development Cell serves as a vital bridge between academics and industry, equipping students with the training, mentorship, and career guidance needed to thrive in professional environments. With a focus on real-world readiness, SRM IST ensures its graduates are not just employable but future-proof in a constantly evolving job market.

SRM IST's Semester Abroad Programme enables students to study at prestigious institutions such as MIT, UC Davis, NTU, and Warwick. This global exposure broadens their perspectives, enriches their academic experience, and unlocks opportunities for international careers.

Research is deeply embedded in SRM IST's DNA. Faculty and students engage in pioneering projects across diverse fields such as nanotechnology, AI, bioengineering, and sustainability. The campus provides state-of-the-art laboratories and resources that foster research-led learning, enabling students and faculty members to publish in highly impactful journals. The SRM IST Delhi-NCR Campus nurtures a dynamic innovation ecosystem through incubation centers and entrepreneurial support. Numerous startups have emerged from campus initiatives, with students and faculty actively filing patents and making significant contributions to India's innovation landscape.

SRM IST holds NAAC A++ accreditation and is consistently ranked among India's top private universities. It has been recognized by FICCI and ASSOCHAM for excellence in research, innovation, and placements.

At SRM IST, students are empowered to become global leaders through a transformative blend of academics, industry experience, and international exposure. Whether your ambition is to innovate, lead, or excel, SRM IST Delhi-NCR provides the perfect foundation to turn aspirations into achievements.

SRM IST is recognized for its commitment to maintaining the highest academic standards.

It has been awarded:

- The prestigious 'A++' grade accreditation by NAAC
- Designated as an "A" Category institution by the Ministry of Education
- Granted Category 1 status by the UGC

In national and international rankings, the institution continues to shine:

- 12th Rank in the University category by NIRF 2024
- Ranked No. 1 in Times All India Engineering Institutes Ranking Survey 2025
- 280th Rank globally in Engineering and Technology by QS World University Rankings (UK)
- Ranked among the Top 5–7 globally by the Shanghai Academic Ranking of World Universities

As it proudly celebrates 28 years of academic excellence, SRM IST Delhi NCR Campus, Ghaziabad remains deeply committed to delivering quality, value-based education.

Sebi chair chief guest at FE CFO Awards today

FE CFO awards 2025

ENS ECONOMIC BUREAU
MUMBAI, JUNE 19

TUHIN KANTA Pandey, Chairman, Securities and Exchange Board of India (Sebi), will be the chief guest at the eighth edition of the FE CFO Awards function in Mumbai on Friday. As the Sebi chief, Pandey has demonstrated a keen understanding of the country's capital markets and has shown he can be both firm and pragmatic.

"Over-regulation will kill innovation. The art of modern regulation is to ease the compliance burden while making regulation more effective," Pandey had observed soon after taking over the reins at Sebi on March 1 this year.

Indeed, the veteran administrator has reassured the markets that the regulator will not rush to roll out new rules at the cost of the development of the market. "Regulation can't be an end in itself, it should be a means to an end," is his mantra. Even as an administrator Pandey had proved his mettle. On his watch as Secretary, DIPAM, central public sector enterprises (CPSEs) created an enormous amount of wealth, even outperforming the private sector. In his keynote address and subsequent fireside conversation, Pandey is expected to enlighten the audience on his vision for the country's capital markets and some of Sebi's recent initiatives.

There will also be a round-table discussion on "GenNext in Family Business" with Manish Kejriwal, founder & managing partner, Kedaara Capital; Rashesh Shah, chairman, Edelweiss Group; Nilesh Shah, managing director, Kotak Mahindra Asset Management and Dinesh Khara, former chairman of State Bank of India.

The FE CFO Awards recognise the efforts of chief financial officers (CFO) across India Inc, acknowledging their untiring efforts behind the scenes. Applauding the winners of the latest round of awards will be the who's who of the country's corporate sector — CEOs and CFOs et al.

Tuhin Kanta Pandey, Chairman, Sebi. *File*

In the individual category, Natarajan Srinivasan, executive vice chairman, Coromandel International, will take home the award for Lifetime Achievement while Atul Daga, Group CFO, Ultratech will be honoured with the CFO of the Year award.

Srinivasan has been with the Murugappa Group for many decades, working with different companies. Indeed, he has been the Murugappa Group's go-to person for complex restructurings, tough negotiations and high-stakes legal battles. Whether it's representing group firms in court or hammering out terms with global investors, Srinivasan's deep financial insights made him indispensable.

Daga started out in a small unit of the Aditya Birla Group where he worked on financial models that nobody paid any attention to. Later, however, his work on identifying and plugging inefficiencies across plants drew the attention of the late Aditya Vikram Birla and there was no looking back. Daga rose from within the ranks to become one of the most valuable leaders in the group. The achievements of CFOs across a host of companies — manufacturing and services — will also be rewarded. All winners were selected by a jury comprising Keki Mistry, former vice chairman and CEO, HDFC (jury chair); Ashu Suyash, former MD & CEO, Crisil; Vishakha Mulye, chief executive officer, Aditya Birla Capital; Pradip Shah, chairman, IndAsia Fund Advisors and Rajeev Gupta, founding partner, Arpwood Capital.

Knowledge partner Deloitte provided the data support for the selection exercise, mining data across companies and using some key metrics to arrive at manageable shortlists. The jury assessed the performance not merely on the basis of financials but also took into account other factors including the standard of corporate governance. **FE**

Career progress, learning opportunities top factors driving job decisions

Young willing to learn, need mentors

Mumbai, May 22: As the workplace continues to evolve with automation, GenAI, and changing expectations, a Deloitte survey on Thursday revealed that career progression and learning opportunities are among the top factors driving job decisions of India's young workforce.

"India's Gen Zs and millennials (Gen Ys) are not just adapting to future of work, they're shaping it. With 85 per cent engaged in weekly upskilling and a preference for on-the-job learning, they're building agile, purpose-driven careers aligned with technologies like GenAI," says Saraswathi Kasturirangan, chief happiness officer, Deloitte India.

5% engaged in weekly upskilling and strong preference for on-the-job learning, they're building agile, purpose-driven careers aligned with technologies like GenAI.

Organisations need to relook at how they prioritise employee happiness and well-being.

Gen Zs **36%**

Gen Ys **39%**

In India said that their job is a factor contributing a lot to their feelings of anxiety or stress.

For employers, this is a call to build cultures anchored in growth, innovation, and continuous learning, she said, quoting the 2025 Deloitte Global Gen Z and Millennial Survey.

It found that career progression and learning opportunities are among the top factors that are driving job decisions for young workforce.

However, there is a mentorship shortfall as around half respondents who seek active mentorship from managers but far fewer receive it, it stated.

Over 94 per cent of Gen Zs and 97 per cent of millennials said they value hands-on experience over theory, it added.

Over 36 per cent of Gen Zs and 39 per cent of millennials in India said that their job is a factor contributing a lot to their feelings of anxiety or stress, the survey stated. — *PTI*

US rakes in $80 bn from India trade, has $45 bn deficit

SANGEETHA G.
CHENNAI, MAY 26

While the US has a $45 billion trade deficit with India, it rakes in $80–85 billion every year from India through education, digital services, financial operations, intellectual property royalties, and arms sales - leading to a $35-40 billion surplus in financial transactions, finds think-tank GTRI.

Indian students studying in the US spend over $25 billion every year — about $15 billion on tuition and another $10 billion on living expenses.

US tech giants like Google, Meta, Amazon, Apple, and Microsoft bring in another $15–20 billion a year in sales from India. These revenues come from digital ads, cloud services, app stores, software and device sales, and streaming subscriptions.

American banks and consulting firms, including Citibank, JPMorgan, Goldman Sachs, Deloitte, PwC, and KPMG, earn an estimated $10–15 billion revenue annually from their work in India's financial sector, advising companies, managing corporate deals, and providing high-end services.

Global Capability Centers (GCCs) run by companies like Walmart, Dell, IBM, Wells Fargo, Cisco, and Morgan Stanley in India handle global operations in tech, finance, and analytics. While most work is done in India, much of the real economic value is booked in the US. GCCs earn $15-20 billion revenue yearly through India operations.

The U.S. pharma firms like Pfizer, Johnson & Johnson, and Merck earn $1.5–2 billion annually through patents, drug licensing, and technology transfer. Auto companies and component suppliers earn $0.8–1.2 billion through licensing and technical services.

Hollywood and US streaming platforms contribute another $1–1.5 billion through Indian box office sales, subscriptions, and content licensing.

Finally, US defence sales to India bring in billions more, although exact figures are often confidential. "If the US insists on focusing solely on the trade deficit, then India should narrow the conversation strictly to tariff cuts and refuse to talks on government procurement, digital trade, IP, and other areas where US firms earn profit from India," said Ajay Srivastava, founder, GTRI.

- Indian students studying in US spend over $25 bn every year.
- US tech giants bring in $15-20 bn a year in sales from India.
- American banks and consulting firms earn $10-15 bn revenue from India's financial sector.
- GCCs earn $15-20 bn revenue yearly through India operations.

CHEQUE OUT! THE NEW NILLIONARIES

A new generation of youngsters are curating their reel life with all fine things, but in real life most of them have little or no money at all

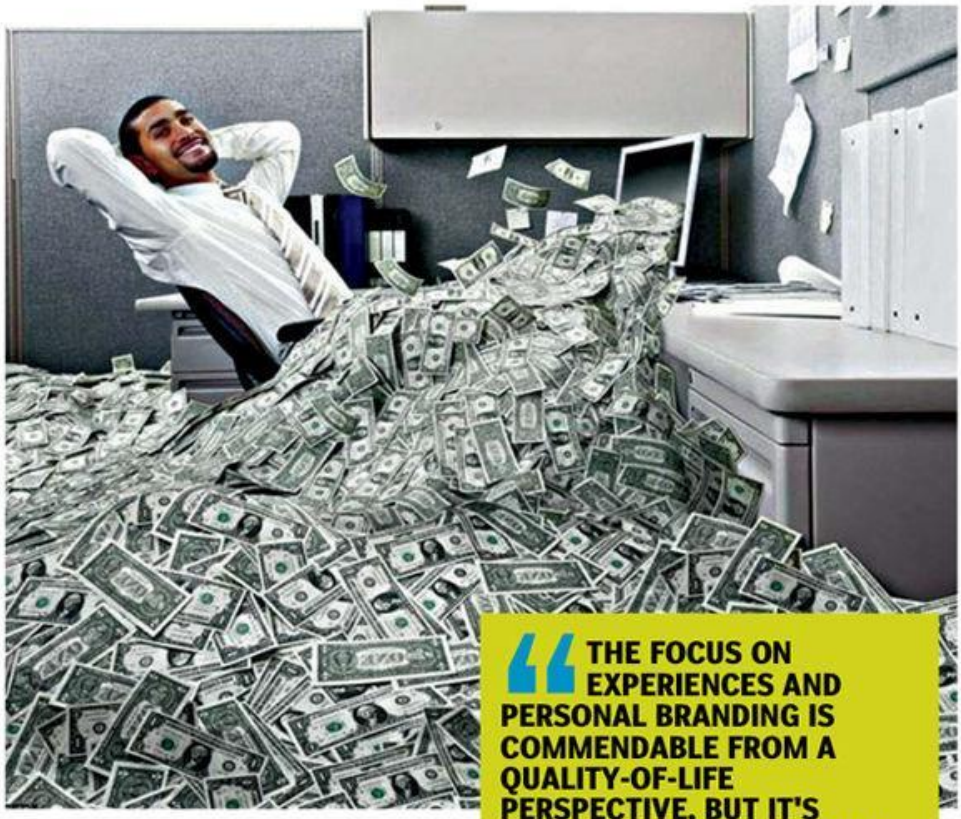

ROCHELLE CRASTO

Meet India's new breed of young adults—the nillionaires. They have little to no savings, don't own property or gold, but they sip on cold brews that cost more than their savings account balance. Their Instagram feeds glisten with luxury—airport looks, curated outfits, and globe-trotting reels—while their bank apps flash low-key panic. Meet India's "nillionaires": the generation living like they have it all, when in fact, they have very little.

BROKE & UNBOTHERED

Nillionaires aren't trying to fool anyone; if anything, they are living life honestly through a financial tightrope. Gone are the days when "broke" meant boring. Today, it means budgeting your way to the finer things in life. It's not deception—it's curation. Where older generations measured success by how much they saved or what they owned, the nillionaire generation measures it by how well they live—today. It's a shift from "delayed gratification" to "deserved gratification."

TURN TO PAGE 2

"THE FOCUS ON EXPERIENCES AND PERSONAL BRANDING IS COMMENDABLE FROM A QUALITY-OF-LIFE PERSPECTIVE, BUT IT'S FINANCIALLY PRECARIOUS."

– PRIYA SINGH, *Financial Planner, Mumbai*

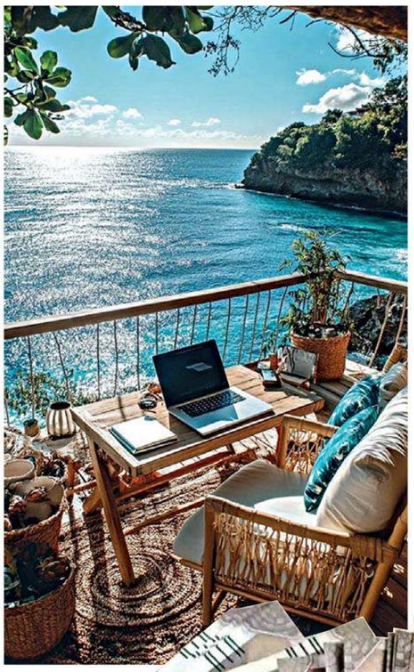

CHEQUE OUT! THE NEW NILLIONAIRES

CONTINUED FROM PAGE 1

The Instagram page of Reyansh (27), a content strategist from Bengaluru looks like a lifestyle magazine—cold brews, cabin stays, and wide-leg pants in moody lighting.

"I know my balance is tragic, but I dress like my life isn't," he shrugs. "It's not about faking it. It's about owning your vibe, even if you're broke. I've got no savings, but I've got good skin, good WiFi, and decent lighting. That's enough."

If the pandemic taught them anything, it's that life is short, uncertain, and rarely plays by the rules. Priya Singh, a certified financial planner based in Mumbai says that the focus on experiences and personal branding is commendable from a quality-of-life perspective, but it's financially precarious. "The absence of an emergency fund, health insurance, and long-term investments like retirement planning can lead to significant distress in unforeseen circumstances. A medical emergency or job loss can quickly unravel this 'curated' lifestyle into a debt trap." Building skills and networks is valuable, but they are not direct substitutes for financial security.

CLOUT & CASH

Behind the polished Instagram stories lies a quieter truth—financial anxiety. Credit card bills pile up, savings are non-existent, and career paths can feel like an emotional rollercoaster. But nillionaires have learned to navigate instability with humour and hustle. They juggle side gigs, upskill constantly, and monetise everything from cooking to Canva. They know how to earn fast, spend faster, and panic later. Influencer gigs, brand collaborations, and freelance work often flow toward those who "look the part."

Meher, 25, is a graphic designer who has mastered the art of looking rich on a budget. "People think I travel all the time. Reality? I book tickets on EMI and stay in shared hostels. It's all about angles," she laughs. Meher wears rental fashion, barters design work for perks, and squeezes in 'mini luxuries' like sushi once a month. "I'm not pretending to be rich. I'm just not letting my bank account define my self-worth."

SELF-BRANDING

In this new economy, visibility often trumps value— A sleek Instagram grid, a decent following, or a knack for aesthetics can open more doors than a fat paycheck. The hustle isn't just about earning money—it's about building a brand. They are aware that their relationship with money is complicated. Money isn't their end goal. Lifestyle is. Identity is. Rajesh Kumar, a seasoned Financial Advisor in Bangalore, offers a nuanced view. "This generation values instant gratification, which isn't inherently bad, but it needs to be balanced. It's feasible to lead a lifestyle that prioritizes experiences, but only if there's a disciplined approach to managing risks. For instance, even if you travel frequently, ensure you have travel insurance, and set aside a small, non-negotiable portion of every earning towards a contingency fund. Even Rs 500 a month consistently can build up over time."

BEHIND THE POLISHED INSTAGRAM STORIES LIES A QUIETER TRUTH- FINANCIAL ANXIETY. CREDIT CARD BILLS PILE UP, SAVINGS ARE NON-EXISTENT, AND CAREER PATHS CAN FEEL LIKE AN EMOTIONAL ROLLERCOASTER. BUT NILLIONAIRES HAVE LEARNED TO NAVIGATE INSTABILITY WITH HUMOUR AND HUSTLE.

UNIQUE ASSETS

Nillionaires may not be piling up fixed deposits or investing in property, they are building less tangible but equally powerful assets—skills, networks, personal brands, and self-worth. Aarav, 29, a DJ in Kochi, sums it up:

NILLIONAIRES' FINANCIAL JOURNEY MAY BE SLOWER, AND YES, RISKIER. BUT IT'S ALSO MORE INTENTIONAL. THEY KNOW THEY'RE NOT SET FOR RETIREMENT AT 35-BUT THAT'S NOT THE DREAM ANYMORE.

"I'd rather collect memories than money. A bank balance doesn't comfort me, but a beach sunrise after a gig? That hits different." He earns well during peak months, spends most of it on travel and gear, and lives light the rest of the year. "Do I have savings? No. But I have a life I like waking up to."

The 'dream' of balance and freedom can quickly turn into a nightmare without a financial safety net.

A financial planner would strongly advise diversifying income streams and, more importantly, building a robust passive income foundation for long-term stability.

Nillionaires' financial journey may be slower, and yes, riskier. But it's also more intentional. They know they're not set for retirement at 35—but that's not the dream anymore. The dream is balance. Flexibility. Fun. Freedom.

MONEY MATTERS

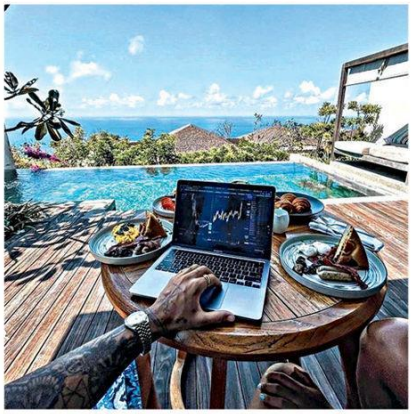

49% of Indian Gen Z live paycheck to paycheck with minimal savings. *(Deloitte, 2024)*

62% prefer spending on experiences over long-term investments. *(YouGov India, 2024)*

17% of urban youth save more than 20% of their income. *(Scripbox, 2023)*

25-30% of monthly spending goes to fashion, grooming, and lifestyle. *(KPMG, 2023)*

72% believe their online image is as important as their real-life identity. *(Meta India, 2024)*

Industry projected to grow 36% to reach $33 billion by 2025 end

Influencer marketing woos Gen Z

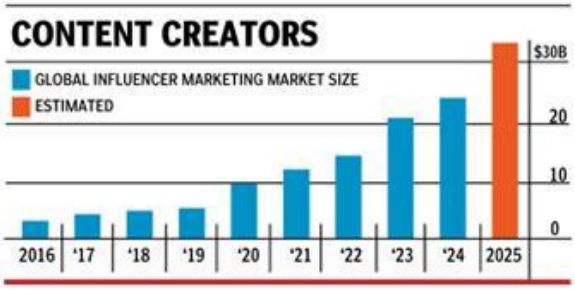

New York, June 15: Ashton Hall's morning routine involves dunking his head in iced Saratoga spring water. For the company that sells the bottled water — Hall's brand of choice for drinking, brushing his teeth and submerging himself — that's fantastic news.

"We're so thankful to this incredible fitness influencer called Ashton Hall," Saratoga-owner Primo Brands's chief executive officer Robbert Rietbroek said on an earnings call after Hall's morning routine video went viral. "He really helped put our brand on the map."

Handbag-maker Coach, once synonymous with mall discounts, has become a Gen-Z status symbol and saw sales soar thanks to social media influencers expanding their collection of purses adorned with little cherry.

With economic turmoil squeezing ad budgets, content creators are seen as better value than other marketing areas.

"While it's true we are seeing brands begin to pull back in marketing expenditure as a whole, the creator economy is surging," said Kenny Gold, head of social, content and influencer at Deloitte Digital.

The global influencer marketing industry is projected to grow 36 per cent between 2024 and 2025 to reach $33 billion, Statista data shows.

While fashion, beauty and accessories lead the way in employing influencer marketing, the strategy is gaining ground among consumer goods companies amid economic turbulence who relying on influencers to position their products as premium, said Ruben Schreurs, CEO, Ebiquity.

Brands increased investment in influencer partnerships by 49 per cent in 2024 and content creators topped social media marketing budgets, taking up a quarter of the total annual spending on average, according to Deloitte research. — *Bloomberg*

Nominations window is now open for businessline Changemaker Awards 2025

The Hindu Bureau
CHENNAI

It is yet again the time to celebrate the unsung heroes amongst us, those who through their actions and deeds, have deeply influenced change in society, communities, mindsets or in physical spaces to make the world a better place to live in. The *businessline* Changemaker Awards 2025 is open for nominations till June 30.

If you know of people who have brought about change in your community or in society at large, please support them by nominating them for the *businessline* Changemaker Awards 2025. Individuals who have been change agents can also nominate themselves.

Six editions of the awards have been held since 2018, the year *The Hindu businessline* stepped into its 25th year of publishing. The 2021 edition could not be held due to the pandemic.

Five categories

Nominations can be made across five categories of awards – Changemaker: Social Transformation; Changemaker: Digital Transformation; Changemaker: Financial Transformation; Young Changemaker and Iconic Changemaker. One flagship award goes to the Changemaker of the Year which is awarded to a person or an organisation that has ushered in far-reaching change. Once the nomination window closes, the applications will be screened and evaluated by *businessline* along with our knowledge partners (Deloitte and Ashoka). The shortlisted nominees will be validated by our validation partner (Niiti Consulting) before the list is sent to an independent jury to pick the winners in each category.

In 2024, the Integral Coach Factory (ICF) in Chennai, the world's largest railway coach manufacturer, which has redefined Indian rail travel with the Vande Bharat trains, setting new benchmarks in speed, comfort, and safety, was awarded Changemaker of the Year.

The Iconic Changemaker of the Year award went to Ashok Jhunjhunwala, a visionary innovator, who transformed communication, mobile payments, energy, and entrepreneurship in India, pioneering impactful solutions and fostering a thriving ecosystem at the IIT Madras Research Park that has empowered scores of entrepreneurs.

The awards for 2024 were given away by the Finance Minister Nirmala Sitharaman.

Defining the award, Raghuvir Srinivasan, Editor, *businessline*, said, "The Changemaker Awards exemplify the fact that we are always looking for change in a positive manner either in business or society. These awards can be a great inspiration and recognition for those whose work has positively impacted communities and society." Scan the QR code or use this link for nominations: thbl.news/BLCM2025ED

GST collections remain above ₹2 trillion in May

Gross collections had touched a record high of ₹2.37 lakh crore in April; growth is not uniform across States; gross revenues from imports higher than those from domestic transactions

Press Trust of India
NEW DELHI

Gross Goods and Services Tax (GST) collections remained above the ₹2 trillion mark for the second month in a row, rising 16.4% in May to over ₹2.01 lakh crore. GST collections had touched a record high of ₹2.37 lakh crore in April. In May 2024, the mop-up was ₹1,72,739 crore.

In May 2025, gross revenues from domestic transactions rose 13.7% to about ₹1.5 lakh crore, while GST revenue from imports grew 25.2% to ₹51,266 crore. Total gross GST revenues stood at ₹2,01,050 crore.

Gross Central GST revenues stood at ₹35,434 crore, State GST revenues at ₹43,902 crore and Integrated GST at about ₹1.09 lakh crore. Revenues from cess were at ₹12,879 crore.

Total refunds issued during the month dipped 4% to ₹27,210 crore. Net GST mop-up in May stood at ₹1.74 lakh crore, a 20.4% year-on-year growth.

Deloitte India Partner M.S. Mani said the wide variations in the growth of GST collections across States require a thorough analysis across the sectors that are important in each State.

Variations across States

While large States such as Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17% to 25%, smaller States such as Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6%. Some States such as Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10%.

"Hence, the average growth across the country does not appear to be uniformly reflected across States possibly due to sectoral or seasonal factors which require a deeper data-based analysis," Mr. Mani said.

Price Waterhouse & Co LLP Partner Pratik Jain said 16% growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11% to 12%.

"If the growth continues in this range for the next couple of months, it might provide the cushion for the government to look at rate rationalisation on which a lot of work has already been done," Mr. Jain said.

Net GST mop-up in May stood at ₹1.74 lakh crore, which is a 20.4% growth year-on-year

EY India Tax Partner Saurabh Agarwal said looking ahead, "we might see similar GST collection numbers with slight increases in June because of ongoing geopolitical tensions across the globe".

'Import-driven growth'

Tax Connect Advisory Services LLP Partner Vivek Jalan said with an approximate 10% growth in domestic GST revenues and 73% growth in import GST revenues, it is very clear that this month's growth in GST revenue is import-driven rather than domestic consumption-driven.

"This coupled with the fact that exports refunds are not growing correspondingly, reflect the fact that import growth far exceeds export growth," Mr. Jalan added.

35% of road accident victims in Cyberabad are pedestrians

2 • PG | 1289 • Sqcm | 1404617 • AVE | 956.08K • Cir | Top Center

Hyderabad

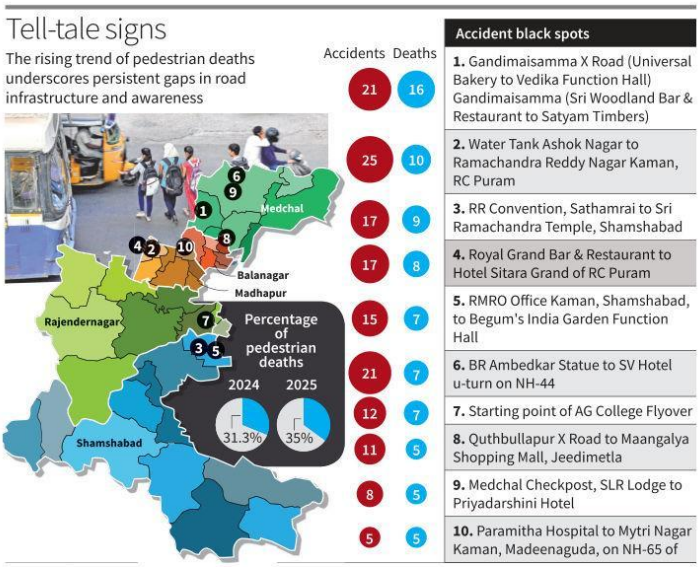

35% of road accident victims in Cyberabad are pedestrians

Across the Cyberabad Commissionerate, 70 black spots have been identified, and in 32 of them, pedestrians account for nearly half of the total fatalities; Shadnagar records the highest number of 19 pedestrian deaths, according to data

Lavpreet Kaur
HYDERABAD

Navigating Hyderabad's IT corridor on foot feels like an obstacle course, with limited footpaths and relentless traffic making crossing the road next to impossible. Around the IKEA Rotary and enroute to the Deloitte Towers, pedestrians are left with two choices - either take a detour through Raidurg Metro Station for a safer passage or brave the chaotic traffic, weaving between speeding vehicles. Confused pedestrians wait at the edge of the road, taking a step forward to cross, only to take two back as vehicles whiz past.

As the pressure on police mounts to speed up traffic flow, pedestrians are bearing the brunt. Pedestrians now account for more than one third of share of road accident victims in the Cyberabad area with 35% of all road fatalities in 2025.

Serious injuried

According to data, 116 of the 331 total fatalities recorded as road accidents until April 2025 were pedestrians. Additionally, 114 of the 318 fatal accidents reported during the same period involved pedestrians, while 13 others sustained injuries.

This marks a steady increase from 2024, when 311 of the 994 road deaths, or 31.3% were pedestrians. The first four months of the year, 303 of 948 fatal accidents involved pedestrians, with 31 injuries.

Shadnagar recorded the highest number of fatal pedestrian accidents, with 19 deaths in as many cases. Medchal and Rajendranagar followed with 17 pedestrian deaths in 16 cases each. Under the jurisdiction of Rajiv Gandhi International Airport (RGIA) there were 12 deaths from 12 cases, while Jeedimetla saw 10 deaths in 10 incidents. The rising trend underscores persistent gaps in pedestrian infrastructure and awareness.

A total of 70 black spots have been identified in the Commissionerate. Among the top pedestrian fatal accident spots are Gandimaisamma X roads in Dundigal, stretch between HMWS&SB water tank Ashok Nagar to Ramachandra Reddy Nagar Kaman in RC Puram, AG College flyover to Budvel Railway Station road in Rajendranagar, Paramitha Hospital to Mytri Nagar Kaman, Madinaguda on NH-65, Royal Grand Bar and Restaurant to Hotel Sitara Grand of RC Puram, Quthbullapur C road to Maangalya Shopping mall in Jeedimetla and RR Convention, Sathamrai to Sri Ramachandra Temple, Shamshabad, BR Ambedkar statue to SV Hotel u-turn and Medchal checkpost to Priyadarshini Hotel, all on NH-44.

Official stand

Cyberabad Joint Commissioner of Police (Traffic), Gajarao Bhupal pointed to the absence and underutilisation of footpaths, poorly designed junctions, non-functional pedestrian signals, and high-speed corridors running through residential areas as key contributing factors to unsafe conditions.

"Areas like Shadnagar and Jeedimetla are flanked by high-speed highways. With the rapid expansion of residential neighbourhoods around them, pedestrian movement has significantly increased. Pedestrian activity often goes unnoticed, and enforcement tends to be limited. We are now actively exploring measures to better regulate this movement," Mr. Bhupal said.

"We have identified several foot-over bridges that are currently underutilised. For instance, structures on the stretch from Mailardevpally to Old Kurnool Road and from JNTU to Miyapur see minimal pedestrian use. These are now being considered for relocation to areas where they might serve a better purpose, while a new foot-over bridge is also under development between Raidurgam metro station and IKEA," the official added.

As a long-term measure, the department has proposed that all new road projects include dedicated pedestrian pathways. For existing roads, efforts are underway to segregate pedestrian and vehicular movement.

"The presence of pedestrians walking on the carriageway not only endangers their safety but also disrupts vehicular flow. We are working towards both strict enforcement, especially regarding stop-line violations, and public education, encouraging the use of footpaths wherever available," Mr. Bhupal said.

'Fundamental right'

Santhana Selvan, an advocate for sustainable mobility, and popularly known as the Bicycle Mayor of Hyderabad, said that pedestrian safety must not be an afterthought, but a fundamental right that must be built into our urban infrastructure.

"Take the Durgam Cheruvu metro stretch towards Inorbit Mall as an example: it's disjointed, lacks walkable space, and becomes even more hazardous during rains. Moreover, U-turns are being introduced for smoother traffic, but with no speed reduction mechanisms or provisions for those on foot,"he said, Mr. Selvan stressed having facilities like signals, crossings, and safe walkways, especially near schools, colleges and workplaces with high pedestrian movement. "So the weakest on the road, be it children or the elderly, are not left at the mercy of motorists," he added.

'Targeted policy intervention to boost green mining vehicles'

Lalatendu Mishra
MUMBAI

India requires targeted and well-defined policy interventions to drive the adoption of alternative fuel Heavy Earth Moving Machinery (HEMM) in mining operations, according to the "Study on Adoption of Cleaner Vehicles for the Indian Mining Industry".

The study was undertaken by the Sustainable Mining Initiative, a division of the Federation of Indian Mineral Industries in association with Deloitte which prepared a detailed report.

"India requires a coherent policy framework that integrates technology-specific incentives, regulatory enablers, infrastructure development and demand-side interventions," as per the report.

Cost, a deterrent

Emphasising green HEMMs were significantly more expensive upfront compared with conventional equipment, it said high initial capital outlay was a major deterrent.

"To address this, targeted incentives such as capital subsidies, premium rebates linked to fleet size, and upfront payment relaxations are critical to de-risk adoption," it said.

"Power subsidies for charging infrastructure and reduced financing costs can further accelerate early deployment. Over time, star rating reforms, production-linked incentives and mandatory adoption clauses can drive scale, lower costs, and mainstream cleaner HEMM usage across the sector," it said.

"These coordinated efforts will provide sustained policy and infrastructure support for fully decarbonized HEMM sector."

India's mining equipment market generated $6.4 billion in revenue in 2024

Stating by 2035, the number of HEMMs would see a significant increase across categories, the report said, "This significant growth in HEMM deployment, driven by increased production targets and supportive government initiatives, also brings with it a sharp rise in fuel consumption and associated CO_2 emissions."

As thousands of high-capacity machines are added to mining fleets, the environmental footprint of operations would expand substantially.

Need for transition

"This underscores the urgent need to transition towards alternative fuel HEMMs – such as those powered by electricity, hybrid systems or hydrogen.

"Proactive adoption of cleaner technologies is critical to ensuring the sector's growth aligns with India's sustainability and net-zero commitments. It is therefore paramount for the country that key gaps in adoption of cleaner fuel HEMMs must be addressed through targeted interventions," it stated.

As per industry analysis, India's mining equipment market generated $6.4 billion in revenue in 2024 and is likely to grow at a CAGR of 6.5%, reaching $11.34 billion by 2033.

Budding dance master kills self over love failure

HYDERABAD: Upset over love failure, a 17-year-old budding dance master died by suicide by hanging himself at a dance studio in Miyapur on Monday night. Sagar, a native of Uttar Pradesh, was working in Deloitte Dance Studio in Miyapur and staying in a room in the studio at night. According to police, he was reportedly in love with a girl and recently shared about his love failure with dance studio owner Paramesh. He was visibly upset for the past one week and hanged from the ceiling fan.

Hyderabad

GST collections rise 16.4 per cent in May

NEW DELHI

Gross GST collections rose 16.4 per cent to over Rs 2.01 lakh crore in May, as per government data released on Sunday.

This comes after a record high Goods and Services Tax (GST) collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore. In May, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore.

In May, the gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess were at Rs 12,879 crore. In May 2024, the mop up was Rs 1,72,739 crore.

Meanwhile, total refunds during the month fell 4 per cent to Rs 27,210 crore. Net GST mop-up stood at about Rs 1.74 lakh crore, a 20.4 per cent year-on-year growth.

Deloitte India Partner M S Mani said wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17 per cent to 25 per cent, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6 per cent. Some states like MP, Haryana, Punjab and Rajasthan have shown median increases of 10%. PTI

IS FIXED REALITY HELPING STUDENTS LEARN FASTER & SMARTER

11 • PG | 652 • Sqcm | 1087301 • AVE | 350K • Cir | Top Left

Kolkata

IS MIXED REALITY HELPING STUDENTS LEARN FASTER & SMARTER?

MR IS HELPING SCHOOLS MOVE FROM THEORY-BASED TEACHING TO SKILL-BASED, HANDS-ON LEARNING

ANINDITA ACHARYA

Try picturing DNA replication or fluid dynamics through static images. Now imagine learning the same through an interactive Mixed Reality (MR) simulation where students can rotate, zoom, and dissect a model in real-time. Traditional methods often fall short when it comes to explaining complex ideas. MR, which combines reality with digital, is fast becoming a game-changer in education. Whether it's a high school student exploring the human heart in 3D or an engineering undergrad walking through the inner workings of a turbine, MR is shifting how we learn, understand, and apply knowledge.

"MR is changing how students learn by replacing passive learning with real-time, interactive experiences. It allows learners to explore complex topics like anatomy, robotics, or astronomy by interacting with 3D environments. This helps build critical thinking and practical skills. As industries adopt AR/VR/MR technologies, students exposed to MR early are better prepared for careers in engineering, healthcare, design, and manufacturing. According to PwC, employees trained in VR complete tasks 4x faster than in classrooms. MR is helping schools move from theory-based teaching to skill-based, hands-on learning—bridging the gap between academics and job-ready skills," said Anurag Gupta, CEO and Co-Founder of STEMROBO Technologies.

At Case Western Reserve University in Ohio, students use HoloLens-based "HoloAnatomy" to walk inside human body holograms. Over in Oxford, MR is replacing traditional cadavers with digital anatomy lessons. In Goa, high schoolers at Vidya Vikas Academy use MR to explore volcanoes and the solar system, all from their classroom. And Deakin University in Australia lets nursing students virtually simulate real-world emergencies.

"MR technologies offer multimodal learning experiences by integrating visual, auditory, and kinesthetic elements. Interactive 3D models and simulations allow students to explore intricate concepts—such as molecular structures, mechanical systems, or anatomical functions—in a tangible and manipulable format. This interactive engagement promotes deeper cognitive processing, enabling learners to construct meaningful mental models and enhance memory consolidation. By moving beyond passive content consumption, MR fosters active exploration and immediate feedback, both of which are associated with improved retention and conceptual understanding in educational research," said an expert of Hindustan Institute of Technology and Science.

MR is not just about making lessons cool. It's about giving students hands-on exposure to tools and platforms that are fast becoming essential in modern industries. Sectors like healthcare, architecture, automotive, and even retail are already hiring people who can design or work with AR/VR/MR systems.

High-end labs, museum tours or industrial visits are often out of reach for students in remote or low-income areas. But MR changes that

A 2023 Deloitte report stated that jobs in extended reality (XR, which includes AR/VR/MR) will grow by 31% annually over the next five years. Educational institutions that integrate MR are not just teaching, they're preparing students for roles that didn't exist a decade ago. From virtual prototyping to surgical training, students with MR exposure stand a step ahead in the job market. Singapore's Nanyang Technological University (NTU) already trains future engineers using MR to simulate bridge-building and structural stress tests. These are job-relevant, real-world applications brought into the classroom.

"Students who engage with MR are more confident in using technology to create, not just consume. According to LinkedIn's 2024 emerging jobs report, AR/VR specialists are among the top 10 fastest-growing roles globally. By integrating MR in education, schools are building a talent pipeline aligned with the future workforce where immersive technology will be a core requirement," said Gupta.

What's even more powerful is MR's potential to make quality education accessible. High-end labs, museum tours, or industrial visits are often out of reach for students in remote or low-income areas. But MR changes that. With just a headset and basic internet, a child in a rural school can dissect a frog virtually or walk through the Louvre Museum, experiences once reserved for the privileged. "MR possesses significant potential to democratise education by mitigating disparities in access to high-quality learning experiences. Virtual classrooms, holographic lecturers, and cloud-based simulation libraries can bring world-class educational resources to remote or underserved communities," said the expert from Hindustan Institute of Technology and Science.

Lets' remember that exposure to MR in classrooms helps students build both tech skills and critical thinking skills needed for future careers. They learn how to work with 3D spaces, design user experiences, and create immersive content, skills useful in fields like healthcare, engineering, architecture, and media. This prepares students not just to use new technology, but to shape and improve it in the real world.

STRONG IMPORT SURGE PUSHES MAY GST COLLECTIONS

GST collections top Rs 2 lakh crore for second month, rise 16.4% in May

MPOST BUREAU

NEW DELHI: Gross GST collections remained above the Rs 2 lakh crore mark for the second month in a row, rising 16.4 per cent in May to over Rs 2.01 lakh crore.

Goods and Services Tax (GST) collection had touched a record high of Rs 2.37 lakh crore in April. In May, 2024, the mop up was Rs 1,72,739 crore.

In May, 2025, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore. Total gross GST revenues stood at Rs 2,01,050 crore in May, 2025.

Gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess was at Rs 12,879 crore.

Total refunds issued during the month dipped 4 per cent to Rs 27,210 crore.

Net GST mop-up in May stood at about Rs 1.74 lakh crore, a 20.4 per cent year-on-year growth.

Deloitte India Partner M S Mani said the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17 per cent to 25 per cent, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6 per cent.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10 per cent.

KEY POINTS

- Net GST revenue after refunds was Rs 1.74 lakh crore, up 20.4 per cent from last year
- GST from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore
- Import-related GST jumped 25.2 per cent to Rs 51,266 crore
- Central GST collections stood at Rs 35,434 crore, while State GST was Rs 43,902 crore

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said.

Price Waterhouse & Co LLP Partner Pratik Jain said 16 per cent growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11 to 12 per cent.

"If the growth continues in this range for the next couple of months, it might provide the cushion for the government to look at rate rationalization on which a lot of work has already been done," Jain said.

EY India Tax Partner Saurabh Agarwal said looking ahead, we might see similar GST collection numbers with slight increases in June because of ongoing geopolitical tensions across the globe.

Tax Connect Advisory Services LLP Partner Vivek Jalan said with an approx 10 per cent growth in domestic GST revenue and 73 per cent growth in import GST revenues, it is very clear that this month's growth in GST revenue is import driven rather than domestic consumption driven.

"This coupled with the fact that exports refunds are not growing correspondingly, reflect the fact that import growth far exceeds export growth," Jalan added.

Delhi • Kolkata

Singapore remains largest FDI source for India for last 7 years

OUR CORRESPONDENT

NEW DELHI: Singapore continued to be India's largest source of foreign direct investment (FDI) for the last seven years, as the country received the highest inflows of about $15 billion in 2024-25. The overseas inflow grew 13 per cent to $50 billion in the last fiscal.

The total FDI, which includes equity inflows, reinvested earnings and other capital, grew by 14 per cent to $81.04 billion during the last financial year. It is the highest in the last three years.

FDI from Singapore in 2024-25 increased to $14.94 billion from $11.77 billion in 2023-24, according to the latest government data. Singapore accounted for around 19 per cent of total inflows in 2024–25.

Since 2018-19, Singapore has been the largest source of such investments in India. In 2017-18, India attracted the maximum FDI from Mauritius.

In the last fiscal, the country received $8.34 billion in foreign inflows from Mauritius.

During 2024-25, Mauritius was followed by the US ($5.45 billion), the Netherlands ($4.62 billion), the UAE ($3.12 billion), Japan ($2.47 billion), Cyprus ($1.2 billion), the UK ($795 million), Germany ($469 million), and Cayman Islands ($371 million).

According to experts, Singapore's position as a global financial hub, combined with strong bilateral ties and its role as a gateway for global private equity and venture capital, makes it a natural conduit for investments into India.

Total FDI, which includes equity inflows, reinvested earnings and other capital, grew 14% to $81.04 billion during the last fiscal. It is the highest in the last three years

Rumki Majumdar, Economist, Deloitte India, said despite turmoil in the capital markets and uncertainties around trade, India has managed to attract huge investments, which are stable and long-term.

"Given that Asia is the second largest region to receive foreign capital inflows, a large part of the funds come from Singapore. There are quite a few reasons for that. One, being a low-tax jurisdiction and with a robust legal framework, Singapore is considered the strategic financial gateway to Asia," she said.

Double Tax Avoidance Agreement between the two nations helps all Singapore-based organisations to invest in India and reduce the total tax burden on income earned from India, Majumdar added.

Lokesh Shah, Partner, IndusLaw, said the India-Singapore tax treaty was one of the major drivers of FDI. "Singapore's continued dominance in India FDI now relies more on genuine business and regulatory advantages, Singapore's sophisticated financial market, its status as a regional hub, and political and economic stability," Shah said.

Rudra Kumar Pandey, Partner, Shardul Amarchand Mangaldas & Co, said that while Singapore will continue to be a significant and active investor in India, the landscape is gradually evolving.

"Singapore's rising FDI into India is anchored in its role as a global financial hub, home to a large number of international private equity and venture capital funds," Pandey said.

These investors see India as a high-growth destination, particularly in sectors like financial services, banking, insurance, business process outsourcing, logistics, computer software and hardware, trading, telecommunications and pharmaceuticals and use Singapore as a key base to manage and deploy capital across Asia, he added.

Foreign investments are crucial for India to overhaul its infrastructure like ports, airports and highways to push growth. FDI also helps improve the country's balance of payments situation and strengthen the rupee's value against other global currencies, especially the US dollar.

IMPORT OF RARE EARTH MAGNETS FROM CHINA

Automobile industry seeks govt help in expediting approvals

Various domestic suppliers have already sought approval from Chinese govt through their local vendors in China, as per industry sources

OUR CORRESPONDENT

NEW DELHI: The automobile industry has sought government support in expediting approvals from the Chinese government for importing rare earth magnets used in various applications, including passenger cars.

As per the industry sources, various domestic suppliers have already sought approval from the Chinese government through their local vendors in China.

However, no approvals have been granted so far, sources said. China controls over 90 per cent of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy. The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets.

In Japan, Suzuki Motor has already suspended production of its Swift car because of China's curbs. Last week, Maruti Suzuki India Senior Executive Officer (Corporate Affairs) Rahul Bharti said China has asked for an end-user certificate, endorsed by the Indian government and approved by the Chinese government. "So that process is on and industry is in discussion with the government," he stated.

China controls over 90 per cent of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy

Deloitte India Partner and Automotive Sector Leader Rajat Mahajan noted that the shortage is a major supply chain disruption especially for EVs as rare earth metals are used extensively in the electric motor which is a core component.

Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures.

"This has been an R&D topic for the automotive industry for a long time but till now other magnetic materials have not seen large scale commercial usage in applications like EV," he noted. Also, there are not enough rare earth magnets to recycle at this point in time to satisfy the EV volumes, Mahajan said. It will not be easy for OEMs to suddenly change course on powertrain as well as on alternate material.

"This situation will hopefully get resolved via diplomatic channels, but if it continues then we may see a shift towards powertrains for large OEMs," he said. Icra Senior Vice President & Co-Group Head Corporate Ratings Srikumar Krishnamurthy noted that rare earth magnets are used for multiple applications in EVs - electric motors, regenerative braking systems, power steering etc.

Given that China accounts for around 90 per cent of the overall supply for rare earth magnets, the curb on export of the same by China can have material implications for the EV industry, he added.

"The implications could include inflationary pressures (led by higher cost for rare earth magnets against the backdrop of shortage) or even disruption in production schedules in absence of a seamless supply of the same," Krishnamurthy stated.

While OEMs are evaluating options to reduce dependence on the supply of rare earth magnets, finding immediate alternatives is going to be challenging, he said. The critical materials include, samarium, gadolinium, terbium, dysprosium and lutetium, which are essential in electric motors, braking systems, smartphones and missile technology.

Key Points

- Chinese govt has put restrictions from April 4, mandating special export licences for seven rare earth elements, related magnets
- Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures
- In Japan, Suzuki Motor has already suspended production of Swift car because of China's curbs

Kolkata

'Fastest-growing' tag on economy

OUR SPECIAL CORRESPONDENT

Calcutta: The Reserve Bank of India has stated that the country is poised to remain the fastest-growing economy globally in 2025-26, even as the global economic outlook for 2025 and 2026 remains clouded by multiple challenges, including geopolitical tensions, trade tensions, elevated public debt, financial market volatility, and climate shocks.

The RBI has projected real GDP growth for 2025-26 at 6.5 per cent, with growth rates of 6.5 per cent in Q1, 6.7 per cent in Q2, 6.6 per cent in Q3, and 6.3 per cent in Q4.

"The outlook for the Indian economy remains promising in 2025-26, supported by revival in consumption demand, government's continued thrust on capex while adhering to the path of fiscal consolidation, healthy balance sheets of banks and corporates, easing financial conditions, continuing resilience of the services sector and strengthening of consumer and business optimism, besides sound macroeconomic fundamentals," RBI said in its annual report.

"However, uncertainty about global trade post-protectionist measures, protracted geopolitical tensions and global financial market volatility pose downside risks to the growth outlook and upside risks to the inflation outlook," the central bank said.

With inflation falling below the target in February and March 2025, supported by a sharp fall in food inflation, there is now greater confidence about a durable alignment of headline inflation with the target of 4 per cent over a 12-month horizon, the central bank said.

RBI has projected a 4 per cent CPI inflation for 2025-26, with Q1 at 3.6 per cent, Q2 at 3.9 per cent, Q3 at 3.8 per cent, and Q4 at 4.4 per cent.

"The benign inflation outlook and moderate growth warrant monetary policy to be growth supportive, while remaining watchful about the rapidly evolving global macroeconomic conditions," the annual report said.

The RBI has already lowered the policy rate in two consecutive reviews, and there are expectations of further rate cuts in the current cycle by economists and market analysts to further support economic growth.

Growth expectations

The government is expected to release the provisional estimates of Q4FY25 and FY25 GDP growth numbers on April 30.

"Assuming there are no major revisions in Q1 to Q3 estimates in the upcoming data release by NSO, we expect FY25 GDP to stand at 6.3," said Soumya Kanti Ghosh, group chief economic adviser, State Bank of India, in a research report.

"While a slowdown of FY25 is already factored in, Q4 growth will likely signal whether growth momentum for FY26 is likely to rebound. We expect growth to range between 6.8-7.2 per cent, given the growth in high-frequency indicators around services exports, GST collections, and rural demand indicators," said Rumki Majumdar, economist, Deloitte India.

"The projected real GDP growth of 6.4 per cent in FY25 and 6.5 per cent in FY26 reflects the economy's underlying strength and resilience, driven by robust domestic demand, sustained government capex, and gradual recovery in private investments," said Manoranjan Sharma, chief economist at Infomerics Valuations and Ratings Ltd.

Household savings

The gross financial saving of households increased to 11.2 per cent of gross national disposable income (GNDI) in 2023-24 from 10.7 per cent in the previous year.

Net household financial savings improved to 5.1 per cent of GNDI in 2023-24 from 4.9 per cent in the previous year.

CLOUD ON GLOBAL ECONOMIC OUTLOOK

- India's external debt to GDP ratio remained modest at 19.1 per cent as at end-December 2024, the lowest among emerging market peers
- Currency-deposit ratio declined to 15.4 per cent by March 31, 2025, from 15.9 per cent in the previous year, driven by growth in digital transactions
- The value of central bank digital currency (CBDC) or e-rupee in circulation jumped to ₹1,016 crore at the end of March 2025 from ₹234 crore in the year-ago period. RBI is exploring the commencement of CBDC pilots on cross-border payments

Farm shines as economy grows 7.4%

OUR BUREAU

Calcutta: The Indian economy grew 7.4 per cent in Q4FY25, higher than 6.4 per cent in Q3FY25 but lower than 8.4 per cent in Q4FY24.

The Q4FY25 growth numbers were marginally ahead of analyst estimates, who pointed to a sharp growth of 5.4 per cent in agriculture compared with 0.9 per cent in Q4FY24. However, manufacturing disappointed with a growth of 4.8 per cent in Q4FY25 compared with 11.3 per cent in Q4FY24.

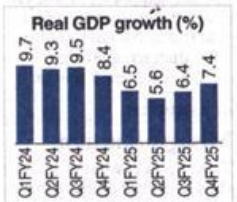

"Manufacturing has seen feeble growth because of slow urban demand and also global uncertainties (reflected in slower export growth). However, if we look sequentially, there has been an improvement in manufacturing growth from 3.6 per cent in Q3FY25 to 4.8 per cent in Q4FY25," Rajani Sinha, chief economist, CareEdge Ratings, told The Telegraph.

"Last year, the monsoon was good, and rural demand has been strong. So we are seeing a good growth in the farm sector as expected," Sinha said.

"The high growth in manufacturing in Q4FY24 came on the back of a very low base, partly attributable to the impact of the commodity prices cycle on margins. While the year-on-year GVA growth in manufacturing in Q4FY25 is undoubtedly lower when compared with the year-ago quarter, it is higher in sequential terms, which is a positive sign," Aditi Nayar, chief economist, Icra, told this newspaper.

In absolute numbers, real GDP in Q4FY25 is estimated at ₹51.35 lakh crore against ₹47.82 lakh crore in Q4FY24. Nominal GDP in Q4FY25 is estimated at ₹88.18 lakh crore against ₹79.61 lakh crore in Q4 of 2023-24 — a rise of 10.8 per cent.

Real Gross Value Added (GVA) in Q4FY25 is estimated at ₹45.76 lakh crore against ₹42.86 lakh crore in Q4FY24, registering a growth rate of 6.8 per cent. Nominal GVA in Q4FY25 is estimated at ₹79.46 lakh crore, against ₹72.51 lakh crore in Q4FY24, showing a growth rate of 9.6 per cent.

	Q4FY 24	Q4FY 25
Agriculture	0.9	5.4
Manufacturing	11.3	4.8
Construction	8.7	10.8

Growth in %

The construction segment grew 10.8 per cent in Q4FY25 from 8.7 per cent in Q4FY24. The electricity, gas, water supply, and other utility services segments grew 5.4 per cent during the fourth quarter, down from 8.8 per cent in the year-ago period.

GVA growth in the services sector — trade, hotel, transport, communication and services related to broadcasting — is estimated at 6 per cent in the fourth quarter, lower than 6.2 per cent a year ago.

Financial, real estate and professional services grew 7.8 per cent in the March 2025 quarter compared with 9 per cent in the year-ago period. Public administration, defence and other services posted almost flat growth at 8.7 per cent in the quarter.

Private final consumption expenditure grew 6 per cent in Q4FY25, down from 6.2 per cent in Q4FY24. Exports growth at 3.9 per cent in Q4FY25 was down from 7.7 per cent in Q4FY24.

GVA-GDP gap

A high net tax growth of 12.7 per cent in Q4FY25 resulted in a wide gap between the GVA and GDP numbers.

"The divergence between GDP and GVA is concerning because it points to rapidly rising demand while the production side growth lagged. The possibility of a wide gap between GVA and GDP could also be because of strong tax collections and lower subsidies, which may explain the contraction in government spending," said Rumki Majumdar, economist, Deloitte India.

Economists remain optimistic that the government will meet its budgeted growth of tax aggregates and deficit targets and predict further rate cuts by the RBI in the next monetary policy meet in June.

"We expect the benign inflation and soft growth to continue to provide the MPC room for incremental monetary easing, with a 25 basis point cut in the upcoming June policy," said Upasna Bhardwaj, chief economist, Kotak Mahindra Bank.

Kolkata

GST trove jumps 20%

OUR SPECIAL CORRESPONDENT

Calcutta: Net GST collection, a barometer of economic activity in the country, jumped 20.4 per cent to ₹1,73,841 crore in the month of May compared with ₹1,44, 381 crore collected in May 2024.

However, on a month-on-month basis, the net collection was lower by 16.9 per cent from April, when it had touched ₹2,09,376 crore.

In the month of May, total gross GST revenue (sans the refunds) stood at ₹2,01,050 crore, up 16.4 per cent from ₹1,72,739 crore. While gross domestic revenue was up 13.7 per cent to ₹1,49,785 crore, gross import revenue was up 25.2 per cent to ₹51,266 crore.

Commenting on the monthly data, M.S. Mani, partner at Deloitte, said, "Compared with the FY25 average gross GST collections of ₹1.84 lakh crore, the figures reported for May25 — ₹2.01 lakh crore — would provide significant fiscal headroom for the government. These figures are also in line with the recent GDP growth estimates, which indicate a robust consumption pattern across months."

Pointing towards the spike in GST earned from imports, Mani argued, "The GST revenues from imports are 25 per cent higher compared with the same month last year... this indicates that imports have accelerated despite recent tariff headwinds."

State collections

Collections by the states, which cumulatively reflect in the gross domestic revenue, showed that Bengal managed to beat the national average with an 18 per cent growth to ₹6,321 crore, up from ₹5,377 crore it collected in May 2024.

Among the large and industrialised states, Maharashtra, Tamil Nadu, Karnataka reported strong growth with collections jumping by 17 per cent, 25 per cent and 20 per cent, respectively.

However, Gujarat, Punjab, Telangana, Andhra Pradesh, Haryana were below the cumulative growth. Andhra recorded a 2 per cent decline, while Telangana grew only 6 per cent. Punjab, Haryana and Gujarat grew 10 per cent, 9 per cent and 4 per cent, respectively, trailing the national average.

Pointing towards the wide variation in the growth of GST collections, Mani suggested it required a thorough analysis across the sectors that are important in each state.

"The average growth across the country does not appear to be uniformly reflected across states, possibly due to sectoral or seasonal factors which require a deeper data-based analysis," he noted.

TAX GAIN

Singapore tops FDI list

New Delhi: Singapore continued to be India's largest source of foreign direct investment (FDI) for the last seven years, as the country received the highest inflows of about $15 billion in 2024-25. The overseas inflow grew 13 per cent to $50 billion in the last fiscal.

Total FDI, which includes equity inflows, reinvested earnings and other capital, grew 14 per cent to $81.04 billion during the last financial year. It is the highest in the last three years.

FDI from Singapore in 2024-25 increased to $14.94 billion from $11.77 billion in 2023-24, according to the latest government data. Singapore accounted for around 19 per cent of total inflows in 2024–25.

Since 2018-19, Singapore has been the largest source of such investments in India. In 2017-18, India attracted the maximum FDI from Mauritius. In the last fiscal, the country received $8.34 billion in foreign inflows from Mauritius.

During 2024-25, Mauritius was followed by the US ($5.45 billion), the Netherlands ($4.62 billion), the UAE ($3.12 billion), Japan ($2.47 billion), Cyprus ($1.2 billion), the UK ($795 million), Germany ($469 million), and Cayman Islands ($371 million).

Rumki Majumdar, economist at Deloitte India, said that despite the turmoil in the capital markets and uncertainties around trade, India has managed to attract huge investments.

Fast-track mode

The government has significantly streamlined procedures for clearing FDI applications of neighbouring countries, including China, with quicker decisions, and regular inter-ministerial committee meetings to ensure approvals are processed within the set timelines, an official said.

The number of pending foreign direct investment (FDI) proposals from countries sharing a land border with India under the provisions of Press Note 3 is lower.

AI BLOODBATH IN WHITE-COLLAR JOBS AND SLOWER HIRING

10 • PG | 811 • Sqcm | 689718 • AVE | 177.8K • Cir | Top Left

Bengaluru

AI BLOODBATH IN WHITE-COLLAR JOBS AND SLOWER HIRING

UNCERTAINTY translates into different meanings for different people and is largely defined by context. It is now visiting folks across the livelihood spectrum—those looking for jobs and those who are employed. The creeping fear of generative artificial intelligence displacing job opportunities is reflected in search queries and posts on job portals. Type 'AI jobs displacement fears' or 'AI jobs impact' on LinkedIn, and you see a host of posts spanning the range from fear to hope.

The fears are scarcely unreal. Earlier this month, Aneesh Raman, chief economic opportunity officer at LinkedIn, revealed in a signed piece, "AI poses a real threat to a substantial number of the jobs" for new seekers. Raman pointed out that LinkedIn's Workforce Confidence Index was hitting new lows and cited a survey wherein two-thirds of executives admitted that AI will take over many of the tasks currently allocated to their entry-level employees. Four decades back, philosopher J Krishnamurti had asked an existential question: "What is our place if computers and AI can do most of what we can do, faster and more efficiently?"

The impact of AI adoption on white-collar warriors showed up in a report on India's job market published last week by TeamLease, a leading provider of staffing solutions. Its biannual survey for April-September 2025 estimated that job growth across India would slow down to 2.8 percent from 7.1 percent in the previous six months. The tempered outlook "underscores significant caution and a calibrated move toward agile, tech-enabled and modular workforce strategies in response to business uncertainty".

THE THIRD EYE

SHANKKAR AIYAR

Author of *The Gated Republic, Aadhaar: A Biometric History of India's 12 Digit Revolution,* and *Accidental India*

(shankkar.aiyar@gmail.com)

The granular details merit attention. Job growth is plateauing in back office and administrative roles. Companies are investing in AI-driven workflow management and centralised operation hubs to curb costs and bloat. Gen AI and the emergence of inference and agentic solutions are propelling automation in factories and offices. AI-powered bots and self-service portals are replacing HR functions. Tech start-ups seek marketing and growth via AI. In media and entertainment, AI is driving post-production and audience engagement. The sectoral trend has been visible—especially in IT jobs—and is accelerating.

The gloom sensed by job seekers has popped up persistently in expert articulation every few months. This week, Dario Amodei, once on the founding team of Open AI and currently CEO at Anthropic, warned of a 'white-collar bloodbath'. Amodei said, "AI could wipe out half of all entry-level white-collar jobs." The man who is building the large-language model Claude, which ironically is used to retrench human interface, says, "Lawmakers don't get it, CEOs are afraid to talk about it and workers won't realise the risks" until after it hits.

Amodei has plenty of company. Bill Gates has predicted, "Within 10 years, AI will replace many doctors and teachers." We know of AI reading of cancer imaging. Now, AI-based mammography is here and is raising ethical questions. There is no dearth of studies either. An IMF research estimates that AI will affect almost 40 percent of jobs around the world, replacing some and complementing others. A report of the US Senate recognises: "AI has the potential to affect every sector of the workforce—including both blue-collar and white-collar jobs." A report by Goldman Sachs says the emerging capabilities of AI models will result in companies eventually 'employing AI workers' along with humans.

Indian enterprises are on the tech wagon, too. This week, India's IT behemoth Infosys announced the launch of over 200 enterprise AI agents powered by its Topaz suite on Google Cloud Vertex AI platform. AI agents leverage machine learning and cognitive architecture to manage processes and deliver outcomes at scale across sectors. A study by Deloitte shows 80 percent companies are exploring development of autonomous agents and 70 percent signalled a desire to use Gen AI for automation.

Effectively, the deployment of machine-based solutions will retrench human interface. The migration is visible in corporate plans and results. Morgan Stanley estimates that mentions of AI accompanied by adoption have reached a record high on earnings calls. And the cash is showing up on the books of chips giant Nvidia, which beat Street estimates to clock $44.1 billion in first-quarter revenues despite lacking access to China, which accounts for half of the chips market. In a call with investors, CEO Jensen Huang defined AI as infrastructure and underlined that the expansion of investment intent across the globe is just the beginning.

The rapid adoption of AI-driven solutions in advanced economies is catalysed by demographic reality—every day, over 10,000 persons retire in the US and the estimate is twice for Europe. Technology bridges the manpower gap and boosts profits. This acceleration in adoption of technology has implications for India's demography of a young workforce and for growth. Private final consumption, which accounts for 56.5 percent of GDP, depends on job creation.

American polymath Roy Amara had said, "We tend to overestimate the effect of a technology in the short run and underestimate the effect in the long run." It's not too late. Countries are redefining economic objectives, reframing curriculum and redesigning skilling programmes to adapt to the AI age. India is not immune to the global trends and must review the gamut of policies governing education, skilling, investment and job creation. India's political class needs to shun partisan electoral short-termism to ensure long-term sustainability of its political economy.

GST collections stay above ₹2 lakh cr in May

Gross GST revenue up 16.4%; robust mop-up for 2nd month in a row; double-digit growth in several large states

DIPAK MONDAL @ New Delhi

IF May GST collection—tax collected for April transactions—are anything to go by, India's economy started the financial year with a bang despite the disruptions caused by US president Donald Trump's threat of reciprocal tariffs.

GST collections in May rose 16.4% to touch ₹2.01 lakh crore. Gross domestic revenue increased 14% to ₹1.5 lakh crore, while revenue from imports shot up 25% to ₹51,000 crore.

Net GST revenues (after deducting refunds) showed even better buoyancy as the same increased by 20.4% to ₹1.74 lakh crore. Total refunds contracted by 4% year-on-year.

This is the second month in a row that gross collections have witnessed double-digit growth. In April, gross GST revenue hit an all-time high of ₹2.36 lakh crore in April 2025, 12.6% higher than the collection of ₹2.10 lakh crore in April 2024. This augurs well for the country as FY25 showed GST revenue collections growth slowing down to single digit numbers.

"A 16% growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11 to 12%. If the growth continues in this range for next couple of months, it might provide the cushion for the Government to look at rate rationalisation on which a lot of work has already been done," says Pratik Jain, partner, Price Waterhouse & Co LLP.

Meanwhile, M S Mani, partner, Deloitte India, says a 25% higher GST revenue from imports indicates that imports have accelerated despite recent tariff headwinds.

Many large states, including southern ones, have seen high double-digit growth. Collections from Maharashtra rose by 17%, Karnataka by 20%, Tamil Nadu by 25% and Kerala by 24%. Bihar (23%) and Delhi (58%) and West Bengal (18%) are few other notable good performers during the month. Gujarat (4%), Telangana (6%) and Andhra Pradesh (-2%) were few of the laggards.

According to Deloitte's Mani, the wide variations in GST collections growth across states require a thorough analysis across the sectors that are important in each state.

GROSS GST REVENUE

	May '24	May '25
CGST	32,409	35,434
SGST	40,265	43,902
IGST	87,781	1,08,836
CESS	12,284	12,879
Total	1,72,739	2,01,050

(Figures in ₹ crore)

Import gains

GST revenue from inward shipments grew 25%, showing imports shot up despite tariff headwinds

Chennai

Ola Krutrim launches agentic AI assistant Kruti

UMA KANNAN @ Bengaluru

AI unicorn Krutrim, which is a part of the Ola group, has launched an agentic AI assistant called Kruti. This is an upgrade from Krutrim's previous public beta chatbot and officials said they will be updating Kruti regularly with many more features.

Available for consumers currently, Kruti for developers will also be launched soon so that they can build new agents and deploy them on the platform.

Navendu Agarwal, head of business, Krutrim and Chandra Khatri, Founding Head of AI at Krutrim said it delivers task execution - from cab booking, food ordering, bill payments to image creation. It also offers advanced AI features such as in-depth research and image creation free of cost for users. "Right now, it is for consumers, but we want to go beyond and we definitely want to personalize. We want to provide recommendations which are relevant for the users. We want to make it more and more personal," said Krutrim's business head.

Agarwal also pointed out that to begin with they want to start with Ola's complex use cases before opening it up to others. Kruti understands voice and text input, and also remembers past interactions. It is currently available in over 11 Indian languages. It is also tuned for Indian voices. Whether it's 'book me a cab to the airport' or 'order my usual lunch,' Kruti understands intent and gets the job done, he added. With its advanced multimodal capabilities powered by the Krutrim V2 LLM (large language model) and open-source models, Kruti ensures scalable and cost-efficient performance.

Bhavish Aggarwal, Founder of Krutrim, said, "Kruti is the first real step towards the future of AI where technology doesn't just talk back, but actually helps you get things done." It also learns user preferences, adapts to usage over time, and integrates with various apps and services, delivering context-aware assistance. Kruti also offers a fully embeddable SDK (Software Development Kit) for developers, enabling third-party platforms to offload LLM orchestration, memory management, and tool execution with minimal code, the team at Krutrim said.

In February this year, Aggarwal announced Rs 2,000 crore investment in Krutrim, with a commitment of Rs 10,000 crore by next year. Many companies are now focusing on agentic AI. Deloitte recently launched the Asia Pacific (AP) Agentic AI Centre of Excellence (CoE) located in India, Malaysia and Singapore. Deloitte said Agentic AI represents a significant evolution in AI, enabling autonomous agents to independently manage complex workflows, learn continuously and adapt over time.

Bengaluru

SBI collaborates with KDEM to support GCCs

State Bank of India has signed a Memorandum of Understanding (MoU) with Karnataka Digital Economy Mission (KDEM) for supporting Global Capability Centres (GCCs) in Karnataka during the 'GCC Leaders Connect' event held on May 28 at Conrad Bengaluru. The MoU was signed by Joohi Smita Sinha, Chief General Manager of SBI Bengaluru Circle, and Sanjeev Gupta, CEO of KDEM, in presence of B V Naidu, Chairman of KDEM. The MoU marks the beginning of a strategic partnership aimed at enabling and empowering GCCs in Karnataka through collaborative initiatives between SBI and KDEM. On this occasion, SBI announced the opening of India's first exclusive GCC in Bengaluru. This pioneering initiative is designed to offer customised banking solutions and support to the growing GCC ecosystem in the state.

Additionally, the event featured a panel discussion on 'Reimagining GCCs: Strategic Perspectives for a New Era'.

Veera Lokesh, Director of Western Digital, Sharada, Country Head for Bayer India, and Aditya Meena, Partner GCC at Deloitte, participated in the discussion. Another panel discussion titled 'Driving Operational Excellence & Innovation in GCCs' had Romit Sen, Director of Blackhawk, Saraswathi Ramachandra, MD & Country Head for Lightcast, Srinivas Sampath, Vice President of Upland Software, Sreedevi Hegde, Managing Director of Vervent, Shivi Mithal, GM at Mimecast, and Nagalakshmi Shetty, Vice President of Icon PLC, in attendance. The event was organised in association with Zyoin Group, a prominent recruitment solution provider for GCCs, startups, and the IT BT Sector.

The event has received an excellent response and has proved to be an exceptional platform for stakeholders across the GCC landscape to interact, exchange ideas, and forge partnerships that will shape the future of digital economy in Karnataka.

GST removes all inefficient parts, says Jt Commissioner

3 • PG | 258 • Sqcm | 644079 • AVE | 182.88K • Cir | Middle Left

Kolkata

GST removes all inefficient parts, says Jt Commissioner

CHRONICLE NEWS SERVICE

KOLKATA: Shafeeq S, IRS, Joint Commissioner, CGST & CX, Kolkata North, in his address said GST removes all inefficient parts or Indirect Taxes. GST replaced existing multiple indirect taxes levied by the central and state governments. MSMes in the economy pays huge role.

Shaffeq mentioned that Composition Scheme is a simple and easy scheme under GST for taxpayers. Small taxpayers can get rid of tedious GST formalities and pay GST at a fixed rate of turnover. Taxpayer whose turnover is less than Rs. 1.5 crore can be under this scheme.

While disucussing about QRPM scheme, He also higlighted that the Government of India introduces GST reforms to support MSMEs, including the QRMP scheme and rationalised late fee caps. These changes benefit 89% of GST-registered taxpayers.

Shafeeq informed that the small tax payers have faced delay while registering because there are several cases of fake invoices.

He suggested that MSMEs which have UDYAM registration can get tax benefit sometimes. If a small business does not register in GeM portal, for the Government it is difficult to identify the scale of the enterprise. Raj Kumar Chatterjee, WBRS, Joint Commissioner of Revenue, Directorate of Commercial Taxes, in his address said the Micro, Small & Medium Enterprises (MSMEs) have rich contribution to the expansion of entrepreneurial endeavours through business innovations. MSMEs are the driving engine of India's economy, contributing around 30% of GDP, 40% of exports, 45 % of manufacturing output and providing employment to over 110 million people.

Chatterjee also mentioned impact of GST. Seamless flow of Input Tax Credit (ITC) throughout the supply chain, GST has ensured considerable reduction on cost-burden of business and time bound disposal of GST refund within 60 days has increased cash flow to export oriented MSME.

While discussing on Compliances, he pointed out that threshold limit for reporting of invoice wise details of outward interstate taxable supplies made to U/R taxpayers in Table 5 of GSTR 1 and Table 6 of GSTR 5 is reduced to 1 lakhs from 2.5 lakhs.

He lastly informed that mandatory reporting of HSN codes (4 digit) for turnover upto 5 cr and 6 digit for turnover above 5 cr in Table 12 of GST1/ IFF . Value of B2B supplies and B2C supplies will be validated. Sanjib Kothari, Treasurer & Chairman, Council on MSMEs, MCCI in his welcome address said that GST has dismantled geographical barriers for MSMEs, enabling access to broader markets across India and empowering them to compete effectively with more prominent players. It has actively benefited MSMEs by reducing tax incidence in many product categories, thereby easing logistics, providing input tax credits, offering broader market access, and promoting growth-oriented formalization. Kothari also mentioned that in spite of the teething challenges, GST registration by MSMEs have increased over time, from 1.36 cr. in 2023 to 3.16 cr. in the current year. The 2025 budget presents an opportunity to introduce meaningful reforms that enhance compliance efficiency, reduce financial strain, and support small businesses in driving economic growth. With targeted interventions, India can create a GST framework that fosters entrepreneurship, competitiveness, and sustainable development. Sushil Kumar Goyal, Chairman, Council on GST, Indirect & State Taxes, MCCI in his Theme Address said that the GST regime has seen a growing acceptance among MSMEs, though significant challenges remain. A survey by Deloitte's GST@7 in 2024 shows that 78% of MSMEs now view GST favourably, up from 66% in 2023.

Chairman also highlighted that Proposed GST Reforms for MSMEs : instead of MSMEs paying 18% GST on spare parts while larger firms pay 12% on finished products, a unified middle-ground rate of 15% could promote fairness. For MSMEs, we feel that a simplified tax structure can ease compliance burdens while maintaining revenue neutrality. Instead of 4 slabs, A three-slab GST structure, 5%, 15%, 28%, [12% & 18% could be clubbed into 15%] could streamline compliance, reduce complexity for MSMEs, and ensure uniformity across industries.

AI Bloodbath In White-Collar Jobs And Slower Hiring

6 • PG | 320 • Sqcm | 143787 • AVE | 215K • Cir | Top Left

Delhi

AI BLOODBATH IN WHITE-COLLAR JOBS AND SLOWER HIRING

UNCERTAINTY translates into different meanings for different people and is largely defined by context. It is now visiting folks across the livelihood spectrum—those looking for jobs and those who are employed. The creeping fear of generative artificial intelligence displacing job opportunities is reflected in search queries and posts on job portals. Type 'AI jobs displacement fears' or 'AI jobs impact' on LinkedIn, and you see a host of posts spanning the range from fear to hope.

The fears are scarcely unreal. Earlier this month, Aneesh Raman, chief economic opportunity officer at LinkedIn, revealed in a signed piece, "AI poses a real threat to a substantial number of the jobs" for new seekers. Raman pointed out that LinkedIn's Workforce Confidence Index was hitting new lows and cited a survey wherein two-thirds of executives admitted that AI will take over many of the tasks currently allocated to their entry-level employees. Four decades back, philosopher J Krishnamurti had asked an existential question: "What is our place if computers and AI can do most of what we can do, faster and more efficiently?"

The impact of AI adoption on white-collar warriors showed up in a report on India's job market published last week by TeamLease, a leading provider of staffing solutions. Its biannual survey for April-September 2025 estimated that job growth across India would slow down to 2.8 percent from 7.1 percent in the previous six months. The tempered outlook "underscores significant caution and a calibrated move toward agile, tech-enabled and modular workforce strategies in response to business uncertainty".

THE THIRD EYE
SHANKKAR AIYAR
Author of *The Gated Republic, Aadhaar: A Biometric History of India's 12 Digit Revolution*, and *Accidental India*
(shankkar.aiyar@gmail.com)

The granular details merit attention. Job growth is plateauing in back office and administrative roles. Companies are investing in AI-driven workflow management and centralised operation hubs to curb costs and bloat. Gen AI and the emergence of inference and agentic solutions are propelling automation in factories and offices. AI-powered bots and self-service portals are replacing HR functions. Tech start-ups seek marketing and growth via AI. In media and entertainment, AI is driving post-production and audience engagement. The sectoral trend has been visible—especially in IT jobs—and is accelerating.

The gloom sensed by job seekers has popped up persistently in expert articulation every few months. This week, Dario Amodei, once on the founding team of Open AI and currently CEO at Anthropic, warned of a 'white-collar bloodbath'. Amodei said, "AI could wipe out half of all entry-level white-collar jobs." The man who is building the large-language model Claude, which ironically is used to retrench human interface, says, "Lawmakers don't get it, CEOs are afraid to talk about it and workers won't realise the risks" until after it hits.

Amodei has plenty of company. Bill Gates has predicted, "Within 10 years, AI will replace many doctors and teachers." We know of AI reading of cancer imaging. Now, AI-based mammography is here and is raising ethical questions. There is no dearth of studies either. An IMF research estimates that AI will affect almost 40 percent of jobs around the world, replacing some and complementing others. A report of the US Senate recognises: "AI has the potential to affect every sector of the workforce—including both blue-collar and white-collar jobs." A report by Goldman Sachs says the emerging capabilities of AI models will result in companies eventually 'employing AI workers' along with humans.

Indian enterprises are on the tech wagon, too. This week, India's IT behemoth Infosys announced the launch of over 200 enterprise AI agents powered by its Topaz suite on Google Cloud Vertex AI platform. AI agents leverage machine learning and cognitive architecture to manage processes and deliver outcomes at scale across sectors. A study by Deloitte shows 80 percent companies are exploring development of autonomous agents and 70 percent signalled a desire to use Gen AI for automation.

Effectively, the deployment of machine-based solutions will retrench human interface. The migration is visible in corporate plans and results. Morgan Stanley estimates that mentions of AI accompanied by adoption have reached a record high on earnings calls. And the cash is showing up on the books of chips giant Nvidia, which beat Street estimates to clock $44.1 billion in first-quarter revenues despite lacking access to China, which accounts for half of the chips market. In a call with investors, CEO Jensen Huang defined AI as infrastructure and underlined that the expansion of investment intent across the globe is just the beginning.

The rapid adoption of AI-driven solutions in advanced economies is catalysed by demographic reality—every day, over 10,000 persons retire in the US and the estimate is twice for Europe. Technology bridges the manpower gap and boosts profits. This acceleration in adoption of technology has implications for India's demography of a young workforce and for growth. Private final consumption, which accounts for 56.5 percent of GDP, depends on job creation.

American polymath Roy Amara had said, "We tend to overestimate the effect of a technology in the short run and underestimate the effect in the long run." It's not too late. Countries are redefining economic objectives, reframing curriculum and redesigning skilling programmes to adapt to the AI age. India is not immune to the global trends and must review the gamut of policies governing education, skilling, investment and job creation. India's political class needs to shun partisan electoral short-termism to ensure long-term sustainability of its political economy.

Singapore remains India's largest FDI source for seventh straight fiscal

10 • PG | 215 • Sqcm | 129145 • AVE | 268.96K • Cir | Middle Center

Chandigarh • Delhi

Singapore remains India's largest FDI source for seventh straight fiscal

PRESS TRUST OF INDIA ■ New Delhi

Singapore continued to be India's largest source of foreign direct investment (FDI) for the last seven years, as the country received the highest inflows of about $15 billion in 2024-25.

The overseas inflow grew 13 per cent to $50 billion in the last fiscal. The total FDI, which includes equity inflows, reinvested earnings and other capital, grew by 14 per cent to $81.04 billion during the last financial year. It is the highest in the last three years. FDI from Singapore in 2024-25 increased to $14.94 billion from $11.77 billion in 2023-24, according to the latest government data.

Singapore accounted for around 19 per cent of total inflows in 2024-25. Since 2018-19, Singapore has been the largest source of

such investments in India. In 2017-18, India attracted the maximum FDI from Mauritius. In the last fiscal, the country received $8.34 billion in foreign inflows from Mauritius. During 2024-25, Mauritius was followed by the US ($5.45 billion), the Netherlands ($4.62 billion), the UAE ($3.12 billion), Japan ($2.47 billion), Cyprus ($1.2 billion), the UK ($795 million), Germany ($469 million), and Cayman Islands ($371 million). According to experts, Singapore's position as a global financial hub, combined with strong bilateral ties and its role as a gateway for global private equity and venture capital, makes it a natural conduit for investments into India.

Rumki Majumdar, Economist, Deloitte India, said despite turmoil in the capital markets and uncertainties around trade, India has managed to attract huge investments, which are stable and long-term.

Double Tax Avoidance Agreement between the two nations helps all Singapore-based organisations to invest in India and reduce the total tax burden on income earned from India, Majumdar said.

Gross GST collections rise 16.4% to over Rs 2.01L cr

8 • PG | 122 • Sqcm | 41340 • AVE | 275K • Cir | Top Right

Hyderabad

Gross GST collections rise 16.4% to over Rs 2.01L cr

PNS ■ NEW DELHI

Gross GST collections rose 16.4 per cent to over Rs 2.01 lakh crore in May, as per government data released on Sunday.

This comes after a record high Goods and Services Tax (GST) collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore.

In May, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore.

In May, the gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess was at Rs 12,879 crore. In May, 2024, the mop up was Rs 1,72,739 crore.

Meanwhile, total refunds during the month fell 4 per cent to Rs 27,210 crore.

Net GST mop-up stood at about Rs 1.74 lakh crore, a 20.4 per cent year-on-year growth.

Deloitte India Partner M S Mani said the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17 per cent to 25 per cent, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6 per cent.

RARE EARTH MAGNETS IMPORT FROM CHINA

Auto industry seeks govt help in expediting approvals

PNS ■ NEW DELHI

The automobile industry has sought government support in expediting approvals from the Chinese government for importing rare earth magnets used in various applications, including passenger cars.

As per the industry sources, various domestic suppliers have already sought approval from the Chinese government through their local vendors in China.

However, no approvals have been granted so far, sources said. China controls over 90 per cent of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy.

The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets.

In Japan, Suzuki Motor has already suspended production of its Swift car because of China's curbs. Last week, Maruti Suzuki India Senior Executive Officer (Corporate Affairs) Rahul Bharti said China has asked for an end-user certificate, endorsed by the Indian government and approved by the Chinese government.

"So that process is on and industry is in discussion with the government," he stated.

Deloitte India Partner and Automotive Sector Leader Rajat Mahajan noted that the shortage is a major supply chain disruption especially for EVs as rare earth metals are used extensively in the electric motor which is a core component.

Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures.

From sidelines to centre stage: Women athletes redefine the future of sports

7 • PG | 458 • Sqcm | 155654 • AVE | 275K • Cir | Middle Left

Hyderabad • Chandigarh • Lucknow

From sidelines to centre stage: Women athletes redefine the future of sports

The next Summer Olympics in Los Angeles, in 2028, will have many firsts! The number of women athletes exceeds their male counterparts. There will be a full gender parity in all team events, while the number of women's football teams surpasses men's. There is another first! Kirsty Coventry, a Zimbabwean athlete, elected this year, takes up the mantle of the International Olympic Committee (IOC), becoming the first-ever woman to lead the Olympics in its 131-year history. In the Olympics, in terms of the number, women athletes scaled new heights from 2.2 per cent representation in 1900 in Paris to achieving gender parity in Paris again in 2024, a quarter and a century later. But, the journey remained fraught with multiple challenges. Lack of financial resources impacted the quality of training, facilities, and overall support available to female athletes (Blinde et al., 1993), and hampered the growth and sustainability of women's sports leagues and teams (Sartore & Cunningham, 2014). Potential brands often undervalued women's sports, considering it to be an arena of 'unproven returns'. There was, however, a significant shift in recent times when angel investors and venture capitalists came forward to explore the over-looked market and made use of the best available data, and content on digital/ social media. The emergence of Angel City FC in 2020 in the US National Women's Soccer League (NWSL), set a new precedent, when its all-female founding team 'inverted the accepted business model of sports franchise, moved their brand beyond the local base, to digital brand building'. Within the first three years, it could raise a market valuation of $250 million in 2024. Such experimental ventures remain not confined to Europe and the USA, but, in areas like the Middle East, where governments are increasingly directing resources towards grassroots initiatives designed to foster greater girls' participation in sports.

ARCHANA DATTA

In India, around 1200 companies invested a combined ₹526.14 crore in 2022-23 on CSR investments, nearly double compared to the previous financial year (₹291.75 crore), for promoting sports, including women's. However, many sports analysts believe that 'not many companies consider women's sports while choosing their CSR goals' (Goodera). Nevertheless, a 2024 survey (Service Monkey & Parity), found that 'women athletes are trusted influencers', the majority of sports fans (88 per cent) regard them as 'impactful role models' and almost 73 per cent said that they watch women's sports at least a few times a year, which is 81 per cent in case of men's sports, and an overwhelming majority think (92 per cent) that it is 'important' for girls to play while growing up. A 2023 report (Deloitte) highlighted that 85 per cent of women who played sports as children, and are now Fortune 500 CEOs, believed that the 'top skills they developed by playing sports helped them to succeed in their professional careers'. In 2024, global revenues for women's sports moved up $1.3 billion, with an impressive 300 per cent growth in just three years (Deloitte). Moreover, sponsorship deals for women's sports have also seen a 20 per cent year-over-year increase since 2020 (Sports United). 'In recent years, attendance, viewership and social engagement for women's sports have spiked, leading to long-overdue financial backing through investments and sponsorships…' said, the CEO and founder of SponsorUnited. Across all countries, 32 per cent of fans of women's sports say they are more likely to purchase products when a brand supports women's sports. While in 2022, there was a 30 per cent surge in the number of advertisements featuring women sports celebrities in India (TAM AdEx). The owner of the UP Warriors in the Women's Premier League (WPL) and the head of Capri Sports, were categorical that 'perception about women athletes as brand endorsers has transformed significantly because of changing consumer mindsets, and growing data-backed proof'. Now, this momentum requires a strategic roadmap that balances innovation with a focus on core business fundamentals for sustained growth and commercial success as well. Industries must move from a short-term return on investment (ROI) to a venture capital mindset driven by values, long-term vision, and a commitment to societal impact for the long-term health of women's sports.

Undeniably, digital space could boost the visibility of women in sports to about 18.5 per cent in 2022, marking a 2.53 per cent average annual increase. But, women sportspersons face a 'different scrutiny on digital space as audiences expectations are still deeply embedded in societal norms' and brand marketing strategies continue to focus more on 'traditional femininity'. A social media analysis during the 2018 Commonwealth Games, found that words like 'strong' and 'talented' were frequently used in the case of male athletes, while women athletes were labelled with terms like 'pretty' or 'girls'. A similar analysis of the online sports stories and images posted during the Rio Olympic Games found that men athletes were portrayed in 'active or competitive roles', while women athletes were frequently depicted in 'passive or aesthetically appealing ways'. Women athletes' Instagram posts on non-sport-related images receive significantly higher engagement. As a result, many high-profile women athletes adopt branding strategies that promote polished, heteronormative femininity, avoiding controversial political stances and thus limiting their abilities to challenge gendered perceptions in sports', argued a study on feminist neo-liberal marketing strategies. Women sportspersons also continue to face 'widespread, overlapping and grave forms of violence at all levels' (UN). Nearly 21 per cent of professional women athletes experienced sexual abuse as a child in sports, almost double the rate of male athletes (11 per cent). A 2021 study (World Athletics) found that 85 per cent of online abuse in the lead-up to and during the Tokyo Olympics was directed at women. But, sports bodies tend to focus more on curbing doping and match-fixing as sports integrity measures. In India, the prolonged protests by Olympic medal-winning women wrestlers exposed the ineptitude of such bodies.

In 2023, the UN Women and UNESCO outlined a 10-point 'Call to Action' for gender equality in and through sports, addressing issues like fair pay, media representation, and safeguarding standards. Countries must adopt it, and standardise procedures to strengthen the grievance redressal mechanisms of sports bodies with a strong legal framework, ensure survivor support and accountability, and also take technology companies and social media platforms on board to tackle online abuses. Governments, Corporations and media houses should all come together to create a level playing field with resources, exposure and voice to herald an era of equitable, safe and inclusive sports.

Auto sector seeks Government help for rare earth imports

PRESS TRUST OF INDIA ■ New Delhi

The automobile industry has sought government support in expediting approvals from the Chinese government for importing rare earth magnets used in various applications, including passenger cars.

As per the industry sources, various domestic suppliers have already sought approval from the Chinese government through their local vendors in China.

However, no approvals have been granted so far, sources said. China controls over 90 per cent of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy. The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets.

In Japan, Suzuki Motor has already suspended production of its Swift car because of China's curbs. Last week, Maruti Suzuki India Senior Executive Officer (Corporate Affairs) Rahul Bharti said China has asked for an end-user certificate, endorsed by the Indian government and approved by the Chinese government. "So that process is on and industry is in discussion with the government," he stated. Deloitte India Partner and Automotive Sector Leader Rajat Mahajan noted that the shortage is a major supply chain disruption especially for EVs as rare earth metals are used extensively in the electric motor which is a core component. Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures. "This has been an R&D topic for the automotive industry for a long time but till now other magnetic materials have not seen large scale commercial usage in applications like EV," he noted.

Also, there are not enough rare earth magnets to recycle at this point in time to satisfy the EV volumes, Mahajan said. It will not be easy for OEMs to suddenly change course on powertrain as well as on alternate material.

The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets

"This situation will hopefully get resolved via diplomatic channels, but if it continues then we may see a shift towards powertrains for large OEMs," he said. Icra Senior Vice President & Co-Group Head Corporate Ratings Srikumar Krishnamurthy noted that rare earth magnets are used for multiple applications in EVs — electric motors, regenerative braking systems, power steering etc.

Given that China accounts for around 90 per cent of the overall supply for rare earth magnets, the curb on export of the same by China can have material implications for the EV industry, he added.

Delhi

From sidelines to centre stage: Women athletes redefine the future of sports

The next Summer Olympics in Los Angeles, in 2028, will have many firsts! The number of women athletes exceeds their male counterparts. There will be a full gender parity in all team events, while the number of women's football teams surpasses men's. There is another first! Kirsty Coventry, a Zimbabwean athlete, elected this year, takes up the mantle of the International Olympic Committee (IOC), becoming the first-ever woman to lead the Olympics in its 131-year history. In the Olympics, in terms of the number, women athletes scaled new heights from 2.2 per cent representation in 1900 in Paris to achieving gender parity in Paris again in 2024, a quarter and a century later. But, the journey remained fraught with multiple challenges. Lack of financial resources impacted the quality of training, facilities, and overall support available to female athletes (Blinde et al., 1993), and hampered the growth and sustainability of women's sports leagues and teams (Sartore & Cunningham, 2014). Potential brands often undervalued women's sports, considering it to be an arena of 'unproven returns'. There was, however, a significant shift in recent times when angel investors and venture capitalists came forward to explore the over-looked market and made use of the best available data, and content on digital/ social media. The emergence of Angel City FC in 2020 in the US National Women's Soccer League (NWSL), set a new precedent, when its all-female founding team 'inverted the accepted business model of sports franchise, moved their brand beyond the local base, to digital brand building'. Within the first three years, it could raise a market valuation of $250 million in 2024. Such experimental ventures remain not confined to Europe and the USA, but, in areas like the Middle East, where governments are increasingly directing resources towards grassroots initiatives designed to foster greater girls' participation in sports.

ARCHANA DATTA

In India, around 1200 companies invested a combined ₹526.14 crore in 2022-23 on CSR investments, nearly double compared to the previous financial year (₹291.75 crore), for promoting sports, including women's. However, many sports analysts believe that 'not many companies consider women's sports while choosing their CSR goals' (Goodera). Nevertheless, a 2024 survey (Service Monkey & Parity), found that 'women athletes are trusted influencers', the majority of sports fans (88 per cent) regard them as 'impactful role models' and almost 73 per cent said that they watch women's sports at least a few times a year, which is 81 per cent in case of men's sports, and an overwhelming majority think (92 per cent) that it is 'important' for girls to play while growing up. A 2023 report (Deloitte) highlighted that 85 per cent of women who played sports as children, and are now Fortune 500 CEOs, believed that the 'top skills they developed by playing sports helped them to succeed in their professional careers'. In 2024, global revenues for women's sports moved up $1.3 billion, with an impressive 300 per cent growth in just three years (Deloitte). Moreover, sponsorship deals for women's sports have also seen a 20 per cent year-over-year increase since 2020 (Sports United). 'In recent years, attendance, viewership and social engagement for women's sports have spiked, leading to long-overdue financial backing through investments and sponsorships…' said, the CEO and founder of SponsorUnited. Across all countries, 32 per cent of fans of women's sports say they are more likely to purchase products when a brand supports women's sports. While in 2022, there was a 30 per cent surge in the number of advertisements featuring women sports celebrities in India (TAM AdEx). The owner of the UP Warriors in the Women's Premier League (WPL) and the head of Capri Sports, were categorical that 'perception about women athletes as brand endorsers has transformed significantly because of changing consumer mindsets, and growing data-backed proof'. Now, this momentum requires a strategic roadmap that balances innovation with a focus on core business fundamentals for sustained growth and commercial success as well. Industries must move from a short-term return on investment (ROI) to a venture capital mindset driven by values, long-term vision, and a commitment to societal impact for the long-term health of women's sports.

Undeniably, digital space could boost the visibility of women in sports to about 18.5 per cent in 2022, marking a 2.53 per cent average annual increase. But, women sportspersons face a 'different scrutiny on digital space as audiences expectations are still deeply embedded in societal norms' and brand marketing strategies continue to focus more on 'traditional femininity'. A social media analysis during the 2018 Commonwealth Games, found that words like 'strong' and 'talented' were frequently used in the case of male athletes, while women athletes were labelled with terms like 'pretty' or 'girls'. A similar analysis of the online sports stories and images posted during the Rio Olympic Games found that men athletes were portrayed in 'active or competitive roles', while women athletes were frequently depicted in 'passive or aesthetically appealing ways'. Women athletes' Instagram posts on non-sport-related images receive significantly higher engagement. As a result, many high-profile women athletes adopt branding strategies that promote polished, heteronormative femininity, avoiding controversial political stances and thus limiting their abilities to challenge gendered perceptions in sports', argued a study on feminist neo-liberal marketing strategies. Women sportspersons also continue to face 'widespread, overlapping and grave forms of violence at all levels' (UN). Nearly 21 per cent of professional women athletes experienced sexual abuse as a child in sports, almost double the rate of male athletes (11 per cent). A 2021 study (World Athletics) found that 85 per cent of online abuse in the lead-up to and during the Tokyo Olympics was directed at women. But, sports bodies tend to focus more on curbing doping and match-fixing as sports integrity measures. In India, the prolonged protests by Olympic medal-winning women wrestlers exposed the ineptitude of such bodies.

In 2023, the UN Women and UNESCO outlined a 10-point 'Call to Action' for gender equality in and through sports, addressing issues like fair pay, media representation, and safeguarding standards. Countries must adopt it, and standardise procedures to strengthen the grievance redressal mechanisms of sports bodies with a strong legal framework, ensure survivor support and accountability, and also take technology companies and social media platforms on board to tackle online abuses. Governments, Corporations and media houses should all come together to create a level playing field with resources, exposure and voice to herald an era of equitable, safe and inclusive sports.

Delhi

GST collections stay above ₹2 lakh cr in May

Gross GST revenue up 16.4%; robust mop-up for 2nd month in a row; double-digit growth in several large states

DIPAK MONDAL @ New Delhi

IF May GST collection—tax collected for April transactions—are anything to go by, India's economy started the financial year with a bang despite the disruptions caused by US president Donald Trump's threat of reciprocal tariffs.

Gross monthly GST collections in May rose by 16.4% to touch ₹2.01 lakh crore—only the third time since the indirect tax regime came into force in July 2017. Gross domestic revenue rose by 14% to ₹1.5 lakh crore, while revenue from imports increased by 25% to ₹51,000 crore.

Net GST revenues (after deducting refunds from gross collections) showed even better buoyancy as the same increased by 20.4% to ₹1.74 lakh crore. Total refunds contracted by 4% year-on-year.

This is the second month in a row when gross collections witnessed double-digit growth. In April, gross GST collections hit an all-time high of ₹2.36 lakh crore in April 2025, 12.6% higher than the collection of ₹2.10 lakh crore in April 2024. This augurs well for the country as FY25 showed GST revenue collections growth slowing down to single digit numbers.

"A 16% growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11 to 12%. If the growth continues in this range for next couple of months, it might provide the cushion for the Government to look at rate rationalisation on which a lot of work has already been done," says Pratik Jain, partner, Price Waterhouse & Co LLP.

Meanwhile, M S Mani, partner, Deloitte India, says a 25% higher GST revenue from imports indicates that imports have accelerated despite recent tariff headwinds.

Several large states, including those in the South, have seen high double-digit growth. Collections from Maharashtra rose by 17%, Karnataka by 20%, Tamil Nadu by 25% and Kerala by 24%. Bihar (23%) and Delhi (58%) and West Bengal (18%) are few other notable good performers during the month. Gujarat (4%), Telangana (6%) and Andhra Pradesh (-2%) were few of the laggards.

According to Deloitte's Mani, the wide variations in GST collections growth across states require a thorough analysis across the sectors that are important in each state.

"The average growth across the country does not appear to be uniformly reflected across states, possibly due to sectoral or seasonal factors which require a deeper data-based analysis," he argues.

GROSS GST REVENUE

	May '24	May '25
CGST	32,409	35,434
SGST	40,265	43,902
IGST	87,781	1,08,836
CESS	12,284	12,879
Total	1,72,739	2,01,050

(Figures in ₹ crore)

Chennai

Gross GST collections in May rise to Rs 2.01L-cr; double-digit growth in TN

NEW DELHI: Gross GST collections rose 16.4 per cent to over Rs 2.01 lakh crore in May, as per government data released on Sunday.

This comes after a record high Goods and Services Tax (GST) collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore.

In May, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore.

In May, the gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess was at Rs 12,879 crore.

In May, 2024, the mop up was Rs 1,72,739 crore.

Meanwhile, total refunds during the month fell 4 per cent to Rs 27,210 crore.

Net GST mop-up stood at about Rs 1.74 lakh crore, a 20.4 per cent year-on-year growth.

This comes after a record high Goods and Services Tax collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore

Deloitte India Partner MS Mani said the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17 per cent to 25 per cent, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6 per cent.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10 per cent.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said.

Singapore remains India's top FDI source for 7th straight year

10 • PG | 330 • Sqcm | 59437 • AVE | 225K • Cir | Middle Right

Delhi

Singapore remains India's top FDI source for 7th straight year

STATESMAN NEWS SERVICE
NEW DELHI, 1 JUNE

Singapore remained India's top FDI source for the 7th straight year in FY 2024–25, with inflows rising to $14.94 billion, up from $11.77 billion in FY24.

Singapore has retained its position as the largest source of foreign direct investment (FDI) into India for the seventh consecutive year, with investments surging to $14.94 billion in the financial year 2024–25, according to the latest government data.

The rise in inflows from Singapore represents a significant jump from $11.77 billion in FY24, reaffirming its importance as a key investment partner for India. Singapore accounted for approximately 19 per cent of India's total FDI inflows during the year.

India attracted a total of $50 billion in overseas equity inflows in 2024–25, marking a 13 per cent increase over the previous year. When combined with reinvested earnings and other capital, the total FDI reached $81.04 billion, reflecting a 14 per cent year-on-year growth—the highest in the past three years.

Following Singapore, the top contributors of FDI into India in 2024–25 included Mauritius: $8.34 billion, United States: $5.45 billion, Netherlands: $4.62 billion, United Arab Emirates: $3.12 billion, Japan: $2.47 billion, Cyprus: $1.2 billion, United Kingdom: $795 million, Germany: $469 million, Cayman Islands: $371 million.

This marks a continued shift from 2017–18, when Mauritius was the top source of FDI, before being overtaken by Singapore in 2018–19.

According to industry experts, Singapore's continued dominance in FDI inflows can be attributed to its status as a global financial hub, its strong bilateral ties with India, and its critical role as a gateway for global private equity and venture capital funds targeting Indian markets.

"Singapore offers a stable and efficient investment environment, which makes it an ideal conduit for global investors looking to access India's high-growth sectors," said a senior economist at a leading investment consultancy.

Bhubaneshwar

Focus on digital innovation in aluminum sector

STATESMAN NEWS SERVICE
BHUBANESWAR, 31 MAY:

Brijendra Pratap Singh, CMD, Nalco emphasized on the importance of embracing Industry 4.0 technologies to boost efficiency and competitiveness.

As the fourth largest economy, India is witnessing strong investment and infrastructure growth driving rapid expansion in the core and manufacturing sectors, he observed.

He was addressing a conference on Smart Mining and Manufacturing here on Friday with the theme Smart Aluminium: Driving Operational Excellence through Industry 4.0."

The event brought together key stakeholders from industry, academia, and technology sectors to explore how digital innovation is reshaping manufacturing and industrial operations.

Jagdish Arora, Director(P&T), described Industry 4. as a revolution driven by advancements in automation, AI, and IoT that enable transformative value creation across manufacturing and industrial operations.

Rajiv Kumar, CEO of Vedanta Aluminium Limited, Sarajit Jha, Chief – Business Transformation & Digital Solutions, Tata Steel also addressed the conference.

Industry leaders from SAIL, Tata Steel, Vedanta, Deloitte India, EY-Parthenon, and McKinsey & Company participated as distinguished speakers at the conference, contributing to discussions on emerging trends and strategies in the Industry 4.0 landscape.

The conference provided a collaborative platform to exchange ideas, showcase emerging technologies, and discuss strategies for accelerating Industry 4.0 adoption, featuring tech sessions and panel discussions on AI and data analytics.

Invest UP hosts conclave to propel GCC investments in Uttar Pradesh

STATESMAN NEWS SERVICE
LUCKNOW, 10 JUNE

Invest UP, the state's premier investment promotion agency, organised a high-profile conclave to unveil and promote the 'Global Capability Centres (GCC) Policy 2024.'

The event held here on Tuesday brought together top tech industry leaders, global investors, policymakers, and multinational corporations to discuss Uttar Pradesh's emergence as a GCC powerhouse.

Inaugurating the conclave, UP Chief Secretary Manoj Kumar Singh while welcoming the delegates, highlighted the Uttar Pradesh's dynamic economic transformation into a leading investment destination.

He credited the state's investor-friendly policies, modern infrastructure, and proactive governance for creating a robust industrial ecosystem. With Noida–Greater Noida emerging as prominent Global Capability Center (GCC) hubs, tier-II and III cities are also gaining momentum. Jhansi, in Bundelkhand, is being developed as a future industrial hub, supported by a substantial land bank.

UP CS noted that UP now ranks among the top choices for office and industrial setups, thanks to competitive incentives and a supportive business environment. Plans are underway to develop a Noida-like city in Bundelkhand, further decentralising growth and boosting regional development.

Praising Invest UP's efforts, he encouraged stakeholders to contribute suggestions for continuous policy improvement. Reflecting on the state's progress, he remarked: "I have witnessed UP's journey—from Delhi to Davos. The transformation in infrastructure, industry, and policy is remarkable. Businesses are increasingly shifting to emerging urban centres. Few global economies possess the potential to double their size in such a short span. By strengthening the agriculture sector, we can further multiply the state's GDP and ensure inclusive, sustainable growth."

During the conclave, discussions focused on four key areas: real estate and commercial space, including CREDAI and building by-laws; availability of a skilled talent pool supported by quality colleges and technical institutes; the overall ecosystem; and infrastructure improvements.

Around 20 companies participated, including SRK Gamechangers, Standard Chartered Bank, Sw-India, Takyon Networks Pvt Ltd, TCS, Trident, Usinfoundation, Velocis Systems Pvt Ltd, Deloitte, US India, HCL, Microsoft, TCS, Amhek, SETI, Venture Lift, Ivani, Hi-Tech Medics, EV Booth, Positroi, KNP, Biozenta, JBJM group and Genrobotics.

Several participating companies pledged to invest in Global Capability Centres (GCCs) in Uttar Pradesh in the coming months. A roadmap and action plan for future GCC conclaves were also discussed, with similar events planned in Bengaluru, Chennai, and Hyderabad. Additionally, international think tanks from the US and Europe will be engaged for roadshows in global cities to attract further investment.Mr. Varun Ramanan, Microsoft India, highlighted the company's expansion from Hyderabad to Noida and praised UP's seamless support in approvals, land allocation, and subsidies. Mr. Amit Verma, Regional Head – North India, NASSCOM, provided insights on Uttar Pradesh's evolving GCC ecosystem, commending the state's policies and talent development efforts.

Mr. Amitabh Tiwari, Principal Consultant and Centre Head, TCS Lucknow, acknowledged the state's support in facilitating operations, praising UP's advancing infrastructure, skilled talent, and improving urban ecosystem.

Mr. Nirmaljeet Singh Kalsi, Board Member, Trident Group said that they have plan to establish a GCC in Noida further underscores UP's commitment to becoming the most preferred destination by providing all necessary facilities and infrastructure for industries and the IT/ITeS sector.

The conclave featured panel discussions and investor interactions, reaffirming Uttar Pradesh's commitment to fostering innovation, business excellence, and global investments in GCCs.

Bhubaneshwar

Auto sector seeks govt help for rare earth magnets import from China

PRESS TRUST OF INDIA

New Delhi, June 8: The automobile industry has sought government support in expediting approvals from the Chinese government for importing rare earth magnets used in various applications, including passenger cars.

As per the industry sources, various domestic suppliers have already sought approval from the Chinese government through their local vendors in China.

However, no approvals have been granted so far, sources said. China controls over 90 per cent of global processing capacity for the magnets, used across multiple sectors including automobiles, home appliances and clean energy.

The Chinese government has put restrictions, with effect from April 4, mandating special export licences for seven rare earth elements and related magnets.

"In Japan, Suzuki Motor has already suspended production of its Swift car because of China's curbs. Last week, Maruti Suzuki India Senior Executive Officer, Rahul Bharti said China has asked for an end-user certificate, endorsed by the Indian government and approved by the Chinese government. Hence industry is in discussion with the government," he stated.

Deloitte India Partner and Automotive Sector Leader Rajat Mahajan noted that the shortage is a major supply chain disruption, especially for EVs, as rare earth metals are used extensively in the electric motor as a core component.

Rare earth magnets have high magnetic energy storage capacity with low coercivity at high operating temperatures.

"This has been an R&D topic for the automotive industry for a long time but till now other magnetic materials have not seen large scale commercial usage in applications like EV," he noted.

Also, there are not enough rare earth magnets to recycle at this point in time to satisfy the EV volumes, Mahajan said. It will not be easy for OEMs to suddenly change course on powertrain as well as on alternate material.

Rare earth magnets are used for multiple applications in EVs - electric motors, regenerative braking systems, power steering etc. China accounts almost 90 per cent of the overall supply for rare earth magnets; the curb on export of the same by China can have material implications on the EV industry

SRIKUMAR KRISHNAMURTHY | ICRA SENIOR VP

"This situation will hopefully get resolved via diplomatic channels, but if it continues then we may see a shift towards powertrains for large OEMs," he said.

ICRA Senior Vice President, Srikumar Krishnamurthy noted that rare earth magnets are used for multiple applications in EVs - electric motors, regenerative braking systems, power steering etc. Given that China accounts for around 90 per cent of the overall supply for rare earth magnets, the curb on export of the same by China can have material implications for the EV industry, he added.

The implications could include inflationary pressures (led by higher cost for rare earth magnets against the backdrop of shortage) or even disruption in production schedules in absence of a seamless supply of the same.

Bengaluru

Several countries interested in India's forensic accounting standards: ICAI President

The Institute of Chartered Accountants of India (ICAI), a statutory body for the regulating and developing the profession of chartered accountancy in India, has recently taken up a number of high-profile financial irregularities cases including IndusInd Bank and Gensol Engineering and Byju's in the past. In conversation with *DH*'s **Gyanendra Keshri**, ICAI President CA **Charanjot Singh Nanda** talks about these cases and initiatives taken by the accountancy regulatory body to make the system robust. Edited excerpts.

Several financial frauds and insider trading cases have been reported in the recent months. What is the update in IndusInd Bank and Gensol Engineering cases?

ICAI constituted Financial Reporting Review Board (FRRB) in July 2002 to strengthen the financial reporting practices and to improve audit quality in India.The Board reviews the general-purpose financial statements of various enterprises and auditors' report thereon with a view to determine compliance with the generally accepted accounting principles, the disclosure requirements as well as reporting obligation applicable to them.

In the matter of IndusInd Bank Limited, the Board at its 148th meeting held on May 29, 2025 has decided to undertake the review of the financial statements and the statutory auditor's reports of the Bank for the financial years 2023–24 and 2024–25.

FRRB is also reviewing the Gensol Engineering Limited and Blu-Smart Mobility Private Limited for the financial year 2023-24 as a special case.

The Board has a comprehensive three-tier review process, to conduct the review of General-Purpose Financial Statements of a selected enterprise. This multi-level approach involves Technical Reviewers (TRs), the Financial Reporting Review Groups (FRRGs) and the Board.

Based on the review, if FRRB finds any material non-compliance affecting true and fair view of financial statements, the case is then referred to the Director (Discipline) of the Institute for further investigation and informs such deficiencies to the regulatory body relevant to the enterprise for appropriate action against the concerned companies.

FRRB has earlier undertaken the review of the financial statements of Think and Learn Private Ltd (Byju's) and has referred the case to the Director (Discipline) of ICAI.

Some of these issues have come up through the disclosure of the respective companies. What needs to be done to prevent such financial irregularities?

Our purpose is to create value by advising the best practices. These have been the issues which should not be repeated. Those who have done wrong must be punished. These will become case studies for us and for the forthcoming generations.

We have developed best Forensic Accounting and Investigation Standards in the world, these standards are also continuously updated to align with the latest technological advancements and global best practices. These standards serve as a robust benchmark for professionals undertaking forensic engagements, significantly enhancing the quality, consistency and credibility of their work. Designed for adaptability, our standards are well-suited for wider adoption across jurisdictions. Several international accounting bodies have expressed keen interest in adopting and implementing our forensic accounting standards.

Charanjot Singh Nanda

Recently, ICAI has also entered into an MoU with Rashtriya Raksha University (RRU), Gandhinagar (an institution under the Ministry of Home Affairs)for co-developing cutting-edge educational content, joint certifications in areas like Forensic Accounting, Cybersecurity, Systems Audit, Blockchain, Big Data and Robotic Process Automation (RPA). This collaboration marks a significant expansion of ICAI's role in forensic accounting and financial investigation and positions India at the forefront of global efforts to tackle complex economic crimes through knowledge-sharing and skill development.Further, ICAI has also renewed its MoU with the National Forensic Sciences University (NFSU), another premier institution under the Ministry of Home Affairs. These dual partnerships reinforce ICAI's commitment to develop a robust national ecosystem for forensic investigation and financial crime detection.

There have been talks about creation of a big Indian accounting firm in line with the Big Four - Deloitte, PwC, EY, and KPMG. What is the progress?

To support the growth of Indian CA firms and emphasise the strategic importance of aggregation for enhancing operational efficiency, global competitiveness and professional growth, ICAI established the Committee for Aggregation of CA Firms (CACAF) to move closer to the vision of our Hon'ble Prime Minister for having 'Big 4' Indian Firm.

ICAI has revised the Guidelines for Merger and Demerger of CA Firmsto streamline the guidelines both at policy and procedural levels to mitigate the practical impediments that previously hampered CA firms to actively participate in mergers, thereby fostering ease of doing practice within the profession. The revised guidelines aim to encourage firms to explore strategic mergers which can significantly enhance their market presence, operational efficiency, among others.

Besides this, Guidelines for Aggregation of LLPs have also been notified in the Gazette of India in the month of Jan 2025. These guidelines provide an opportunity for an LLP, Indian CA Firm to be a partner with another LLP, a CA Firm. This particular concept among LLPs can serve as a vital tool for strategic growth. By these guidelines, firms can significantly expand their capabilities, broaden their market presence, and achieve substantial operational efficiencies. This strategic move allows them to leverage combined resources, diversify service offerings, and enhance competitive advantage, ultimately driving long-term success and sustainability in an increasingly competitive environment.

Recently, the Council also approved Draft Guidelines for Overseas Network, the same will be released shortly for the Public Exposure for 21 days. These guidelines aim to establish a structured and regulated pathway for networking and collaboration.

This initiative is designed to foster global connectivity, enhance professional opportunities for Indian CA firms, uphold the integrity and quality of services delivered as well as to support the evolving needs of the profession in an interconnected world.

Gross GST kitty rise 16.4 pc

NEW DELHI: Gross GST collections rose 16.4 per cent to over Rs 2.01 lakh crore in May, as per government data released on Sunday. This comes after a record high GST collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore. In May, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore. P8

Gross GST collections rise 16.4 pc to over ₹2.01 lakh cr in May

NEW DELHI, JUN 1

GROSS GST collections rose 16.4 per cent to over Rs 2.01 lakh crore in May, as per government data released on Sunday.

This comes after a record high Goods and Services Tax (GST) collection in April, when the revenues touched an all-time high of Rs 2.37 lakh crore.

In May, gross revenues from domestic transactions rose 13.7 per cent to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2 per cent to Rs 51,266 crore.

In May, the gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess was at Rs 12,879 crore.

In May, 2024, the mop up was Rs 1,72,739 crore.

Meanwhile, total refunds during the month fell 4 per cent to Rs 27,210 crore.

Net GST mop-up stood at about Rs 1.74 lakh crore, a 20.4 per cent year-on-year growth.

Deloitte India Partner M S Mani said the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17 per cent to 25 per cent, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6 per cent.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10 per cent.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said. - PTI

NALCO hosts 'Smart Mining' conference to drive digital innovation in aluminium sector

PBD BUREAU

BHUBANESWAR, MAY 31

NATIONAL Aluminium Company Limited (NALCO) hosted a high-level conference on Smart Mining & Manufacturing in Bhubaneswar on Friday, centered around the theme: "Smart Aluminium: Driving Operational Excellence through Industry 4.0." The event brought together key stakeholders from industry, academia, and the technology sector to explore how digital innovation is transforming manufacturing and industrial processes in the aluminium industry.

Inaugurating the conference, NALCO Chairman and Managing Director, Brijendra Pratap Singh, underlined the importance of adopting Industry 4.0 technologies to enhance operational efficiency and global competitiveness. He also emphasized the enabling role of progressive government initiatives such as Make in India and support for start-ups in promoting self-reliance and economic growth. "India, as the world's fourth-largest economy, is witnessing robust investments in infrastructure and manufacturing, accelerating growth in core industrial sectors," he said.

Delivering the welcome address, Jagdish Arora, Director (P&T), described Industry 4.0 as a technological revolution powered by automation, Artificial Intelligence (AI), and the Internet of Things (IoT), which is enabling transformative value creation across the manufacturing ecosystem.

The event featured prominent industry voices including Rajiv Kumar, CEO of Vedanta Aluminium Limited, who graced the occasion as the Guest of Honour. Sarajit Jha, Chief – Business Transformation & Digital Solutions, Tata Steel, joined virtually and delivered a keynote address focused on the digital evolution in heavy industries.

Senior NALCO executives including Pankaj Kumar Sharma, Director (Production), and Dr. Tapas Kumar Pattanayak, Director (HR), also shared strategic insights during the conference.

Distinguished speakers and experts from leading organizations such as SAIL, Tata Steel, Vedanta, Deloitte India, EY-Parthenon, and McKinsey & Company participated in discussions on emerging trends, challenges, and strategies for Industry 4.0 integration.

The conference served as a dynamic platform for collaboration, featuring technical sessions and panel discussions on AI, data analytics, and smart technologies. It attracted participation from technocrats, researchers, policymakers, and delegates from the metals and allied sectors, who exchanged ideas and shared technological expertise to accelerate the digital transformation of the aluminium industry.

Goa

GST collections above Rs 2 lakh cr for second straight month

PTI, NEW DELHI: Gross GST collections remained above the Rs 2 trillion mark for the second month in a row, rising 16.4% in May to over Rs 2.01 lakh crore.

Goods and Services Tax (GST) collection had touched a record high of Rs 2.37 lakh crore in April. In May, 2024, the mop up was Rs 1,72,739 crore.

In May, 2025, gross revenues from domestic transactions rose 13.7% to about Rs 1.50 lakh crore, while GST revenue from imports grew 25.2% to Rs 51,266 crore. Total gross GST revenues stood at Rs 2,01,050 crore in May, 2025.

Gross Central GST revenues stood at Rs 35,434 crore, State GST revenues at Rs 43,902 crore and Integrated GST at about Rs 1.09 lakh crore. Revenues from Cess was at Rs 12,879 crore.

Total refunds issued during the month dipped 4% to Rs 27,210 crore.

Net GST mop-up in May stood at about Rs 1.74 lakh crore, a 20.4% year-on-year growth.

Deloitte India Partner M S Mani said the wide variations in the growth of GST collections across states require a thorough analysis across the sectors that are important in each state.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis

— M S Mani, *Deloitte India Partner*

While large states like Maharashtra, West Bengal, Karnataka and Tamil Nadu have reported collection increases of 17% to 25%, similar large states like Gujarat, Andhra Pradesh and Telangana have shown increases of up to 6%.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10%.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said.

Price Waterhouse & Co LLP Partner Pratik Jain said 16% growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11 to 12%.

"If the growth continues in this range for the next couple of months, it might provide the cushion for the government to look at rate rationalisation on which a lot of work has already been done," Jain said.

Some states like Madhya Pradesh, Haryana, Punjab and Rajasthan have shown median increases of 10 per cent.

"Hence, the average growth across the country does not appear to be uniformly reflected across states possibly due to sectoral or seasonal factors which require a deeper data based analysis," Mani said.

Price Waterhouse & Co LLP Partner Pratik Jain said 16 per cent growth in GST collections in the month shows a renewed upward momentum after a few months of growth in the range of 11 to 12 per cent.

"If the growth continues in this range for the next couple of months, it might provide the cushion for the government to look at rate rationalisation on which a lot of work has already been done," Jain said.

EY India Tax Partner Saurabh Agarwal said looking ahead, we might see similar GST collection numbers with slight increases in June because of ongoing geopolitical tensions across the globe.

Tax Connect Advisory Services LLP Partner Vivek Jalan said with an approx 10 per cent growth in domestic GST revenue and 73 per cent growth in import GST revenues, it is very clear that this month's growth in GST revenue is import driven rather than domestic consumption driven.

"This coupled with the fact that exports refunds are not growing correspondingly, reflect the fact that import growth far exceeds export growth," Jalan added.

Chandigarh

Shoolini University announces 100 percent fee waiver for Himachal students with over 90 percent marks

DINESH AGARWAL
SHIMLA, JUNE 3

India's leading private university, Shoolini University, Solan, which provides world class education, today announced 100 percent fee waiver for Himachal students securing over 90 percent marks in the qualifying examinations.

Chancellor Prof. P.K. Khosla, while addressing media persons here today, said, "Reinforcing its dedication to regional empowerment, Shoolini University gives special preference to students from Himachal, opening up world-class opportunities for local youth. We would be offering 100 percent fee waiver for Himachal students who secure over 90 percent marks in qualifying exams to encourage bright students to get world class education".With a progressive curriculum, state-of-the-art infrastructure, and international partnerships, the university offers a holistic education that prepares students to thrive in a globalised world.

He said, "Shoolini's excellence has been recognised globally. It has been ranked the No.1 Private University in India by both the Times Higher Education (THE) World University Rankings 2024 and QS World University Rankings 2025. Climbing 200 positions in the QS rankings to reach global rank 587, Shoolini is now the highest-ranked Indian private university ever. It also leads all private institutions in India for Research Quality and International Outlook in THE rankings.

In addition to global recognition, Shoolini continues to shine on the national stage. The university ranks among India's top 15 institutions (including government universities) and holds an A+ NAAC accreditation with an impressive CGPA of 3.33. It is also a national leader in patent filings, with over 1,500 patents to its credit and an H-index exceeding 115—among the highest for young Indian universities, said Prof. Khosla.

The university is known for its 100 percent placement record in programs like MBA, BTech (CSE), Hotel Management and Media and Communications. Renowned companies such as IBM, Deloitte, HUL, Accenture, Genpact, and Cipla regularly recruit from its talent pool.

With over 250 international collaborations across 28 countries, Shoolini offers dual-degree programs with global institutions like the University of Melbourne and Royal Holloway, University of London, along with study abroad pathways, student exchanges, and global internships, added Prof. Khosla.

AIFF chief Chaubey denies corruption claims

19 • PG | 321 • Sqcm | 969137 • AVE | 893.04K • Cir | Middle Center

Chandigarh • Delhi

AIFF chief Chaubey denies corruption claims

TRIBUNE NEWS SERVICE

NEW DELHI, JUNE 13

All India Football Federation (AIFF) president Kalyan Chaubey was in a firefighting mode. Cornered by one and all including former India captain Bhaichung Bhutia for the state of Indian football, Chaubey denied allegations of corruption and addressed the pending issue of Indian coach Manolo Marquez's continuation. Further, he also informed that the federation is in contact with 33 foreign based players of Indian origin, who are open to the idea of representing India should the laws get changed.

This was only three day after India team's lame 0-1 loss against the lesser ranked opponents Hong Kong in the AFC Asian Cup qualifiers.

Kalyan Chaubey

"I have received several calls in the last few days asking me whether the coach will continue or leave. We have an executive committee meeting on June 29, where we will have a full discussion on this," Chaubey said.

Importantly, he has disclosed that the AIFF was in contact with several OCI players. "The AIFF is in contact with the 33 players who are eligible for the OCI card. Some of them have already received the card and AIFF is helping others to get them. We are in constant dialogue with the government for the necessary approvals," the president said.

When pressed further, Chaubey, who is also the Indian Olympic Association joint secretary, hinted the approvals may take time

"As I had mentioned, a systematic change is not possible overnight. It is a process. I am also trying. We had meetings with several stakeholders. When I say we have contacted 33 players across the world, do you think it can be done in five or seven days?" he explained.

Targets Bhutia

Chaubey also made sure to hit back at former India captain and striker Bhaichung Bhutia, who had criticized the AIFF president for the sorry state of Indian football, alleging that there was rampant corruption in the federation.

"We have been audited by the CAG, by Deloitte, by FIFA and also by our external auditors. If there is any corruption, I am sure it would have been red flagged. There are several petitions by 3 or four members, who have either lost elections against my team or were part of the AIFF and are not today and they are party to all of this," Chaubey said.

"He is a very successful player and we all respect him as he was the best striker India had. He was also an advisor to the AIFF president with a monthly remuneration of 1.5 lakh. He also sits on the EC as an imminent player. I mentioned we had at least 11 meetings and he is there to stop the corruption and was allowed to raise issues," he added.

Delhi

BIG 4 AND DOMESTIC

Satyam, Kingfisher, PNB to Jet: How auditors failed Indian investors

BIG 4 & DOMESTIC

Satyam, Kingfisher, PNB to Jet: How auditors failed Indian investors

CONTACT REPORT

Serious—resulting in bans from financial auditing.

The others don't escape scrutiny either. In the Infrastructure Leasing & Financial Services (IL&FS) default, one of the country's biggest financial meltdowns, Deloitte was the statutory auditor for several group companies, but didn't flag growing liabilities. The company continued to get clean audits even as its debt piled up. ICT and Deloitte also featured in the National Stock Exchange (NSE) co-location scandal, where brokerage firms allegedly got unfair access to trading systems. Their audits didn't catch what regulators later found deeply problematic.

KPMG-linked BSR & Associates came under fire in 2023 for its role in auditing Coffee Day Enterprises. The National Financial Reporting Authority (NFRA) fined the firm Rs 10 crore and barred two partners—Aravind Maiya and Amit Somani—for 10 and 8 years, respectively. The audit, conducted in financial year 2018-19 (FY19), failed to raise questions even when significant intercompany loans and circular transactions were clearly present. NFRA's formal order came in August 2024.

Failures aren't confined to global networks. Indian firms, too, have left a trail of questionable sign-offs.

Take ABG Shipyard. The company allegedly defrauded banks of over Rs 22,000 crore. Its auditor, Nisar & Kumar, didn't report misuse of funds or shady related-party transactions. It took a forensic review by Ernst & Young in 2019 to finally unravel the wholesness.

In Dewan Housing Finance Corporation Limited (DHFL)'s case, where the fraud is pegged at Rs 34,000 crore, auditors Krishna Bihari Chaturvedi and Kashinath Chaturvedi failed to detect glaring misstatements. NFRA imposed a Rs 1 lakh fine on each and barred them from practice for a year in a June 2024 order.

For Coffee Day's financial year 2019-20 (FY20) audit, Venkatesh & Co., replaced BSR but failed in a different way. The firm did not even obtain a no-objection certificate (NOC) from the previous auditor, breaching Institute of Chartered Accountants of India (ICAI) norms. It also overlooked red flags despite being aware of an investigative report outlining fund diversion. NFRA's order, dated 30 October 2024, fined the firm Rs 2 crore and barred two partners for up to 10 years.

Ricoh India's downfall also had auditors at its centre. From 2012 to 2015, Sahni Nararajan & Bahl (SNB) certified financials that later turned out to be filled with manipulated revenues and unrecorded liabilities. After they resigned, BSR & Co. stepped in, but they too couldn't fully uncover what later investigations showed: losses exceeding Rs 1,100 crore. SEBI held Ricoh executives responsible but the audit trail raised troubling questions about both firms' conduct.

Then came the Punjab National Bank (PNB) scam. It involved over Rs 11,000 crore in fraudulent Letters of Undertaking (LoUs) issued by rogue employees to Nirav Modi-linked entities. While no Big Four was involved, what stands out is that this scam operated beneath multiple layers of audit—internal audits, statutory audits, concurrent audits, and even Reserve Bank of India (RBI) inspections—yet went unnoticed. The real-time integration between the SWIFT (Society for Worldwide Interbank Financial Telecommunication) messaging system and the bank's core banking systems was missing, and so were any red flags.

Kingfisher Airlines is another familiar name. The company defaulted on over Rs 9,000 crore in loans, while its auditor—BK Ramadhyani & Co. LLP—signed off on statements that kept calling it a going concern. Fund diversion, mounting losses, and shell companies tied to the promoter? None of that made it into the audits. In 2019, the Serious Fraud Investigation Office (SFIO) called for the prosecution of the firm, and ICAI began disciplinary action, but no permanent penalty has followed.

Jet Airways, too, followed a disturbingly similar pattern. Its finances looked stable on paper, but the company collapsed under a Rs 9,000-crore loan burden. The same audit firm—BK Ramadhyani & Co.—certified Jet's accounts without flagging unusual transactions or inflated expenses. A forensic audit by Ernst & Young later found Rs 3,000 crore in suspect payments, many linked to entities connected to Naresh Goyal's family. This led to a First Information Report (FIR) filed by the Central Bureau of Investigation (CBI) in 2023. EFO and ICAI probes are still open.

Each of these cases—Satyam, IL&FS, DHFL, Ricoh, Coffee Day, ABG Shipyard, Kingfisher, Jet Airways, and even Punjab National Bank—shows a pattern: audits signed without scrutiny, irregularities left unquestioned, and, when exposed, consequences that came too late.

Clean audit reports were relied on by banks, regulators, and investors. When those reports fail, trust in the system collapses. And while some firms and partners have been penalised, others continue with little consequence. The assumption that an audit is a stamp of integrity is clearly under strain. If the very watchdogs miss the bark—or choose not to hear it—it's not just companies that fail. The whole architecture of oversight begins to look hollow.

Kolkata

Women bag 35 pc of job offers in 2025 campus placements, says JECRC University

JAIPUR, JUNE 14/--/ Around 35 per cent of all job offers were secured by female students at the 2025 campus placement drive, JECRC University said on Saturday.

Over 2,230 students got job offers in 2025 campus placement and more than 876 students secured annual packages exceeding Rs 7 lakh per annum, JECRC said in a release.

"The highest package touched an impressive Rs 33 lakh per annum, offered by a global tech major," it added.

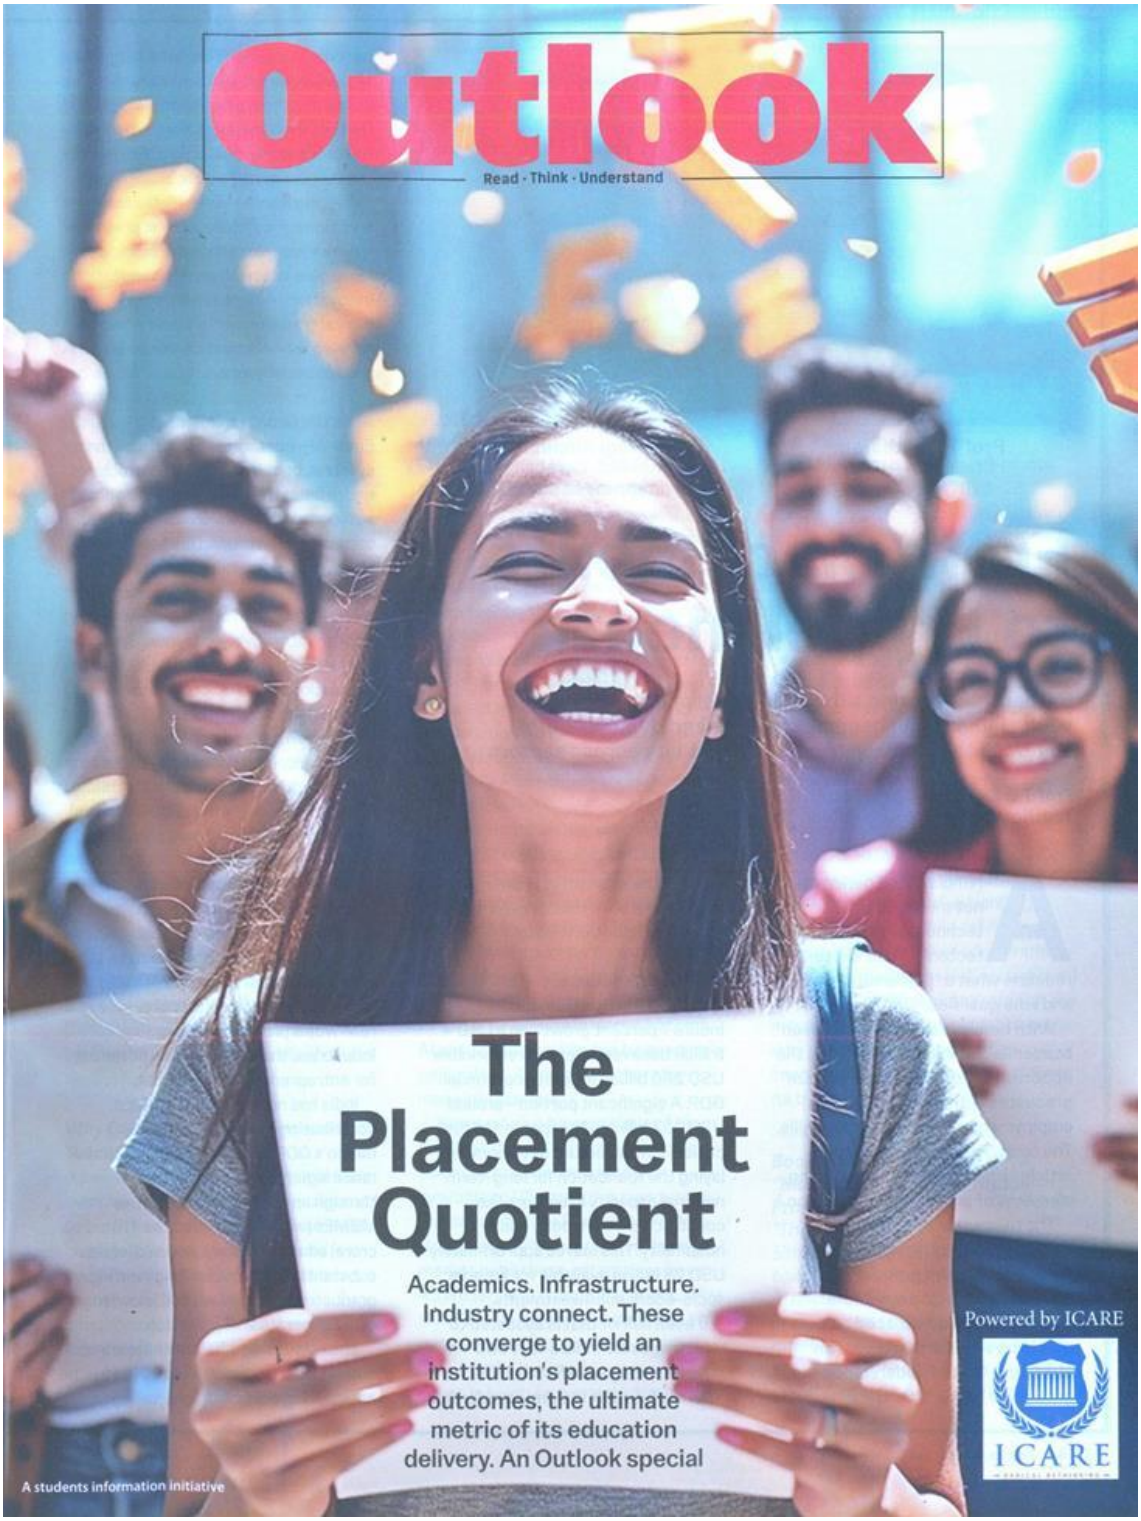

This year's hiring season marked a significant cultural shift, as women students not only participated actively but outperformed expectations across technical, management, and commerce streams. Leading recruiters like TCS, Accenture, Capgemini, LTI Mindtree, and Deloitte have offered over 860 roles, with a substantial portion going to JECRC's female talent, the release stated. It underscores the university's commitment to empowering women through industry-aligned education and robust training programmes, the release said. The university has facilitated more than 12,000 placements in the past five years, it added. (PTI)

Shaping Tomorrow's Leaders

Sri Siddhartha Academy of Higher education: pioneering teamwork and collaboration, offering a transdisciplinary approach for medical, engineering, and management students and research scholars

Dr G Parameshwara, Chancellor
Sri Siddhartha Academy of Higher Education, Tumkur
Hon'ble Home Minister, Govt of Karnataka

Sri Siddhartha Education Society (SSES), founded by the visionary educator, the late Dr H M Gangadharaiah, in 1959, is a leading educational institution with a NAAC A+ accreditation. Following in his footsteps, his two illustrious sons—Dr G Shivaprasad and Dr G Parameshwara—continued with their father's legacy to develop over 88 eminent academic and research facilities.

Global Learning Environment

Focused on sustainability, the sprawling campuses deploy eco-friendly measures. Excellent hostel with modern amenities, along with state-of-the-art facilities, comprise stress-free learning classrooms, seminar halls, board rooms, and discussion rooms with modern furniture, LED & DLP projectors, multimedia-enabled lecture facilities, and exclusive facilities for workshops.

The skill lab at SSAHE provides a safe environment for students to learn, practice, and be observed in a simulated environment, thus mitigating the risks involved in direct patient exposure without adequate preparation and supervision.

The Central Research Laboratory at SSAHE is equipped with advanced technologies such as medical, analytical, and information devices like electron microscopes, nucleic acid structure analysis systems, image analysis processors, and mass spectrometers under a centralized control system.

SSAHE's Knowledge Centre is equipped with a digital library, a media room, and WiFi on campus. 24/7 with over 5 lakh titles, 50k+ journals, and a large database of case studies.

The sports facilities include international standard playgrounds for

cricket, basketball, football, volleyball, table tennis, hockey, etc.

The Geodesic Dome Library at SSAHE is sixth in the world, an 'energy center' with a seating capacity of 500 and 5 floors stocking over 100,000 books. Currently, the library has 67,000 volumes and subscriptions to 156 national and international journals.

Exemplary Medical Practice

Sri Siddhartha Medical College (SSMC) and Hospital, Tumkur, established in 1988, and the Sri Siddhartha Institute of Medical Sciences and Research Centre (SSIMS & RC), T-Begur, started in 2019, under the aegis of SSES, are committed to excellence in healthcare education, research, outreach, and inclusivity through discovery, purpose, and application.

SSMC offers undergraduate (MBBS) and postgraduate (MD/MS) medical programs, along with various allied health science courses. A multi-specialty hospital includes 1,350-bed facilities and a training ground for medical students. It is equipped with 12 major operation theaters, modern diagnostic equipment like CT scanners and MRI machines, and offers 24/7 emergency care.

Excellence in Dental Care

Sri Siddhartha Dental College (SSDC), Tumkur, was founded in 1992 under the aegis of the SSES with the vision of pursuing excellence in the science and the art of dentistry through education, research, and service. Over the years, SSDC has evolved into an institution of repute, comprising highly skilled oral healthcare specialists who provide excellent patient-centered oral healthcare.

SSDC has been awarded outstanding research and development dental college in India gap in the recently concluded edicts education or awards.

Tech Trailblazers and Innovators

Sri Siddhartha Institute of Technology

(SSIT), founded in 1979, holds an A+ grade from the National Assessment and Accreditation Council (NAAC), reflecting its commitment to high academic standards.

Undergraduate programs in civil, computer science, electronics, electrical, information science, and mechanical engineering are accredited by the National Board of Accreditation (NBA). The institute runs 9 comprehensive programs in Bachelor of Engineering (BE), 7 post-graduate programs, and doctoral programs, apart from Master of Computer Application & MBA programs, with an annual intake of 1200 students. SSIT has been awarded financial assistance by the World Bank for the Technical Education Improvement Program (TEQIP) Phase II to establish a 'center of excellence'.

International collaborations are at the heart of SSAHE. Tie-up for student exchange program with Avalon University in Dutch Caribbean islands is a prestigious endeavor. The university has signed MOUs with Mico-Bosch, TATA, Infosys, PROSYM, AIT, among others. Collaboration with Saint Louis University, NYU, Florida Internationaly, and North Dakota University in the USA creates opportunities for students and staff to explore cutting-edge advantages of exclusive twinning and exchange programs.

For medical collaborations, SSAHE has tie-ups with Mount Vista Medical Centre in Phoenix, Arizona; Hinsdale Hospital, Bolingbrook Hospital, Glenn Oaks Hospital, La Grange Memorial Hospital, and Jackson Park Hospital in Chicago; Raleigh General Hospital; and Appalachian Regional Healthcare Hospital in Beckley, West Virginia for clinical rotations and electives for medical students.

Acing Current Placements

Sri Siddhartha Academy of Higher Education (SSAHE) in Tumkur has demonstrated strong placement outcomes across its undergraduate and postgraduate programs. 97 companies participated in the recruitment drives, averaging 800+ placements consecutively over the last 3 years.

A total of 1,261 jobs were offered across various disciplines, with the highest salary up to Rs 44 LPA. Top recruiters include Infosys, Microsoft, Capgemini, HP, Wipro, TCS, Mahindra, Nokia, Cognizant among others.

Private Category

Legacy, Innovation and Results

While institutes focus on amping up infrastructure, masterclasses, and industry connect, all these converge towards what remains the central metric of success – placements. Outlook explores how the country's first premier engineering college continues to not just maintain but enhance its game year on year.

Placement season is special on every campus, steeped in both tradition and emotion. Seniors share tips with juniors, alumni return to recruit, and the campus community rallies to support its own. Amidst the flurry of activity, there is also a palpable sense of nostalgia. As the moment of reckoning comes closer, the study sessions get longer and group projects become more elaborate. All for that one pivotal moment. One of India's foremost engineering colleges, IIT Kharagpur, has set the benchmark for placement time and again. This year was no different.

The Numbers Game

Established in 1951, Kharagpur's Indian Institute of Technology is one of the first in India, and is recognised as an

Institute of National Importance. Over the years, it has grown from an engineering college into a diverse academic haven which offers courses in management, law, architecture and the humanities. Seventy-three years ago, the first session had just 224 students. Today, the 2100-acre campus houses 22,000 residents.

IIT Kharagpur's vast alumni network comprises some of the most distinguished leaders in the world, including HCL co-founder Arjun Malhotra and former RBI Governor Duvvuri Subbarao.

In the realm of higher education, placement statistics serve as a critical measure of an institution's success. For students, securing a job post-graduation is the culmination of years of academic effort. For institutions, it reflects their ability to prepare students for the professional world.

Given the institute's legacy, IIT Kharagpur's students have always had an edge in the job market. The 2024-25 placement season was no different, with the statistics speaking from themselves. The highest package recorded was a staggering Rs 2.14 crore per annum. Over 10 students received offers exceeding Rs 1 crore.

Yearly Trends

While the exact placement figures for this year haven't been released, reports suggest that the institute's placements have continued to grow from strength to strength.

While 1284 students were placed in the 2020-21 academic session, this placement season saw more than 800 offers being extended on the first day, with nine offers exceeding an annual package of Rs 1 crore! By Day Three, this number had grown to over 1000!

Many companies who had visited the campus last July returned for the placement drive, undoubtedly impressed by the pool of talent. A large chunk of the offers were PPOs (Pre-Placement Offers), wherein the company found an intern's skills worthy enough to directly hire them.

Sectoral Insights

An index of IIT Kharagpur's quality education delivery is in how it consistently attracts legacy recruiters across domains.

Like every year, core engineering companies such as Tata Steel and Larsen & Toubro continued their strong presence, while tech giants such as Microsoft, Google, and Amazon were among the top recruiters in roles in software development and data analytics. Google is known to share a special relationship with the institute, with CEO Sundar Pichai being one of IIT Kharagpur's most renowned alumni. Not only has Pichai fondly spoken of his time at the institute, the affection is mutual, with his alma mater awarding him an honorary doctorate last year.

GIVEN THE INSTITUTE'S LEGACY, IIT KHARAGPUR'S STUDENTS HAVE ALWAYS HAD AN EDGE IN THE JOB MARKET. THE 2024-25 PLACEMENT SEASON WAS NO DIFFERENT, WITH THE STATISTICS SPEAKING FOR THEMSELVES.

Many of the best offers also came from financial institutions including American Express, Mastercard and DE Shaw. Apart from technically-heavy roles, students were also hired in the fields of banking and consulting.

Several noteworthy patterns emerged during the placement season. There have been more than 20 international offers, a remarkable feat in the current geopolitical climate. This increasing number of global opportunities indicates the universal recognition of IIT Kharagpur's talent. Countries such as Japan, Taiwan, the USA, and Singapore were among the destinations for these international roles.

There has also been a noticeable shift towards roles in emerging technologies. Companies are increasingly offering positions in areas such as artificial intelligence, machine learning and data science, reflecting evolving industry demands.

Prof. Rajib Maity, Chairperson of the institute's Career Development Centre (CDC) attributed this to targeted outreach and industry collaboration, "Our efforts in fostering ties with companies and understanding evolving market needs have been crucial in maintaining placement excellence."

The CDC at IIT Kharagpur plays a pivotal role in facilitating the placement process. It organises training programmes, mock interviews and resume-building workshops to prepare students for the recruitment process. The CDC's efforts have been instrumental in maintaining the institute's strong record.

Looking Ahead

As industries continue to evolve, IIT Kharagpur remains committed to adapting its curriculum and training methods to meet the changing demands. The institute's emphasis on research, innovation, and interdisciplinary learning ensures that its graduates are well-equipped to tackle future challenges. The placement season, while a significant milestone, is just the beginning to a lifetime of learning and growing for IIT Kharagpur graduates.

IIT Kharagpur director Prof. V K Tewari reflected upon this success, "Even with a slow placement season, surpassing 800 offers on the first day underscores our commitment to nurturing leaders for national development. This reflects the trust companies place in our graduates and the strength of our academic legacy," he said.

PLACEMENT FACT FILE

Syed Muhammad Ali al-Hussaini
Chancellor, Khaja Bandanawaz University (KBNU) Kalaburagi, Karnataka

Futuristic Learning Beyond Boundaries

Syed Muhammad Ali al-Hussaini, spearheading KBNU's commitment to create a flagship institution in Karnataka through collaboration, innovation, and sustainability

KBNU's trajectory excels in driving change in education, research, and community engagement. How would you describe the ethos of this institution?

KBNU is not just a university; we are trying to build a future here. Our ethos lies deeply rooted in the vision of our late founders, who believed education should be the source for character building and community impact. We focus on providing world-class education while inculcating a sense of social responsibility so that our students not only become excellent professionals but also contribute towards building a meaningful society.

How is KBNU ensuring that the physical and digital infrastructure supports its vision of a robust academic framework?

We have created a campus that is an ecosystem that nurtures the professional and personal growth of our students. A state-of-the-art campus spread across 50 acres, well equipped with modern facilities that set the stage for future-ready learning. From high-tech lecture halls with cutting-edge audiovisual tools to expansive and up-to-date research labs and 24/7 Wi-Fi.

We prioritize our students' well-being with a dynamic campus life. The university also houses research and skill development centers, a well-stocked library with digital resources, recreational facilities, and the state-of-the-art Khaja Bandanawaz Teaching & General Hospital, offering hands-on medical training. Our sports infrastructure includes a cricket stadium of national standard, KBN riding club, the first of its kind in North Karnataka.

How does KBNU equip its students to excel in the fast-evolving job market?

At KBNU, we prepare our students not only for exams but also for life. Our curriculum is tailored to meet the demands of a globalized and rapidly changing job market. We recruit top-tier faculty who don't just educate but also mentor, constantly up-skilling them to stay ahead of industry trends.

We focus on a hands-on approach. We provide opportunities to our students to work on real-time projects through AI-related workshops, internships, seminars, webinars, and collaborations with industry experts. As a result of graduating, students secure top-tier jobs, with the highest placement package reaching ₹90,000 per month. We encourage them to enhance their entrepreneurial skills in case they want to start their own business.

What is your future vision for KBNU and towards higher education in India?

Our vision is to evolve into a dynamic hub of innovation, where education is not limited to textbooks but flows seamlessly into real-world projects and industry challenges. We are constantly reimagining our curricula to align with the future of new-age jobs, embracing emerging fields like artificial intelligence, renewable energy, and sustainable development. The future I envision for KBNU is one where innovation, diversity, and global citizenship walk hand in hand—where every student is empowered to shape the world, not just fit into it.

Coding Careers Climb, Consistently

As digital disruption accelerates, Outlook examines how a premier tech institute is changing the game with steady placement growth and sectoral shifts

We live in a world where there is perpetual fear around 'employability'. With technology changing the game every day, the job market hangs in a perpetual limbo. Amid all this, IIIT Hyderabad continues to mark its relevance as one of India's top institutions, with placement figures that speak of both consistency and evolution.

Metrics with Momentum

Founded in 1998, the International Institute of Information Technology, Hyderabad (IIITH) is a research-driven institution known for its deep emphasis on computer science. In an ecosystem crowded with engineering colleges, IIITH has carved a niche that blends academic rigour with applied innovation.

Their academic credibility has resulted in over 95% placements each year since 2019. In the 2023-24 cycle, this number crossed 99%, with 411 students receiving compelling offers! Given the institute's emphasis on deep research, the placement record was an overwhelming 100% for MS students across all research streams.

This growth extends to the packages. In the 2019-20 batch, the highest salary was Rs 85 lakhs. By 2023-24, this number had grown to a staggering Rs 1.05 crore. The average salary also went from Rs 25 lakhs to Rs 26.34 lakhs.

A Broad Horizon

Amid global economic slowdowns and budget cut downs in the tech sector, IIITH has persistently courted and welcomed recruiters from the best players in their respective industries.

The sheer diversity of offers received within the tech domain sets the institute apart. Core engineering and software development roles dominate the landscape, but there has been a significant uptick in emerging domains such as AI, cybersecurity and fintech.

Tech giants such as Microsoft, Apple, and Nvidia have made high-profile offers, as have deep-tech startups and Indian product companies such as Swiggy and Unacademy.

International roles have also featured on the roster, largely from US and Singapore-based firms, further underscoring IIITH's global appeal.

The institute's emphasis on research has also opened pathways beyond placements. Several students opted out of job offers to pursue PhDs at top global universities such as Massachusetts Institute of Technology, Carnegie Mellon University and Stanford University, reflecting IIITH's standing in the academic world. "We follow a research-led curriculum for all our programs. Our aim is to equip graduates with skills and mindset that will prepare them for their last job and not the first one," said the institute's director, Prof. P.J. Narayanan.

Future-Facing Fundamentals

With flexible academic structures, early exposure to research labs, and dual degrees in subjects such as CSE and Computational Linguistics, the institute equips students for both conventional tech roles and cross-disciplinary futures.

As industries increasingly demand specialised expertise and adaptable thinking, IIITH is not just keeping up, but anticipating what comes next.

Placement Powerhouse: Delivering Results in a Challenging Economy

IMS Ghaziabad, a leading management institution, empowers students with knowledge, skills, and industry exposure, driving remarkable placement success stories

Dr Prasoon M Tripathi
Director, IMS Ghaziabad

IMS Ghaziabad maintains an exceptional placement record with 93% students placed and strong industry participation across sectors and domains.

Placement Snapshot
IMS Ghaziabad recorded a 93% overall placement rate this year, with students receiving an average of one job offer each. The average salary package offered was ₹9.25 LPA, indicating strong employer confidence.

Industry Demand
Top recruiting sectors included FMCG, Research & Consulting, and NBFCs. These industries had the highest demand, reflecting industry alignment with the institute's pedagogy.

Top Recruiters
In Research & Consulting, top recruiters included Deloitte, KPMG, PwC, Gartner, Acuity Knowledge Partner, Wipro, Protiviti, WNS, Ameriprise Financial Services, and Ericsson.

FMCG firms like Dabur, Colgate, Mondelez International, Reckitt, Nestlé, ITC, Himalayas, Zydus, Helium, JL Morison, Café Coffee Day, Tata Consumer Products, Godrej & Boyce, and DS Group participated actively.

Dairy companies like Amul and Mother Dairy recruited, along with Manufacturing giants such as MRF Tyres, Polycab, Bosch, LG, Asian Paints, JK Cement, Ultratech Cement, JK Tyre, and Hawkins.

Banks and NBFCs like Federal Bank, HDFC Bank, ICICI, Axis Bank, Kotak Bank, IndusInd Bank, South Indian Bank, and ANZ Bank offered various profiles.

Logistics and Telecom companies such as DHL, TCIL, Interocean Shipping, Swiggy, Zomato, Airtel, and Vodafone also hired in large numbers.

Key roles offered included Financial Analyst, Tax Consultant, Research Analyst, Data Analyst, Marketing Manager, and more.

Salary Trends
The highest package was ₹35 LPA, and the lowest ₹6 LPA. The median salary being ₹9.27 lakh showing a 15–20% increase in CTCs and enhanced perks.

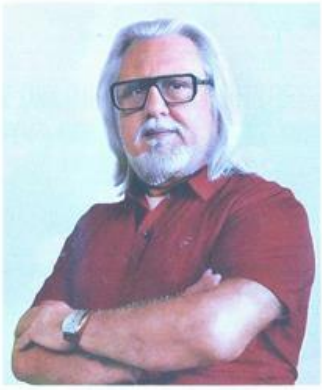

Feedback Highlights
Recruiters praised students' technical, communication, and workplace readiness. Feedback is used to update training modules and ensure industry relevance.

Industry Trends
Consulting and NBFCs led the placements. Startups also showed growth with a 20–30% hiring increase forecast for 2025, backed by $10.9 billion in funding.

IMS Ghaziabad's strong academic foundation, combined with its proactive approach to placements, ensures that IMS graduates are well-equipped to excel in the global workforce.

Prof T G Sitharam
Chairman AICTE

Yogi Kochhar
AI evangelist, Celebrity Global happiness savant

From placements to Propel'ments

Rather than chasing a dwindling pool of entry-level jobs, young Indians can become creators and deployers of AI solutions that radically boost productivity across sectors

Prof T G Sitharam, Chairman, AICTE
Yogi Kochhar, Author/Co Author: The Road Ahead 2.0

Artificial Intelligence (AI) is not merely another technology wedge but a tectonic force set to redefine what a "placement" means and who qualifies.

With timely realignment between academia and industry, India has the opportunity to empower millions of graduates with meaningful employment and future-ready skills. The term "Propel'ments" in this article corresponds to "Key driving elements of progress or innovation."

The reliance of educational institutes on enterprises for placement of their graduating students has to go away. More emphasis should be placed on solving problems and starting their own start-ups. No one understands the enterprise better than the enterprise itself. If the enterprise is downsizing in the wake of AI that belief in them to hire fresh hands is wishful.

The Numbers Game: Supply Outstrips Demand

India's 7 percent growth on a USD 4 trillion base represents a remarkable USD 280 billion in additional annual GDP. A significant portion—around USD 252 billion—is expected to fuel critical infrastructure development, laying the foundation for long-term national capacity in sectors like construction, transport, and hospitality. This leaves approximately USD 28 billion available for broader socio-economic investments.

If even half of that is allocated to raise wages for India's vast 500 million-strong workforce, a meaningful uplift in living standards becomes possible. The remaining USD 14 billion offers a focused window to invest in employment opportunities for the 10 million graduates expected to enter the job market in 2026. While the current model poses challenges in delivering high-volume, high-value traditional jobs, this moment presents India with an extraordinary chance to reimagine job creation—through innovation, entrepreneurship, digital transformation, and scalable service models that can redefine the future of work.

AI as the Great Equalizer

Enter AI—not as another item on the syllabus, but as an axis upon which entire industries will pivot. AI "agents," autonomous software entities capable of performing end-to-end tasks, represent India's greatest chance to leapfrog low-value service roles. Rather than chasing a dwindling pool of entry-level jobs, young Indians can become creators and deployers of AI solutions that radically boost productivity across sectors. This requires an education paradigm shift: from rote coding drills to hands-on, problem-driven AI curricula that blend computer vision, interaction AI, spatial AI and "metaverse AI" into composite, market-ready skillsets.

The opportunity before us is to empower students to become entrepreneurs and create their own startups. They should aspire to be job creators, not job seekers. With AI emerging as a powerful tool to solve real-world problems across industries, there is immense potential for entrepreneurial innovation.

India has nearly 8 crore MSMEs, contributing around 30% of the nation's GDP. These enterprises can be made significantly more efficient through applied AI. Even if 4 crore MSMEs (with turnovers above ₹10 crore) adopt AI models, it could lead to substantial job creation. Engineering graduates equipped with AI knowledge could generate 2–3 jobs each.

The authors emphasize the need to embed entrepreneurship training in engineering education, preparing

students as future-ready innovators in an AI-driven economy. Recognizing this, AICTE, NITI Aayog, and CII have joined hands to upskill youth and empower MSMEs through AI adoption.

There has always been space in the market and a market in that space—as seen with pioneers like Google, Microsoft, IBM, and Amazon who capitalized on this vision early.

Agricultural AI:
A 5× Boost for Farmers

India's agricultural universities have historically resembled hamster wheels—refining existing seed strains rather than reinventing farming with smart insights. Spatial AI can change that. By analyzing soil characteristics via satellite and drone imagery, coupling that with hyper-local weather forecasts, an AI agent could recommend to a smallholder: "Plant blueberries instead of maize this season. Given your red-loam pH, anticipated monsoon shifts, and current market prices, blueberries promise a 5× yield boost and higher export value." Such intelligence could create fertile ground for AI-powered agritech startups.

The Mall Metaphor:
Architecture of Opportunity

To build a physical mall, one need not be an architect—vision and specification suffice. Likewise, drafting an AI-enabled world does not demand mastery of every algorithm; it requires a coherent blueprint of amenities (APIs), walkways (data pipelines), lighting (real-time feedback loops), and design (user interfaces).

Why Education Must Evolve—and Teachers Must Lead

A sweeping teacher training initiative is overdue. Teachers must be re-oriented to teach metacognition and inspire use cases innovation through AI. India needs imagination. The richness or poverty of a nation springs from imagination. Institutes must recruit AI-savvy mentors, incentivize continuous upskilling to co-create curricula. Only then can India avoid an "AI talent gap" while simultaneously addressing the broader placement crunch.

Beyond coding to composite:

An AI Lab is not synonymous with coding, software or server maintenance. True AI prowess lies in orchestrating four pillars:

- Computer Vision AI to interpret images and video
- Interaction AI (NLP and conversational agents) to converse and understand
- Spatial AI to map and contextualize the physical world
- Metaverse AI to create immersive, mixed-reality environments

Graduates versed in these domains will fill roles and dominate tomorrow's corporate org charts.

The Road Ahead 2.0:
Blueprint for an Imagi"NATION"

As Prof. Philip Kotler recently observed in his endorsement of our book The Road Ahead 2.0, "This book will provide readers and institutions with a blueprint to create a new nation called 'imagi'Nation' that transcends borders and does not require visas." Kotler argues. Were Bill Gates left off—in his book 3 decades ago titled, The Road Ahead, diagnosing the digital divide—this volume charts TheraPeuting (A combi'Nation of diagnosis and therapy) how AI can pave the next roadway for global inclusion.

We must know that as compared to millions of GPUs available in US and China and less than 20000 in India and with tens of thousands of PetaFlops in US and China and less than 100 in India, India's opportunity to grow a ton of grains using 100 gms of seeds only.

We need to create APPLIED AI LABS where learners can in weeks become AI entrepreneurs. We can be seeding a generation of creators rather than mere job-seekers.

We must also be conscious of the fact that data which is our sovereign strength has been made freely available to US through a masquerade ball set up by free Facebook and free Google etc. With over trillion dollars market caps these enterprises have 40% user base from Indian users. Why should India not tax this data that sits outside carried by the Pied Pipers if data in India is a taxable commodity. Grass is being converted into cheese while Indians are grazing upon it like excited cows vying for the next 'like'.

Conclusion:
From Placements to Propel-ments

College placements in 2025–26 cannot rely on the old script of campus drives and mass recruiting. With only USD 1,400 per graduate p.a in conventional job value, the next wave of Indian talent must become AI architects, entrepreneurs, product owners and "agent" creators. Academic institutions must overhaul curricula, train teachers, entreprenurs and forge industry partnerships that emphasize AI's composite nature—computer vision, interaction, spatial and metaverse AI.

By doing so, India will not only absorb its 10 million annual graduates but will export a new generation of AI solutions to the world, advancing economic growth while solving real human problems—from accelerating heart surgeries to revolutionizing rural agriculture to reimagining retail on the move. In this vision, placements evolve into "propel-ments," and Indian imagination, once impoverished, finds its true currency.

Book "The Road Ahead 2.0"" = "Blueprint for an Imagi'Nation"- Prof Philip Kotler

"The Road Ahead 2.0" by Prof. T.G. Sitharam and Yogi Kochhar is a comprehensive exploration of Artificial Intelligence's transformative impact across over 80 domains, offering a visionary roadmap for individuals and enterprises to adapt and thrive in an AI-driven future.

Engineering Futures

Despite global economic challenges, a premièr Indian engineering institute showcases its resilience with robust placement outcomes. Outlook takes a look

In a scenario where the job market is impacted significantly by rapid technological advancements and economic fluctuations, placement statistics serve as an even more critical measure of an institution's adaptability and relevance. For students, securing employment post-graduation is not just a milestone but a testament to the quality of education and training received. For institutions, it reflects their commitment to aligning academic offerings with evolving industry needs. Time and again, BITS Pilani has been exemplary in this regard, with students finding fulfilling jobs from campus.

A Snapshot of Success

One of the most exclusive technical universities in the world with an acceptance rate of less than two per cent (2%), BITS Pilani was established in 1964 and houses more than 13,000 students on its lush 328-acre campus.

The institute has consistently achieved a near 100% placement rate. The credit for this can be attributed to the focus on holistic learning, where the Practice School Programme ensures that every student spends more than seven months working in the industry before graduating. The development of soft skills is also emphasised in classrooms.

Analysing the placement data over recent years reveals a consistent upward trajectory. Considering the statistics available on the official website between 2021 and 2023, the number of companies recruiting has registered a steady growth from 301 to 314. More than 750 students have been placed each year.

The average compensation has also seen a steady increase, indicating growing recognition of graduates in the job market. During this period, the median domestic salary has grown from Rs 12.33 lakh to Rs 18.20 lakh. At the same time, the average salary, which was Rs 15.59 lakh in 2021, crossed Rs 20.79 lakh in 2023! This trend underscores the institute's commitment to aligning its curriculum with industry demands and fostering skill development among students.

Diverse Opportunities

The BITS Pilani placement drive has always attracted a diverse range of industries. The technology sector participated significantly with companies such as Microsoft, Google and IBM, offering roles in software development, data science, and analytics.

The finance and banking sectors were also well-represented, with firms such as Goldman Sachs and Morgan Stanley recruiting for various positions. Manufacturing and automotive companies including L&T Limited, Tata Steel and Hyundai participated actively too.

The entrepreneurial spirit is also strong in the campus, with BITS Pilani grooming successful leaders of the likes of Hotmail co-founder Sabeer Bhatia, and SanDisk co-founder Sanjay Mehrotra. Hence, it is no surprise that the prominent start-ups like Myntra and Navi have also been headed to this campus to find the best talent.

Path to Success

Despite global economic uncertainties, the placement outcomes remained resilient. The focus on interdisciplinary learning, research initiatives, and industry collaborations seem set to enable BITS Pilani to sustain and grow its placement performance in the coming years.

Gateway to Future Leaders

Empowering Minds, Enriching Futures: GLA University's Journey since 1998, Guided by Founder Shri Narayan Das Agarwal's Philosophy

Sustainable Excellence in Education

In a world where only the best and toughest survive in the professional arena and worldly life, educational institutions like GLA are going the extra mile to ensure that students graduating from their campuses are made of unique mettle, which is a combination of knowledge, application acumen, leadership skills and people management. GLA, created under the Sri Jagannath Prasad Ganeshi Lal Bajaj Charitable Trust Samiti, has an edge by virtue of being strategically located in the Holy city of Mathura, a recognized destination for knowledge seekers from different spheres of life and every part of the world. This paved the inspirational journey with the laying of a significant foundational milestone of fostering leadership, entrepreneurship, and innovation by GLA at the karmabhoomi embodying spiritualism and value-based pragmatic way of life- Lord Krishna.

LATEST PLACEMENT HIGHLIGHTS:

- 2500+ Students Placed (Ongoing Batch)
- 600+ Recruiters
- 55 LPA Highest CTC (Engineering)
- 19.8 LPA Highest CTC (Management)
- 8.14 LPA Average CTC (Engineering)
- 6.3 LPA Average CTC
- 46,000+ Alumni
- 86% Placement in Past 5 Years
- 1500+ Alumni Working in Fortune 500 Companies
- 6000+ Alumni Working Abroad
- 1350+ Students Placed at Capgemini
- 40+ Students Placed at Microsoft
- 830+ Placements in TCS
- 650+ Placements in Accenture
- 1270+ Placements in Wipro

Creating Industry Ready Graduates

GLA University was created with the vision and mission to provide an empowering learning experience in established and emerging professions and build capacity human resources to cater to the evolving industry demands. A robust industry-academia partnerships, besides fostering Industrial Internships that enable GLAians to adapt to varied work environment through various national international internships are key strategies ensuring premier placements for its graduates in the crème-la crème of diverse industry sectors. Going beyond the classrooms, GLA is also actively involved with social causes, which has drawn wide appreciation for its initiatives across various societal paradigms.

Powering Placement

What sets GLA apart from others in terms of campus placements include its training and placement cell, besides a proactive bond with its strong alumni association that ensure successful placements of its students in companies of more than 600+ marquee recruiters like Samsung Electronics, cocacola India, Dabur India, Ultratech cement, Asian paints Ltd, Bajaj Electricals, MRF tyres, JP Morgan. Amazon, Microsoft, Infosys, Wipro, HCL, Tech Mahindra, Disney Hotstar, VMware, Accenture, LAVA, Jindal Steel and Power, AFCONS, ACPL, HDFC, BKT to name a few, who have visited the GLA campus.

S V Rajiv Gowda, CEO, East Point Group Of Institutions, Trustee, MG Charitable Trust

Code the Future Solve with Purpose

New-age leader, S V Rajiv Gowda shares a clear and concise vision, and factual overview of learning and performance of East Point Group Of Institutions in a fast-evolving market landscape

What are the pillars of academic excellence in EPGI?
East Point Group of Institutions (EPGI) in Bengaluru has earned its reputation for its commitment to academic excellence, offering a robust educational framework that integrates industry-relevant curricula, advanced teaching methodologies, and comprehensive student development programs.

The institution holds NAAC: B++ grade, NBA, NBAH, and NABL national accreditations and approvals from AICTE and UGC for engineering and other programs. EPGI provides a diverse array of programs across multiple disciplines, including B Tech and M Tech Engineering in various specializations, MBA, BBA, B Com, BCA, B Sc, healthcare sciences such as pharmacy, nursing, and physiotherapy, and other diploma courses.

A dedicated team of over 600 highly qualified faculty members ensures teaching methodologies are effective and relevant. The institution invites guest faculty for conferences and lectures and arranges seminars and workshops for students and teachers. The faculty is majorly involved in 'centers of excellence,' motivating and guiding students and offering strong mentorship for entrepreneurial and innovative student-led projects.

In the current market scenario, what are your initiatives aimed at improving employability?
The job market is changing rapidly, and to keep pace with it, we have implemented a comprehensive strategy to enhance the employability of our students. We encourage over 300 companies, including Infosys, Wipro, IBM, TCS, Cognizant, Cisco, Accenture, Amazon, and Capgemini, to participate in regular campus recruitment drives.

Industry-academia partnerships have helped the colleges tremendously in terms of employability. Students are provided with industrial training, internships, and opportunities for entrepreneurial mentoring.

We have signed MOUs with top companies for a long-term, mutually beneficial relationship focused on achieving shared goals. The institution has various labs for skill development where the companies train the students according to the required job function of their own

companies, ensuring placement.

The Department of Training and Placement focuses on both technical and non-technical skills, including aptitude training, technical workshops, and soft skills development.

Given the job market scenario, where coding is extremely sought after, EPGI has adopted a comprehensive approach to cater to students with varying levels of coding proficiency—ranging from high coding to low coding or no coding levels. EPGI employs experienced trainers to conduct sessions focused on data structures, algorithms, and problem-solving techniques. Students are prepared for coding rounds in top companies and are mentored to excel on platforms like HackerRank, Codeforces, and LeetCode.

Courses Offered

HEALTH SCIENCES
MBBS , MS, MD
BSc Cardiac Care/ AT & OTT/ Perfusion
BSc Medical Imaging/ Medical Laboratory
BSc Emergency & Trauma Care
BOT Bachelor of Occupational Therapy
D Pharm/ B Pharm/ Pharm D/ M Pharm
BSc Nursing
GNM (General Nursing & Midwifery)
BPT (Bachelor of Physiotherapy)
MPT (Master of Physiotherapy)

ENGINEERING
BE – CSE, CSE - AI & ML, CSE - (Data Science), CSE - (IoT & Cyber Security), ISE, ECE, Civil , M Tech

HIGHER EDUCATION
MBA, BBA, BBA – Aviation
MCA, BCA, MCom, B Com
DOCTORAL COURSES
PhD - CSE, ECE, Mech, Civil , Mathematics, Chemistry

facilities and convenience stores indicate a good life on campus.

Sports enthusiasts readily appreciate outdoor sports such as cricket, football, basketball, volleyball, and badminton, and indoor games such as table tennis, chess, etc.

What is your long-term vision for EPGI over the next decade? Right insert

The Indian government is encouraging the transformation of some private colleges into universities, primarily through initiatives by state governments and by fostering private sector investment in higher education.

EPGI comprises a diverse array of educational establishments across various disciplines, with 13 institutions from medicine, engineering, pharmacy, healthcare,

What other facilities are provided by EPGI towards creating a state-of-the-art learning environment?

A luscious green campus spreads over 100 acres and offers a comprehensive campus infrastructure designed to support academic excellence, personal development, and student well-being. Spacious classrooms equipped with the latest technologies and ICT initiatives. The high-tech labs for various departments, including engineering, pharmacy, and science, are equipped with modern equipment for practical learning. Each academic block houses a well-equipped library with a vast collection of textbooks, reference books, journals, and a digital library.

EPGI offers furnished, spacious accommodations to over 2,500 students, maintaining strict hygiene standards and complete safety and security. The auditorium has modern acoustics and state-of-the-art facilities that offer a truly immersive experience. On-campus banking

management, etc. Currently, these institutions are affiliated with prominent universities such as Rajiv Gandhi University of Health Sciences (RGUHS), Bengaluru North University (BNU), and Visvesvaraya Technological University (VTU). We have already applied to achieve a private university status. Vision is to grow into a prominent university. We operate on a 100-acre campus, housing all our institutions, and we have the bandwidth and expertise to chase our dreams.

Well Placed!

In today's competitive skill-based job market, within the context of a volatile geopolitical environment, how does an institute stand out? Outlook examines a legacy engineering institute vis-a-vis its placements

Placement season is a pivotal milestone in every student's life. It is a time when lecture halls give way to interview rooms, and case studies are replaced by real-world challenges. Every waking moment of campus life culminates in this quest for an offer letter. By the end of it, one is forever changed, having made the transition from a student to a professional. And the force that empowers and drives this transition is each institute's placement systems, developed over time and implemented with enhancements year after year. IIT Madras has time and again proved how excellence is immune to changing trends. The institute's emphasis on holistic development, combining technical prowess with soft skills, has led to yet another successful recruitment season.

An Unmatched Legacy

Founded in 1969, IIT Madras was the third Indian Institute of Technology to be set up. It is also one of the eight public Institutes of Eminence in India, and since 2016, it has consistently ranked as the Best Engineering Institute in India according to the National Institutional Ranking Framework (NIRF).

While it started with just 120 students, the institute today provides quality education to over 10,000 individuals! Over the past 66 years, its students have gone on to become global leaders in their respective fields. Its distinguished alumni include Infosys co-founder Kris Gopalakrishnan and University Grants Commission (UGC) chairperson M. Jagadesh Kumar.

A Glimpse into the Numbers

With such a rich history like this, it is no surprise that their placements are some of the best in the country. However, IIT Madras made headlines this year with their record-breaking highest package. A student received an offer from Wall Street trading firm Jane Street for a staggering Rs 4.3 crore, covering base salary, bonuses and relocation

benefits! Packages exceeding Rs 2 crore were also offered by firms such as BlackRock and Glean. This is an exponential jump from 2023, when the highest package was Rs 1.31 crore.

The official placement brochure from the 2023-24 academic year reveals how IIT Madras has managed to remain a compelling choice for students around the country. Known for its technological prowess, the median package for Computer Science students was Rs 26.50 lakhs, with the average going up to 36.63 lakhs.

Based on the institute's official reports from 2022-23, there has been a healthy distribution of offers across different sectors. While core engineering dominated the numbers with 27.6%, IT and consulting came second and third at 14.9% and 14.3% respectively. The 12.1% stake of R&D roles signals a bright future for the country's innovative side. With 3.1% roles in the education space, there was also an incentive for the graduates to give back by passing on the quality knowledge they gathered at IIT Madras.

Analysing placement trends over recent years reveals a consistent upward trajectory. The institute has consistently placed over 1,000 students – a number they maintained even during the catastrophic pandemic batch of 2020-21, where 1046 offers were made. By 2022-23, this number had risen to 1612.

In 2024, the placement season also witnessed 15 international offers. This is reassuring, given how international offers have dried up in most institutes due to turbulent geopolitical events.

Holistic Learning

This placement success was distributed across non-CS disciplines too, with a huge chunk of candidates finding success in mechanical engineering, metallurgical & materials engineering, and even ocean engineering. Non-engineering fields also prospered, with ample jobs being extended to candidates who had a background in management studies, humanities and physics.

A major chunk of this success can be attributed to the institute's Career Pathway Centre, which was established in 2024 to integrate placements and internships with soft skill training provided by the Career Development Centre, and an entrepreneurial mindset encouraged by the E-Cell. This unified platform unlocked diverse career strategies, encouraging students to redefine their career goals.

Their work seems to have had a direct impact on the rise in pre-placement offers. This indicates a shift towards early talent acquisition, with companies seeking to secure top candidates ahead of the formal placement drive.

"As India's premier institution, IIT Madras maintains its leadership by fostering/cultivating strong partnerships with organisations worldwide. These collaborations extend beyond recruitment to encompass collaborative research and knowledge exchange. The curriculum and training provided to our students will undoubtedly prove beneficial to recruiters, with our students poised to exceed expectations," said IIT Madras director, Prof. V. Kamakoti.

Diverse Opportunities

IIT Madras remains a go-to for not just legacy brands, but fast-growing start-ups. Names like Qualcomm, Microsoft, Goldman Sachs, Bajaj Auto, Ola Electric, and Alphonso compete every year for the best talent from IIT Madras. This eclectic mix has shown that students are increasingly seeking not just a fat pay-check, but a bigger purpose.

The institute's focus on interdisciplinary programmes deserve credit for this, with a singular space hosting India's most talented students across diverse fields like Data Science, Robotics, and Aerospace Engineering. The E-Cell has also groomed students to not just be cogs in systems, but solve problems independently. This has broadened their skill sets, making them attractive to a wider range of recruiters.

Looking Ahead

As industries evolve and new sectors emerge, IIT Madras remains poised to adapt and prepare its students for future challenges. The institute's commitment to innovation ensures that its graduates are well-equipped to navigate the dynamic global landscape. The last placement performance not only reflects the achievements of the present but also sets the stage for continued excellence in the years to come.

UNDER THE TAX LENS

TAXATION
COMPLIANCE

THE INCOME TAX DEPARTMENT HAS ENHANCED ITS ABILITY TO MONITOR AND PROFILE TAXPAYERS IN A BID TO PREVENT TAX EVASION AND WIDEN THE TAX BASE. BUT TAXPAYERS COMPLAIN OF HIGH COMPLIANCE BURDEN AND MISUSE OF POWERS

BY **SURABHI**

EFFECTIVE APRIL 22, 2025, the purchase of certain ultra luxury and premium products worth ₹10 lakh or more would attract a 1% tax collected at source (TCS). These include wrist watches, handbags, sunglasses, shoes, sportswear, art objects (including paintings and sculptures), yachts, home theatre systems and horses for racing or polo.

This is the latest in a series of steps by the Central Board of Direct Taxes (CBDT) over the past few years to get information about spending patterns to see if taxpayers are paying up in line with their incomes.

Consider this. The government had, in the Union Budget 2024-25, introduced a 1% TCS on sale of motor vehicles priced ₹10 lakh or more as well as other goods the central government may specify later. Similarly, it has levied TCS on purchase of foreign tour packages, money transfers or purchases through debit, forex or international cards and foreign remittances above ₹10 lakh, except for the purpose of education. These are in addition to the tax deducted at

ILLUSTRATIONS BY **RAJ VERMA**

TAX EVADERS BEWARE!

- The income tax department uses several data to match the income and expenditure of taxpayers
- The datasets include not only income tax returns but also high-value purchases, TDS and TCS on specified goods, GST returns
- Tax information exchange agreements provide data on foreign assets of Indian taxpayers
- Returns are scrutinised using computer algorithms and data analytics that look for inconsistencies
- The department is also nudging taxpayers to file updated returns in case of mismatches
- Such measures have led to rising tax revenues with lower litigation, but experts and taxpayers complain of a high compliance burden
- Tax authorities are likely to depend more on data mining techniques to boost tax collection

source (TDS) on several transactions, not only on salary, interest income and rent but also on windfalls such as winnings from online games, betting, lottery and crossword puzzles.

Officials and experts say the aim is not just revenue generation but monitoring of transactions. They look at various expenditure by taxpayers to understand if they are in sync with reported earnings and income tax returns. After all, most such provisions fetch less than ₹1,000 crore in revenue per year. The TCS on ultra luxury goods, for example, is expected to bring in just ₹200-250 crore in a fiscal year.

The trend towards the formalisation of the economy and the rapid pace of economic expansion have increased incomes and, as a result, high-value purchases. At the same time, the informal economy, still 45-50% of the GDP, and the high use of cash have led to concerns about under-reporting of income. Despite a population of 1.4 billion, a little over 90 million people in India filed income tax returns in 2024-25. In December 2024, Minister of State for Finance Pankaj Chaudhary informed the Rajya Sabha that just 6.68% (eight million) Indians filed income tax returns in FY24.

No wonder the government is taking steps to boost tax compliance and collections. In fact, the CBDT has been priding itself for shifting from aggressive to more taxpayer-friendly methods that are non-intrusive and, by and large, do not involve a direct face-off with taxpayers. CBDT Chairman Ravi Agrawal has also highlighted that the department has moved from being an adversarial entity to one that operates more on trust.

THE RISE OF BIG DATA

While India Inc has been going to town about its use of big data and data analytics, the income tax department has, over the years, quietly set up a massive database with comprehensive information on

RISING DIRECT TAX COLLECTIONS

individuals sourced through various agencies. Known as Project Insight, which started way back in 2016, it has an integrated data warehousing and business intelligence platform that uses data analytics and mining to create a 360-degree profile of taxpayers and identify non-filers.

The CBDT has, over the years, expanded Project Insight into Project Insight 2.0 with new functionalities such as the Income Tax Transaction Analysis Centre (INTRAC) and the Compliance Management Centralised Processing Centre (CMCPC). While the INTRAC leverages data analytics and performs tasks related to data integration, data processing, data quality monitoring, data warehousing, master data management, data analytics, web and text mining, alert generation, compliance management, enterprise reporting and research support, the CMCPC uses campaign management approach (SMS, reminders, outbound calls, letters) to support voluntary compliance and resolution of compliance issues.

Gokul Chaudhri, President, Tax, Deloitte South Asia, says at the centre of Project Insight is a powerful system that brings together data from multiple sources and uses analytics to spot discrepancies. "The core purpose is to widen the tax base and discourage underreporting," he says.

The linking of PAN and Aadhaar has also helped the department understand the genuineness of transactions, while the use of databases from various sources has brought it a wealth of information about taxpayers. For instance, the tax department taps into GST returns, bank transactions, mutual fund payments and even social networking sites to profile taxpayers' spending habits. Not just that, the department is also looking at big-ticket cash splurges, be it for weddings, shopping, foreign travel or even IVF treatments. The CBDT is also rolling out Digital Intelligence and Analytics Labs in various parts of the country for forensic analysis of data.

Kuldip Kumar and Tanu Gupta, Partners, Mainstay Tax Advisors, say it has been quite some time since the government started collecting data on financial transactions through tax returns, Annual Information Returns and TDS and TCS returns. Now, linking of these transactions with PAN and Aadhaar has significantly improved the accuracy of the data, they say, adding that the government has also invested heavily in modern technologies and automated processes, which have enhanced its data analytics capabilities and plugged revenue leakages. India now has information exchange agreements with over 170 countries, which has strengthened the government's ability to detect unreported overseas income and assets, they point out. In recent years, the tax authorities have contacted several taxpayers with foreign income and assets to reconcile its information with the tax returns filed by them.

Meanwhile, to help taxpayers, the CBDT has taken initiatives such as the Annual Information Statement (AIS) and the Taxpayer Information Summary (TIS) that give a complete statement of financial transactions in a reporting year. This allows them to verify the accuracy of the information and flag any discrepancy.

The CBDT has also introduced a new form, 26AS, which has information about deduction or collection of tax at source, specified financial transactions, and tax demands, payments and refunds. It has also brought in pre-filled income tax returns (ITRs) for individual taxpayers as well as a provision for filing an updated return by voluntarily admitting omissions or mistakes and paying the additional tax if applicable. It has also launched an e-verification scheme allowing taxpayers to disclose unreported or under-reported income in the updated ITR. Thanks to data analytics, taxpayers receive notifications via SMS or email regarding financial transactions. This has improved compliance. For instance, if you have claimed HRA exemption and pay rent of over ₹50,000 per month without deducting TDS, the income tax department is likely to send you a reminder message. Similarly, in case of a mismatch between capital gains transactions and TDS/TCS data, the taxpayer will get a message. The use of computer assisted scrutiny, algorithms and data analytics helps the department weed out inconsistencies

THE USE OF DATABASES FROM VARIOUS SOURCES HAS BROUGHT THE I-T DEPARTMENT A WEALTH OF INFORMATION ABOUT TAXPAYERS

in returns, seek explanations from taxpayers through notices and choose cases for further scrutiny.

Amit Maheshwari, Tax Partner, AKM Global, says integration of Artificial Intelligence has further enhanced efficiency. "The department's dedicated analytics team utilises AI tools to swiftly detect inconsistencies in returns, enabling real-time notifications to taxpayers," he says.

There are several instances of data analytics coming to the department's aid. Last year, it detected a large number of cases where house rent allowance was claimed using bogus or unauthorised permanent account numbers. The trigger for the investigation was one case. A detailed investigation found thousands of such cases.

Similarly, a compliance drive launched last November helped the CBDT recover over ₹29,000 crore as undisclosed income from foreign assets from over 30,000 people. As part of the campaign, the income tax department sent notices through emails and SMSes to 19,501 taxpayers who had high foreign account balances or significant foreign interest or dividend income. The initiatives have led to a sharp rise in the number of income tax filers as well as income tax collections over the years. The number of income tax return filers is expected to cross 100 million this fiscal. Further, despite significant tax cuts in Budget 2025-26, income tax collections are expected to rise 16% to ₹14.38 lakh crore this fiscal. The CBDT did not respond to a detailed email query by *BT* on use of data analytics and mining.

170

THE NUMBER OF COUNTRIES WITH WHICH INDIA HAS INFORMATION EXCHANGE AGREEMENTS

WHAT NEXT

Tax administrators across the world, including the US, the UK, Singapore and Australia, are using data analytics. Experts say India has been late to the party, though the tax department is now steadily expanding the use of AI and machine learning along with data mining and analytics.

Sandeep Jhunjhunwala, M&A Tax Partner at Nangia Andersen, says while developed nations such as the US, the UK and Australia have long employed AI and data analytics to identify underreported income, flag dubious deductions and automate selection of cases for audit, India has rapidly advanced in this space with its own

DATA-LED TAX MONITORING

- Project Insight is a data warehousing and business intelligence project for collection of information from various sources
- Use of tax collected at source on high-value purchases and foreign remittances is a monitoring tool
- Use of machine learning and data analytics for reviewing high-risk taxpayers, inconsistencies between income and expenditure
- During search and survey, tax authorities can gain access to the assessee's computer, virtual digital spaces, social media

ambitious initiatives. "The Income Tax Department uses AI to monitor digital transactions in real time from UPI payments and credit card usage to e-wallet transfers, cross-referencing them with reported income to detect anomalies. AI-driven algorithms flag high-value or suspicious activities such as large donations, property deals or significant credit card expenditures," he says.

For developing nations, India's model, built on digitisation and AI-powered analytics, offers a compelling road map for smart and equitable tax governance, he says. Chaudhri of Deloitte says authorities around the world use a range of data matching methodologies and analytics to drive compliance and detect evasion. "For instance, the Australian Tax Office has a rich history of using sophisticated analytics to compare taxpayers' data with other taxpayers in similar circumstances. That tends to place a lot more onus on taxpayers making highly accurate self-declaration and self-assessment of their taxable income," he says.

The income tax department in India is set to further scale up the use of non-intrusive methods. This is especially crucial given the steep direct tax collection target of ₹25.2 lakh crore for FY26 despite the Budget giving sops of ₹1 lakh crore to individual taxpayers. The CBDT's central action plan for 2025-26 has elaborated ways to further widen the tax net through measures such as close monitoring of advance-tax payers, checking bogus claims for exemptions and deductions and watching out for suspicious high-value cash transactions. Official sources say data analytics and mining techniques will be used to keep track of these transactions. The new Income Tax Bill has also introduced the concept of virtual digital spaces; tax authorities can gain access to these spaces during search and seizure operations.

"Linking of transactions with PAN and Aadhaar has significantly improved the accuracy of data"

AMIT MAHESHWARI
TAR PARTNER, AKM GLOBAL

But while these measures have simplified tax administration, one of the key concerns is data privacy as well as the cost of compliance for measures such as TCS.

The government's decision to introduce a 20% TCS on international credit card spends under the Liberalised Remittance Scheme has also triggered a lot of heartache. Similarly, questions have also arisen over the TCS on luxury items over ₹10 lakh with many noting that such products are hardly ever purchased through cash and so have an electronic trail.

In fact, the Internet Freedom Foundation had written to the chairperson and other members of the Select Committee of the Lok Sabha that is examining the Income Tax Bill, 2025, seeking a review of the provisions around virtual digital spaces and putting in place safeguards.

Maheshwari of AKM Global says while these advancements by the income tax department promote compliance, they also raise concerns about privacy. "Measures such as social media profiling, accessing WhatsApp chats, and examining mobile phone data may be perceived as intrusive, potentially affecting individual privacy," he says, underlining that a balance between tax enforcement and protection of privacy remains a critical challenge overall. For now, the jury's still out on how to achieve a fine balance! BT

National

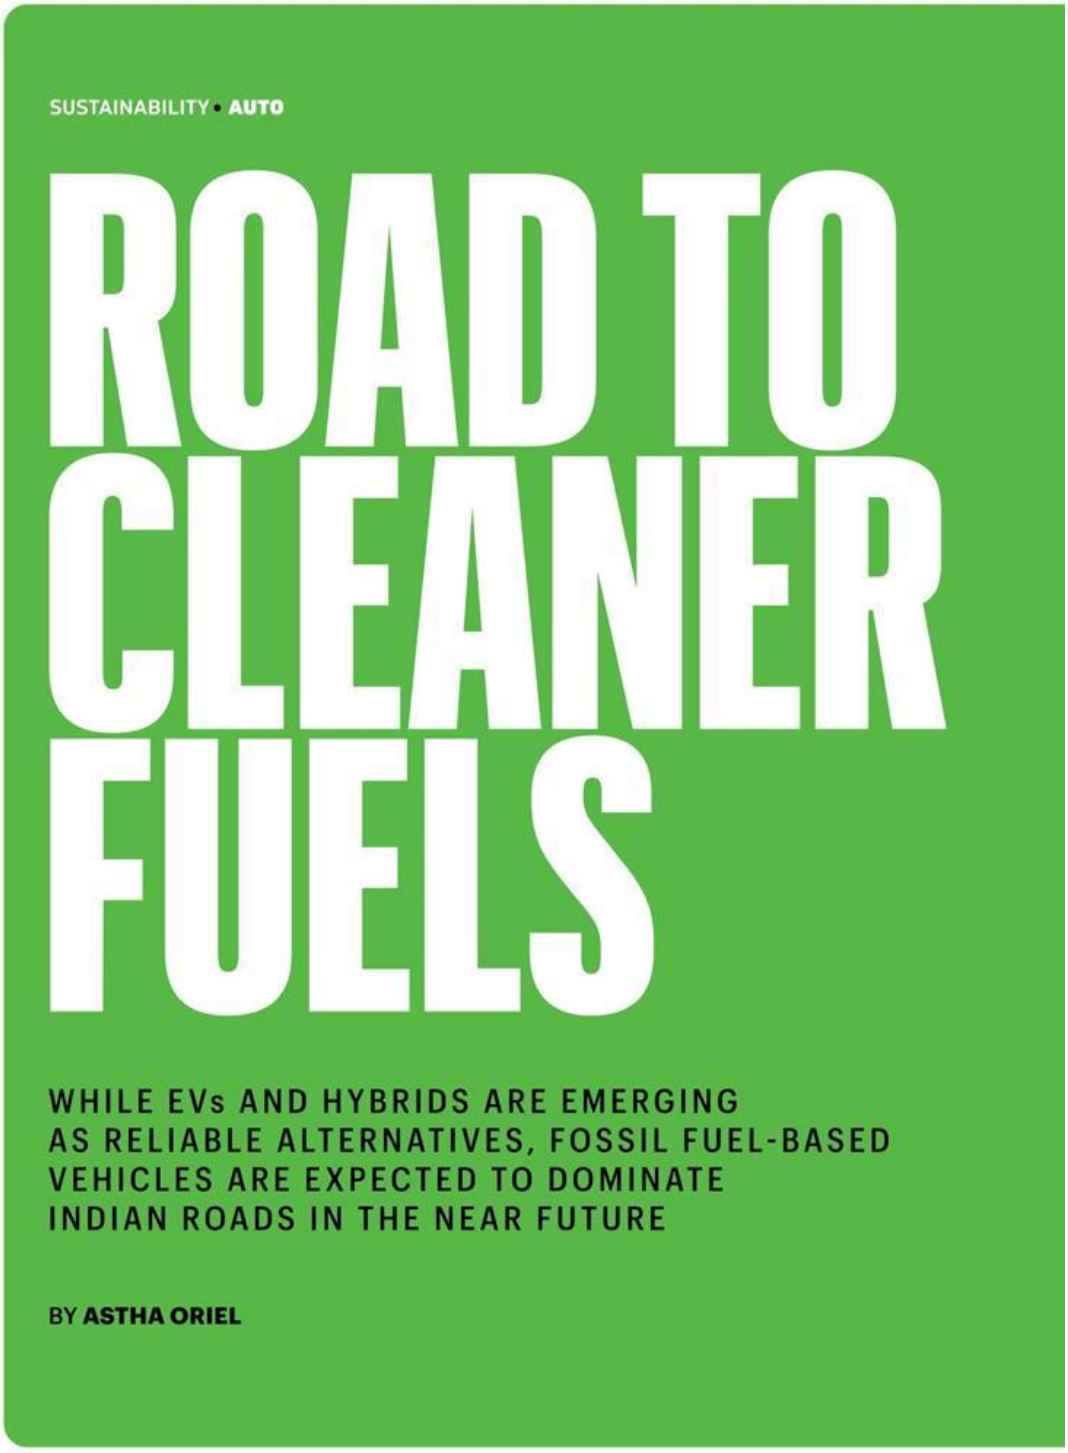

ILLUSTRATION BY **RAJ VERMA**

IN HIS BOOK, *The Third Industrial Revolution*, economist Jeremy Rifkin says that every major economic shift is driven by changes in energy use and transportation. The global automotive industry is undergoing such a transformation, from fossil fuels to sustainable alternatives like electric, CNG and biofuel. In India, where the transport sector accounts for 10% of greenhouse gas emissions, the government is targeting net-zero emissions by 2070. The world's third-largest auto market is expected to add 10 million vehicles by 2030.

Automakers are adopting a multi-powertrain approach—integrating EVs, CNG, hybrids and biofuels—to meet their sustainability goals. "These are a scalable pathway to reduce the carbon footprint. Their impact is amplified when supported by green manufacturing, sustainable supply chains and end-of-life recycling policies," says Saket Mehra, Partner and Auto & EV Industry Leader at Grant Thornton Bharat.

EVs: CHARGING AHEAD

In CY2024, global EV sales surpassed 17 million units, pushing EVs' share in the global car market above 20% for the first time, according to the International Ener-

KEY TAKEAWAYS

1. In India, the transport sector accounts for 10% of greenhouse gas emissions
2. India, the world's third-largest auto market, is expected to add 10 million vehicles by 2030
3. In CY2024, global EV sales surpassed 17 million units, pushing EVs' share in the global car market above 20% for the first time
4. EV penetration in the domestic market is 8%; India is targeting 30% by 2030
5. In FY25, sales of CNG cars surpassed sales of diesel vehicles; CNG accounts for over 15% of the domestic car market

gy Agency (IEA). The agency projects that one in four cars sold in 2025 will be electric, rising to over two in five by 2030. "Countries like China, the US, and EU members are investing heavily in EV infrastructure and battery innovation," says Grant Thornton's Mehra. EV adoption in passenger vehicles in India is 2–3%. But 2024 saw a 27% rise in overall sales of EVs to a record 1,949,114 units, driven by two-wheelers (59%) and three-wheelers (35%).

India is targeting 30% EV penetration by 2030, supported by policies such as 5% GST on EVs, reduced road taxes in several states and subsidies under FAME (Faster Adoption of Manufacturing of Electric Vehicles and Hybrid Vehicles) and PM E-Drive (PM Electric Drive Revolution in Innovative Vehicle Enhancement) schemes. The Scheme for Promotion of Manufacturing of Electric Passenger Cars in India, offering import duty rebates, is also expected to attract global players.

Automakers such as Maruti Suzuki, Tata Motors, Mahindra & Mahindra and Hyundai are already ramping up their EV portfolios. Tata Motors, the country's largest EV manufacturer, has planned an investment of ₹16,000-18,000 crore by 2030.

"If we go by what the government and the Bureau of Energy Efficiency have been saying, it would mean 10%-plus EV penetration for a manufacturer like us. We are at 11%. So, we are comfortable," Shailesh Chandra, Managing Director, Tata Motors Passenger Vehicles and Tata Passenger Electric Mobility, said in a recent analyst call. The company aspires to achieve more than 30% EV penetration by FY30. "We are pretty much on track," he said.

Maruti Suzuki, the country's largest passenger vehicle manufacturer, plans to launch four EVs by 2030. Its first EV will roll out this September . "It is a freshly designed EV on a new platform which offers several safety and performance advantages—500 km range, battery safety, larger cabin space, Level 2 ADAS, seven airbags. Above all, the customer will get a lot of confidence when he sees the same car being exported to advanced markets like Europe and Japan," says Rahul Bharti, Senior Executive Officer, Corporate Affairs, Maruti Suzuki India Ltd. Despite being late to the EV party, Maruti Suzuki is taking a measured approach. "We decided to adopt a more diversified approach and did not want to put all our eggs in one basket," Chairman R.C. Bhargava wrote in the FY24 annual report.

M&M is also treading cautiously. Despite committing ₹12,000 crore to EV arm Mahindra Electric Automobile Ltd (MEAL) and launching electric models like the BE.6 and XEV.E9, it is scaling up slowly. "This is a business in which we don't want to be rash. There is a lot of product complexity. We are learning new technologies as we ramp up, and so are our suppliers. We have to be cautious," Rajesh Jejurikar, ED, Auto & Farm, Mahindra & Mahindra, said in a recent analyst call.

But electrification faces hurdles such as affordability, shortage of charging infrastructure and range anxiety. "For two-wheelers and three-wheelers, we will obviously hit it, but for four-wheelers, it is going to be tough. At just 3% penetration in 2025, we don't have a strong base. Achieving 30% in five years is a 10x leap, which is difficult," says Rajat Mahajan, Partner and Automotive Sector Leader at Deloitte India.

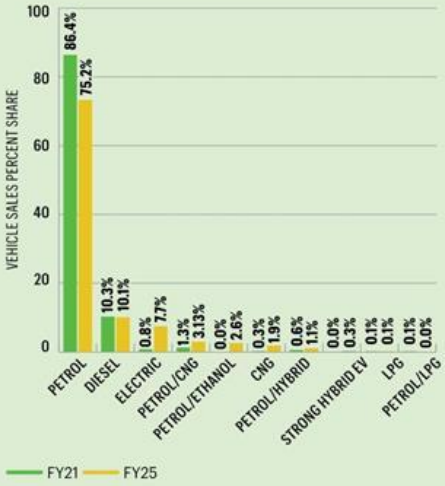

Grant Thornton's Mehra concurs. "One of the foremost hurdles is the high upfront cost of electric and hybrid vehicles. Charging infrastructure is underdeveloped in many regions. India has a little over 25,000 public charging stations, concentrated in urban regions, limiting consumer confidence," says Mehra.

HYBRIDS BRIDGE GAP

While it will take some time for Indian customers to widely adopt EVs, hybrids have emerged as a viable in-

CHARGED UP

- India targets 30% EV penetration by 2030
- At present, the share of EVs and hybrids is 8%

SOURCE VAHAN (MINISTRY OF HEAVY INDUSTRIES)

terim option. According to Deloitte's 2025 Global Automotive Consumer Study, 33% of Indian consumers prefer hybrid electric vehicles (HEVs), while 12% view plug-in hybrids (PHEVs) as a more sustainable and economical option.

According to Grant Thornton's Mehra, hybrid vehicles, which combine internal combustion with electric propulsion, bridge the gap by improving fuel efficiency and reducing emissions without relying entirely on charging infrastructure. "Hybrid and hydrogen vehicles are gaining traction in markets where full electrification faces infrastructural or range-related challenges," says Mehra.

At present, Maruti Suzuki has the largest hybrid vehicle portfolio. By 2030, it wants hybrid vehicles to account for 15-20% sales. "All our efforts are to maximise EV adoption. EV penetration will not be 100% tomorrow. It is important to reduce carbon emissions from the rest of the fleet. Strong hybrids reduce CO_2 emissions by over 30%," says Bharti.

Several automakers have retraced their hybrid strategy. Hyundai Motor India has announced plans to bring hybrids to the domestic market despite earlier apprehensions. Honda has also scaled back its global EV plans to focus on hybrids. "By 2030, we will strive to grow further and achieve total automobile sales volume above the current level of 3.6 million units, with a HEV sales target of 2.2 million units," President and CEO Toshihiro Mibe said during the 2025 Business Briefing on May 20.

CNG ALTERNATIVE

Unlike hybrids and EVs, CNG powertrains have managed to woo customers. They are, after all, not only economical but also sustainable. CNG accounts for over 15% of the domestic automobile market. Grant Thornton's Mehra says CNG vehicles provide an immediate reduction in CO_2 and particulate matter, making them a practical transitional solution, particularly for public transport and commercial fleets.

Automakers like Maruti Suzuki, Tata Motors and Hyundai are bullish on CNG. Every third car sold by Maruti Suzuki is CNG. The company is aiming for 35% CNG penetration by 2030. CNG models accounted for 25% of Tata Motors' sales in FY25. "It has been rocking for the last few years. It has seen 30% year-on-year rise despite 2% growth for the industry," says Chandra. According to Mehra, in 2024, CNG vehicles saw the strongest sales growth of 46%, driven by affordability, fuel efficiency and popularity among cost-conscious buyers and commercial users. Despite this, CNG penetration is likely to face a hurdle owing to the limited number of CNG stations.

ACHIEVING THE TARGET

By embracing a multi-fuel strategy, the industry is laying a pragmatic foundation for sustainable mobility. While EVs remain the long-term goal, transitional technologies like hybrids and CNG will play a critical role in bridging gaps in infrastructure, affordability and customer readiness. "While the industry is on the right path—with increasing investments in EV infrastructure, battery manufacturing and sustainable mobility solutions—it is not yet fully on track to meet net-zero emissions by 2030. Instead, the sector is more realistically aligned with India's national net-zero target of 2070, with 2030 serving as a critical milestone for deep emission cuts and technology transition," says Mehra. SUSTAINABILITY • MSMEs

TURNING GREEN FROM THE GROUND UP

INCREASINGLY, INVESTORS AND FOREIGN BUSINESSES ARE USING NON-FINANCIAL YARDSTICKS LIKE ESG TO ASSESS THE IMPACT THEIR PARTNERS HAVE ON THE ENVIRONMENT AND SOCIETY, MAKING IT CRUCIAL FOR MSMEs TO EMBRACE AND ADOPT ACCEPTABLE STANDARDS

BY **RIDDHIMA BHATNAGAR**

MUMBAI-BASED Leap India, which builds and operates warehouses for storing farm produce, offers its customers reusable packaging products such as pallets, crates and containers, reducing their reliance on single-use materials like plastics and paper.

Leap India is not the only company—classified among micro, small and medium enterprises (MSMEs)—that's embracing green and following a sustainable business model.

According to a survey by the Small Industries Development Bank of India (SIDBI) released in May, out of 2,097 MSMEs surveyed across 19 sectors, one-third have adopted some form of sustainable practices. While 31% have switched to energy-efficient lighting and machinery, 21% have adopted renewable energy sources, says the report.

These MSMEs have acted at least partly under pressure from

PHOTO BY **SUMIT KUMAR**

the Securities and Exchange Board of India (Sebi), the market regulator, and government initiatives to promote ESG, or environmental, social and governance, standards.

To be sure, ESG adoption among MSMEs is still at an early stage—often limited by capacity and awareness gaps, and resource constraints. That can no longer be an excuse for inaction by the MSMEs, which play a vital role in the economy, their presence cutting across sectors ranging from agriculture to automobile components, contributing 30% of gross value added, 45.7% of exports and employing 260 million people, according to the latest available figures.

STARTING SMALL

Increasingly, investors and foreign businesses are using yardsticks like ESG to assess the impact their partners leave on the environment and society at large, making it crucial for MSMEs to embrace and adopt an ESG framework.

For MSMEs, starting small and building on existing processes will lead to both efficiency and value, says Shailesh Tyagi, Partner in the sustainability and climate practice at Deloitte India. "ESG is no longer optional; it is becoming the blueprint for long-term value," he says.

Sebi's initial ESG mandate came into effect in financial year 2022-23 (FY23), requiring the top 1,000 listed companies by market capitalisation to file Business Responsibility and Sustainability Reports (BRSR). In FY24, the regulator went a step further by directing the top 250 listed companies to begin supply chain ESG disclosures, covering 75% of their suppliers.

Companies promptly raised a raft of red flags. Smaller companies lack ESG reporting capacity, went one complaint. Some flagged concerns over the burden of third-party verification and said the cost of complying with ESG standards was too high for companies already battling capital constraints.

Responding to these concerns, Sebi deferred the supply chain reporting timeline to FY26.

WHAT'S GOING RIGHT?

Some large industries like automotive, textiles, fast-moving consumer goods and information technology are already actively moving towards implementing ESG standards, says Anil Bhardwaj, Secretary General of the Federation of Indian Micro and Small & Medium Enterprises.

Meanwhile, MSMEs have been trying to comply with softer aspects of ESG like reducing emissions by switching to solar power and other non-conventional energy sources, Bhardwaj adds.

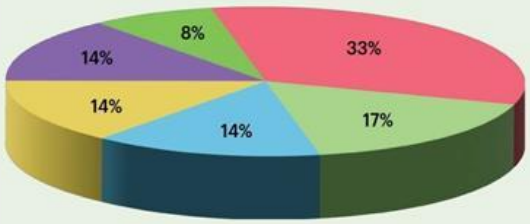

"Many MSMEs are now implementing simplified ESG frameworks like BRSR Lite to showcase sustainability practices and are collaborating with larger companies who are supporting sustainability among SMEs through ESG toolkits, templates and training to navigate reporting complexities," says Vinod Kumar, president of the India SME Forum.

Initiatives like Project Savannah, aimed at empowering MSMEs in their ESG reporting, are equipping companies with digital credentials and standardised tools to measure compliance, Kumar says. MSMEs are also receiving green certification and leveraging technology and financial support from government and state initiatives, he adds.

To tackle greenhouse gas emissions by MSMEs, the government launched two schemes under its Raising and Accelerating MSME

CHALLENGES IN ADOPTING ESG

• **The biggest issue MSMEs face is limited awareness**

LIMITED AWARENESS — AFFORDABILITY
IMPLEMENTATION COMPLEXITY — TIME
INSUFFICIENT INFRASTRUCTURE — ENVIRONMENTAL CHALLENGES

SOURCE SIDBI SURVEY REPORT

Productivity programme in December 2023.

Several larger organisations have already started supporting MSMEs. "Our partnerships with companies like Pointo, 3Ev and Urja Mobility involve battery leasing models that are both economically viable and environmentally sustainable, benefiting all stakeholders," says Pratik Kamdar, Co-founder and Chief Executive Officer of Neuron Energy, an MSME that makes batteries to power electric vehicles.

"In addition, some OEMs (original equipment manufacturers) are taking proactive steps by sharing audit templates, reporting tools, and training resources to help MSMEs meet ESG compliance requirements," Kamdar added.

CHALLENGES IN ESG IMPLEMENTATION

Even so, awareness of ESG among MSMEs is limited and implementation of the guidelines remains a significant challenge.

MSMEs are not yet mandated to comply with ESG regulations, and are confused about which standards to follow, how to prepare disclosures and what timelines to meet, says the SIDBI survey. Data collection and digital technology are other limitations.

"Data is very fragmented as industries have many facilities and there has to be a process in place to capture data and consolidate it in a systematic way," says Akash Keshav, Co-founder and CEO of Sprih, an ESG consulting firm with over 20 MSME clients. "Also, digital tools and monitoring systems essential for tracking ESG metrics aren't so affordable or accessible for many MSMEs."

Limited finances and resources to implement ESG standards have already put pressure on MSMEs in export-dependent industries like textiles and pharmaceuticals, whose customers in the US and UK, for instance, lay great store by such norms, says R. Sakthivel, founder & CEO of textile maker Daffodil and a member of the board of Tiruppur Exporters' Association. "It's very difficult, as unlike big companies, we don't have an ESG set-up and, hence, our margins have also been suffering due to this," Sakthivel says.

THE GREEN SHIFT

1. Per a SIDBI survey, a third of the 2,097 MSMEs across 19 sectors have implemented some forms of sustainable practices
2. 31% have switched to energy-efficient lighting and machinery and 21% have adopted renewable energy sources
3. The share of MSMEs in the country's GVA has increased from 27.3% in FY21 to 30.1% in FY23
4. MSMEs accounted for around 46% of India's exports in FY25

THE WAY AHEAD

Sure, some policy changes can help MSMEs in the transition towards full implementation of ESG standards. These include simplified ESG reporting standards that focus on material indicators tailored specifically to MSMEs.

The effort can begin with leveraging affordable digital solutions and centralised, user-friendly platforms that automate ESG data tracking, reporting, and self-certification that minimise manual work, says Kumar of the India SME Forum. Encouraging group reporting or a cluster-based approach can also reduce individual costs.

Additionally, allowing MSMEs to begin with self-assessments or third-party evaluations rather than filing expensive full audits can significantly lower verification costs without compromising data credibility, Kumar adds.

Siddharth Manchanda, Partner at IndusLaw, suggests a sectoral classification of ESG norms given that MSMEs cut across industries. Sebi can work with other regulators to prescribe compliance parameters for different industries.

If India can empower its MSMEs, there's a big opportunity awaiting it. "As global supply chains get reconfigured because of ongoing geopolitical shifts, India has a unique opportunity to move away from the traditional sources of competitive advantage—low labour and input costs—by focusing on green manufacturing," says Namrata Rana, Partner, National Head ESG, KPMG. This needs a value chain focus that encompasses not just the top companies, but their extended supply chain consisting of hundreds of MSMEs. BT

INDIA'S EDUCATIONAL RENAISSANCE

Visionary Leaders Powering a New Era in Private Higher Education

In the contemporary era, as India confronts globalization, technological disruptions, and the aspirations of a youthful population, the torch of educational reform is being carried forward by a new generation of leaders—particularly in the private higher education sector. These pioneers are not only expanding access to quality education but also elevating academic standards through innovation, global perspectives, and student-centric models.

India's journey in education has been profoundly influenced by transformative visionaries like Raja Ram Mohan Roy, Mahatma Gandhi, Jawaharlal Nehru, Dr. B.R. Ambedkar, and Dr. Sarvepalli Radhakrishnan. They firmly believed that education is the foundation of social justice, empowerment, and national development. Their ideals laid the groundwork for an education system centered around accessibility, critical thinking, and holistic development.

Carrying on these legacy, Private universities have today emerged as critical stakeholders in transforming India's higher education landscape. Institutions such as Ashoka University, Shiv Nadar University, OP Jindal Global University, Galgotias University, Manav Rachna University, Manipal Academy of Higher Education, Jaypee Institute of Information Technology, Azim Premji University, GLA University, and others are leading this renaissance. Their success is largely attributable to the dynamic visionaries at their helm.

Ashoka University for instance is widely credited with introducing the liberal arts model in India, cultivating interdisciplinary thinking and civic engagement. Spearheaded by co-founder Sanjeev Bikhchandani, Ashoka emphasizes academic excellence, social impact, and global exposure, producing graduates who are not only professionally equipped but also socially conscious.

Suneel Galgotia
Chancellor, Galgotias University

HOW DR. PRASHANT BHALLA IS SHAPING GLOBAL AND INDUSTRY ALIGNED EDUCATION WITH THE 4-I MODEL

Dr. Prashant Bhalla
President, MREI

India's higher education system, among the largest in the world, is at a pivotal crossroads. As the country surges ahead in technology, entrepreneurship, and global engagement, its educational institutions are being challenged to move beyond rote learning and silo'ed disciplines. The need of the hour is a holistic, future-focused framework that nurtures not just employability, but innovation, interdisciplinary thinking, and global citizenship.

At the forefront of this transformation is Dr. Prashant Bhalla, President of Manav Rachna Educational Institutions (MREI). Under his stewardship, Manav Rachna has emerged as a progressive educational ecosystem that reimagines learning through the 4 I's philosophy: Innovation, Industry Connect, Interdisciplinary Approach, and Internationalization. These pillars form the core of MREI's academic and institutional strategy in the higher education space.

Innovation is embedded in the DNA of Manav Rachna. Through hackathons, student-led startups, advanced prototyping labs, and patent facilitation programs, students are not just passive learners but active problem-solvers equipped to tackle real-world challenges.

Industry Connect ensures students graduate with more than just theoretical knowledge. From tie-ups with global giants like Google Cloud, Deloitte, L&T Edutech, Microsoft, and HCL to industry-led curricula and sponsored labs, Dr. Prashant Bhalla has cultivated a culture where academia and enterprise work hand in hand.

Interdisciplinary Thinking is deeply encouraged, enabling students to work across fields such as engineering, management, design, law, and healthcare. Collaborative research, cross-disciplinary innovation cells, and thematic student projects bring together diverse disciplines, mirroring the complexity of today's global problems.

Internationalization is not just an aspiration but a lived reality. With over 135 global academic collaborations, student mobility programs, and exposure to global faculty and pedagogy, Manav Rachna under Dr. Prashant Bhalla's leadership has become a gateway to the world. Recent collaborations with globally renowned institutions such as Purdue University Northwest (USA), American University (USA), KEDGE Business School (France), Temple University (USA), The University of Waikato (New Zealand), and Hotel & Tourism Management Institute (Switzerland) and many others have opened up new avenues for dual and joint degrees, credit transfers, semester exchanges, collaborative research, global internships, and accelerated master's pathways.

The results speak volumes. Manav Rachna's institutions are consistently ranked among India's top private universities, with MRIIRS holding NAAC A++ accreditation and QS 5-star ratings. Students from over 20 countries study at the campus. The global impact of the Manav Rachna legacy is also reflected in an alumni network of over 41,000 professionals across 60 nations.

Staying aligned with the evolving demands of education and industry, Manav Rachna continues to launch cutting-edge programmes that reflect current industry and societal needs, be it in artificial intelligence, sports sciences, sustainable development, or cybersecurity. Centres of Excellence in collaboration with global partners, new-age certifications, and a strong push towards research and innovation hubs are constantly shaping a campus environment that is future-ready.

What sets Dr. Prashant Bhalla apart is his ability to combine vision with execution. He carries forward the legacy of his father, Dr. O.P. Bhalla, with a deep sense of purpose, ensuring education remains a tool for empowerment, equity, and nation-building.

In a time when India seeks to become a knowledge superpower, his model offers a blueprint for what future-ready education can truly look like. Dr. Prashant Bhalla's leadership is defined by clarity of purpose and a deep-rooted belief that education should empower students to shape the world around them.

FOCUS
EDUCATION

Dr. Dhruv Galgotia
CEO, Galgotias University

In Greater Noida, Galgotias University, led by Chancellor Suneel Galgotia, is shaping a future-ready education model. Known for its strong industry linkages and outcome-based learning, Galgotias offers robust programs in engineering, law, business, and humanities, preparing students for success in the modern workforce. Supporting this vision is Dr. Dhruv Galgotia, CEO of Galgotias University, who brings a global outlook and youthful dynamism to the institution. Under his leadership, the university has embraced digital transformation, internationalization, and student innovation, ensuring that learners are equipped for the evolving demands of the global economy. Galgotias University under Dr. Dhruv Galgotias has embraced digital technologies to enhance learning and research. The university has established AI-driven research centers in partnership with industry leaders like HP and Intel, providing students with access to cutting-edge resources. Initiatives such as the Galgotias Student Centered Active Learning Ecosystem (G-SCALE) have redefined traditional education models, fostering interactive and collaborative learning environments. Dr. Galgotia places a strong emphasis on nurturing innovation and entrepreneurship among students. The university's iOS Development Centre has produced remarkable achievements, with eleven students winning Apple's prestigious Swift Student Challenge in 2025.

OP Jindal Global University, under the stewardship of Prof. (Dr.) C. Raj Kumar, has made notable advances in legal studies, public policy, and international affairs. Its rapid ascent in global rankings reflects its commitment to academic freedom, faculty diversity, and international collaboration.

Similarly, Shiv Nadar University, backed by philanthropist Shiv Nadar and the HCL Group, combines advanced research facilities with an interdisciplinary approach across science, technology, and humanities. The university fosters an environment where innovation and critical inquiry thrive.

Jaypee Institute of Information Technology (JIIT), Noida, led by Chancellor Manoj Gaur, blends academic rigor with real-world relevance. Under Mr. Gaur's leadership, JIIT has evolved into a premier institution emphasizing a blend of academic rigor and real-world application. His vision has been instrumental in fostering an environment that encourages innovation, research, and holistic development. Recognizing the importance of industry-academia collaboration, Mr. Gaur has championed partnerships that bridge the gap between theoretical knowledge and practical application, enhancing the employability of JIIT graduates.

Manoj Gaur
Chancellor,
Jaypee Institute of Information Technology

Another prominent education group in North India, Manav Rachna Educational Institutions (MREI), led by Dr. Prashant Bhalla, President of MREI, represents a stellar example of how private initiatives can build ecosystems of academic excellence, innovation, and entrepreneurship. Under his forward-looking leadership, Manav Rachna educational institutions have developed into a multidisciplinary, innovation-led educational hub, empowering thousands of students with skills, values, and global competencies. Dr. Bhalla's vision has fostered strategic industry partnerships, cutting-edge research, and a vibrant culture of sports and co-curricular achievements, making MREI a role model in holistic education.

Similarly Manipal Academy of Higher Education stands out as a trailblazer in private education. With decades of experience, it continues to set benchmarks in medical, engineering, and

Dr. Prashant Bhalla
President, MREI

management education, supported by a global alumni network and state-of-the-art infrastructure.

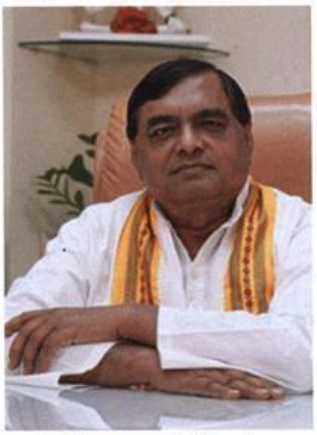

With a mission to uplift students from semi-urban and rural backgrounds, GLA University under the leadership of Chancellor Narayan Das Agrawal has emerged as a hub of excellence in engineering, pharmacy, and management. Chancellor Agrawal has also prioritized internationalization, with GLA University establishing partnerships with over 150 international institutions. These collaborations facilitate academic and cultural exchanges, enhancing the global competencies of students and faculty alike.

Through these multifaceted initiatives, Narayan Das Agrawal has significantly contributed to transforming

Narayan Das Agrawal
Chancellor, GLA University

FOCUS
EDUCATION

Shri Ajay Prakash Shrivastava
Honourable Chancellor, MUIT

higher education, making GLA University a model institution that balances academic rigor with inclusivity and industry relevance.

Maharishi University of Information Technology (MUIT), Noida, helmed by Chancellor Ajay Prakash Shrivastava, brings a unique philosophy to Indian higher education. By integrating consciousness-based learning with modern disciplines like IT, business, and law, MUIT promotes holistic student development.

Sanskriti University in Mathura is another institution making significant strides. Chancellor Dr. Sachin Gupta has transformed it into a vibrant center for innovation and research. The university offers a modern, student-centered learning environment that prioritizes character development alongside academic achievement.

Lingaya's Vidyapeeth, under the guidance of Chancellor Dr. Picheswar Gadde, emphasizes accessible, multidisciplinary education. It offers a range of programs in engineering, law, management, and humanities, with a strong focus on entrepreneurship and community upliftment. Dr. Picheswar Gadde, Chancellor of Lingaya's Vidyapeeth has been a transformative figure in Indian higher education. With over 25 years of experience in academia, he has steered the institution from a technical and management school to a multidisciplinary university offering programs in engineering, law, management, humanities, and more.

Shiv Nadar
Founder, Shiv Nadar University

Azim Premji University exemplifies this commitment to equity and social change. Founded by philanthropist Azim Premji, the university focuses on public policy, development, and education, aiming to create professionals who drive societal transformation.

Another prominent leader in the private education sector is Dr. Rajesh Kumar Gupta, Chairman of GNIOT Group of Institutions. With an unwavering focus on quality, discipline, and industry relevance, Dr. Gupta has transformed GNIOT into one of the most sought-after institutions in Greater Noida for engineering, management, and professional studies. His leadership has seen the integration of advanced technologies in teaching, extensive placement initiatives, and community-driven educational programs, providing students from diverse backgrounds a launchpad for career success and societal contribution.

Azim Premji
Founder, Azim Premji University

These institutions are redefining higher education by combining academic excellence with a commitment to inclusivity. Many offer scholarships, flexible admissions, and outreach initiatives to attract students from Tier II and Tier III cities, thereby democratizing access to world-class education.

What sets these institutions apart is their agility and vision in embracing emerging disciplines such as artificial intelligence, data science, environmental studies, and sustainability. Through modern pedagogical tools, cutting-edge research facilities, and global academic partnerships, they are nurturing a generation of learners equipped for the complexities of the 21st-century economy.

Dr. Picheswar Gadde
Chairman, Lingaya's Group of Institution

Crucially, the leaders of these universities are not only building educational institutions—they are nurturing ecosystems of innovation, values, and excellence. Their collective efforts are producing students who are not just employable but are also empathetic, curious, and globally minded.

In conclusion, as India aspires to become a knowledge-driven global economy, private universities and their visionary leaders are playing a pivotal role. By aligning the foundational ideals of India's educational heritage with the imperatives of the modern world, they are crafting a future where education is not only a tool for personal advancement but also a catalyst for national transformation. These changemakers are laying the groundwork for a more inclusive, dynamic, and globally competitive India.

Dr. Rajesh Kumar Gupta
Chairman, GNIOT Group of Institutions

COVER 21

India's Integrated targets Affordable Healthcare Access

Technology is reshaping healthcare, offering new ways to tackle long-standing gaps and expand access. With its vast population and diverse healthcare needs, India is making significant strides to build a robust digital health ecosystem. Flagship initiatives like the Ayushman Bharat Digital Mission (ABDM) are laying the digital backbone for a unified healthcare system, with over 568 million Ayushman Bharat Health Account (ABHA) IDs and 350 million health records already integrated. Managing the administration of over 2 billion doses of COVID vaccines, CoWIN platform set a global benchmark for precision, scale, and transparency in vaccine delivery, and is now being repurposed for broader immunisation tracking and health logistics. India's digital health sector is poised for exponential growth, with a recent BCG report, in collaboration with B Capital, projecting a surge from $2.7 billion in 2022 to nearly $37 billion by 2030. Let's explore the cutting-edge technologies, key players, and policy shifts propelling the country's digital health journey.

India's Integrated targets Affordable Healthcare Access

Technology is reshaping healthcare, offering new ways to tackle long-standing gaps and expand access. With its vast population and diverse healthcare needs, India is making significant strides to build a robust digital health ecosystem. Flagship initiatives like the Ayushman Bharat Digital Mission (ABDM) are laying the digital backbone for a unified healthcare system, with over 568 million Ayushman Bharat Health Account (ABHA) IDs and 350 million health records already integrated. Managing the administration of over 2 billion doses of COVID vaccines, CoWIN platform set a global benchmark for precision, scale, and transparency in vaccine delivery, and is now being repurposed for broader immunisation tracking and health logistics. India's digital health sector is poised for exponential growth, with a recent BCG report, in collaboration with B Capital, projecting a surge from $2.7 billion in 2022 to nearly $37 billion by 2030. Let's explore the cutting-edge technologies, key players, and policy shifts propelling the country's digital health journey.

From telemedicine to AI-driven diagnostics, India is leveraging digital innovation to transform its healthcare landscape. The telemedicine service eSanjeevani, is another noteworthy initiative by the government, launched by the Ministry of Health and Family Welfare. Originally designed for doctor-to-doctor consultations, it evolved into eSanjeevani OPD during the COVID-19 period to enable direct physician-to-patient care. As of August 2024, it has facilitated over 270 million consultations, connecting people in remote and underserved areas with quality healthcare. The upcoming eSanjeevani 2.0 aims to integrate point-of-care diagnostic data, enabling quicker diagnoses and personalised care.

These platforms are part of a larger digital vision under the ABDM, which aims to create a seamless, interoperable health ecosystem. With these platforms, India is laying the foundation for a unified digital healthcare infrastructure.

Acknowledging these efforts, a January 2025 article by the World Economic Forum praised India's strides, positioning it as a potential global leader in digital health. The report emphasised the critical role of public-private partnerships, strong data governance, and interoperability, underscoring how India's model could serve as a global benchmark for digital healthcare transformation.

Apart from government initiatives, several startups and researchers are working on developing digital health strategies. India's growing digital health landscape is also attracting global interest. A recent Dutch delegation in March 2025 expressed interest in C-CAMP's digital health innovations, particularly in labour-saving technologies for healthcare, pharmaceutical advancements using AI for drug discovery, and remote monitoring and telehealth solutions. These technologies are viewed as promising tools for medical triaging, improving accessibility, and optimising healthcare delivery in underserved regions.

India's AI push

The most talked-about technology, now deeply integrated into various industries and everyday life, holds significant implications for the healthcare sector. According to a Deloitte report, Artificial Intelligence (AI) in healthcare is expected to contribute $30 billion to India's GDP. Recognising this immense potential, India has launched a series of strategic initiatives and investments to revolutionise its healthcare ecosystem, making it more accessible and efficient.

The World Economic Forum has launched the India Digital Health Activator to drive AI adoption and ensure interoperability in healthcare systems. International collaboration is also gaining traction; India and France have identified digital health and antimicrobial resistance (AMR) as key areas for cooperation. Strengthening academic and institutional ties, Apollo Hospitals has partnered with the University of Leicester to establish a Centre for Digital Health & Precision Medicine in India, while Takeda's India Capability Centre (ICC) in Bengaluru is developing a specialised Global Capability Centre focused on digital health and R&D.

Industry leaders are equally engaged. Manipal Hospitals has joined hands with Google Cloud to advance AI-driven healthcare, and Zeiss India has launched an AI research lab for eyecare at the Indian Institute of Science in Bengaluru. Samsung R&D Institute, Noida and IIT Bombay have signed an MoU to pioneer research in digital health, AI, and other emerging technologies.

Key Innovations Shaping Digital Health in India

Some of the key innovations shaping digital health in India include genomics enabling precision medicine, AI-driven drug discovery, and the digitisation of diagnostics—all contributing to more personalised and efficient healthcare delivery.

Genomics driving precision care

In January 2025, India launched its Indian Genomic Data Set and the Indian Biological Data Centre (IBDC) portals. This initiative unlocks 10,000 whole genome sequencing (WGS) samples for researchers around the world, marking a significant milestone in the country's vision to build a self-reliant biotech ecosystem.

The IBDC is set to become a critical hub for genomic research, providing seamless access to valuable genetic information. The 10,000 WGS samples represent diverse Indian populations, offering researchers a rich catalogue of genetic variations. This initiative is poised to accelerate the development of genomic chips tailored to the Indian demographic, thereby enhancing the precision and accuracy of genetic studies.

Building on this momentum, global genomics leaders are turning their focus toward India. In April 2025, Oxford Nanopore Technologies, a UK-based company pioneering nanopore-based molecular sensing technology, announced strategic partnerships with two premier Indian institutions. The company signed Letters of Intent with the Biotechnology Research and Innovation Council-Centre for DNA Fingerprinting and Diagnostics (BRIC-CDFD) and the Biotechnology Research and

Stanford India Biodesign: 18-year Journey

In 2007, Stanford Biodesign forged a first-of-its-kind partnership with the Government of India to seed and nurture a new health technology innovation ecosystem in the country. So far, the Stanford Biodesign programme has driven innovation with 16 startups, 148 fellows, 48 medical devices, 147 IP filings, 7 commercialised products, and 13 summits that bring industry leaders together.

Stanford Biodesign's innovation ecosystem has given rise to impactful medical technologies transforming patient care. Among its commercialised technologies, Consure Medical leads with a comprehensive portfolio of active incontinence management products. At the same time, Sohum addresses newborn hearing loss with a unique screening solution for resource-poor settings. Windmill Health's Neobreathe empowers frontline health workers to resuscitate newborns effectively, and OrthoHeal's FlexiOh introduces a breathable, customisable cast for fracture immobilisation.

Emerging startups under the programme are pushing the boundaries of healthcare innovation. SparshMind Innovations is pioneering virtual reality-based neurological rehabilitation with ReMind-Home, while Prezitec Health enhances anaesthesia delivery with its iGuide system. Ripple Healthcare's HipPro+ is working to prevent fall-induced injuries, and Neuranics Lab's Muon reimagines diagnostics using AI-driven blood analysis. Innovations like Inochi Care's advanced wound dressing and Cureous Labs' Eturnal—an automated repositioning device for bedridden patients—aim to improve patient outcomes and quality of life. Other startups, including Crimson Healthcare's SphinX, RCupe Lifesciences' Ozyn-D and Chest Compression Device, Indio Labs' Bioscoop, Unino Healthcare's pleuraGoh, and Brun Health's fetal assessment tool, are addressing critical gaps in patient care and emergency response.

The programme's influence also extends through technology licensing to third-party manufacturers. InnAccel Technologies markets Noxeno, a device for safely removing nasal foreign bodies in children, while VFPL Medevice's Transfer Life Facilitates effortless patient transfers. HiCare LIMO provides innovative solutions for immobilising injured limbs in trauma cases, and Phoenix Medical Systems manufactures and markets devices designed by Windmill Health, amplifying their reach and impact.

It wouldn't be outlandish to say Stanford Biodesign has been instrumental in advancing health technology in India, fostering innovation and enabling the development of impactful medical solutions tailored to local needs.

Innovation Council-National Institute of Biomedical Genomics (BRIC-NIBMG). This agreement commits to the establishment of two new Centres of Excellence (CoE) in genomics, reinforcing India's positioning as a critical player in global genomic research.

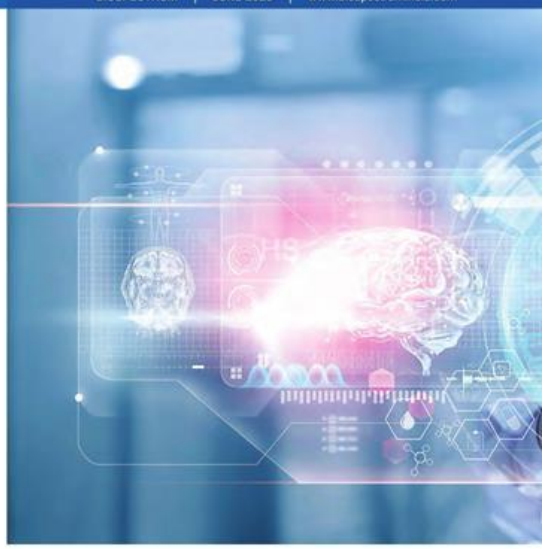

The surge in genomics infrastructure is also evident in the private sector. 4baseCare, an emerging leader in precision oncology, recently inaugurated its genomics laboratory in Bengaluru. The company also unveiled the Global Cancer Diversity Atlas (GCDA)—an initiative aimed at bridging the genomics data gap in cancer care.

Experts are equally bullish on the transformative potential of genomics. "Genomics will significantly impact human health over the next 5-10 years by enabling precision medicine, early disease detection, and personalised treatments. For instance, genomics can identify genetic risks for conditions like heart disease and cancer, guiding preventive care. In India, the Genome India Project aims to map the genetic diversity of the population, creating a reference database for disease prediction and personalised healthcare," said Dr Vikram Venkateswaran, Partner, Healthcare & Life Sciences, Deloitte India.

Several firms are already driving breakthroughs in precision medicine through genomics. Strand Life Sciences has leveraged genomics to develop tests for hereditary cancers, enabling early detection and personalised treatment options tailored specifically for Indian patients.

Further amplifying India's genomic landscape, Noida-based Vgenomics, a leader in precision health, recently announced a strategic collaboration with Meril Genomics, a trusted provider in diagnostics and molecular biology. This partnership aims to deliver advanced genomic diagnostics to hospitals and research centres across India. By combining Vgenomics' expertise in bioinformatics, AI-driven research, and translational genomics with Meril Genomics' strengths in diagnostics and molecular biology, the collaboration is set to significantly expand the reach of precision medicine.

"Leading Indian corporate hospitals have already started integrating genome sequencing as

"While a lot of progress has been made, there are still opportunities to make more out of the data being held in hospitals. Certain regulatory guardrails would also help. I believe the DPDPA is a step in the right direction. It gives the much-needed incentive for hospitals to assess their data structures and make the necessary changes to ensure that the data can be used for more clinical research and innovation on the Indian genotype that would boost the care outcomes.

Dr Vikram Venkateswaran,
Partner, Healthcare & Life Sciences, Deloitte India

part of their treatment protocols. Most of them are already using this for expecting mothers, especially if there are risk indications like older expecting mothers, while testing for conditions like Down's Syndrome or Autism. Oncology is another area where molecular precision medicine, by analysing patients' genetic information, helps hospitals to identify specific mutations associated with cancer. This approach allows for the development of targeted therapies, improving treatment efficacy and patient outcomes. While this is just scratching the surface. The availability of high-power computers along with awareness within the medical and patient community has contributed to the adoption of genomics," said Dr Venkateswaran.

India's AI leap in drug discovery

AI is reshaping drug discovery, with leading pharma companies embedding it across their R&D pipelines. Globally, players like XtalPi in China and Standigm in South Korea are using machine learning and computational chemistry to fast-track drug design.

Now, India is stepping onto this stage with a surge of AI-driven startups focused on revolutionising drug discovery. These emerging companies are harnessing advanced algorithms and big data analytics to identify novel drug candidates faster and more efficiently. One such pioneer is Boltzmann Labs, with its vision to transform drug discovery through data-driven solutions. The company offers a comprehensive suite of products and services covering target and biomarker identification, small molecule design, antibody design, protein engineering, and custom synthesis planning—all powered by AI-driven technologies.

Another promising player is Peptris Technologies, an AI-powered preclinical drug discovery company. In March 2025, Peptris made headlines by out-licensing India's first AI-discovered drug candidate to US-based Revio Therapeutics.

Several other startups are also reimagining the AI-driven drug discovery process across India. Bengaluru-based Prescience Insilico is accelerating drug and materials discovery with its AI-driven platform, PRinS3. Sravathi AI focuses on designing and developing molecules and materials, collaborating across the R&D pipeline. Molecule AI, recognised at BioSpectrum Asia 2024, is gaining traction with its flagship platform, Molecule GEN.

Even established Indian pharmaceutical giants are embracing AI. Aurigene Pharmaceutical Services Ltd., the CDMO arm of Dr. Reddy's Laboratories, recently launched Aurigene.AI, an end-to-end AI and machine learning-assisted drug discovery platform.

Digitising Diagnostics

Digital pathology is emerging as a key area of innovation. In January 2025, IIIT-Hyderabad and Nizam's Institute of Medical Sciences (NIMS) launched India's first comprehensive pathology dataset. The India Pathology Dataset (IPD) project—a multi-stakeholder initiative involving academia, hospitals, industry, and the government-aims to digitise slide images of tissue biopsies. This project is expected to enhance clinical decision-making, reduce the risks associated with handling physical slides, and improve turnaround times for

diagnostics. By leveraging AI, the IPD project also aims to open new avenues for research in pathology.

Bengaluru-based startup SigTuple is also making strides in this space with its digital pathology platform capable of analysing blood samples remotely. This innovation is extending access to specialist diagnostics in areas lacking adequate medical facilities.

According to Dr Venkateswaran, "Digital pathology platforms can analyse specimens in record time, annotate them, and provide initial findings, allowing pathologists to focus on critical areas. This optimises analysis time and enhances the detection of key findings."

AI is also driving change in medical imaging. In May 2025, Rajalakshmi Medical College Hospital and Research Institute in Chennai inaugurated the Rajalakshmi Advanced Diagnostics and Applied Radiomics (RADAR) Centre. This facility focuses on precision diagnostics through AI-enabled imaging, aiming to improve diagnostic accuracy and patient outcomes.

Qure.ai, a leader in AI-based medical imaging, is reshaping the radiology landscape with deep learning tools that automate the interpretation of X-rays, CT scans, and ultrasounds. Its technology accelerates diagnosis and improves healthcare accessibility. In April 2025, AstraZeneca partnered with Qure.ai to complete 5 million AI-enabled chest X-rays (CXRs) across more than 20 countries.

Tata Elxsi, through its innovation arm, is working on AI-powered medical imaging, while Google has partnered with Forus Health and AuroLab to scale up diabetic retinopathy screening across India.

Another area where AI is making significant strides is early diagnosis. Several Indian firms are launching innovative tools aimed at early detection and preventive care. Redcliffe Labs recently introduced a digital prediabetes risk checker, enabling early-stage identification and intervention.

Breaking Barriers in Digital Health

A major challenge in scaling India's digital healthcare ecosystem is the uneven distribution of technology and infrastructure across the country. Urban areas generally benefit from better connectivity and digital literacy, while rural regions often face significant barriers, including limited internet access and inadequate IT infrastructure. Although rural India had over 400 million internet subscribers as of 2024, the connectivity quality is frequently insufficient to support reliable digital health services, according to a paper in the Nature publication.

Concerns around data privacy and security remain significant barriers to the adoption of ABDM. The digitisation of health records demands robust data protection measures to secure sensitive patient information, especially considering the vast scale of ABDM. The Digital Personal Data Protection Act (DPDPA) of 2023 marks a critical step in India's efforts to regulate personal data processing and uphold data privacy, the paper further noted.

"While a lot of progress has been made, there are still opportunities to make more out of the data being held in hospitals. Certain regulatory guardrails would also help. I believe the DPDPA is a step in the right direction. It gives the much-needed incentive for hospitals to assess their data structures and make the necessary changes to ensure that the data can be used for more clinical research and innovation on the Indian genotype that would boost the care outcomes. I also believe that we need a centralised regulatory authority like what RBI has for financial services. This will ensure that there is uniformity in the regulations and hospitals are not overburdened by complying with multiple regulations both at the state and central levels," added Dr Venkateswaran.

India's digital health sector is poised for exponential growth, with a recent BCG report, in collaboration with B Capital, projecting a surge from $2.7 billion in 2022 to nearly $37 billion by 2030. Overcoming these challenges will be vital to unlocking the full potential of digital health, positioning India as a global leader in tech-enabled healthcare delivery. BS

IC POWER PLAY

HAS CONTINUED TO RESHAPE INDIA'S ECONOMY THROUGH BOLD AND TAX REFORMS. By Ashutosh Kumar

WARM WELCOME Prime Minister Narendra Modi at the Adampur air force station in Punjab on May 13, 2025, days after Operation Sindoor.

IN JUNE LAST YEAR, when the results of the Lok Sabha elections were announced and the Bharatiya Janata Party secured 240 seats, it had to depend on its National Democratic Alliance partners to form a government. At that moment, the question on everyone's mind was, will Prime Minister Narendra Modi be able to successfully lead an alliance without the BJP being in the majority?

Given the compulsions of alliance leaders under previous coalitions, the concern was whether coalition pressures will undermine the policy plank of the government.

As the BJP-led NDA government, or Modi 3.0, completes one year in office on June 9, sceptics have been silenced. Mega initiatives have been taken by the government without any visible cracks, even on sensitive issues, including the controversial Waqf (Amendment) Bill, 2024.

Major decisions have been taken on the economic front as well. More than a dozen projects have been announced in the last one year by the Union Cabinet across sectors, entailing economic benefits to the tune of ₹4 lakh crore. India's economy, the fastest growing in the world, continues to remain stable with mega investments lined up in infrastructure, semiconductors, and sunrise sectors.

The government has also showcased its strength in defence by clamping down on terror outfits based in Pakistan and Pakistan-occupied Jammu and Kashmir in the wake of the Pahalgam attack. Indian forces destroyed some Pakistani airbases, establishing a new normal that terror strikes will be akin to a war on the nation.

Macroeconomic stability

That said, the Indian economy has remained largely stable over the past one year, even in the wake of global tremors emanating from America's Liberation Day tariff tantrum, which kicked off on April 2, 2025, with "reciprocal tariffs", but waned soon as the Trump administration pressed the pause button, given the retaliation from China.

Also, fears of a spike in inflation, a growth slump, and recession, along with the non-compromising stand of the U.S. Federal Reserve on monetary easing, led the Trump administration to renegotiate a trade deal with China, which has now been sealed.

The only fallout for India in the build-up to the MAGA (Make America Great Again) din of Donald Trump has been foreign institutional investor (FII) outflows and the subsequent hammering of the rupee. FIIs pulled out a net ₹1.27 lakh crore in FY25, of which ₹1 lakh crore was offloaded between September 2024 and March 2025. From a high of 83.47 against the dollar on September 20, the rupee fell to 85.55 on May 20, after touching a low of 87.78 on February 7, despite minimal intervention by the Reserve Bank of India. The good news, however, is that the country's foreign exchange reserves have risen to a seven-month high of $690.6 billion as on May 9, 2025.

The growth engine is also running at a fast pace.

According to data released by the Ministry of Statistics, real GDP growth in Q4FY25 accelerated to 7.4%, against 6.4% in Q3. The economy expanded by 6.5% in FY25, compared with a 9.2% growth in FY24. The second advance estimates for FY25 had projected a real GDP growth rate of 6.5%, and a nominal growth rate of 9.9%.

The government expects the economy to grow in the range of 6.3% to 6.8% in the longer term. Chief economic advisor V. Anantha Nageswaran pointed to silver linings on the macroeconomic front in his address at the CII Annual Business Summit. "Energy prices are much lower. Regardless of how the tariff numbers will play out after 90-day expiration from the Liberation Day, there will be some sectors where India did not enjoy an advantage before, but may enjoy an advantage later from the tariff perspective," Nageswaran said. "Progress of monsoon is good and there is an expectation that it will be above average, and it is likely to be well distributed."

The momentum in the economy picked up in Q4FY25, and is continuing in Q1FY26, Nageswaran said after the release of the latest GDP numbers. "This is a good sign."

Consulting firm Deloitte is bullish on the momentum and the "inherent strength" in the economy, evident from the upward revision of the 2023-24 GDP growth rate to 9.2% (the highest in 12 years), compared with 8.2% estimated earlier. "The optimism is carried forward, as we see a good jump in high-frequency indicators such as the Goods and Services Tax (GST), auto sales, and sales of fast-moving consumer goods in recent months," it says in its India Economic Outlook 2025.

Oiling India's growth engine

India continues to enjoy the distinction of being the fastest-growing major economy globally. The International Monetary Fund's World Economic Outlook released in

THE SCORECARD

A LOOK AT SOME OF THE KEY ACHIEVEMENTS OF THE GOVERNMENT IN THE PAST YEAR.

FASTEST-GROWING ECONOMY

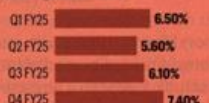

THE FINE PRINT

- GDP growth at 6.5% in FY25.
- India retains status of the fastest-growing major global economy.

IMPACT

- A major fillip to global investor confidence.

STABLE GDP
(GDP growth rate)

TIGHT LEASH ON INFLATION
(Retail inflation)

*Projected

BIG-BANG INFRA PUSH

THE FINE PRINT

- Infra outlay increased to ₹11.11 lakh crore (3.4% of GDP).
- Capex worth ₹10.52 lakh crore spent in FY25.

IMPACT

- Highways, railways, ports, and shipping see major fund flows.

INCOME TAX RELIEF

THE FINE PRINT

- Annual income up to ₹12 lakh made tax-free.
- New Direct Tax Code Bill tabled in Parliament to repeal the I-T Act, 1961.

IMPACT

- Tax relief a much-awaited reprieve for the middle class.
- Move expected to boost consumption in the economy.
- New Tax Code Bill to simplify tax provisions, ensuring better compliance.

TRADE TIES

THE FINE PRINT

- India inks trade pack with the U.K.
- Talks on for 10 more FTAs, bilateral investment agreements.
- India-EU FTA by 2025-end.

IMPACT

- Negotiations to tilt trade balance in India's favour.
- Move aims to boost domestic manufacturing.

PM INTERNSHIP SCHEME

THE FINE PRINT

- 12-month internship scheme for employable youth at top 500 companies for a monthly stipend of ₹5,000.

IMPACT

- 28,141 youth currently undergoing internships under the first phase of the scheme.

April says the Indian economy is expected to grow 6.3% in 2026, leaving behind global and regional peers by a high margin—China's economic growth has been pegged at 4% each in 2025 and 2026, and that of the U.S. at 1.8% and 1.7%, respectively. Global economic growth has also been projected much lower, at 2.8% in 2025 and 3.0% in 2026 according to the IMF.

Experts say the factors that are expected to propel India's growth engine include benign inflation (the retail inflation rate hit a six-year low of 3.16% in April) and free trade agreements (FTAs), which the Ministry of Commerce is aggressively pursuing.

"Prices of cereals coming down are a big positive. Vegetables and fruits tend to have a little erratic pattern. But cereals distinctly coming down means lower food inflation for a couple of quarters at least. It opens up space on the household budget for discretionary consumption. With this, consumer sentiment is expected to pick up," says Rajni Thakur, chief economist, L&T Finance.

U.K. FTA done, U.S. next?

A major trade breakthrough took place on May 6, with the finalisation of the India-U.K. FTA, which will provide zero duty access to 99% of India's exports to the U.K. The

pact also promises to remove/reduce tariffs on 92% of goods that are imported from the U.K. "Bilateral trade, valued at $60 billion (£42.6 billion) in 2024, is projected to double to $100 billion (£75 billion) by 2030," EY says in its U.K.-India FTA alert.

Within days of signing the deal, commerce minister Piyush Goyal held talks with U.S. commerce secretary Howard Lutnick on the India-U.S. bilateral trade agreement, on which negotiations have been going on. "Good discussions with Secretary Howard Lutnick towards expediting the first tranche of India-U.S. Bilateral Trade Agreement," Goyal said in a post on X on May 20.

A preliminary agreement is likely by the end of the first half of FY26. According to the India-U.S. joint statement dated February 13, 2025, both sides have agreed to expand bilateral trade to $500 billion by 2030.

Other key deals

Deliberations are underway on trade pacts with around 10 partners, a commerce ministry source close to the development told *Fortune India*. "Negotiations are on with a number of trading partners, including the U.S. and the EU. Efforts are also on to forge new ties with other nations."

India and the EU have decided to conclude FTA negotiations by the year-end. Goyal met EU commissioner for trade and economic security, Maros Sefcovic, in Brussels on May 1. India and Chile, too, are planning a Comprehensive Economic Partnership Agreement (CEPA), encompassing technology, health, agriculture, and critical minerals, among others. Under CEPA, Indian companies will bid for lithium in Chile.

India and New Zealand have agreed to revive FTA negotiations, stalled for over a decade now. India is also advancing CEPA talks with Oman, and has inked a pact to enhance trade and investment with the European Free Trade Association comprising Iceland, Liechtenstein, Norway, and Switzerland.

The ASEAN-India Trade in Goods Agreement (AITIGA), signed in 2009, is also being reviewed. In addition to the above, India and Qatar are scouting for FTA opportunities. Both countries plan to double bilateral trade to $28 billion in the next five years. An India-Canada CEPA, an India-GCC (Gulf Cooperation Council) FTA and an investment treaty with Saudi Arabia are also in the pipeline.

Tax relief

In fact, the benefit of nil taxes on annual income up to ₹12 lakh announced in the Budget was one of the bold moves of the Modi government. In one stroke, 15 million taxpayers were moved out of the tax net, and the decision cost the government ₹1 lakh crore in terms of revenue foregone. According to Deloitte, the move will add 0.6-0.7% to the country's GDP.

OTHER BIG DECISIONS

Housing, health, research, space... some of the Centre's focus areas.

1 Development of an all-weather greenfield deep draft port at Vadhavan, Maharashtra for ₹76,200 crore.

2 Viability Gap Funding scheme for offshore wind energy projects at a total outlay of ₹7,453 crore.

3 Addition of 30 million rural and urban households under the Pradhan Mantri Awas Yojana.

4 The BioE3 (Biotechnology for Economy, Environment and Employment) Policy to boost bio-manufacturing.

5 Approval to build the first unit of the Bharatiya Antariksh Station under the Gaganyaan programme.

6 Health coverage for senior citizens above 70 under the Ayushman Bharat Pradhan Mantri Arogya Yojana.

7 Research in critical mineral technologies through the ₹16,300-crore National Critical Mineral Mission.

8 The Electronics Component Manufacturing Scheme is set to attract investments worth ₹60,000 crore.

Apart from these initiatives, the government is going all guns blazing in the infrastructure sector, and has come out with a scheme to provide paid internships to its youth in the top 500 companies. Central capital expenditure has surpassed the FY25 target of ₹10.18 lakh crore, spending a total of ₹10.52 lakh crore, despite initial hiccups due to elections. A record expenditure of ₹2.4 lakh crore has been done in March alone. Besides, ports have been one of the key focus areas for the government, with the Centre approving the ₹76,000-crore Vadhavan port in Maharashtra.

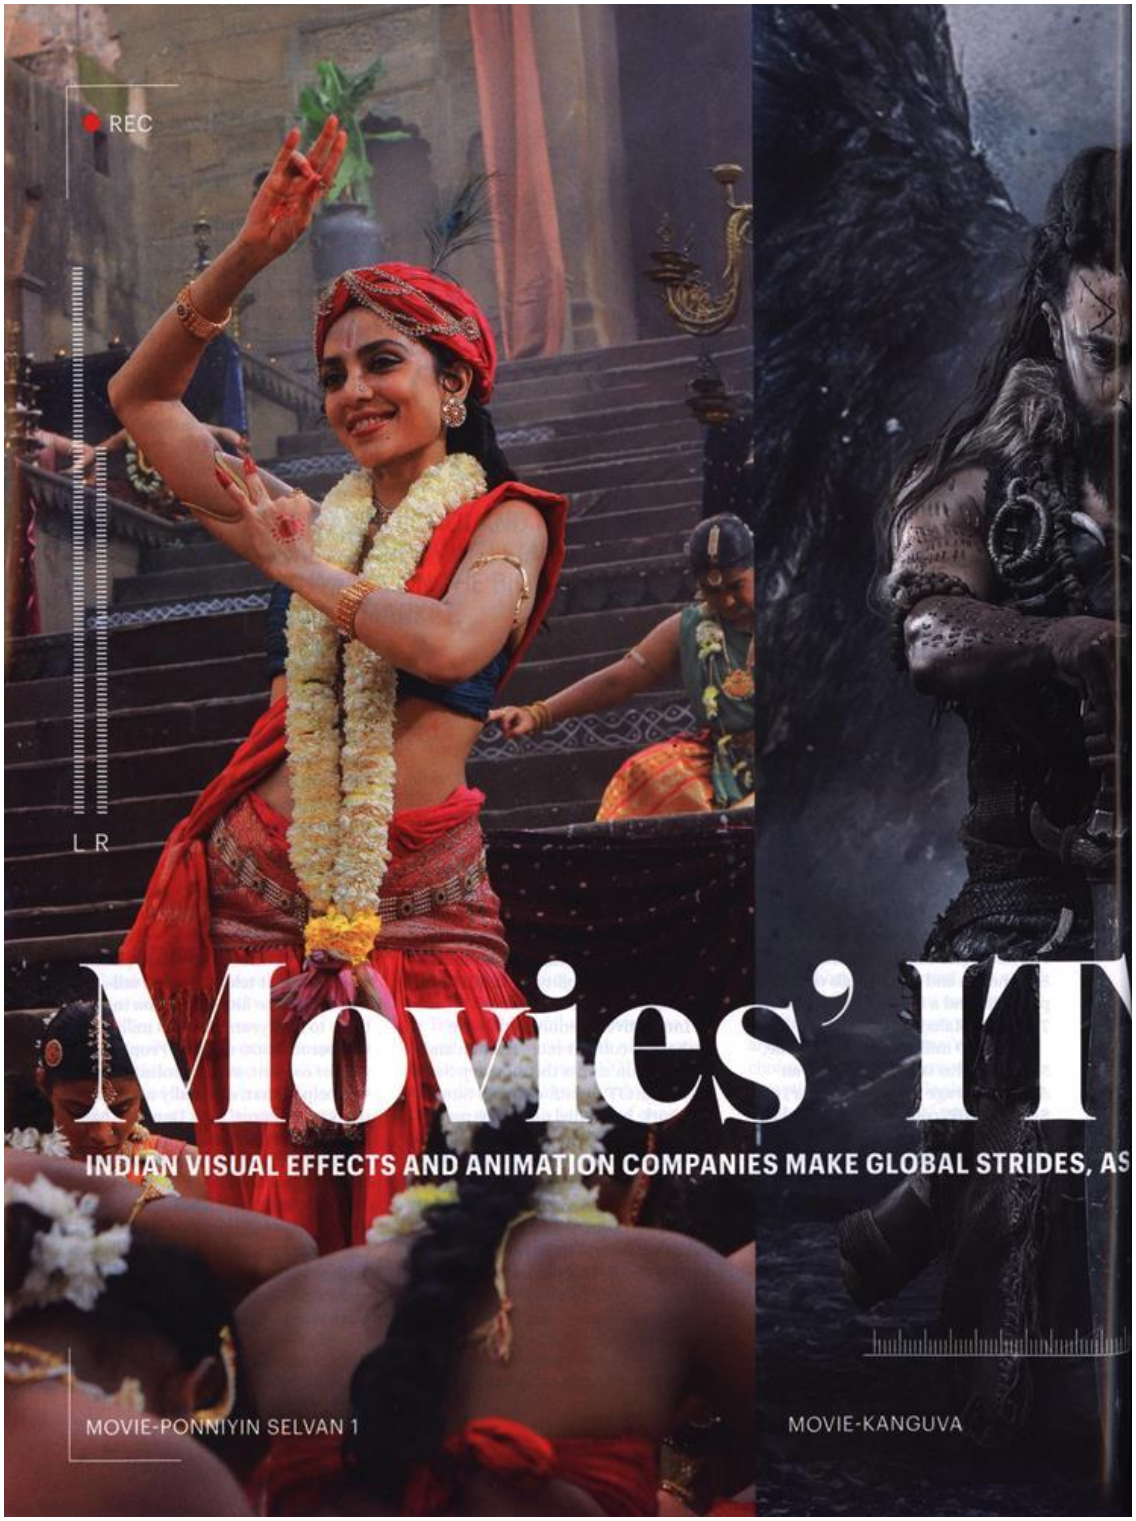

Modi 3.0 has largely remained unaffected by the so-called coalition compulsions. Mega decisions have been taken on the economic front, which are expected to serve as a launch pad for future growth.

DOMESTIC BUSINESS ALSO PICKS UP DUE TO INCREASING OTT PENETRATION.
BY RUKMINI RAO
F1.8 AUTO ISO
MOVIE-KANTARA

WHEN JAMES CAMERON'S Avatar hit the screens in 2009 and set a record for the highest opening weekend gross for a non-franchise, non-sequel film, two things happened. It set off the craze for 3D movies, and Indian visual effects companies got recognised in Hollywood beyond being low-cost outsourcing shops. The gainer in this case was Prime Focus, an established Indian visual effects company founded in 1997 by Namit Malhotra. It used proprietary software to craft a tenth of the total VFX in Avatar and its wondrous alternative world of Pandora.

Since then, India's audio-visual and computer graphics (AVCG) companies have worked on many big-budget movie projects such as *Avatar 2*, *Wakanda*, *Dune*, and the series *Lucifer*. Then came streaming technology, which allowed viewers to watch content of their choice over the internet, and artificial intelligence tools. (No coincidence that, in 2023, when Hollywood actors and writers went on strike, one of their fears was that producers would use AI to edge them out.)

All these mean more business for India's AVCG industry. The film, television, and online curated content (OCC) industry in India is booming, with revenues rising 18% since FY19 to around $13.1 billion, according to audit firm Deloitte.

A joint report by Deloitte and the Motion Pictures Association, representing top Hollywood studios, says the Indian AVCG industry will double its revenues by 2026. The report, released in May this year, says India's animation and VFX (AVFX) industry will grow to $2.2 billion by 2026 from $1.3 billion in 2023. By 2032, it will employ 2.3 million people or nearly 10x the number in 2023.

Today, India's AVCG sector has big players such as The Moving Picture Company, DNEG, Red Chillies VFX, Reliance Animation; mid-size ones that have gone public, such as PhantomFX, Digikore Studios and Basilic Fly Studio; and small firms with fewer than 50 people. The sector handles international projects as well as Indian cinema and OTT content.

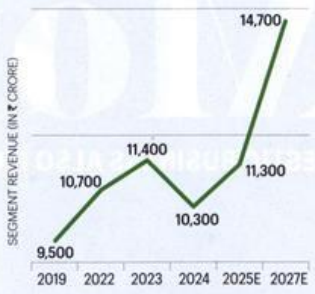

What underpins the industry

According to a joint report by professional services firm EY and the Federation of Indian Chambers of Commerce & Industry (Ficci), the VFX and animation sector is one of the fastest-growing segments in the media and entertainment space.

The EY-Ficci report, captioned 'Shape the future: The revolution in Indian Media and Entertainment sector', says the VFX and animation segment reported a CAGR of 6.2% be-

STEADY RISE

Animation and VFX

12.5% CAGR 2024-2027

GROSS OF TAXES; SOURCE: EY ESTIMATES

tween 2019 and 2023, and is expected to double by 2027 to 12.5%.

With *Avatar* having set off a craze for 3D, Prime Focus got another landmark project the next year: the post-production conversion of *Clash of the Titans* from 2D to 3D.

The company never looked back. In 2014, its creative services division, Prime Focus World, merged with Europe-based DNEG, an Academy Award-winning creative services firm. The resultant Amsterdam-headquartered entity was called DNEG Group, a subsidiary of Prime Focus Ltd. DNEG has 19 studios across the world, including in London, Vancouver, Los Angeles, Toronto, and Sydney.

It went on to work in Hollywood productions such as *Avatar: The Last Airbender*, *Transformers: Rise of the Beasts*, and *Oppenheimer*, and Bollywood movies *Kalki 2829 AD* and *Fighter*, among others.

In July 2024, DNEG Group secured a $200-million investment from Abu Dhabi-based United Al Saqer Group. DNEG Group CEO Malhotra had then said that the funds would be deployed for service and market expansion. It now has a studio in Abu Dhabi.

However, for Malhotra, the pinnacle of success came in March this year when *Dune: Part Two*, for which DNEG was the lead VFX partner, took home the Academy Award for Visual Effects. The company delivered around 1,000 VFX shots, creating large-scale CG environments, massive crowds, and detailed creature animation such as giant sandworms in the movie.

The big-ticket projects notwithstanding, the Hollywood exposure cost Prime Focus Ltd dearly in the 2023 strike. The company's consolidated revenue plummeted from ₹4,644.26 crore in FY23 to ₹3,950.54 crore in FY24. As a result, from a net profit of ₹147.29 crore in FY23, the company incurred a net loss of ₹404.54 crore in FY24.

However, that hasn't dampened the spirits of Prime Focus Ltd, which has around 10,400 employees. The expansion plans are on track. In India, Prime Focus has studios in Mumbai, Chennai, Mohali, Bengaluru, Patna, Hyderabad, and Pune, among others. Recently, Prime Focus signed a Memorandum of Understanding with the Maharashtra government to set up an advanced tech & digital content creation hub worth ₹3,000 crore in Mumbai. "The new site will become a worldwide leisure destination, right at the heart of one of the world's oldest filmmaking industries. We are bringing India to the world by bringing the world to India," CEO Malhotra had said.

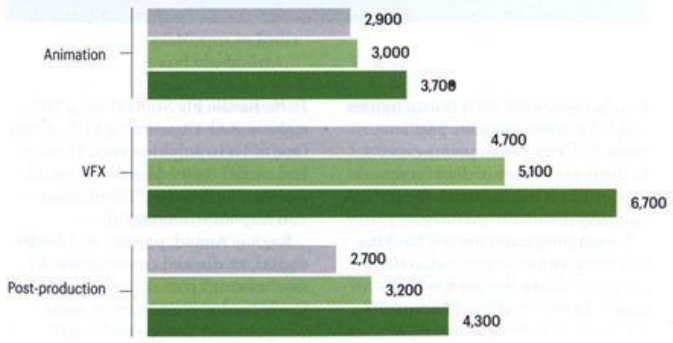

Meanwhile, smaller players such as PhantomFX, DigiKore and Basilic Fly Studios have also been growing since the Covid-19 pandemic disrupted life.

Basilic Fly Studio's co-founder, Balakrishnan Rii, began as an intern at the famous post-production house Prasad group in Chennai and then spent a few years at The Moving Picture Company, a British VFX major. Balakrishnan co-founded Basilic Fly Studio in 2013. The big break was the VFX work for *The Legend of Hercules* (2014). Basilic was given two months to work on shots that required complex execution skills.

"Only global studios used to have the

SOURCE: DELOITTE-MPA REPORT 2025

kind of talent required for the work, but we were not just the only Indian firm, but also among the four or five global companies that were selected to execute this high-pressure project," says Balakrishnan.

Today, 75% of Basilic Fly's business comes from clients in Europe and North America. Basilic Fly's revenues have grown from ₹25 crore in FY22 to ₹120 crore in FY25, while profit margins have surged from 6.7% in FY22 to 49.3% in FY25. Basilic attributes the high margins to resource management and optimising employee costs. Also, movie producers are nowadays onboarding VFX studios right at the start, along with the cast and crew.

Pune-headquartered Digikore Studios started in 2000, doing mainly animation and graphics work. It got its big break after 10 years, when it bagged the work of converting the 1997 Cameron hit, *Titanic*, into 3D. Abhishek More, Digikore's MD, recalls "cold-calling" Cameron with a flood of emails that did not fetch a single reply. But the production house handling the conversion work decided to try out Digikore. More chuckles, saying Cameron must have asked the production house to try out Digikore "just to get me off his back".

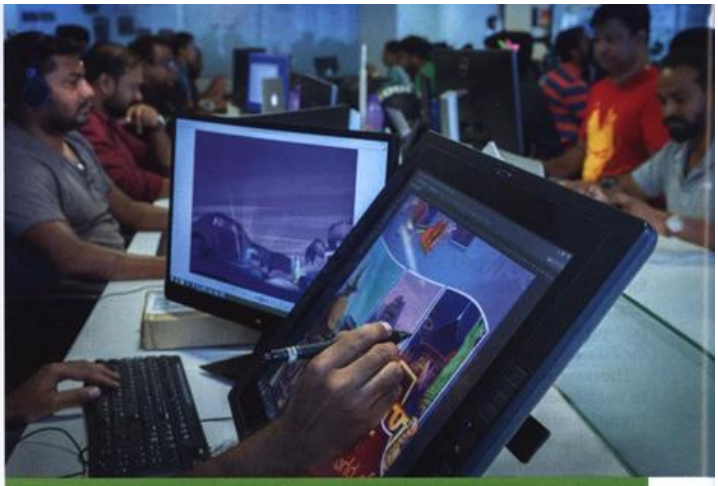

While in-the-face visual effects form just about 10% of the business revenue, the other 90% comes from invisible effects work, says More, citing *Haider*, a 2014 political crime thriller. "*Haider* was completely done by us with Vishal Bhardwaj way back. Half the movie was VFX because you can't film in certain areas in Kashmir. A lot of it was shot on green screen, and everything else was VFX," says More.

Digikore also has an office in Montreal, Canada, where it executes much work for its North American clients, such as Hulu, Disney, and Netflix. The Montreal location also offers a huge pricing difference compared with work done in India.

Digikore, which reported revenues of ₹22 crore in the first half of FY25, has also seen work from Indian movies and OTTs shoot up in the past few years. In FY26, the company expects to increase its share of direct revenues compared with outsourced ones, which currently dominate revenues.

Indian companies are not banking just on work coming to India: they are going where the work is in demand. In March 2024, PhantomFX finalised an agreement to acquire 80% of Tippett Studio, a U.S. company known for its work in *Jurassic Park*. Basilic Fly Studio took a 70% stake in BAFTA-winning VFX studio One of Us in July that year. The two had earlier teamed up for *Fantastic Beasts: The Secrets of Dumbledore*, and *Napoleon*, among others.

Raghav Anand, partner and leader-digital, media and convergence, EY, says inherent cost structures and Covid bankruptcies turned many companies in Europe and North America into attractive bargains for Indian companies.

PHOTOGRAPH BY NARENDRA BISHT

THE GOVERNMENT PUSH

The Centre has approved setting up of a National Centre of Excellence (NCoE) for animation, visual effects, gaming, comics, and extended reality (AVGC-XR) in Mumbai.

The Karnataka government has earmarked the KITVEN Fund-4, offering **₹20 crore,** for AVGC startups.

The Kerala government is looking to generate **50,000 jobs,** train **10,000 professionals** and set up 250 startups by 2029 through its AVGC-XR policy.

ANIMATION'S GLOBAL FOOTPRINT

Chennai-based **PhantomFX** has finalised an agreement to acquire a majority stake in the U.S.-based **Tippett Studio.**

Mumbai's **Digikore Studios** is set to launch a cloud-based metaverse marketplace for virtual production sets; it has a library of **250 virtual production sets** for films, TV, and photography.

Chennai-based **Basilic Fly Studio** has picked up a 70% stake in London's VFX studio One of Us.

The UAE's United AI Saqer Group recently invested **$200 million** in **DNEG Group's Brahma division** and opened a studio in Abu Dhabi.

Anand says the acquisitions abroad allowed the Indian studios to get work as brands rather than being looked down upon as outsourced agents. This means better pricing for the work they do.

While the big and medium companies battle for large projects in India and abroad, small shops with 20-30 employees depend on personal contacts to get work, which is often for tighter margins, and they have to work on multiple projects simultaneously. Kochi-based Turbo Digital Media, a post-production and VFX company that works in non-Hindi movies, got the Kannada blockbuster *Kantara* because its actor-director Rishab Shetty knew Lavan Prakash, one of the two brothers who founded the company, from some earlier project. Turbo has worked with directors such as S.S. Rajamouli and Shankar, and in movies such as director Sathya Mathiyalagan's *Vellaiyan* and Nissam Basheer's psychological thriller *Rorschach*.

OTT and AI disruption

The Covid-19 pandemic's restrictions on gatherings left multiplexes empty, and cable TV channels were playing reruns. There was a boom in OTT or entertainment that reached consumers directly via the internet. The OTT boom powered content generation, cloud computing, virtual studios and tools using AI.

The list of OTT platforms in India has been growing, and big-budget studios such as Amazon Prime Video, Netflix, and Jio have also attracted customers. According to the Ficci-EY report, India will have 65 million OTT subscribers by 2027. High-cost OTT content volumes fell 12% in 2024 as platforms aimed for profitability. The report expects OTT content volumes to increase in 2025, but at a lower average cost of production.

This aim for profitability is good news, say experts, given that this could trigger the rise of better content, which means more spending on domestic VFX and post-production business.

The new site in Mumbai will become a worldwide leisure destination. We are bringing India to the world by bringing the world to India."

Namit Malhotra, founder, Prime Focus, after signing an MoU with Maharashtra

Half of *Haider* was VFX as you can't film in certain areas in Kashmir. A lot of it was shot on green screen."

Abhishek More, MD, Digikore Studios

Anand says audiences now go to multiplexes and big screens for a differentiated experience and prefer OTT for the rest. He points out that OTTs also spend a lot of money on VFX.

Technology and AI are the biggest disruptors helping the AVGC business today, from virtual production to machine learning and AI-led features, with software such as Nuke, Houdini, and Maya offering both ease and speed to VFX creators.

Monica Shergill, Netflix's vice president of content in India, says most of the original content has some VFX work, irrespective of the genre. The work could be VFX-driven titles, drama or crime. Shergill cites the mini-series *IC 814: The Kandahar Hijack*, where the airports, runways, and scenes depicting places from Jordan to Nepal involved a lot of VFX work. Similarly, the outdoor scenes in *Heeramandi*, a period drama, and the crocodile scene in *Haseen Dillruba* relied on extensive VFX work.

Shergill concedes that VFX is expensive and that cost benefits come into play only in certain cases for small productions. For example, when a small sequence has to be shot in another country but is too small to be worth sending an entire crew there, creators and producers shoot plates in those countries and then make composite scenes here with a green screen.

Gaurav Gandhi, vice president, Amazon Prime Video, Asia-Pacific & Middle East-North Africa, says technology is driving aspects of post-production beyond visual effects. For example, the 'dialogue boost' feature sharpens the audio or creates audio language options. "I feel technology is at the core of the streaming experience," says Gandhi. "The fact is you (the viewer) focus so much on the content, but at the backend, it is making sure it's available to you on the device of your choice and gives you an immersive experience."

Jyoti Deshpande, head of the media and content business at Reliance Industries, says the group's collaboration with tech firms such as Microsoft, NVIDIA and Google is helping it on the OTT side.

When will the industry be ready to replace physical actors with VFX for entire stretches, or even bring back actors of yesteryear with the help of AI and machine learning? With the tech of wearable devices advancing rapidly, experts see AI playing an even more defining role in reality: extended, virtual or augmented. 'How' is not the point: the technology is on us. The question is, when? F

SMALL TOWNS, BIG BUSINESS

REGIONAL OTTs SUCH AS HOICHOI AND AHA ARE BLENDING LOCAL STORIES WITH SMART BUSINESS MODELS TO TAKE ON THE BIGGIES IN A CROWDED STREAMING MARKET.

BY SAMALI BASU GUHA

MOVE OVER NETFLIX and Amazon Prime Video. Whether it's a Bhojpuri action drama or a Punjabi romantic comedy or a Bengali thriller, regional OTTs such as Hoichoi (Bengali), Aha (Telugu), ManoramaMAX (Malayalam) and Chaupal (Punjabi) are winning hearts and turning small-town vibes into big business.

Regional content volumes surpassed 50% of the total volume in 2023 and are expected to reach over 55% by 2026, says a recent Deloitte report on the online curated content industry in India in 2024.

But then, growing fast also means struggling with rising content costs, pressure on profitability, and stiff competition from both local and global giants. "We've never tried to outspend the giants—we've instead focussed on out-engaging them. That's been our biggest differentiator," says Vishnu Mohta, co-founder, Hoichoi, and ED, SVF Entertainment. Since its inception in 2017, Hoichoi has streamed 600-plus Bengali films, and 135-plus original web series, shorts, and documentaries.

Sustainable economics, leaner models, sharper storytelling, and movie acquisitions are driving regional OTTs.

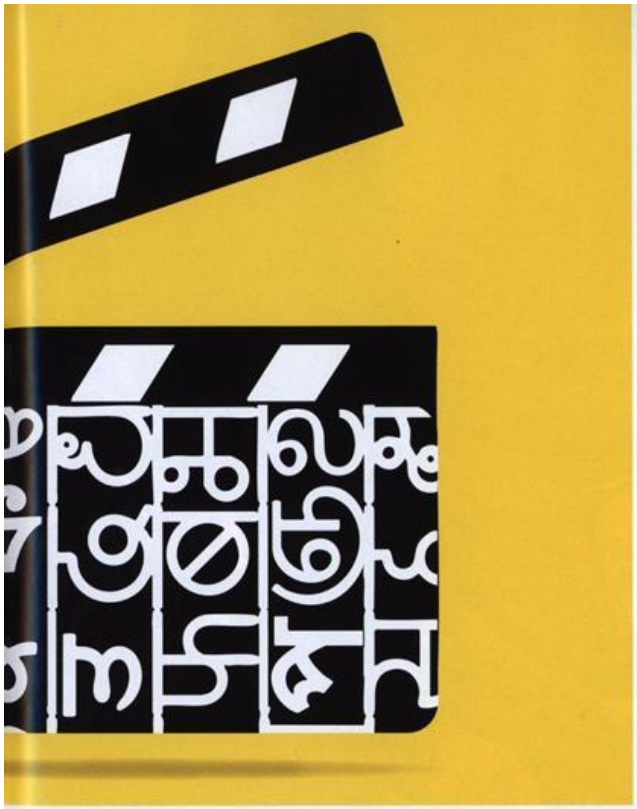

Aha, for instance, has always focussed on giving "audiences a sense of belonging," says co-founder and director Ajit Thakur. Aha, which caters to Telugu and Tamil audiences, has stayed majorly on the path of subscription video on demand (SVOD). "We started as a subscription-only platform because we were confident of our content offering and positioning. Lately, we have added AVOD (advertising video on demand), which is a more competitive market," says Thakur.

With profitability becoming a priority, Aha has embraced hybrid storytelling formats like TV-plus—a multi-episode format with episodes released at regular intervals, similar to traditional television but available on demand, and tapped into new revenue streams such as premium packs and short-form content, an approach that has helped them build a base of over 2.3 million subscribers. It now plans to focus on branded content.

Hoichoi, on the other hand, is betting on short-form content. "We are very clear about our unit economics. Shorter seasons, five to six episodes, aren't a compromise; they're a design choice. This format aligns with consumption patterns while also allowing for sharper storytelling," says Mohta. Hoichoi's business model combines subscription plans, strategic partnerships, and innovative payment solutions. Its freemium section offers select shows for free without ads, often developed in collaboration with brands.

For Chandigarh-based Chaupal, however, acquisition has been key since its inception in 2021. Co-founder Ujjwaal Mahajan claims the platform has 96% of last year's Punjabi theatrical releases, including those of Diljit

ILLUSTRATION BY ANIRBAN GHOSH

Dosanjh and A.P. Dhillon, which it balances with selective, high-cost originals featuring regional stars. Chaupal, which focusses mainly on Punjabi, Haryanvi, and Bhojpuri content, has 800 movies and 35 originals on its platform, and a user retention rate of 78%, says Mahajan.

With $10 million-plus in revenue, 5 million-plus subscribers, and an ARPU (average revenue per user) of $4 across 165 countries, its model is built around grassroots marketing. "Our senior leadership personally led activations across hundreds of towns and villages in Punjab, directly connecting with subscribers. We focussed on monthly plans to get people on our platform for a longer attention period," says Mahajan.

Meanwhile, ManoramaMAX is betting on innovation and cinematic quality. Executive editor and director Jayant Mammen Mathew, however, says the road to scaling remains steep. "Investment and marketing are huge challenges in scaling up a regional OTT platform. We need sizeable investment to increase production as well as discoverability of the platform for non-Malayalis to come in."

Innovative revenue models are reshaping content monetisation and distribution across the industry. Sun NXT, the OTT platform from Sun TV Network, has rolled out a pay-per-view model to help producers earn revenue based on viewing hours. Producers receive a certain amount for every hour their content is streamed on the platform, without upfront licensing deals. The move is expected to help small- and medium-sized producers gain more eyeballs.

Strategic partnerships are also helping regional OTTs grow faster and reach wider. "While we continue to acquire some films, we do a majority of our film acquisition through revenue-sharing. This helps us reach an otherwise untapped audience pool," says Aha's Thakur.

Hoichoi's Mohta agrees. "Strategic collaborations with aggregators such as Amazon Prime Video channels and Apple TV+ have further amplified our reach." Around 40% of Hoichoi's revenue comes from markets outside India, including the U.S., the U.K., Canada, and Bangladesh.

What next for OTTs then? "There has been a rationalisation in the last seven years. It is a tightrope walk between value and volume. Things are correcting now," says Deepak Dhar, founder and group CEO of Banijay Asia and Endemol Shine. "If independent players build their models only on AVOD, it will be a long journey before they can recover their investment. A hybrid model of SVOD and AVOD, (currently around 70: 30) will be the way forward; 50:50 is something we are looking at," says Thakur.

Is consolidation then the way ahead for the industry, especially since the big ones are planning to foray into regional languages?

"Indian OTT currently has around 40 million paid subscribers who buy directly from the company, and 100 million who buy bundled plans from different telcos. The 40 million is likely to hit 100 million in three to four years and 100 million will become 300 million. People will pay for content, and consolidation will help in that, especially in some particular genres," says Danish Khan, EVP & business head, Sony LIV and StudioNEXT, Sony Pictures Network India.

"Consolidation is inevitable, but it doesn't have to mean loss of identity. Smaller players that are culturally focussed and audience-loyal will remain attractive, especially to larger platforms looking to deepen regional relevance," says Mohta.

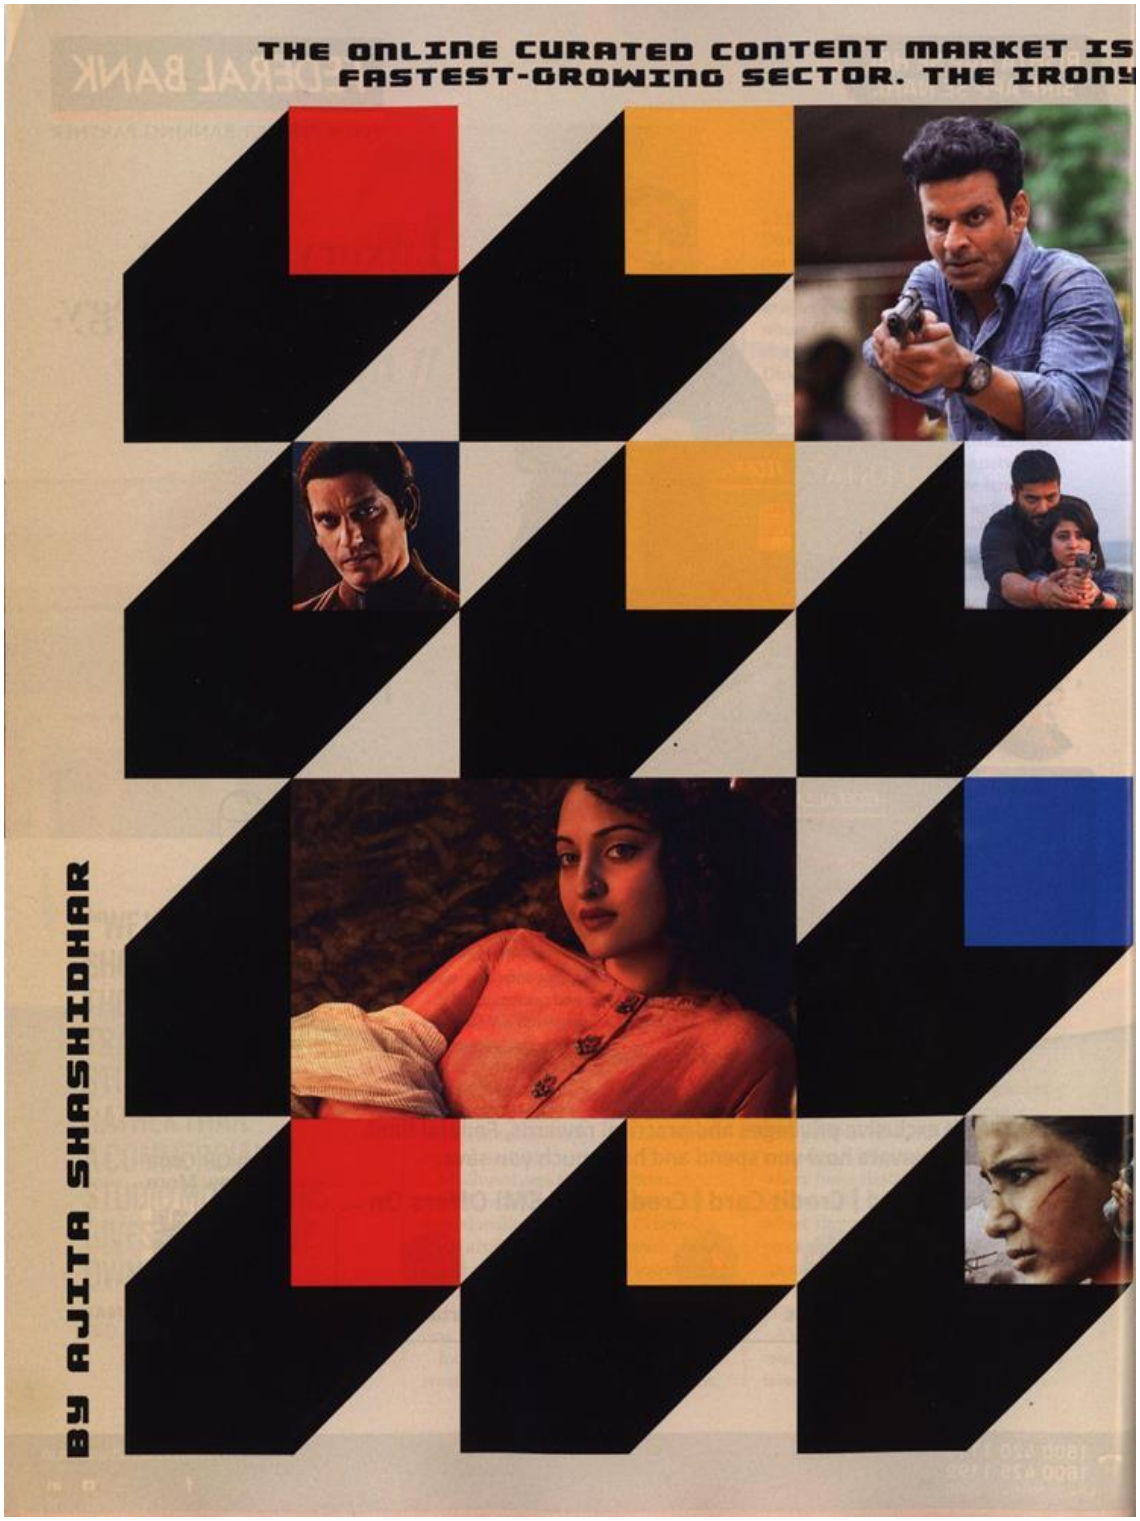

That can only mean good news for both OTT players and viewers. F

> THE MOST EXPENSIVE PIECE OF ORIGINAL CONTENT I HAVE PRODUCED IS AROUND ₹35 CRORE. IF I WERE TO SPEND ₹30 CRORE ON CONTENT, I WOULD BUY TWO FILMS INSTEAD. IT WOULD GIVE ME BETTER RoI."
>
> **AMIT GOENKA**
> President, digital businesses and platforms, Zee

minutes each. If we do eight episodes, we reduce it to 25 minutes per episode," says Goenka. "We stay away from the large content studios. The most expensive piece of original content I have ever produced is around ₹35 crore. If I were to spend ₹30 crore on content, I would buy two films instead. It would give me better RoI."

ZEE5 has kept customer acquisition costs low through a financially prudent content strategy, but retention remains a challenge. Goenka believes loyalty lies with content, not platforms. Like Amazon Prime Video, ZEE5 is experimenting with a rent-a-piece-of-content model, targeting users unlikely to subscribe by letting them pay a fee to watch individual movies. "Those are experiments we need to make to expand the market," explains Goenka.

The TV-plus model

Coming back to rationalising costs, the new phrase doing the rounds in the industry is the TV-plus model. If linear TV channels made 250 episodes at ₹10-20 lakh per episode, OTT platforms are seeking a sweet spot at ₹30-50 lakh per episode for an 8–10 episode series. ZEE5 sees merit in this model, and JioHotstar is also looking to reach a mass audience.

"We are trying to create the same show with TV production values. It is TV quality, but great finite stories. We have just launched a Kannada show, *Ayyana Mane*, which has done phenomenally well. It is a TV-plus model. It cost me ₹1 crore for the entire series," says Goenka.

Deepak Dhar, founder and group CEO of Banijay Asia and Endemol Shine, calls TV-plus a great way to build a profitable business. "With the migration of audiences from TV to OTT, a considerable set looks for finite premium dramas. They don't want to binge all at once. This audience wants a daily episode drop—30-40 finite episodes," he explains. Banijay produces around 50 shows yearly, with 50% moving towards the TV-plus model.

Sony LIV's content strategy is a mix of TV-plus and premium content, says Khan. "We have a 30-episode series, *Adrishyam—The Invisible Heroes*, and *Rajsinghani vs Rajsinghani*. TV-plus is not just an economic solution but a habit solution. TV viewers follow characters daily, and TV-plus fills that gap. However, every TV-plus or 10-episode original costing over ₹1 crore per episode must meet the simple criterion—is the unit economics working?"

Amazon Prime Video's MX Player uses the TV-plus model as an AVOD (advertising video on demand) offering, but Gandhi warns that replicating this for Prime Video's premium content could be disastrous. ""If we have to invest deeply in the long term, it has to make sense economically."

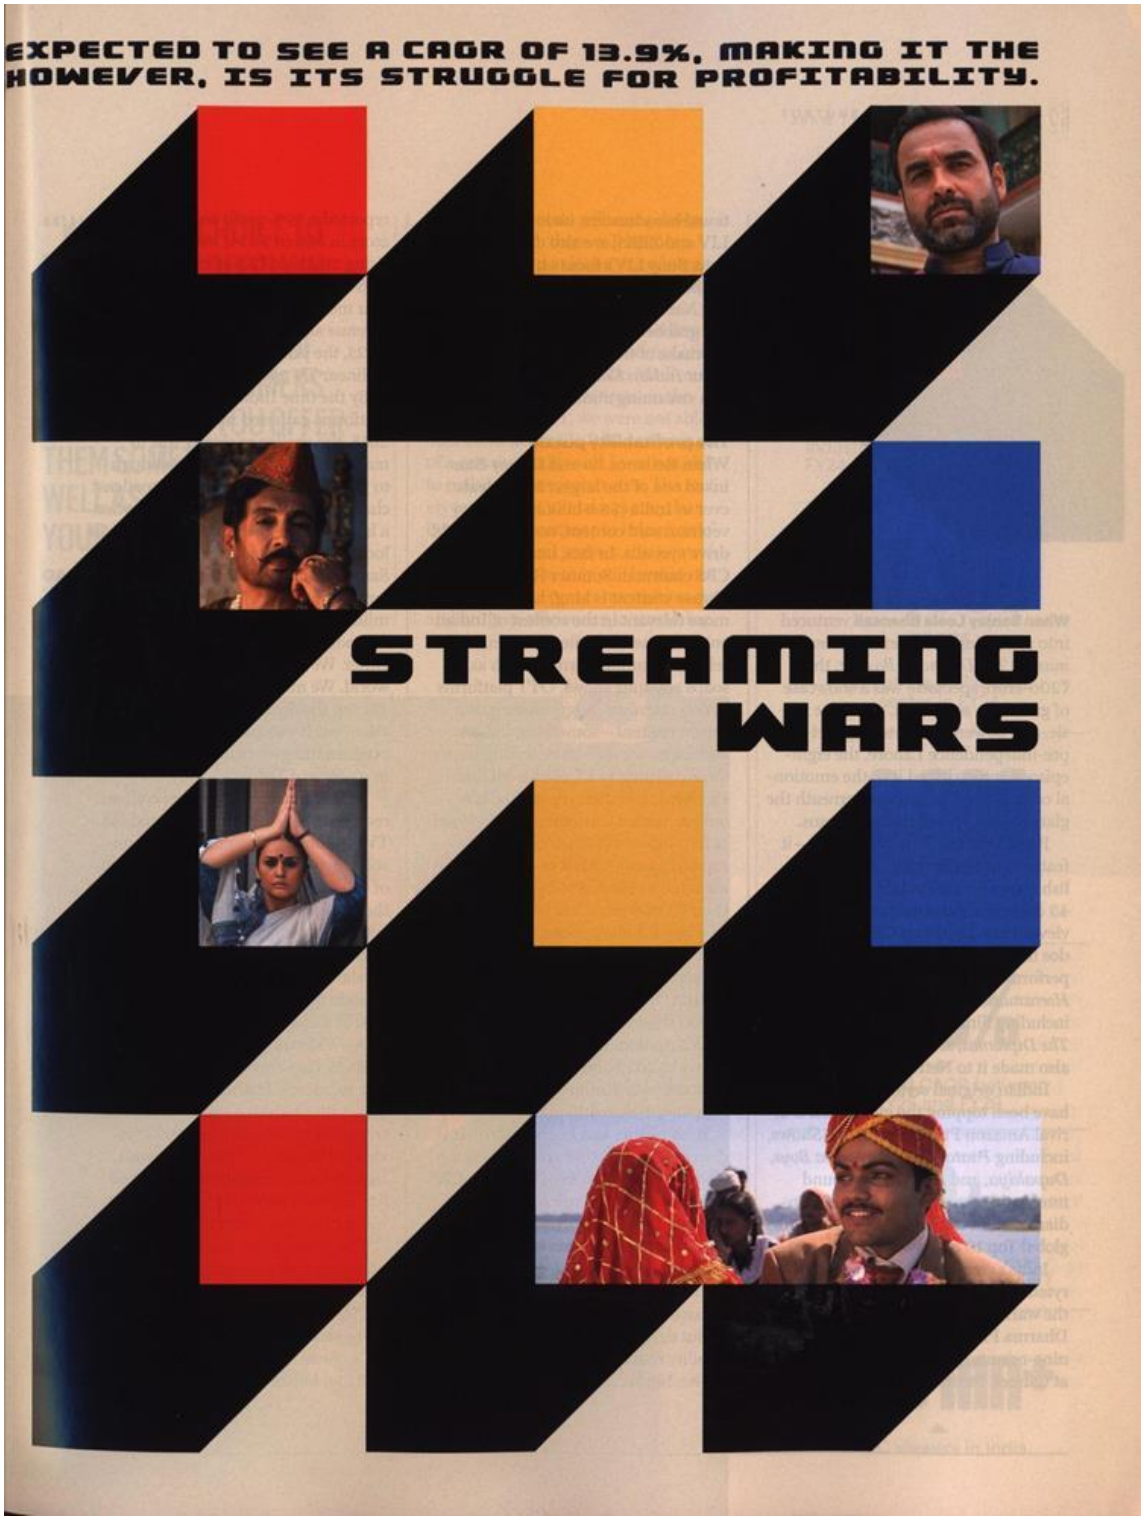

Malhotra of Abundantia adds, "Streaming needs its own plus-plus content model for the plus-plus audience. What worked on linear TV can't be blindly adapted for streaming to access a wider audience."

Nair of Applause agrees, "Should you reduce the quality of content because you have to keep prices under control and crash this place, or should you double down and create better and continue to do what you are doing, is the call platforms need to take." According to the 2025 Ficci-EY report, digital media in India surpassed traditional TV, contributing ₹80,200 crore to the ₹2.5 lakh crore M&E sector, while TV fell to ₹67,900 crore.

Platforms are shifting focus from metros to the Top 50 cities, with more family-friendly and regional language programming, says Malhotra. "There is a clear desire to programme for youth and families. Platforms aren't bearish about content."

India's narrative of creating quality content for local and global audiences is gaining steam, but growth will be measured and mindful. F

EXPECTED TO SEE A CAGR OF 13.9%, MAKING IT THE
HOWEVER, IS ITS STRUGGLE FOR PROFITABILITY.

When Sanjay Leela Bhansali ventured into streaming with Netflix's *Heeramandi: The Diamond Bazaar*, the ₹200-crore spectacle was a showcase of grandeur, set design, evocative music, and powerful storytelling. Set in pre-independence Lahore, the eight-episode series delved into the emotional conflicts and tragedy underneath the glamourous lives of the courtesans.

Its success was, however, global—it featured in Netflix's Top 10 non-English shows for six straight weeks across 43 countries, garnering over 15 million views. Even Netflix co-CEO Ted Sarandos hailed it as the platform's best-performing Indian original. And while *Heeramandi* was an outlier, others, including films *Laapataa Ladies* and *The Diplomat*, and series *The Royals*, also made it to Netflix's global Top 10.

Indian original series and movies have been topping the global charts of rival Amazon Prime Video, too. Shows, including *Paatal Lok*, *The Mehta Boys*, *Dupahiya*, and *Khauf* have found international audiences. In 2024, Indian content trended in the platform's global Top 10 every week.

India's emergence as a global storyteller has been further validated by the warm reception of *Homebound*, a Dharma Productions film that earned a nine-minute standing ovation recently at Cannes. Streaming arms of traditional broadcasters, including Sony LIV and ZEE5, are also upping their ante. Sony LIV's focus on authentic Indian narratives such as *The Waking of a Nation* and *Freedom at Midnight* has grabbed eyeballs. ZEE5's film *Mrs.*, a remake of the Malayalam movie *The Great Indian Kitchen*, logged 150 million streaming minutes in its first week.

The profitability puzzle

When Reliance Jio and Disney-Star inked one of the largest M&A deals ever in India ($8.5 billion), industry veterans said content, not scale, would drive eyeballs. In fact, late Viacom and CBS chairman Sumner Redstone's phrase 'content is king', has never been more relevant in the context of Indian entertainment. While traditional TV relied on familiar formats such as soaps and quiz shows, OTT platforms bet on premium, edgy, subscription-driven content—something Indian audiences are now more willing to pay for. According to a Deloitte-Motion Picture Association report, India's online curated content market, valued at $2.1 billion (₹17,300 crore), is expanding at a CAGR of 13.9% and is expected to touch $35 billion by 2030. Over ₹3,000 crore has been invested in original Indian content over the past decade. From just five original shows in 2015, the number rose to 225 in 2021. In 2023, as many as 13 non-fiction shows had a viewership of more than 5 million in India, up from 10 shows in 2022 and only four in 2021. In 2024, over 10 shows crossed the 5-million viewership mark.

Both Netflix and Prime Video's Indian operations were among their top global contributors in 2024. Sony LIV claimed 85% audience engagement, while regional platforms, including Chaupal, STAGE, Aha, and Hoichoi reported growth. JioHotstar, powered by the Indian Premier League (IPL), amassed over 275 million subscribers.

But despite the content boom, profitability remains elusive for most platforms. Netflix India is an exception—it reported a 59% profit surge to ₹52.4 crore in March 2024, with revenue rising 28.5% to ₹2,846 crore. Though JioStar (post the Reliance-Disney-Star merger) posted ₹10,006 crore in revenue and ₹229 crore in profit for FY25, the profit stemmed largely from its linear TV operations.

By the time Indian streaming platforms gathered momentum in 2018, the challenge clearly was to make content that was edgy enough to pull audiences away from broadcast channels. This was also the time when a large section of Indian audiences was looking for differentiated content. As Sameer Nair, CEO of Applause Entertainment, says, "There are 50-100 million people who can't see *Naagin* anymore, but can't understand *Narcos* either. We started to cater to that world. We made shows like *Criminal Justice*, the *Scam* series and *Black Warrant*. It was premium Indian programming—not a *saas-bahu* show, or a *Game of Thrones*."

But creating edgy, cerebral content required steep budgets. The good old TV economics of producing 250 episodes, with each costing in the region of ₹10-20 lakh couldn't be replicated in the streaming model of creating high-octane content. Therefore, platforms partnered with filmmakers and costs escalated upwards of ₹3-4 crore per episode for a 10-episode original series. Since the likes of Netflix, Amazon Prime Video and JioHotstar had deep pockets, they could afford to splurge. The pandemic further inflated budgets, with platforms shelling out massive sums to acquire films and keep viewers engaged during lockdowns, leading to accumulation of debt and forcing most services globally and in India to taper content investment.

This splurge has since led to cost pressures and reduced content investment. Originals dropped from 225 in 2021 to 206 in 2023. "In 2023 there was 2,986 hours of premium OTT content; in 2024 it came down to 2,620 hours. This year is expected

to be flat, and costs will come down. Going forward, there will be more content created at lower price," says Ashish Pherwani, partner, media and entertainment, EY.

Veteran filmmaker Ram Madhvani, creator of *Arya* and *The Waking of a Nation*, and founder, Ram Madhvani Films and Equinox, reflects on the shift: "Before OTT, we were not able to offer content for TV. It had to be made of a certain quality and I was not able to make content at that cost. The anxiety today is not to make money, but being able to continue to bring work."

EY's Pherwani stresses cost control: "To be profitable, they will have to cut content cost, customer acquisition cost, and bring in efficiencies in streaming.

Earlier, a cable operator sold a set-top box and had monthly billing. Now, if you don't like a streaming service, you are free to drop it. More often than not, the cost of acquiring a customer is higher than what they pay."

In fact, the challenge JioHotstar is staring at is retaining its 275 million-plus subscribers after IPL. While it offers a broad library, including Disney, Paramount, Peacock, and HBO content, retaining IPL viewers who don't consume premium shows is a challenge. The company spends $2 billion annually on IPL and ICC rights and must also invest in compelling content to maintain subscriber loyalty.

Still, Vivek Raicha, former executive director and investment head at Emerald (KKR's pan-Asia private equity fund), says businesses going overboard with investment at the time of launch is common. "When Prime Video and Netflix launched, they were aggressive with content. Everyone goes through these cycles. There is a mismatch between cost of production and revenue per subscriber. But if you are thinking over a 10–20 year horizon, I don't see a problem. Per capita income will go up to $14,000."

In summary, while Indian OTT platforms have successfully taken the nation's stories to a global audience, sustaining growth and profitability will require a more measured approach to investment, content creation, and customer retention. The next phase will be about balancing creativity with commercial prudence.

Rationalisation over cost-cutting

Gaurav Gandhi, vice president, Amazon Prime Video, Asia-Pacific & Middle East-North Africa, maintains that the platform remains deeply committed to the Indian market, despite adjustments in content spending. "When more players actively acquire content, demand rises. Conversely, as the market consolidates and fewer buyers remain, the volume of acquisitions declines—a typical demand-supply adjustment, also seen in the Indian streaming landscape. However, this shift should not be mistaken for a negative outlook on the sector. Those who are invested in this space remain deeply committed," Gandhi explains, alluding to the Reliance–Disney-Star merger and the failed Sony-Zee deal.

PHOTOGRAPH BY NARENDRA BISHT

Jyoti Deshpande, president, media and content business, Reliance Industries Ltd, agrees. "In that period, when Sony was looking at Zee, and Reliance was looking at Disney, the big players were distracted. What should have gone on four-five platforms were being offered to two—Netflix and Amazon, as they were not in any M&A."

Monika Shergill, vice president, content, Netflix India, says profitability has always been a priority, but not by compromising on quality. "We are clear that we are not going to win by being cheaper. We focus on high-quality entertainment," she says. Netflix has heavily invested in premium Indian content, including *Heeramandi*, *Black Warrant*, *Dabba Cartel*, *The Roshans*, the *Khakee* series, *Jewel Thief - The Heist Begins*, *Pushpa 2: The Rule* and *The Diplomat*. "Budgets are not guiding the Netflix programming strategy; our priority is to take Indian storytelling across the globe."

Shergill acknowledges early overspending but compares it to a startup's growth curve. "It takes multiple pivots for a startup to find its room and place. It's the same for streaming services. When we started programming, it was a journey of listening and learning. The more we listened, the more we learnt about audiences and their preferences. It was important for us to understand audience dynamics and correctly invest

WE ARE NOT GOING TO WIN BY BEING CHEAPER. WE FOCUS ON HIGH-QUALITY ENTERTAINMENT. BUDGETS ARE NOT GUIDING THE NETFLIX PROGRAMMING STRATEGY."

INDIAN STORYTELLING: PULLS & PUSHES

1. PRESSURES TO CUT CONTENT COSTS AND INCREASE PROFITABILITY HAVE LED TO A DIP IN THE COMMISSIONING OF PROJECTS IN THE PAST TWO YEARS.
2. TV-PLUS CONTENT HAS GROWN LATELY. IT IS SUPERIOR TO TV CONTENT OFFERING BUT LOWER IN PRODUCTION VALUE COMPARED TO OTT SHOWS.
3. THE PRIMARY FOCUS OF THE TV-PLUS CONTENT IS TO INCREASE THE REACH OF OCC (ONLINE CURATED CONTENT) SERVICES AND INCREASE MARGINS.
4. IN 2015, INDIAN PLATFORMS PRODUCED ONLY FIVE ORIGINALS, WHICH WENT UP TO 225 IN 2021. THE NUMBER HAS DIPPED TO 206 IN 2023.
5. IN THE INITIAL YEARS, THE OCC SECTOR FOCUSSED ON CREATING ORIGINAL FICTION SERIES. DUE TO INCREASE IN OCC SERVICES PENETRATION, THERE HAS BEEN A RISE IN NON-FICTION SHOWS.

PROFITABILITY WOES

1. NEARLY ALL OCC SERVICES FALL IN THE 'FREEMIUM' SPECTRUM (A COMBINATION OF AVOD AND SVOD). THE KEY IS TO CONVERT FREE USERS INTO PAID ONES.
2. DEEP-POCKETED PLATFORMS GET FUND INJECTIONS FROM PARENT FIRMS; SMALLER RIVALS ARE HIT BY HIGH CONTENT PRODUCTION AND USER ACQUISITION COSTS.
3. PLATFORMS ARE UNDER PRESSURE TO IMPROVE CONTENT QUALITY, PRICING STRATEGIES AND USER EXPERIENCE TO INCREASE MARKET SHARE.

in storytelling," she adds.

After Covid-19, there was an oversupply of content, which led to a dip in quality, acknowledges Deshpande. "OTT platforms were grabbing whatever was available at a heightened price. Now rationalisation has happened; the focus is back on quality, not quantity. We are making fewer stories that we are confident about." Deshpande claims 2023 was a stellar year for Jio Studios. "We had more than 50% of the box office. Four out of the Top 10 films were monster hits—*Singham Again*, *Shaitaan* and *Article 370*. At one point the top three of Netflix's most viewed films globally were Jio Studios films—*Article 370*, *Laapataa Ladies*, and *Shaitaan*."

Echoing her sentiment, Vikram Malhotra, founder and CEO of Abundantia Entertainment (maker of originals such as *Breathe* and films, including *Chhorii* and *Jalsa*), says the last two years have been excellent for his firm. He believes it's not about blind cost-cutting but a smarter, more strategic approach. "Streaming services are more calculative now—there is more focus on customers and input costs, which means measures of return on investment (RoI), efficiency and timeliness are coming in a very big way."

Platforms continue to invest in high-end content but are also picking quality stories that don't break the bank. For instance, *Laapataa Ladies* was made on a modest ₹20-25 crore budget and still earned an Oscar nomination. Spending on high-fee stars has also been reined in.

Gandhi adds that the early streaming era was led by film directors and creators. "The 8-10 episode format felt closer to the cinematic storytelling of movies than traditional television that India was creating in the past 15 years. This ecosystem has evolved dramatically since then. Today, we are proud to partner with both traditional powerhouses such as Dharma and Excel, as well as digital-native creators like TVF," he says.

Nair of Applause Entertainment

IF YOU HAVE TO TAKE THE RISK OF TELLING FRESH STORIES, WE HAVE TO CONTROL COSTS IN A WAY THAT WE CAN TAKE MULTIPLE RISKS."

DANISH KHAN
EVP & business head, Sony LIV and StudioNEXT, Sony Pictures Network India

says streaming services may rationalise costs in the short-term, but eventually they have to invest in content. "Audiences have tasted premium content. We are writing too many obituaries. The industry needs to double down and build the business," he asserts.

Varied strategy

The streaming battle in India is about engaging audiences with compelling content. Each platform—JioHotstar, Netflix, and Prime Video—is following a unique strategy based on strengths, target audience, and market dynamics.

JioHotstar aims to reach one billion screens, tapping into scale, inherent to Reliance's DNA. According to Kiran Mani, CEO, digital, JioStar, the app targets both premium users and those on ₹2,500 Jio feature phones.

JioHotstar is leveraging Disney-Star's legacy in television. Popular shows like *Anupamaa*, *Bigg Boss*, and *MTV Roadies* now have exclusive digital content. "Fans of *Anupamaa* will get to see bite-sized content, big moments they might not catch on TV. Technology changing from a wire behind the TV should not change what content you are comfortable watching," Mani told *Fortune India* in an earlier interview.

In addition to premium global content from Marvel, Disney, HBO, and Warner, JioHotstar is expanding user-generated content (UGC) via JioHotstar Sparks. "People had to go to three places—TV for habitual content, niche hubs for unorganised UGC, and OTTs for hero content. Our hope is to cater to all three," Mani had said.

Cricket remains JioHotstar's biggest draw. The platform spends around $2 billion annually on IPL and ICC rights. "Cricket is the biggest attractor of eyeballs. JioStar is spending around $2 billion a year on IPL and ICC rights. It is expensive, but that's a long-term strategic bet they have taken," says Gaurav Mehta, partner, head of India, Raine, a global strategic advisory and investment firm.

Amazon Prime Video and Netflix have focussed solely on entertainment, especially in India. "We made a strategic choice to invest more deeply in entertainment. We are not closed to sports, we keep evaluating," says Gandhi. "An important aspect of retaining your customers is how often you offer them something new as well as how deep your library is." Prime Video launched 70 original shows and movies last year, with over 100 currently in production.

"As a service, we don't believe that it is required to have sports to build stickiness because we are an entertainment platform. That is our core," adds Netflix's Shergill.

Prime Video's acquisition of MX Player (merged into MiniTV) expands its mass reach. It also produces films for digital and theatrical release. "We are building an entertainment hub, giving customers content of their choice," says Gandhi.

Adds Karan Bedi, director and head, Amazon MX Player. "We have 250 million audience per month, so the ideas we pick up has to resonate with a wider pool of audience. In fact, after our transition into the Amazon ecosystem, the ability for us to create high-quality ad experiences for both our users and our advertisers has increased manifold."

In addition to its own shows, Prime Video has partnered with Apple TV, BBC Player, Sony Pictures Stream, and CN Rewind, as well as regional players Hoichoi, Chaupal, and ManoramaMAX. This is an addition to its own portfolio of content in 10 vernacular languages, and movie rental service. "We are building a category of movie rentals which didn't exist in India. For this we are partnering with global studios and local ones," explains Gandhi.

Netflix India, with about 12–14 million subscribers, maintains its premium positioning. The entry-level monthly plan is ₹149, and the highest tier is ₹649—compared to Prime Video (₹299) and JioHotstar (₹149 with ads and ₹299 without). Shergill, however, says the platform is designed for all audiences. "Being a global streaming service with quality benchmark, it's important for us to do the highest quality storytelling. Budgets have to be the best to tell that story."

Engagement is key to Netflix's success. "We focus on engagement. That brings in high-quality audiences," says Shergill.

Netflix follows a disciplined programming strategy. "Month-on-month, we programme more than any other entertainment service. We've produced about 165 originals in the last seven years and around 30 per year in the past three to four years."

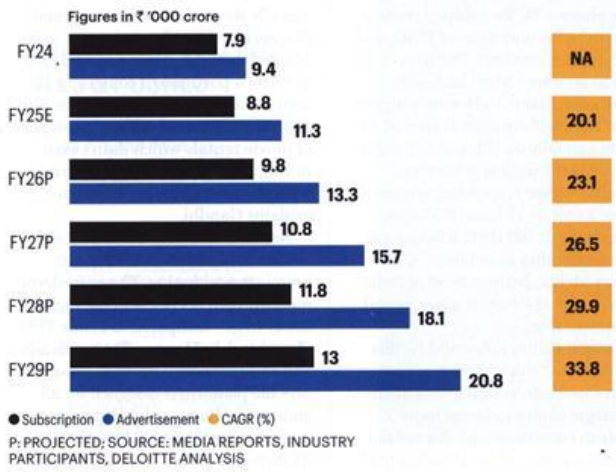

The platform's aim is to be the anchor service in India. "This won't come by just chasing more customers. It will be driven by the quality of stories we tell, how well we tell them, and how consistently we do that," says Shergill.

Most streaming platforms in India—except Netflix—rely on advertising. Prime Video already has MX Player and will introduce ads to its ₹99 plan from June 18. For ad-free viewing, users will pay ₹129 per month.

Netflix has launched ad-supported tiers in markets, including the U.S., the U.K., and Australia, but isn't

ROBUST GROWTH

The online curated content (OCC) sector has emerged as a force in entertainment consumption, particularly after Covid-19.

P: PROJECTED; SOURCE: MEDIA REPORTS, INDUSTRY PARTICIPANTS, DELOITTE ANALYSIS

planning that in India. "We are doing well in SVOD (subscription video on demand). It's important for us to keep growing in our subscription offering, which is happening," says Shergill.

India's digital ad market is worth ₹70,000 crore, of which Google and Meta hold ₹60,000 crore. With lower ad rates in India compared to mature markets, Netflix prefers to stick to a subscription-only model for now.

The challengers

While JioHotstar, Amazon Prime Video and Netflix are the big daddies of India's streaming market, challengers like Sony LIV and ZEE5 are leaving no stone unturned to make a mark with differentiated content strategies.

When Sony Pictures Network decided to do original content on Sony LIV in 2020, its competitors were already burning huge amounts of capital in that space. "The only way we could compete was by picking stories that would surprise our audience and delight them. We decided to tell stories from India, which are slightly more cerebral and authentic," explains Danish Khan, EVP & business head, Sony LIV and StudioNEXT, Sony Pictures Network India.

The platform, says Khan, was careful not to splurge, certainly not by roping in big stars. "If we have to take the risk of telling fresh stories, we have to control costs in a way so that we can take multiple risks. If we put lots of budgets (money), our ability to take risks in terms of story selection will go down." The streaming platform, which has 5-6 million subscribers, doesn't do more than 20 original shows a year. Apart from Hindi content, Sony LIV is also investing significantly in Malayalam content and plans to also get into Telugu, Tamil, and Bengali.

ZEE5, on the other hand, like its parent company, Zee Entertainment, believes in frugality. Instead of investing in expensive original series, the platform sees more merit in acquiring films. It launches 50-60 films across 12 languages every year and does just four-five original series. "While a show could cost me ₹1,000 per subscriber, a movie would cost me maximum ₹350-400 per subscriber," explains Amit Goenka, president, digital businesses and platforms, Zee.

Having a film-heavy portfolio makes sense, especially in today's era of snackable content, adds Goenka. "People don't want to spend 7-8 hours watching a series. There have been instances when we commissioned a story, and during the shoot realised it won't lend itself to a 7-8-episode series. We crunched it and made a movie out of it. We did that with *Attack*, a story around the attack on Parliament."

ZEE5 has also been reducing the number, or duration, of episodes of its original series. "We don't go beyond six episodes, and not more than 30

National

MANUFACTURING OUTLOOK 2025

Key Trends That Will Shape the Future

BY **RAHUL GARG**, CEO & FOUNDER MOGLIX

Despite recent global challenges, the manufacturing sector experienced steady growth, with the industry's output rising by 1.5% in 2024. Now, as a year of uncertainty and opportunity comes to an end, the manufacturing industry stands at the brink of a new age. Disruptive technologies, changing workforce dynamics, and a focus on sustainability are reshaping the sector, demanding strategic navigation from industry leaders.

As we look ahead, 2025 holds immense promise. In fact, projections show that the value added in the manufacturing market is set to reach US$13.8tn in 2025, with an expected CAGR of 1.42% to 2029. To find lasting success, manufacturers must adapt to the ever-evolving industry, embracing innovation and resilience at every step. Here, we take a look at the pivotal trends of 2025, analyzing the critical shifts that are set to redefine the future of manufacturing.

THE ROLE OF AI IN THE SMART FACTORY BOOM

Just as smartphones revolutionized communication, smart factories have the potential to reshape manufacturing. Standing as the fundamental pillars of Industry 4.0, these sophisticated facilities leverage the latest technologies to boost efficiency and streamline processes. The growth of these facilities is evident, with the global smart factories market expected to surpass a staggering US$ 386.36 billion by 2034 with a CAGR of 9.52%.

Several technologies and strategies, such as IoT, data-driven decision-making, and automation, play crucial roles in the expansion of smart factories. However, none are as groundbreaking as artificial intelligence. According to a recent Deloitte survey, 93% of companies believe AI will be a fundamental technology to drive the progress of the manufacturing sector. In 2025, AI is poised to act as an invisible guardian for smart factories. By leveraging the large pools of data collected in smart factories, AI can be utilized to forecast equipment failures and market demands, perform inspections to accurately detect defects, and manage complex supply chains.

In 2025, generative AI (GenAI) especially can emerge as a major disruptor in the manufacturing industry. Last year, this relatively new innovation was widely tested by manufacturers as an exciting new tool. But now, the C-suite looks to GenAI as a solution that can generate real-world outcomes and drive ROI. Predictive maintenance, in particular, can be an area where GenAI excels. With GenAI's ability to continuously analyze real-time data and compare it to historical patterns, it can effectively detect anomalies from normal operating conditions. Using this information, these models can predict likely equipment failures and the requirement of maintenance. By proactively addressing these issues, manufacturers can significantly reduce downtime and maintenance costs.

SUSTAINABILITY WITH SOFTWARE-APPROACH

Sustainability is not a new concept in manufacturing. In recent years, we've all borne witness to numerous eco-friendly initiatives and regulations that push for a greener economy. However, in 2025, the focus now turns to green software engineering, emphasizing software's role in achieving sustainability. In fact, according to Gartner's predictions, 30% of large global enterprises will include software sustainability in their nonfunctional requirements by 2027. This is a significant increase from less than 10% in 2024.

Similarly, technologies such as digital twins—virtual replicas of physical assets or systems—can serve as prominent game changers for sustainability. These digital models help manufacturers simulate their operations and test experimental approaches before making physical changes on the factory floor. Ultimately, this massively lowers waste and reduces resource consumption, supporting a greener tomorrow. The benefits of this solution are undeniable, and leading manufacturers are quick to realize it. According to IoT Analytics' Digital Twin Market Report 2023-2027, the digital twin market is set to expand at a CAGR of 30% between 2023 and 2027.

Future Work - Force: Why Industry Players Are Betting Big On AI Agents

32,33,34 • PG | 1570 • Sqcm | 368955 • AVE | 515K • Cir | Inside Page (Magazine only)

National

FUTURE WORK-FORCE: WHY INDUSTRY PLAYERS ARE BETTING BIG ON AI AGENTS

Since 2022, the world has amused itself with the generative artificial intelligence (AI) offerings of ChatGPT and others for coding and content generation to name a few. However, there were no virtual assistants.

BY PAROMITA GUPTA

Enter AI agents. These software programs use AI to interact with their environment and perform tasks with minimal to no human supervision. One of the key trends expected in 2025, AI agents can collect data, analyze it, and use it to achieve goals. Welcome to the age of AI agents, a future of seamless collaboration between humans and machines.

AI AGENTS AS THE FUTURE: In recent times, several headliners of the tech space have shared their views on AI agents, including Jensen Huang with "the IT department of every company is going to be the HR department of AI agents in the future." Marking a shift from Passive Information Generators to Active Completion Agents, AI agents will use websites and user details to schedule meetings and plan vacations among other things. "Unlike traditional chatbots or automation scripts, these agents don't simply follow if-then rules - they observe the environment, analyze data, and take dynamic, goal-driven actions with minimal human intervention. Chatbots mostly respond to user prompts within pre-defined parameters, but an AI agent proactively identifies problems, reasons about potential solutions, and executes tasks across different platforms," said Ramprakash Ramamoorthy, Director of AI and Research, ManageEngine, Zoho Corp. Salesforce, Anthropic, Google, NVIDIA, and Microsoft are some of the frontrunners in the AI agent race. Presently, AI agents are increasing in both horizontal and vertical applications. Markets and Markets project the global AI agents market to grow from USD 5.1 billion in 2024 to a whopping USD 47.1 billion by 2030.

INDIA AND AI AGENTS: Back home, the space is maturing– at a slower rate than the global standard. CP Gurnani, former CEO of Tech Mahindra and co-founder of AIonOS feels that there will be faster adoption in AI agents. In November 2024, Bengaluru-based AI startup KOGO launched the world's first AI Agent store, providing developers, SMEs, and enterprises access to hundreds of AI tools, agents and plugins. Its AI Agents are built on KOGO OS, a no-code/low-code, on-premises AI Platform as a Service (AIPaas). "Our on-premises AI Agent Store comes with ready-to-deploy AI Agents. All businesses have to select from a library of templates and tools to design agents that align with their specific operational requirements," shared Raj K Gopalakrishnan, Co-Founder & CEO, KOGO. Counting Mappls, Caryn Health, KTM, BTO, and Indian Army among its various customers, KOGO's on-prem deployments have also helped businesses save on data transfer and cloud service fees, further enhancing the overall return on investment (ROI).

For Ramamoorthy, AI agents are enhancing IT decision-making by transforming complex data streams into actionable insights, allowing for proac-

tive problem resolution. AI agents can categorize and prioritize tickets, predict incident surges, and provide self-healing solutions, drastically reducing mean time to resolution. "AI agents help monitor infrastructure health, dynamically allocate resources, and detect anomalies before they escalate into service disruptions. By scanning real-time metrics across networks, endpoints, and applications, the agents can isolate root causes with remarkable precision," he shared. Industries running large-scale IT environments—such as finance, telecom, and healthcare—stand to benefit from operational resilience and cost efficiencies.

Zendesk, a customer relationship management (CRM) solutions provider, reported that 59 per cent of consumers believe that genAI will undergo a metamorphosis in the way they interact with companies in the next two years. Miko, a startup creating AI-powered robot companions for kids, is a benefactor of Zendesk's AI agent. The offering

The global AI agents market to grow from USD 5.1 billion in 2024 to a whopping **USD 47.1 B** by 2030.

Source: Markets and Markets

streamlined workflows, improved cross-department visibility and enhanced self-service, taking Miko's self-service rate from 75 per cent to over 90 per cent with reduced peak support tickets from a daily average of 7,500 to 1,250. This allowed its CX team to keep pace with the 12x to 15x spike in seasonal volume.

Series A Bengaluru-based Series A AI-driven conversation intelligence platform Convin has devised AI phone calls. Deeming the flow has no human intervention, Convin's AI Voice Agents automate customer calls, engage customers with personalized, multilingual conversations and handle routine interactions in Hindi, English, and Hinglish. The startup has successfully optimized fleet operations and reduced manual workload for a logistics client.

"Drivers often stopped trucks for legitimate reasons during routes (e.g., rest, refuelling, minor delays). Human agents were triggered to investigate each stop, leading to wasted time and resources on non-critical cases. With AI agents they could evaluate situations like truck stoppages. They categorized cases, identifying critical issues (e.g., accidents) and escalating them to human agents while handling routine stops autonomously. Due to this, human intervention was reduced by 90 per cent, focusing only on

critical incidents. The company saved significant resources and reduced the average response time to critical situations," shared Ashish Santhalia, founder, Convin.AI.

CoRover, the creator of BharatGPT, powers IRCTC's AskDISHA, which efficiently handles over 150,000 passenger queries daily, streamlining processes like ticket booking. Another remarkable achievement is NPCI's Ask PAi, which has served millions of users by delivering prompt and accurate responses to their inquiries. It has helped a cigarette manufacturing company create seamless interactions between manufacturing machines and humans in multiple languages, including English, Hindi, Tamil, and more. This has resulted in a significant reduction in machine downtime by over 30 per cent.

WHEN TO LOOK AT AI AGENTS: If expectations are matched, AI agents could provide businesses with the ROI they hoped for from genAI. Some technology leaders are optimistic of the fact that this tech will lead to a reduction in the number of working hours or how many hirings a company makes. In February 2024, Buy Now, Pay Later Company, Klarna implemented autonomous agents in its customer service function in collaboration with Open AI. According to the fintech player, the AI assistant handled 2.3 million conversations, two-thirds of Klarna's customer service chats, eventually leading to a reduction in its workforce from 5000 to 3800.

But is an AI agent viable for all? Industry players advised careful consideration.

"Effective implementation of AI agents begins with carefully evaluating customer pain points and expectations. Businesses should determine specific areas where the AI agent can add value and establish clear objectives to ensure alignment with business goals," said Maureen Chong, RVP Asia, Zendesk. Global cosmetic retailer Lush faced concerns managing customer inquiries across multiple communication channels leading to hindrance in metric tracking and data-driven improvements. With Zendesk's AI agent, they could overcome challenges and streamline CX operations across multiple touch points and languages. This saved Lush roughly 5 minutes per ticket and 360 agent hours monthly and achieved a 369 per cent ROI within months. "Not all workflows should involve AI agents, so businesses must be thoughtful about the workflows that need to be redesigned without introducing unnecessary complexity," added Chong.

"NOT ALL WORKFLOWS SHOULD INVOLVE AI AGENTS, SO BUSINESSES MUST BE THOUGHTFUL ABOUT THE WORKFLOWS THAT NEED TO BE REDESIGNED WITHOUT INTRODUCING UNNECESSARY COMPLEXITY."

MAUREEN CHONG, RVP ASIA, ZENDESK

"ADDRESSING CRITICAL CONCERNS AROUND SECURITY, COMPLIANCE, AND TRANSPARENCY IS ESSENTIAL FOR MAINTAINING TRUST AND REGULATORY ADHERENCE."

ANKUSH SABHARWAL, FOUNDER, COROVER

"WE'LL SEE A SHIFT TOWARD ADAPTIVE AGENTS THAT LEARN FROM REAL-WORLD USER INTERACTIONS, REFINING THEIR BEHAVIORS IN NEAR REAL-TIME"

RAMPRAKASH RAMAMOORTHY, DIRECTOR OF AI AND RESEARCH, MANAGEENGINE, ZOHO CORP

For Ankush Sabharwal of CoRover, integrating AI agents into existing workflows presents several challenges for organizations such as data quality and system integration, ensuring a seamless user experience, and managing the inherent complexity of AI technologies. "Addressing critical concerns around security, compliance, and transparency is essential for maintaining trust and regulatory adherence. To successfully navigate these challenges, companies must develop a comprehensive strategy, enable collaboration across departments and stakeholders, and commit to continuous training and development to keep pace with evolving AI capabilities and industry best practices," he shares.

2025 AND BEYOND: A Deloitte report stated that AI agents are equipped for use cases that were once thought too complicated for GenAI. "What is available today is only a glimpse of what's to come. Indeed, we anticipate a significant evolution of core language models, AI agents, and agent orchestration platforms within the next 12 months," the report read.

Ramamoorthy anticipates AI agents to evolve into more specialized, domain-specific experts while becoming increasingly collaborative. "We'll see a shift toward adaptive agents that learn from real-world user interactions, refining their behaviours in near real-time," he notes, adding that the focus will be on building AI agents that are trustworthy, interpretable, and seamlessly integrated into daily operations.

"Apart from technological constraints, employee adoption is another challenge. There can be employees who still hesitate to trust or use AI tools, especially if they perceive them as a threat to job security. It hinders the effective utilization of AI Agents and can lead to inefficiencies. Businesses must ensure that employee concerns are addressed effectively, and create a culture where AI Agents and human talent work hand in hand," said Gopalakrishnan. For Chong, investment in upskilling to effectively manage AI systems will be key.

Empowering India with AI

As demand for AI infrastructure grows, India offers cost advantages, a renewable energy focus and a strategic location for development of data centres. However, its emergence as a global AI data centre hub depends on bridging gaps in AI infrastructure, talent availability and policy framework, as per Deloitte India's report.

CT Bureau

The country could require an additional 45 to 50 million square feet of real estate space and 40 to 45 terawatt hours incremental power by 2030 to meet the growing demand for AI, according to Deloitte India's latest report titled 'Attracting AI Data Centre Infrastructure Investment in India.'

The report suggested targeted policy interventions would be critical in positioning India as a global AI hub.

The report identifies six key pillars for India to reach its potential in building a world-leading, AI-ready ecosystem.

These pillars are real estate, power utilities, infrastructure, connectivity, network infrastructure, talent and policy framework. From a policy perspective, the report suggested introducing a separate category for data centres in National Building Code, 2016 and recognising them under Essential Services Maintenance Act, 1981.

India offers an advantage in data centre real estate with lower land and labour costs

कॉमर्स की पढ़ाई में अब एआई का कमाल

अकाउंटिंग के करियर में एक ओर ग्रीन अकाउंटिंग और सस्टेनेबिलिटी रिपोर्टिंग जैसे नए क्षेत्र उभर रहे हैं, तो दूसरी ओर आर्टिफिशियल इंटेलिजेंस की तकनीक नए मौके बना रही है। छोटे शहरों में बड़ी वित्तीय कंपनियों की बढ़ती मौजूदगी परंपरागत भूमिकाओं की भी मांग में भी बढ़ोतरी कर रही है। यही वजह है कि कॉमर्स में स्नातक युवाओं के लिए अकाउंटिंग में अपस्किलिंग के बाद कई मौके बने हैं। क्या हैं ये अवसर, बता रही हैं रुपाली चतुर्वेदी

ग्रीन अकाउंटिंग

एन्वाइरन्मेंट अकाउंटिंग में कंपनी की वित्तीय गतिविधियों में पर्यावरण संबंधी प्रभावों व सुधार हेतु खर्चों का लेखा-जोखा देखा जाता है। इसे ग्रीन अकाउंटिंग भी कहते हैं। इसके लिए अकाउंटिंग, फाइनेंस, इकोनॉमिक्स, कॉमर्स या एनवाइरन्मेंटल साइंस में स्नातक करें। सस्टेनेबिलिटी या सीएसआर मैनेजमेंट में सर्टिफिकेट कोर्स करें। संबंधित कोर्स GRI Training, Harvard Online, EdX पर उपलब्ध है।

अगर विशेषज्ञों की मानें, तो भारत में प्रतिवर्ष करीब 55,000 से 60,000 नए अकाउंटिंग पेशेवरों की आवश्यकता होती है। सर्टिफाइड अकाउंटिंग पेशेवरों की भी भारी कमी है। भारत में वर्तमान में 4 लाख के लगभग सीए हैं, जबकि जरूरत है दस लाख सीए की। बेशक, अकाउंटिंग और फाइनेंस के स्किल के साथ मौकों की कमी नहीं है। क्योंकि हाल ही की अर्नस्ट एंड यंग की एक रिपोर्ट के अनुसार अब कई बहुराष्ट्रीय अकाउंटिंग फर्म्स भारत के छोटे शहरों का रुख कर रही हैं, जो कई अन्य नौकरियों के साथ ही अकाउंटिंग के लिए भी मौके पेश कर रही हैं। इसी के साथ आर्टिफिशयल इंटेलिजेंस और मशीन लर्निंग जैसी तकनीकों के समावेश से इस क्षेत्र में कुछ और नए स्किल के लिए भी मौके बने हैं।

अकाउंटिंग में एआई का स्किल

डेलॉइट के एक शोध के अनुसार वर्तमान में 54 फीसदी अकाउंटिंग फर्म्स ने एआई को किसी ना किसी रूप में अपने काम में शामिल किया है। इसीलिए आधुनिक तकनीक के ऐसे स्किल, जो कॉमर्स के स्नातक को व्यापार हेतु वित्तीय रणनीति बनाने, व्यापारिक विश्लेषण करने जैसे आधारभूत हुनर देते हैं, भी अहम हो गए हैं। ऐसे सीखें :

- फाइनेंशियल सर्विसेज के लिए मशीन लर्निंग और एआई आधारित अकाउंटिंग सॉफ्टवेयर के कोर्स कराने वाले मंचों से जुड़ें। जैसे कोर्सेरा के फाइनेंशियल टेक्नोलॉजी के विशेषज्ञता कोर्स, जिसमें एआई से संबंधित मॉड्यूल्स हों। किसी उत्पाद या सॉफ्टवेयर विशेष की ट्रेनिंग लें, जैसे **Xero, Vic.ai, NetSuite, FreshBooks** का अकाउंटिंग सॉफ्टवेयर।
- एआई का अकाउंटिंग में समावेश, ऑडिटिंग में एआई के प्रभाव आदि विषयों पर आईसीएईडब्लू और एसीसीए समय-समय पर सेमिनार करते हैं। उनमें शामिल हो सकते हैं। आईएफटीए जैसी फिनटेक कॉन्फ्रेंस में शामिल हो सकते हैं।
- **Cube, Anaplan, Vena, Nintex, FlowForma, Entrust, IBM** जैसे पूर्वानुमान, खतरे का आकलन व धोखाधड़ी का पता लगाने वाले एआई टूल्स सीखें।

कुछ लोकप्रिय करियर

- **चार्टर्ड अकाउंटेंट :** भारत का साल 2047 तक 30 लाख सीए प्रशिक्षित करने का लक्ष्य है। वैसे भी अकाउंटिंग क्षेत्र में यह सबसे लोकप्रिय करियर है। इसका कोर्स आईसीएआई **(icai.org)** की ओर से कराया जाता है। यह कोर्स कुल तीन स्तरों- फाउंडेशन, इंटरमीडिएट और फाइनल-में कराया जाता है। बारहवीं के बाद फाउंडेशन कोर्स कर सकते हैं।
- **कॉस्ट एंड मैनेजमेंट अकाउंटेंट (सीएमए) :** ये पेशेवर लागत, बजट, व्यापार विश्लेषण और रणनीतिक योजना बनाने में अपना योगदान देते हैं। 12वीं के बाद सीएमए फाउंडेशन कोर्स से शुरुआत करें। स्ट्रैटेजिक कॉस्ट मैनेजमेंट,बिजनेस डाटा एनालिटिक्स जैसे कोर्स कर सकते हैं। यह कोर्स आईसीएमएआई **(icmai.in)** से कर सकते हैं।
- **टैक्स कंसल्टेंट :** बीकॉम के बाद सीएमए सर्टिफिकेशन कोर्स या टैक्सेशन में डिप्लोमा करें। टैक्सेशनल लॉ में सर्टिफिकेशन कर सकते हैं। या एलएलबी के बाद एलएलएम टैक्सेशन लॉ जैसी विशेषज्ञता कोर्स चुन सकते हैं।

ये अपस्किलिंग भी काम की

अकाउंटिंग से जुड़े कई ऐसे क्षेत्र भी है, जहां सीए, सीएमए जैसी बड़ी परीक्षाओं के बजाय स्नातक (जैसे बीकॉम या बीबीए) के तुरंत बाद अपस्किलिंग कर नौकरी के मौके पा सकते हैं। टैली,जीएसटी फाइलिंग कोर्स, एडवांस्ड एक्सेल के माध्यम से अकाउंट्स असिस्टेंट/ जूनियर अकाउंटेंट जैसे कामों से जुड़ सकते हैं। वहीं टैक्सेशन से संबंधित काम की भी ज्यादा मांग देखी जा रही है, जिसके लिए जीएसटी प्रैक्टिशनर कोर्स, इनकम टैक्स रिटर्न फाइलिंग कोर्स आदि की अपस्किलिंग आपको काम दिलाएगी।

जीएसटी कंसल्टेंसी के लिए जीएसटी कॉम्प्लायंस कोर्स, एडवांस्ड जीएसटी फाइलिंग के ऑनलाइन कोर्स कर सकते हैं।

- **प्रमुख मंच : ClearTax, Taxmann Academy, LearnCab, ICA Edu Skills, NIIT, Udemy, Intenshala**
- **औसत आय :** 15,000 रुपये प्रतिमाह से शुरुआत हो सकती है।

इसी तरह बीकॉम, बीबीए, एमबीए फाइनेंस या सीएफए सर्टिफिकेशन के बाद फाइनेंशियल एनालिस्ट, सीए या बीकॉम के साथ फॉरेंसिक अकाउंटिंग सर्टिफिकेट, सर्टिफाइड फ्रॉड इग्जामिनर, केपीएमजी फॉरेंसिक कोर्सेज करके फोरेंसिक अकाउंटेंट के तौर पर करियर बना सकते हैं। सीए मुकुल शर्मा कहते हैं कि इस क्षेत्र में 3 से 4 लाख रुपये प्रतिवर्ष से शुरू होकर अनुभव के बाद कई लाख रुपये प्रतिमाह तक वेतन हो सकता है।

एक्सपर्ट की राय

अकाउंटिंग का क्षेत्र अब ऑटोमेशन, डेटा एनालिटिक्स डिजिटल फाइनेंस की ओर बढ़ रहा है। इसलिए अपस्किलिंग और डिजिटल टूल्स की समझ भी बेहद आवश्यक है। एक्सेल के साथ-साथ अब **ERP** सिस्टम (जैसे एसएपी, टैली प्राइम), बिजनेस इंटेलिजेंस टूल्स (पावर बीआई, टैबलियू) और फिनटेक सॉफ्टवेयर की जानकारी भी जरूरी होती जा रही है। ऑनलाइन प्लेटफॉर्म जैसे **Coursera, Udemy, ICAI Digital Learning Hub,** और **LinkedIn Learning** से छोटी अवधि के कोर्स करके छात्र खुद को समय के अनुसार तैयार कर सकते हैं, जिससे उनको ज्यादा फायदा मिलेगा।'

-मुकुल शर्मा, चार्टर्ड अकाउंटेंट

देश का माल एवं सेवा कर राजस्व फिर दो लाख करोड़ के पार निकला

घरेलू खपत के दम पर तीसरी बार सर्वाधिक जीएसटी संग्रह

उत्साहजनक

नई दिल्ली, एजेंसी। देश में तीसरी बार सर्वाधिक जीएसटी राजस्व प्राप्त हुआ है। मई माह में माल एवं सेवा कर (जीएसटी) संग्रह 16.4 प्रतिशत बढ़कर 2.01 लाख करोड़ रुपये से अधिक हो गया। इससे पहले बीते अप्रैल में संग्रह 2.37 लाख करोड़ रुपये के अपने अबतक के सर्वकालिक उच्चस्तर पर पहुंच गया था।

रविवार को जारी आंकड़ों के मुताबिक, वर्ष 2017 में जीएसटी को लागू किया गया था। इसके बाद यह तीसरा मौका है, जब जीएसटी संग्रह दो लाख करोड़ के पार निकला है। अप्रैल 2024 में पहली बार सर्वाधिक 2.10 लाख करोड़ रुपये का जीएसटी संग्रह हुआ रहा था। तब से इसके नए रिकॉर्ड स्थापित हो रहे हैं। इस बीच, महीने के दौरान कुल रिफंड चार प्रतिशत घटकर 27,210 करोड़ रुपये रह गया।

16 फीसदी से अधिक का उछाल : मई 2024 में जीएसटी संग्रह 1,72,739 करोड़ रुपये था। सालाना आधार पर देखा जाए तो मई 2025 में जीएसटी राजस्व में 16.4 फीसदी का उछाल आया है। मई में घरेलू लेनदेन से कुल जीएसटी राजस्व 13.7 प्रतिशत बढ़कर लगभग 1.50 लाख करोड़ रुपये हो गया, जबकि आयात से जीएसटी संग्रह 25.2 प्रतिशत बढ़कर 51,266 करोड़ रुपये रहा। वित्त वर्ष 2025-26 के अप्रैल-मई की अवधि में कुल जीएसटी राजस्व 4,37,767 करोड़ रुपये रहा, जो पिछले साल की समान अवधि के 3,83,006 करोड़ रुपये से 14.3 फीसदी अधिक है। वहीं, कारोबारी साल 2024-25 में राजस्व 22 लाख करोड़ रुपये था, जो पिछले साल की तुलना में 9.4 फीसदी अधिक था। कारोबारी साल 2023-24 में कुल सकल राजस्व 20.18 लाख करोड़ रुपये था।

रिकॉर्ड कमाई

महीना	संग्रह
मई 2025	2.01
अप्रैल 2025	2.37
मार्च 2025	1.96
फरवरी 2025	1.83
जनवरी 2025	1.95
दिसंबर 2024	1.77

■ संग्रह लाख करोड़ रुपये में

राज्यों की कमाई में काफी बड़ा अंतर

डेलॉयट इंडिया के साझेदार एम.एस. मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में प्रत्येक राज्य में ऐसे क्षेत्रों का गहन विश्लेषण करने की जरूरत है, जो उसके लिए महत्वपूर्ण हैं। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 प्रतिशत से 25 प्रतिशत की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह प्रतिशत तक की वृद्धि दिखाई है। मध्यप्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 प्रतिशत की वृद्धि हुई है। मणि ने कहा कि, देशभर में औसत वृद्धि, संभवत: क्षेत्रीय या मौसमी कारकों के कारण राज्यों में समान रूप से परिलक्षित नहीं होती है, इसके लिए गहन विश्लेषण की जरूरत है।

मजबूती की ओर इशारा

हाल के जीएसटी संग्रह के आंकड़े भारत की अर्थव्यवस्था में तेजी के रुझान को दर्शाते हैं। इससे यह पता चलता है कि देश में घरेलू खपत, मांग और आयात गतिविधियों में मजबूती दर्ज की जा रही है। ये आंकड़े देश की कारोबारी स्थिति और आर्थिक सुधार प्रयासों के लिए सकारात्मक संकेत हैं, जो वैश्विक अनिश्चितताओं के बीच भी आर्थिक मजबूती का इशारा करता है।

इसलिए बढ़ रहा राजस्व

- भारत में मजबूत मांग और खपत
- सेवा और विनिर्माण क्षेत्र में तेजी
- ई-इन्वॉइसिंग में बढ़ोतरी
- विनियामक अनुपालन में इजाफा
- नए करदाताओं में बढ़ोतरी
- डिजिटलीकरण एवं पारदर्शिता

యాక్సెంచర్‌లో 50,000 మందికి పదోన్నతులు

దిల్లీ: ఈ ఏడాది జూన్‌లో ప్రపంచవ్యాప్తంగా దాదాపు 50,000 మంది ఉద్యోగులకు యాక్సెంచర్ పీఎల్‌సీ పదోన్నతులు కల్పించనుంది. కన్సల్టెన్సీ సేవలకు గిరాకీ తగ్గడంతో పదోన్నతుల ప్రక్రియ, ఇప్పటికే ఆరు నెలల జాప్యమైంది. దీంతో ఉద్యోగుల్లో విశ్వాసం నింపేందుకు పదోన్నతులు ఇవ్వాలని కంపెనీ నిర్ణయించినట్లు వార్తా సంస్థ బ్లూమ్‌బర్గ్ తెలిపింది. భారత్‌లో 15,000 మందికి, ఐరోపా, పశ్చిమాసియా-ఆఫ్రికాల్లో 11,000 మందికి, అమెరికాలో 10,000 మంది ఉద్యోగులకు పదోన్నతులు లభించే అవకాశం ఉంది. ఈ కంపెనీ సాధారణంగా ఏటా డిసెంబరులో పదోన్నతులు ఇస్తుంది. ఇకపై జూన్‌లో ఇవ్వనుంది. ప్రపంచవ్యాప్తంగా యాక్సెంచర్‌కు 8,01,000 మంది ఉద్యోగులు ఉన్నారు. కన్సల్టెన్సీ సేవలకు గిరాకీ నెమ్మదించడంతో కొన్నేళ్లుగా యాక్సెంచర్ ఇబ్బందులు పడుతోంది. 2023లో సంస్థ 19,000 ఉద్యోగులను తొలగించింది కూడా. పోటీ సంస్థలు మెకిన్సే, ఎర్నెస్ట్ అండ్ యంగ్, డెలాయిట్ కూడా ఉద్యోగుల లేఆఫ్స్ ప్రకటించాయి.

అభ్యాసం, కెరీర్ వృద్ధికి యువత ప్రాధాన్యం

- ఉద్యోగ నిర్ణయాల్లో ఇవే కీలకాంశాలు
- 2025 డెలాయిట్ గ్లోబల్ జెన్‌జెడ్ అండ్ మిలీనియల్ సర్వే

ముంబయి: ఆటోమేషన్, జెన్ ఏఐ (కృత్రిమమేధ), మారుతున్న అంచనాలతో పని ప్రదేశాలు అభివృద్ధి చెందుతున్నాయని '2025 డెలాయిట్ గ్లోబల్ జెన్ జెడ్ అండ్ మిలీనియల్' సర్వే గురువారం వెల్లడించింది. దేశంలోని యువ శ్రామిక శక్తి (30 ఏళ్లలోపు -జెన్ జెడ్, 45 ఏళ్లలోపు-మిలీనియల్స్) ఉద్యోగ నిర్ణయాల్లో కెరీర్ పురోగతి, అభ్యాస అవకాశాలకు అధిక ప్రాధాన్యం ఇస్తున్నారని తెలిపింది. ఈ సర్వే ప్రకారం..

- దేశంలోని యువత భవిష్యత్తు అవసరాలకు అనుగుణంగా మారడమే కాకుండా, నైపుణ్యాలను ఎప్పటికప్పుడు పెంచుకుంటున్నారు. 85 శాతం మంది వారం వారీగా తమ నైపుణ్యాలను పెంచుకోవడంపై దృష్టి సారిస్తున్నారు.
- మేనేజర్ల నుంచి చురుకైన మెంటార్‌షిప్ కోరుకునే వారిలో సగం మందే దాన్ని పొందుతున్నారు.
- వేగంగా మారుతున్న ఉద్యోగ విపణికి సంప్రదాయ విద్యా వ్యవస్థ, డిగ్రీలు సరిపోతాయా అనే అనుమానాలు వీరి నుంచి వ్యక్తమయ్యాయి. 94 శాతానికి పైగా జెన్ జెడ్‌లు, 97% మంది మిలీనియల్స్ థియరీ కంటే అనుభవానికే (ప్రాక్టికాలిటీ) విలువ ఇస్తున్నట్లు తెలిపారు.
- 52% మంది జెన్‌జెడ్‌లు, 45% మంది మిలీనియల్స్ ఉన్నత విద్య నాణ్యతపై అసంతృప్తిగా ఉన్నారు. 33% జెన్ జెడ్‌లు, 29% మిలీనియల్స్ తాము అన్ని సమయాల్లో లేదా ఎక్కువ సమయం ఒత్తిడి/ఆందోళనకి గురవుతున్నామని చెప్పారు. తమ ఉద్యోగ బాధ్యతలే ఈ ఒత్తిడికి కారణమవుతున్నాయని 36 శాతానికి పైగా జెన్ జెడ్‌లు, 39% మంది మిలీనియల్స్ వెల్లడించారు.

సంస్థలూ పని సంస్కృతి నిర్మించుకోవాలి: ఉద్యోగంలో నేర్చుకోవడానికి ప్రాధాన్యం ఇవ్వడంతో పాటు జెన్ ఏఐ వంటి సాంకేతికతలతో అనుసంధానించిన కెరీర్‌లను యువత నిర్మించుకుంటోందని డెలాయిట్ ఇండియా చీఫ్ హ్యాపినెస్ ఆఫీసర్ సరస్వతి కస్తూరిరంగన్ వెల్లడించారు. ఉద్యోగ సంస్థలు కూడా వృద్ధి, ఆవిష్కరణలు, నిరంతర అభ్యాసం వంటి పని సంస్కృతిని నిర్మించుకోవాలని సూచించారు. ఉద్యోగుల ఆనందం, శ్రేయస్సుకు సంస్థలు ఎలా ప్రాధాన్యం ఇస్తున్నాయో ఒకసారి పునరాలోచించుకోవాలని సరస్వతి సూచించారు. శారీరక, మానసిక, ఆర్థిక శ్రేయస్సు ఒకదానితో ఒకటి ముడిపడి ఉంటాయని, నాయకత్వంలోని అత్యున్నత స్థాయిల్లో దీన్ని పరిష్కరించుకోవాల్సిన అవసరం ఉందని ఆమె అభిప్రాయపడ్డారు.

- 809 మంది భారతీయ వృత్తి నిపుణులు, 505 మంది జెన్ జెడ్‌లు, 304 మంది మిలీనియల్స్ నుంచి స్పందనలు స్వీకరించి ఈ సర్వే నివేదికను రూపొందించారు.

युवाओं के नौकरी से जुड़े फैसलों को प्रभावित कर रही करियर में तरक्की की चिंता

मुंबई (भाषा)।

ऑटोमेशन और जनरेटिव एआई (जेनएआई) के साथ निरंतर विकसित होते कार्यस्थलों और बदलती अपेक्षाओं के मद्देनजर करियर की प्रगति और सीखने के अवसर भारत के युवा कार्यबल के नौकरी के फैसले को प्रभावित करने वाले शीर्ष कारकों में से है।

पेशेवर सेवा कंपनी डेलॉयट की ओर से बृहस्पतिवार को जारी सर्वेक्षण में यह बात सामने आई है।

डेलॉयट इंडिया की 'चीफ हैप्पीनेस ऑफिसर' सरस्वती कस्तूरीरंगन ने कहा, 'भारत के 'जेन-जी' और 'मिलेनियल्स' न केवल भविष्य के अनुरूप काम करने के तरीकों के हिसाब से खुद को ढाल रहे है, बल्कि वे इसे आकार भी दे रहे है। 85 प्रतिशत लोग साप्ताहिक 'अपस्किलिंग' में लगे हुए है और नौकरी के दौरान सीखने को प्राथमिकता दे रहे है, वे जेनएआई जैसी प्रौद्योगिकियों के साथ मिलकर चुस्त, उद्देश्य-संचालित करियर बना रहे है।'

'जेन-जी' 1997 से 2012 के बीच और 'मिलेनियल्स' 1981 से 1996 के बीच जन्म लेने वाले लोगों को कहा जाता है। कस्तूरीरंगन ने '2025 डेलॉयट ग्लोबल जेन-जी एंड मिलेनियल्स सर्वे' का हवाला देते हुए कहा कि नियोक्ताओं के लिए यह विकास, नवाचार और निरंतर सीखने पर आधारित संस्कृति का निर्माण करने का संकेत है।

सर्वेक्षण में पाया गया कि करियर की प्रगति और सीखने के अवसर उन शीर्ष कारकों में से है जो युवा कार्यबल के लिए नौकरी के फैसले को प्रभावित करते है। हालांकि, 'मेंटरशिप' (अनुभवी व्यक्ति के मार्गदर्शन) की कमी है क्योंकि लगभग आधे उत्तरदाता प्रबंधकों से सक्रिय 'मेंटरशिप' चाहते है, लेकिन बहुत कम को यह मिलती है।

यह '2025 डेलॉयट ग्लोबल जेन-जी एंड मिलेनियल्स सर्वे' वैश्विक दृष्टिकोण से प्राप्त अंतर्दृष्टि पर आधारित है। इसमें 809 भारतीय पेशेवरों की प्रतिक्रियाएं शामिल है जिनमें से 505 जेन-जी और 304 मिलेनियल्स थे। सर्वेक्षण से पारंपरिक शिक्षा के मूल्य के बारे में बढ़ती शंकाएं उजागर हुईं, क्योंकि कई लोगों ने सवाल उठाया कि क्या तेजी से बदलते नौकरी बाजार में केवल औपचारिक डिग्री ही पर्याप्त है? इसमें 94 प्रतिशत से अधिक जेन-जी और 97 प्रतिशत से अधिक मिलेनियल्स ने कहा कि वे सिद्धांत से अधिक व्यावहारिक अनुभव को महत्व देते है।

इसके अलावा, सर्वेक्षण में यह भी पाया गया कि 52 प्रतिशत जेन-जी और 45 प्रतिशत मिलेनियल्स उच्च शिक्षा की गुणवत्ता से असंतुष्ट है। साथ ही 36 प्रतिशत जेन-जी और 40 प्रतिशत मिलेनियल्स ने लागत संबंधी चिंताओं की बात कही। इस बीच, भारत में 33 प्रतिशत जेन-जी और 29 प्रतिशत मिलेनियल्स ने कहा कि वे हर समय या अधिकतर समय तनावग्रस्त या चिंतित महसूस करते है। भारत में 36 प्रतिशत से अधिक जेन-जी और 39 प्रतिशत मिलेनियल्स ने कहा कि उनकी नौकरी उनकी चिंता या तनाव की भावनाओं के लिए काफी हद तक जिम्मेदार है।

सरस्वती ने कहा, '' संगठनों को इस बात पर पुनर्विचार करने की जरूरत है कि वे कर्मचारियों की खुशी तथा कुशलक्षेम को किस तरह प्राथमिकता देते है।

लगातार 7वें साल सिंगापुर के रास्ते आया सर्वाधिक एफडीआई

नई दिल्ली (भाषा)।

सिंगापुर पिछले सात साल से भारत का प्रत्यक्ष विदेशी निवेश (एफडीआई) का सबसे बड़ा सोत बना हुआ है। भारत को 2024-25 में सिंगापुर से लगभग 15 अरब अमेरिकी डॉलर का सबसे अधिक विदेशी निवेश मिला है।

पिछले वित्त वर्ष के दौरान कुल एफडीआई (जिसमें इक्विटी प्रवाह, पुनर्निवेशित आय और अन्य पूंजी शामिल है) 14 प्रतिशत बढ़कर 81.04 अरब डॉलर हो गया। यह पिछले तीन साल का सबसे ऊंचा आंकड़ा है।

ताजा सरकारी आंकड़ों के अनुसार, 2024-25 में सिंगापुर से एफडीआई 2023-24 के 11.77 अरब डॉलर से बढ़कर 14.94 अरब डॉलर हो गया। 2024-25 में कुल प्रवाह में सिंगापुर का योगदान लगभग 19 प्रतिशत था। 2018-19 से, सिंगापुर, भारत के लिए एफडीआई का सबसे बड़ा स्रोत बना हुआ है।

इससे पहले 2017-18 में भारत ने मॉरीशस से सबसे ज्यादा प्रत्यक्ष विदेशी निवेश आकर्षित किया था। पिछले वित्त वर्ष में देश को मॉरीशस से 8.34 अरब डॉलर का विदेशी निवेश प्राप्त हुआ। बीते वित्त वर्ष में मॉरीशस के बाद अमेरिका (5.45 अरब डॉलर), नीदरलैंड (4.62 अरब डॉलर), संयुक्त अरब अमीरात (3.12 अरब डॉलर), जापान (2.47 अरब डॉलर), साइप्रस (1.2 अरब डॉलर), ब्रिटेन (79.5 करोड़ डॉलर), जर्मनी (46.9 करोड़ डॉलर) और केमैन आइलैंड (37.1 करोड़ डॉलर) का स्थान रहा।

विशेषज्ञों का कहना है कि वैश्विक वित्तीय केंद्र के रूप में मजबूत स्थिति, बेहतर द्विपक्षीय संबंध और वैश्विक निजी इक्विटी और उद्यम पूंजी निवेश का 'गेटवे' होने की वजह से भारत के लिए सिंगापुर सबसे बड़ा एफडीआई का सोत बना हुआ है।

डेलॉयट इंडिया की अर्थशास्त्री रुमकी मजूमदार ने कहा कि पूंजी बाजार में उथल-पुथल और व्यापार को लेकर अनिश्चितताओं के बावजूद भारत भारी विदेश निवेश आकर्षित करने में कामयाब रहा है, जो स्थिर और दीर्घकालिक है।

उन्होंने कहा कि चूंकि एशिया विदेशी पूंजी प्रवाह प्राप्त करने वाला दूसरा सबसे बड़ा क्षेत्र है, इसलिए कोष का एक बड़ा हिस्सा सिंगापुर से आता है। इसके कई कारण है। कम कर वाला क्षेत्र होने के साथ सिंगापुर का कानूनी ढांचा काफी मजबूत है, ऐसे में उसे एशिया के लिए रणनीतिक वित्तीय 'गेटवे' माना जाता है।

मई में दो लाख करोड़ का जीएसटी संग्रह

नई दिल्ली (भाषा)।

सकल माल एवं सेवा कर (जीएसटी) संग्रह मई में 16.4 प्रतिशत बढ़कर 2.01 लाख करोड़ रुपये से अधिक हो गया है। रविवार को जारी सरकारी आंकड़ों में यह जानकारी दी गई। इससे पहले अप्रैल में जीएसटी संग्रह 2.37 लाख करोड़ रुपये के अपने अब तक के सर्वकालिक उच्चस्तर पर पहुंच गया था। मई में घरेलू लेनदेन से कुल जीएसटी राजस्व 13.7 प्रतिशत बढ़कर लगभग 1.50 लाख करोड़ रुपये हो गया, जबकि आयात से जीएसटी संग्रह 25.2 प्रतिशत बढ़कर 51,266 करोड़ रुपये रहा।

मई में कुल केंद्रीय जीएसटी राजस्व 35,434 करोड़ रुपये, राज्य जीएसटी राजस्व 43,902 करोड़ रुपये और एकीकृत जीएसटी संग्रह लगभग 1.09 लाख करोड़ रुपये रहा। उपकर से राजस्व 12,879 करोड़ रुपये रहा। मई, 2024 में जीएसटी संग्रह 1,72,739 करोड़ रुपये रहा था। इस बीच, महीने के दौरान कुल रिफंड चार प्रतिशत घटकर 27,210 करोड़ रुपये रह गया। माह के दौरान शुद्ध जीएसटी संग्रह 20.4 प्रतिशत की सालाना वृद्धि के साथ लगभग 1.74 लाख करोड़ रुपये रहा।

डेलॉयट इंडिया के साझेदार एमएस मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में प्रत्येक राज्य में ऐसे क्षेत्रों का गहन विश्लेषण करने की जरूरत है, जो उसके लिए महत्वपूर्ण है। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 प्रतिशत से 25 प्रतिशत की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह प्रतिशत तक की वृद्धि दिखाई है। मध्य प्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 प्रतिशत की वृद्धि हुई है। मणि ने कहा, ''इसलिए, देशभर में औसत वृद्धि, संभवतः क्षेत्रीय या मौसमी कारकों के कारण राज्यों में समान रूप से परिलक्षित नहीं होती है, जिसके लिए गहन डेटा आधारित विश्लेषण की आवश्यकता है।'

मई में दो लाख करोड़ का जीएसटी संग्रह

नई दिल्ली (भाषा)।

सकल माल एवं सेवा कर (जीएसटी) संग्रह मई में 16.4 प्रतिशत बढ़कर 2.01 लाख करोड़ रुपये से अधिक हो गया है। रविवार को जारी सरकारी आंकड़ों में यह जानकारी दी गई। इससे पहले अप्रैल में जीएसटी संग्रह 2.37 लाख करोड़ रुपये के अपने अब तक के सर्वकालिक उच्चस्तर पर पहुंच गया था। मई में घरेलू लेनदेन से कुल जीएसटी राजस्व 13.7 प्रतिशत बढ़कर लगभग 1.50 लाख करोड़ रुपये हो गया, जबकि आयात से जीएसटी संग्रह 25.2 प्रतिशत बढ़कर 51,266 करोड़ रुपये रहा।

मई में कुल केंद्रीय जीएसटी राजस्व 35,434 करोड़ रुपये, राज्य जीएसटी राजस्व 43,902 करोड़ रुपये और एकीकृत जीएसटी संग्रह लगभग 1.09 लाख करोड़ रुपये रहा। उपकर से राजस्व 12,879 करोड़ रुपये रहा। मई, 2024 में जीएसटी संग्रह 1,72,739 करोड़ रुपये रहा था। इस बीच, महीने के दौरान कुल रिफंड चार प्रतिशत घटकर 27,210 करोड़ रुपये रह गया। माह के दौरान शुद्ध जीएसटी संग्रह 20.4 प्रतिशत की सालाना वृद्धि के साथ लगभग 1.74 लाख करोड़ रुपये रहा।

डेलॉयट इंडिया के साझेदार एमएस मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में प्रत्येक राज्य में ऐसे क्षेत्रों का गहन विश्लेषण करने की जरूरत है, जो उसके लिए महत्वपूर्ण है। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 प्रतिशत से 25 प्रतिशत की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह प्रतिशत तक की वृद्धि दिखाई है। मध्य प्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 प्रतिशत की वृद्धि हुई है। मणि ने कहा, ''इसलिए, देशभर में औसत वृद्धि, संभवतः क्षेत्रीय या मौसमी कारकों के कारण राज्यों में समान रूप से परिलक्षित नहीं होती है, जिसके लिए गहन डेटा आधारित विश्लेषण की आवश्यकता है।'

लगातार 7वें साल सिंगापुर के रास्ते आया सर्वाधिक एफडीआई

नई दिल्ली (भाषा)।

सिंगापुर पिछले सात साल से भारत का प्रत्यक्ष विदेशी निवेश (एफडीआई) का सबसे बड़ा सोत बना हुआ है। भारत को 2024-25 में सिंगापुर से लगभग 15 अरब अमेरिकी डॉलर का सबसे अधिक विदेशी निवेश मिला है।

पिछले वित्त वर्ष के दौरान कुल एफडीआई (जिसमें इक्विटी प्रवाह, पुनर्निवेशित आय और अन्य पूंजी शामिल है) 14 प्रतिशत बढ़कर 81.04 अरब डॉलर हो गया। यह पिछले तीन साल का सबसे ऊंचा आंकड़ा है।

ताजा सरकारी आंकड़ों के अनुसार, 2024-25 में सिंगापुर से एफडीआई 2023-24 के 11.77 अरब डॉलर से बढ़कर 14.94 अरब डॉलर हो गया। 2024-25 में कुल प्रवाह में सिंगापुर का योगदान लगभग 19 प्रतिशत था। 2018-19 से, सिंगापुर, भारत के लिए एफडीआई का सबसे बड़ा स्रोत बना हुआ है।

इससे पहले 2017-18 में भारत ने मॉरीशस से सबसे ज़्यादा प्रत्यक्ष विदेशी निवेश आकर्षित किया था। पिछले वित्त वर्ष में देश को मॉरीशस से 8.34 अरब डॉलर का विदेशी निवेश प्राप्त हुआ। बीते वित्त वर्ष में मॉरीशस के बाद अमेरिका (5.45 अरब डॉलर), नीदरलैंड (4.62 अरब डॉलर), संयुक्त अरब अमीरात (3.12 अरब डॉलर), जापान (2.47 अरब डॉलर), साइप्रस (1.2 अरब डॉलर), ब्रिटेन (79.5 करोड़ डॉलर), जर्मनी (46.9 करोड़ डॉलर) और केमैन आइलैंड (37.1 करोड़ डॉलर) का स्थान रहा।

विशेषज्ञों का कहना है कि वैश्विक वित्तीय केंद्र के रूप में मजबूत स्थिति, बेहतर द्विपक्षीय संबंध और वैश्विक निजी इक्विटी और उद्यम पूंजी निवेश का 'गेटवे' होने की वजह से भारत के लिए सिंगापुर सबसे बड़ा एफडीआई का सोत बना हुआ है।

डेलॉयट इंडिया की अर्थशास्त्री रुमकी मजूमदार ने कहा कि पूंजी बाजार में उथल-पुथल और व्यापार को लेकर अनिश्चितताओं के बावजूद भारत भारी विदेश निवेश आकर्षित करने में कामयाब रहा है, जो स्थिर और दीर्घकालिक है।

उन्होंने कहा कि चूंकि एशिया विदेशी पूंजी प्रवाह प्राप्त करने वाला दूसरा सबसे बड़ा क्षेत्र है, इसलिए कोष का एक बड़ा हिस्सा सिंगापुर से आता है। इसके कई कारण है। कम कर वाला क्षेत्र होने के साथ सिंगापुर का कानूनी ढांचा काफी मजबूत है, ऐसे में उसे एशिया के लिए रणनीतिक वित्तीय 'गेटवे' माना जाता है।

७० लाखांहून अधिक लोकांना रोजगार मिळाला

अन्न प्रक्रियेने उजळले ग्रामीण भारताचे चित्र

दिल्ली.नवराष्ट्र न्यूज नेटवर्क. भारताचे अन्न प्रक्रिया क्षेत्र देशाच्या अर्थव्यवस्थेचा एक महत्त्वाचा आधारस्तंभ म्हणून उदयास येत आहे. देशाच्या एकूण उत्पादन जीव्हीए (एकूण मूल्यवर्धित) मध्ये या क्षेत्राचे योगदान ७.७ टक्के आहे आणि मूल्य साखळीत ७ दशलक्षाहून अधिक नोकऱ्यांना आधार देते.

१६० अब्ज अमेरिकन डॉलर्स किमतीचे हे क्षेत्र ग्रामीण औद्योगिकीकरणाला चालना देत आहे आणि कापणीनंतरचे नुकसान कमी करत आहे, असे डेलॉइट आणि फिक्कीच्या नवीन अहवालात म्हटले आहे. ग्रामीण भागातील वाढती मागणी, डिजिटल परिवर्तन आणि सरकारी धोरणांना पाठिंबा यामुळे या क्षेत्राला सतत चालना मिळत आहे. डेलॉइट साउथ एशियाचे पार्टनर आणि कंझ्युमर इंडस्ट्री लीडर आनंद रामनाथन म्हणाले की, भारतातील कृषी आणि अन्न प्रक्रिया क्षेत्र एका मोठ्या परिवर्तनाच्या उंबरठ्यावर आहे जिथे पारंपरिक पद्धती आणि अत्याधुनिक तंत्रज्ञान एकत्रितपणे भविष्यासाठी तयार अन्न परिसंस्था तयार

करत आहेत. ते म्हणाले की, ग्राहक आता स्वच्छ लेबल असलेल्या, प्रथिनेयुक्त आणि पोटासाठी अनुकूल असलेल्या अन्नाकडे वळत आहेत, ज्यामुळे भारतात अन्न वापरात संरचनात्मक वाढ होत आहे. रामनाथन यांचा असा विश्वास आहे की भारत आरोग्य-केंद्रित, तंत्रज्ञान-सक्षम आणि समावेशक अन्न प्रणालींवरील जागतिक चर्चेचे नेतृत्व करण्यास सज्ज आहे, ज्याला एआय, आयओटी आणि ब्लॉकचेनमधील प्रगतीमुळे चालना मिळाली आहे.

शहरी वापराच्या पद्धती देखील बदलत आहेत जिथे अन्न बजेटच्या जवळजवळ ५० टक्के रक्कम आता पॅक केलेल्या आणि तयार केलेल्या अन्नावर खर्च केली जाते.

एआई के दौर में नौकरी से जुड़े फैसलों में प्रगति और सीखने को प्राथमिकता देते हैं मिलेनियल्स

मुंबई। जेनरेटिव आर्टिफिशियल इंटेलिजेंस (एआई) व ऑटोमेशन के साथ निरंतर विकसित होते कार्यस्थलों और बदलती अपेक्षाओं के मद्देनजर देश के जेनरेशन जेड और मिलेनियल्स नौकरी संबंधी फैसलों में प्रगति एवं सीखने को प्राथमिकता देते हैं। जेनरेशन जेड 1997 से 2012 और मिलेनियल्स 1981 से 1996 के बीच जन्मे लोगों को कहा जाता है।

डेलॉय ने बृहस्पतिवार को जारी सर्वे में कहा, भारत के जेनरेशन जेड और मिलेनियल्स न सिर्फ भविष्य के अनुरूप काम करने के तरीकों के हिसाब से

खुद को ढाल रहे हैं, बल्कि वे इसे आकार भी दे रहे हैं। 85 फीसदी युवा साप्ताहिक आधार पर अपने कौशल को निखारने पर जोर दे रहे हैं। वे जेनरेटिव एआई जैसी प्रौद्योगिकियों के साथ मिलकर चुस्त और उद्देश्य संचालित करियर बना रहे हैं। डेलॉय इंडिया की चीफ हैप्पीनेस ऑफिसर सरस्वती कस्तूरीरंगन ने कहा, नियोक्ताओं के लिए यह विकास, नवाचार और निरंतर सीखने पर आधारित संस्कृति का निर्माण करने का संकेत है। सर्वे लोगों ने सवाल उठाया कि क्या तेजी से बदलते नौकरी बाजार में सिर्फ औपचारिक डिग्री पर्याप्त है? इस पर 94 फीसदी से ज्यादा जेनरेशन जेड और 97 फीसदी से अधिक मिलेनियल्स ने कहा, वे बदलते नौकरी बाजार में सैद्धांतिक से अधिक व्यावहारिक अनुभव को महत्व देने पर जोर देते हैं। एजेंसी

आरबीआई के रिकॉर्ड लाभांश के बाद अब जीएसटी ने भरा केंद्र सरकार का खजाना

घरेलू लेनदेन-आयात से जीएसटी राजस्व में 25.6 फीसदी तक उछाल, रिफंड घटा

अमर उजाला ब्यूरो

नई दिल्ली। भारतीय रिजर्व बैंक (आरबीआई) की ओर से रिकॉर्ड 2.69 लाख करोड़ रुपये का लाभांश मिलने के बाद अब माल एवं सेवा कर (जीएसटी) संग्रह ने भी सरकार का खजाना भर दिया है। मई, 2025 में सरकार को जीएसटी के रूप में हुई कुल 2,01,050 करोड़ रुपये की कमाई में घरेलू लेनदेन और आयात से प्राप्त राजस्व की महत्वपूर्ण भूमिका रही।

सरकार की ओर से रविवार को जारी आंकड़ों के मुताबिक, मई में घरेलू लेनदेन से कुल करीब 1.50 लाख करोड़ रुपये का राजस्व प्राप्त हुआ। यह आंकड़ा एक साल पहले की समान अवधि के 1,31,783 करोड़ रुपये से 13.7 फीसदी अधिक है। आयात से हासिल राजस्व भी मई, 2024 के 40,956 करोड़ की तुलना में 25.2 फीसदी बढ़कर 51,266 करोड़ रुपये पहुंच गया। हालांकि, इस दौरान रिफंड चार फीसदी घटकर 27,210 करोड़ रुपये रह गया। मई, 2024 में कुल 28,357 करोड़ रुपये का रिफंड जारी किया गया था।

प्राइस वाटरहाउस एंड कंपनी एलएलपी के साझेदार प्रतीक जैन ने कहा, जीएसटी संग्रह में 16 फीसदी की वृद्धि कुछ महीनों तक 11 से 12 फीसदी की बढ़ोतरी के बाद नए सिरे से तेजी को दर्शाती है। अगले अगले कुछ महीनों तक वृद्धि इसी दायरे में जारी रहती है, तो इससे सरकार को दरों को तर्कसंगत बनाने पर विचार करने का अवसर मिल सकता है, जिस पर पहले ही काफी काम हो चुका है।

1.50 लाख करोड़ का राजस्व घरेलू लेनदेन से मिला

रिफंड 4 फीसदी घटकर 27,210 करोड़ रुपये रह गया

प्रत्येक राज्य में महत्वपूर्ण क्षेत्रों का विश्लेषण जरूरी

डेलॉय इंडिया के साझेदार एमएस मणि ने कहा, राज्यों में जीएसटी संग्रह वृद्धि में व्यापक अंतर देखा जा रहा है। ऐसे में हर राज्य में ऐसे क्षेत्रों के गहन विश्लेषण की जरूरत है, जो उसके लिए महत्वपूर्ण हैं।

अब तक पांच सर्वाधिक संग्रह

वसूली (करोड़ रुपये में)

सबसे ज्यादा वसूली वाले पांच राज्य

महाराष्ट्र	31,530
कर्नाटक	14,299
तमिलनाडु	12,230
गुजरात	11,737
दिल्ली	10,366

(आंकड़े : करोड़ रुपये में)

इन राज्यों में जीएसटी संग्रह में मासिक आधार पर 38 फीसदी तक तेजी।

यूपीआई लेनदेन : बढ़कर 25.14 लाख करोड़ रुपये

अप्रैल में गिरावट के बाद यूपीआई के जरिये लेनदेन में संख्या और मूल्य दोनों के लिहाज से मई, 2025 में बढ़ोतरी दर्ज की गई है। संख्या के लिहाज से

यूपीआई लेनदेन मई में मासिक आधार 4.4 फीसदी और सालाना आधार पर 33 फीसदी बढ़कर 18.68 अरब पहुंच गया। अप्रैल, 2024 में यह आंकड़ा 17.89 अरब और मई, 2024 में 14.03 अरब था। मूल्य के लिहाज से यूपीआई लेनदेन अप्रैल के 23.95 लाख करोड़ रुपये से पांच फीसदी बढ़कर 25.14 लाख करोड़ रुपये पहुंच गया। मई, 2024 के 20.45 लाख करोड़ रुपये की तुलना में यूपीआई लेनदेन में 23 फीसदी की बढ़ोतरी दर्ज की गई है।

- पिछले महीने हर दिन औसतन 81,106 करोड़ रुपये के 60.2 करोड़ यूपीआई लेनदेन हुए।
- आईएमपीएस के जरिये मई में 5.91 लाख करोड़ रुपये के 43.24 करोड़ लेनदेन हुए।

बिजली खपत : 4 फीसदी घटी

देश में बिजली की खपत मई में सालाना आधार पर चार फीसदी घटकर 148.71 अरब यूनिट रह गई। इसका मुख्य कारण बेमौसम बारिश और मानसून का समय से पहले आना है, जिससे कूलर और एयर कंडीशनर जैसे उपकरणों के इस्तेमाल में कमी आई है। आंकड़ों के मुताबिक, पिछले साल मई में बिजली की खपत 155.15 अरब यूनिट रही थी।

लक्षद्वीप में संग्रह सबसे ज्यादा 445 फीसदी बढ़ा

लक्षद्वीप में जीएसटी संग्रह मई में सालाना आधार पर 445 फीसदी बढ़ा है। मणिपुर 102 फीसदी के साथ दूसरे, लद्दाख 89 फीसदी के साथ तीसरे, चंडीगढ़ 53 फीसदी के साथ चौथे और नगालैंड 46 फीसदी के साथ पांचवें स्थान पर है।

- मिजोरम में कर संग्रह सालाना आधार पर सबसे ज्यादा 26 फीसदी घटकर 29 करोड़ रुपये रह गया।
- *हरियाणा में जीएसटी संग्रह 10,170 करोड़, पंजाब में 2,414 करोड़, उत्तराखंड में 1,605 करोड़, हिमाचल प्रदेश में 849 करोड़, जम्मू-कश्मीर में 578 करोड़ और चंडीगढ़ में 363 करोड़ रुपये रहा।*

నైపుణ్యాలు, ఉద్యోగ పురోగతికే ప్రాధాన్యం

- జెన్ జెడ్, మిలీనియల్స్ అభిప్రాయం
- డెలాయిట్ సర్వేలో వెల్లడి

ముంబై: కంపెనీల కార్యకలాపాల్లో ఆటోమేషన్, జెనరేటివ్ ఏఐ వినియోగం విస్తరిస్తుండడంతో.. జెనరేషనల్ జెడ్, మిలీనియల్స్ తరగతి యువత నైపుణ్యాలు పెంచుకునేందుకు, ఉద్యోగంలో పురోగతికి ప్రాధాన్యం ఇస్తున్నారు. ఉద్యోగ నిర్ణయాల్లో పురోగతి, అభ్యాసనా అవకాశాలకే తమ ప్రాధాన్యమని డెలాయిట్ సర్వేలో వారు చెప్పారు. జెన్ జెడ్, మిలీనియల్స్‌లో 85 శాతం మంది ప్రతి వారం చివర్లో నైపుణ్యాలు పెంచుకునేందుకు, పనిచేస్తూనే నేర్చుకునేందుకు ప్రాధాన్యం ఇస్తున్నట్టు డెలాయిట్ ఇండియా చీఫ్ హ్యూమన్ ఆఫీసర్ సరస్వతి కన్నూరి రంగన్ తెలిపారు. కాకపోతే వీరికి తగినంత మార్గదర్శకత్వం లభించడం లేదని డెలాయిట్ సర్వే

పేర్కొంది. సర్వేలో పాల్గొన్న వారిలో సగం మంది తమ మేనేజర్ల నుంచి మార్గదర్శనం కోరుకుంటుంటే.. అది కొందరికే లభిస్తున్నట్టు తెలిపింది. 505 మంది జెనరేషన్ జెడ్, 304 మిలీనియల్స్ అభిప్రాయాలను ఈ సర్వేలో భాగంగా డెలాయిట్ తెలుసుకుంది. 1981-1996 మధ్య జన్మించిన వారిని మిలీనియల్స్‌గా, 1997-2012 మధ్యకాలంలో జన్మించిన వారిని జెనరేషన్ జెడ్ కింద పరిగణిస్తుంటారు.

పట్టాలు కాదు.. అనుభవానికే పెద్ద పీట

వేగంగా మార్పులకు గురవుతున్న ఉద్యోగ మార్కెట్లో సంప్రదాయ డిగ్రీ అర్హతల కంటే.. అనుభవానికే అగ్ర తాంబూలం లభిస్తున్న విషయాన్ని ఈ సర్వే గుర్తు చేసింది. దీంతో సంప్రదాయ విద్యా వ్యవస్థ నాణ్యతపై సందేహాలు లేవనెత్తింది. 94 శాతం జెన్ జెడ్, 97 శాతం మిలీనియల్స్ సిద్ధాంతాల కంటే అనుభవానికే విలువ ఎక్కువని చెప్పారు. ఉన్నత విద్యపై 52 శాతం జెన్ జెడ్, 45 శాతం మిలీనియన్స్ అసంతృప్తి వ్యక్తం చేశారు. ఉన్నత విద్య వ్యయాలపై 36 శాతం జెన్ జెడ్, 40 శాతం మిలీనియల్స్ ఆందోళన వ్యక్తం చేశారు. ఆందోళన, ఒత్తిడి విషయంలో ఉద్యోగం కారణమవుతున్నట్టు 36 శాతానికి పైనే చెప్పారు.

ఉద్యోగుల శ్రేయస్సుపై దృష్టి పెట్టాలి..

''ఉద్యోగుల సంతోషం, శ్రేయస్సు విషయంలో సంస్థలు తమ విధానాలను తిరిగి పరిశీలన చేయాల్సిన అవసరం ఉంది. భౌతిక, మానసిక, ఆర్థిక శ్రేయస్సు ఒకదానితో ఒకటి ముడిపడి ఉన్నాయి. నాయకత్వం స్థాయిలో వీటిని పరిష్కరించాల్సి ఉంది''అని ఈ సర్వే నివేదిక తెలిపింది.

పేర్కొంది. సర్వేలో పాల్గొన్న వారిలో సగం మంది తమ మేనేజర్ల నుంచి మార్గదర్శనం కోరుకుంటుంటే.. అది కొందరికే లభిస్తున్నట్టు తెలిపింది. 505 మంది జెనరేషన్ జెడ్, 304 మిలీనియల్స్ అభిప్రాయాలను ఈ సర్వేలో భాగంగా డెలాయిట్ తెలుసుకుంది. 1981-1996 మధ్య జన్మించిన వారిని మిలీనియల్స్‌గా, 1997-2012 మధ్యకాలంలో జన్మించిన వారిని జెనరేషన్ జెడ్ కింద పరిగణిస్తుంటారు.

పట్టాలు కాదు.. అనుభవానికే పెద్ద పీట

వేగంగా మార్పులకు గురవుతున్న ఉద్యోగ మార్కెట్లో సంప్రదాయ డిగ్రీ అర్హతల కంటే.. అనుభవానికే అగ్ర తాంబూలం లభిస్తున్న విషయాన్ని ఈ సర్వే గుర్తు చేసింది. దీంతో సంప్రదాయ విద్యా వ్యవస్థ నాణ్యతపై సందేహాలు లేవనెత్తింది. 94 శాతం జెన్ జెడ్, 97 శాతం మిలీనియల్స్ సిద్ధాంతాల కంటే అనుభవానికే విలువ ఎక్కువని చెప్పారు. ఉన్నత విద్యపై 52 శాతం జెన్ జెడ్, 45 శాతం మిలీనియన్స్ అసంతృప్తి వ్యక్తం చేశారు. ఉన్నత విద్య వ్యయాలపై 36 శాతం జెన్ జెడ్, 40 శాతం మిలీనియల్స్ ఆందోళన వ్యక్తం చేశారు. ఆందోళన, ఒత్తిడి విషయంలో ఉద్యోగం కారణమవుతున్నట్టు 36 శాతానికి పైనే చెప్పారు.

ఉద్యోగుల శ్రేయస్సుపై దృష్టి పెట్టాలి..

''ఉద్యోగుల సంతోషం, శ్రేయస్సు విషయంలో సంస్థలు తమ విధానాలను తిరిగి పరిశీలన చేయాల్సిన అవసరం ఉంది. భౌతిక, మానసిక, ఆర్థిక శ్రేయస్సు ఒకదానితో ఒకటి ముడిపడి ఉన్నాయి. నాయకత్వం స్థాయిలో వీటిని పరిష్కరించాల్సి ఉంది''అని ఈ సర్వే నివేదిక తెలిపింది.

जेन-जी, मिलेनियल्स नौकरी संबंधी फैसलों में प्रगति व सीखने को देते हैं प्राथमिकता : सर्वेक्षण

ऑटोमेशन और जनरेटिव एआई (जेनएआई) के साथ निरंतर विकसित होते कार्यस्थलों और बदलती अपेक्षाओं के मद्देनजर करियर की प्रगति और सीखने के अवसर भारत के युवा कार्यबल के नौकरी के फैसले को प्रभावित करने वाले शीर्ष कारकों में से हैं। पेशेवर सेवा कंपनी डेलॉयट की ओर से बृहस्पतिवार को जारी सर्वेक्षण में यह बात सामने आई है। डेलॉयट इंडिया की चीफ हैप्पीनेस ऑफिसर सरस्वती कस्तूरीरंगन ने कहा, भारत के जेन-जी और मिलेनियल्स न केवल भविष्य के अनुरूप काम करने के तरीकों के हिसाब से खुद को ढाल रहे हैं, बल्कि वे इसे आकार भी दे रहे हैं। 85 प्रतिशत लोग साप्ताहिक अपस्किलिंग में लगे हुए हैं और नौकरी के दौरान सीखने को प्राथमिकता दे रहे हैं, वे जेनएआई जैसी प्रौद्योगिकियों के साथ मिलकर चुस्त, उद्देश्य-संचालित करियर बना रहे हैं। जेन-जी 1997 से 2012 के बीच और मिलेनियल्स 1981 से 1996 के बीच जन्म लेने वाले लोगों को कहा जाता है। कस्तूरीरंगन ने 2025 डेलॉयट ग्लोबल जेन-जी एंड मिलेनियल्स सर्वे का हवाला देते हुए कहा कि नियोक्ताओं के लिए यह विकास, नवाचार और निरंतर सीखने पर आधारित संस्कृति का निर्माण करने का संकेत है। सर्वेक्षण में पाया गया कि करियर की प्रगति और सीखने के अवसर उन शीर्ष कारकों में से हैं जो युवा कार्यबल के लिए नौकरी के फैसले को प्रभावित करते हैं। हालांकि, मेंटरशिप (अनुभवी व्यक्ति के मार्गदर्शन) की कमी है क्योंकि लगभग आधे उत्तरदाता प्रबंधकों से सक्रिय मेंटरशिप चाहते हैं, लेकिन बहुत कम को यह मिलती है। यह 2025 डेलॉयट ग्लोबल जेन-जी एंड मिलेनियल्स सर्वे वैश्विक दृष्टिकोण से प्राप्त अंतर्दृष्टि पर आधारित है। इसमें 809 भारतीय पेशेवरों की प्रतिक्रियाएं शामिल हैं जिनमें से 505 जेन-जी और 304 मिलेनियल्स थे। सर्वेक्षण से पारंपरिक शिक्षा के मूल्य के बारे में बढ़ती शंकाएं उजागर हुईं, क्योंकि कई लोगों ने सवाल उठाया कि क्या तेजी से बदलते नौकरी बाजार में केवल औपचारिक डिग्री ही पर्याप्त है? इसमें 94 प्रतिशत से अधिक जेन-जी और 97 प्रतिशत से अधिक मिलेनियल्स ने कहा कि वे सिद्धांत से अधिक व्यावहारिक अनुभव को महत्व देते हैं। इसके अलावा, सर्वेक्षण में यह भी पाया गया कि 52 प्रतिशत जेन-जी और 45 प्रतिशत मिलेनियल्स उच्च शिक्षा की गुणवत्ता से असंतुष्ट हैं। साथ ही 36 प्रतिशत जेन-जी और 40 प्रतिशत मिलेनियल्स ने लागत संबंधी चिंताओं की बात कही।

अन्न प्रक्रिया क्षेत्र आर्थिक विकासाचे नवे इंजिन

७० लाखांपेक्षा जास्त लोकांना मिळाला रोजगार

नवी दिल्ली : भारताचे अन्न प्रक्रिया क्षेत्र आता देशाच्या अर्थव्यवस्थेचा एक मजबूत आधारस्तंभ बनत आहे. डेलॉइट आणि फिक्कीच्या नवीन अहवालानुसार, हे क्षेत्र एकूण उत्पादन सकल मूल्यवर्धनात ७.७ टक्के योगदान देत आहे आणि त्याच्या मूल्य साखळीत ७० लाखांहून अधिक लोकांना रोजगार देते.

सुमारे १६० अब्ज डॉलर्स किमतीचे हे क्षेत्र ग्रामीण औद्योगिकीकरणाला चालना देत आहे. तसेच कापणीनंतरचे नुकसान कमी करत आहे. वाढती ग्रामीण मागणी, डिजिटल परिवर्तन आणि सरकारी धोरणांना पाठिंबा यामुळे या क्षेत्राला नवीन गती मिळाली आहे. अहवालात असे दिसून आले आहे की, शेती आणि अन्न प्रक्रिया क्षेत्राची मूल्य साखळी आता देशाच्या एकूण अन्न बाजारपेठेत सुमारे ३० टक्के वाटा उचलते.

भारताचे कृषी आणि अन्न प्रक्रिया क्षेत्र आता परिवर्तनाच्या उंबरठ्यावर आहे, जिथे परंपरा आणि आधुनिक तंत्रज्ञानाचा मिलाफ भविष्यासाठी तयार अन्न व्यवस्था निर्माण करण्यासाठी होत आहे, असे डेलॉइट साऊथ एशियाचे ग्राहक उद्योग नेते आनंद रामनाथन म्हणाले.

ग्राहकांची पसंती स्वच्छ लेबल असलेल्या, प्रथिनेयुक्त आणि पचनास अनुकूल अन्न उत्पादनांकडे वळत असल्याने भारताची अन्न बाजारपेठ एक नवीन रचना घेत आहे. आर्टिफिशियल इंटेलिजेंस, इंटरनेट ऑफ थिंग्ज आणि ब्लॉकचेन सारख्या तंत्रज्ञानाच्या माध्यमातून भारत आरोग्य केंद्रित, तंत्रज्ञान सक्षम आणि समावेशक अन्न प्रणालींमध्ये जागतिक आघाडी घेण्याच्या दिशेने वाटचाल करत आहे, असेही त्यांनी सांगितले.

शहरी आणि ग्रामीण बाजारपेठेत उदयोन्मुख बदल

२०२३-२४ च्या तिसऱ्या तिमाहीत ग्रामीण भागात एफएमसीजी वापरात ६ टक्क्यांनी वाढ झाली आहे. त्याच वेळी टियर-२ आणि टियर-३ शहरे आता नवीन मागणी केंद्रे म्हणून उदयास येत आहेत. भारताचे अन्न प्रक्रिया क्षेत्र केवळ आर्थिक विकासाचे इंजिन बनू शकत नाही, तर समावेशक विकासाचे एक मजबूत माध्यमदेखील बनू शकते, असे फिक्कीच्या महासंचालक ज्योती विज म्हणाल्या. ग्राहकांच्या बदलत्या पसंती आणि आरोग्याविषयी जागरूकता लक्षात घेता या क्षेत्रात नावीन्यपूर्णता, मूल्यवर्धन आणि लवचिकता आता आवश्यक झाली आहे, यावर त्यांनी भर दिला.

सकल जीएसटी संकलनात १६.४ टक्के वाढ

मे महिन्यात आकडा २.०१ लाख कोटींवर

कोणत्या राज्यात किती वाढ

महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तामिळनाडूसारख्या मोठ्या राज्यांच्या जीएसटी संकलनात १७ टक्के ते २५ टक्के वाढ झाली आहे. तर, गुजरात, आंध्र प्रदेश आणि तेलंगाणा या अन्य मोठ्या राज्यांचे हे संकलन ६ टक्क्यांपर्यंत वाढले आहे. मध्य प्रदेश, हरयाणा, पंजाब आणि राजस्थान आदी काही राज्यांच्या जीएसटी संकलनात सुमारे १० टक्के वाढ झाली आहे.

> राज्यांतमध्ये जीएसटी संकलनात झालेल्या वाढीत मोठी तफावत दिसून येत आहे. त्यामुळे प्रत्येक राज्यात त्यांच्यासाठी महत्वपूर्ण असलेल्या क्षेत्रांचे खोलवर विश्लेषण करण्यावी गरज आहे. त्यासाठी आकडेवारीचा आधार घेतला पाहिजे.
>
> – एम. एस. मणि, डेलॉयट इंडियाचे भागीदार

। नवी दिल्ली : मे महिन्यात देशात सकल वस्तू आणि सेवा कर (जीएसटी) संकलनात तब्बल १६.४ टक्के वाढ होत सरकारच्या तिजोरीत २.०१ लाख कोटी रुपयांहून अधिक महसूल जमा झाला आहे.

याबाबतची आकडेवारी रविवार सरकारने प्रसिद्ध केली. त्यानुसार, आधी एप्रिलमध्ये जीएसटीचे संकलन हे २.३७ लाख कोटी रुपये इतक्या विक्रमी स्तरावर पोहोचले होते. मे महिन्यात देशांतर्गत व्यापारातून एकूण जीएसटी महसूल १३.७ टक्के वाढला होता. तो सुमारे १.५० लाख कोटो रुपयांवर गेला होता. आयातीतून प्राप्त जीएसटी महसूल २५.२ टक्के वाढून ५१ हजार २६६ कोटींवर गेला होता. मे महिन्यात एकूण केंद्रीय जीएसटी महसूल ३५ हजार ४३४ कोटी रुपये इतका आहेत. तर, राज्य जीएसटी महसूल ४३ हजार ९०२ कोटी रुपयांवर पोहोचला आहे. त्यामुळे एकूण जीएसटी संकलन सुमारे १.०९ लाख कोटी रुपयांवर गेले आहे. उपकरातून मिळणारा महसूल १२ हजार ८७९ कोटींवर पोहोचला आहे. मे २०२४ मध्ये जीएसटीचे उत्पन्न १,७२,७३९ कोटी रुपये होते. दरम्यान, या महिन्यात एकूण परतावा ४ टक्के घटून २७ हजार २१० कोटी झाला आहे. महिनाभरात निव्वळ जीएसटी संकलन २०.४ टक्के वार्षिक वृद्धीच्या दराने सुमारे १.७४ लाख कोटी रुपेय राहिले आहे.

कामगार-मजुरांचे वेतन वाढते आहे!

उद्योगांनी कुशल कामगारांना आकर्षित करण्यासाठी आणि टिकवून ठेवण्यासाठी कामगिरीवर आधारित प्रोत्साहन देण्यास सुरुवात केल्यामुळे ब्ल्यु कॉलर कामगारांचे वेतन दरवर्षी ५ ते ६ टक्क्यांनी वाढत आहे, असे 'ब्लू-कॉलर वर्कफोर्स ट्रेंड्स २०२५' या डेलॉइटच्या नव्या अहवालात म्हटले आहे.

या अहवालानुसार, २०२५ मध्ये निळ्या कॉलरच्या भूमिका भरतीसाठी उद्देश १० टक्क्यांनी वाढला आहे. यामुळे उत्पादन, ऑटोमोबाइल, ई-कॉमर्स आणि लॉजिस्टिक्ससारख्या महत्त्वाच्या क्षेत्रांमध्ये कुशल कामगारांची मोठी मागणी दिसून येते.

वेतनवाढ दरवर्षी ५-६ टक्के आहे. ती या वाढत्या मागणीशी सुसंगत आहे. ऑटोमोबाइल, मेटल आणि माइनिंग व केमिकल्स क्षेत्रात वेतनात सातत्याने ६ टक्के वाढ होते आहे. ती ऑटोमेशन आणि उत्पादन क्षमता वाढीमुळे आहे. ई-कॉमर्स क्षेत्रात सर्वाधिक वेतनवाढ (७ टक्के) अपेक्षित आहे. कारण लास्ट-माईल डिलिव्हरी, गोदाम व लॉजिस्टिक पायाभूत सुविधा सतत वाढत आहेत.

डेलॉइट इंडियाचे भागीदार निलेश गुप्ता म्हणतात, भारताची ब्ल्यु कॉलरची कार्यशक्ती तंत्रज्ञानातील बदल आणि धोरणात्मक सुधारणा यांच्या वळणावर उभी आहे. ऑटोमेशन, एआय आणि स्मार्ट मॅन्युफॅक्चरिंगमुळे उद्योग क्षेत्रात आमूलाग्र बदल होत आहेत. त्यामुळे सर्वसमावेशक कौशल्य प्रशिक्षण, मजबूत सामाजिक संरक्षण आणि मानवी कार्यस्थळाची गरज अधिक तीव्र झाली आहे. ही संधी उद्योगांसाठी जबाबदारी आणि क्षमता घेऊन येते. एक सक्षम, उत्पादक आणि भविष्यकाळासाठी तयार कार्यशक्ती उभारणे ही केवळ उत्तम व्यावसायिक रणनीती नसून ती औद्योगिक प्रगतीसाठी आवश्यक आहे.

■ अहवालातील इतर महत्त्वाचे निष्कर्ष :

१५ हून उद्योगांतील माहिती, २०० हून कंपन्यांचा सहभाग आणि ३०० पेक्षा अधिक मॅन्युफॅक्चरिंग युनिटमधून गोळा केलेली ही आकडेवारी आहे, असे स्पष्ट केले आहे.

तंत्रज्ञान आणि औपचारिक क्षेत्रात सकारात्मक प्रगती असली तरी वेतन व समावेशनाच्या बाबतीत अजूनही मोठी तफावत आहे. केवळ २.३ टक्के ब्ल्यु कॉलर नोकऱ्या या महिन्याला ६० हजार रुपयेपेक्षा अधिक वेतन देतात, त्यादेखील उच्च प्रशिक्षित किंवा अनुभवी कामगारांसाठी असतात, असे निरिक्षण नोंदविण्यात आले आहे.

महिला कामगारांचे सरासरी वेतन त्यांच्या पुरुष समकक्षांच्या ०.७ पट आहे. विशेषतः शारीरिक मेहनतीच्या नॉन आयटीआय क्षेत्रामध्ये ही तफावत अधिक आहे.

■ उद्योगांसमोरील आव्हाने :

वेतनाचे प्रमाणिकरण अद्याप न झाल्यामुळे तफावत वाढली आहे. पुनःकौशल्य व कौशल्यवृद्धीची गरज मोठी असून, तंत्रज्ञान सज्जतेमध्येही अडचणी आहेत.

हा अहवाल उद्योग क्षेत्राला भविष्यासाठी तयारी करताना कुशल, समावेशक आणि योग्य वेतन देणारी कार्यशक्ती तयार करण्याचे महत्त्व अधोरेखित करतो.

जीएसटी संकलन मे मध्ये १६ टक्के वाढून २ .०१ लाख कोटींवर

नवी दिल्ली : मे महिन्यात एकूण जीएसटी संकलन १६.४ टक्क्यांनी वाढून २.०१ लाख कोटी रुपयांवर पोहोचले, असे रविवारी जाहीर झालेल्या सरकारी आकडेवारीनुसार उघड झाले. एप्रिलमध्ये वस्तू आणि सेवा कर (जीएसटी) संकलनाचा विक्रमी उच्चांक २.३७ लाख कोटी रुपये होता.

मे महिन्यात, देशांतर्गत व्यवहारांमधून मिळणारा एकूण महसूल १३.७ टक्क्यांनी वाढून सुमारे १.५० लाख कोटी रुपये झाला, तर आयातीतून मिळणारा जीएसटी महसूल २५.२ टक्क्यांनी वाढून ५१,२६६ कोटी रुपये झाला.

मे महिन्यात, केंद्रीय जीएसटीचा एकूण महसूल ३५,४३४ कोटी रुपये, राज्य जीएसटीचा महसूल ४३,९०२ कोटी रुपये आणि एकात्मिक जीएसटीचा सुमारे १.०९ लाख कोटी रुपये झाला. सेसमधून मिळणारा महसूल १२,८७९ कोटी रुपये होता. मे २०२४ मध्ये जीएसटी संकलन १,७२,७३९ कोटी रुपये झाले होते.

दरम्यान, या महिन्यातील एकूण परतफेड ४ टक्क्यांनी घसरून २७,२१० कोटी रुपये झाली.

निव्वळ जीएसटी करसंकलन सुमारे १.७४ लाख कोटी रुपये होता, जो वर्षानुवर्षे २०.४ टक्के वाढ आहे.

मोठ्या राज्यात संकलनात २५ टक्क्यांपर्यंत वाढ

डेलॉइट इंडिया पार्टनर एम. एस. मणी म्हणाले की, राज्यांमधील जीएसटी कर वसुलीच्या वाढीतील मोठ्या फरकांमुळे प्रत्येक राज्यातील महत्त्वाच्या क्षेत्रांमध्ये सखोल विश्लेषण आवश्यक आहे. महाराष्ट्र, पश्चिम बंगाल, कर्नाटक आणि तमिळनाडूसारख्या मोठ्या राज्यांतील जीएसटी संकलनात १७ टक्क्यांपासून २५ टक्क्यांपर्यंत वाढ नोंदवली आहे, तर गुजरात, आंध्र प्रदेश आणि तेलंगणासारख्या मोठ्या राज्यांनी ६ टक्क्यांपर्यंत वाढ दर्शविली आहे. मध्य प्रदेश, हरयाणा, पंजाब आणि राजस्थानसारख्या काही राज्यांनी सरासरी १० टक्क्यांची वाढ दर्शविली आहे. म्हणूनच, देशभरातील सरासरी वाढ सर्व राज्यांमध्ये एकसारखी दिसून येत नाही. कदाचित क्षेत्रीय किंवा हंगामी घटकांमुळे ज्यासाठी सखोल आकडेवारी-आधारित विश्लेषण आवश्यक आहे, असे मणी म्हणाले.

२०२४-२५ मध्ये देशात सुमारे १५ अब्ज डॉलरचा सर्वाधिक ओघ

सलग सातव्या आर्थिक वर्षात सिंगापूरमधून भारतात सर्वाधिक एफडीआय

नवी दिल्ली : गेल्या सात वर्षांत सिंगापूर भारतातील सर्वांत मोठा थेट परकीय गुंतवणुकीचा (एफडीआय) सर्वात मोठा स्रोत राहिला आहे. २०२४-२५ मध्ये देशात सुमारे १५ अब्ज अमेरिकन डॉलरचा सर्वाधिक ओघ आला आहे. गेल्या आर्थिक वर्षात विदेशी गुंतवणूक १३ टक्क्यांनी वाढून ५० अब्ज अमेरिकन डॉलरवर पोहोचली.

गेल्या आर्थिक वर्षात एकूण थेट परकीय गुंतवणूक १४ टक्क्यांनी वाढून ८१.०४ अब्ज अमेरिकन डॉलरवर पोहोचली. गेल्या तीन वर्षांतील ही सर्वाधिक आहे.

ताज्या सरकारी आकडेवारीनुसार, २०२४-२५ मध्ये सिंगापूरमधून थेट परकीय गुंतवणूक १४.९४ अब्ज अमेरिकन डॉलरवर पोहोचली, जी २०२३-२४ मध्ये ११.७७ अब्ज अमेरिकन डॉलर होती. २०२४-२५ मध्ये एकूण थेट परकीय गुंतवणूक सुमारे १९ टक्के होती. २०१८-१९ पासून, सिंगापूर हा भारतात अशा गुंतवणुकीचा सर्वात मोठा स्रोत आहे. २०१७-१८ मध्ये, भारताने मॉरिशसमधून सर्वाधिक थेट परदेशी गुंतवणूक आकर्षित केली.

मॉरिशस, अमेरिकेसह अनेक देशांची गुंतवणूक

गेल्या आर्थिक वर्षात, देशाला मॉरिशसमधून ८.३४ अब्ज अमेरिकन डॉलरची परकीय गुंतवणूक मिळाली. २०२४-२५ मध्ये, मॉरिशसनंतर अमेरिका (५.४५ अब्ज अमेरिकन डॉलर), नेदरलँड्स (४.६२ अब्ज अमेरिकन डॉलर), यूएई (३.१२ अब्ज अमेरिकन डॉलर), जपान (२.४७ अब्ज अमेरिकन डॉलर), सायप्रस (१.२ अब्ज अमेरिकन डॉलर), यूके (७९५ दशलक्ष अमेरिकन डॉलर), जर्मनी (४६९ दशलक्ष अमेरिकन डॉलर) आणि केमन बेटे (३७१ दशलक्ष अमेरिकन डॉलर) यांचा क्रमांक लागतो. तज्ज्ञांच्या मते, जागतिक वित्तीय केंद्र म्हणून सिंगापूरचे स्थान, मजबूत द्विपक्षीय संबंध आणि जागतिक खासगी इक्विटी आणि उद्यम भांडवलासाठी प्रवेशद्वार म्हणून त्याची भूमिका यामुळे ते भारतात गुंतवणुकीसाठी एक नैसर्गिक मार्ग बनते.

भारत-सिंगापूर कराराचा लाभ : लोकेश शाह

इंडसलॉचे भागीदार लोकेश शाह म्हणाले की, भारत-सिंगापूर कर करार हा एफडीआयच्या प्रमुख चालकांपैकी एक होता. भारतात सिंगापूरचे सततचे वर्चस्व आता खऱ्या व्यवसाय आणि नियामक फायद्यांवर, सिंगापूरची अत्याधुनिक वित्तीय बाजारपेठ, प्रादेशिक केंद्र म्हणून त्याची स्थिती आणि राजकीय आणि आर्थिक स्थिरतेवर अधिक अवलंबून आहे, असे शाह म्हणाले.

जागतिक वित्तीय केंद्राकडे वाटचाल : पांडे

शार्दुल अमरचंद मंगलदास अँड कंपनीचे भागीदार रूद्र कुमार पांडे म्हणाले की, सिंगापूर भारतात एक महत्वपूर्ण आणि सक्रिय गुंतवणूकदार राहील, परंतु परिस्थिती हळूहळू विकसित होत आहे. सिंगापूरची भारतात वाढती थेट परकीय गुंतवणूक ही जागतिक वित्तीय केंद्र म्हणून त्याच्या भूमिकेवर आधारित आहे, जिथे मोठ्या संख्येने आंतरराष्ट्रीय खासगी इक्विटी आणि व्हेंचर कॅपिटल फंड आहेत, असे पांडे म्हणाले.

अनिश्चितता असूनही भारतात मोठ्या प्रमाणात गुंतवणूक आकर्षित : मजुमदार

डेलॉइट इंडियाच्या अर्थशास्त्रज्ञ रुमकी मजुमदार म्हणाल्या की, भांडवली बाजारपेठेतील गोंधळ आणि व्यापाराभोवती अनिश्चितता असूनही, भारताने मोठ्या प्रमाणात गुंतवणूक आकर्षित केली आहे, जी स्थिर आणि दीर्घकालीन आहे. परकीय भांडवलाचा प्रवाह प्राप्त करणारा आशिया हा दुसऱ्या क्रमांकाचा सर्वात मोठा प्रदेश असल्याने निधीचा मोठा भाग सिंगापूरमधून येतो. त्याची अनेक कारणे आहेत. एक, कमी कर क्षेत्राधिकार आणि मजबूत कायदेशीर चौकट असल्याने, सिंगापूरला आशियातील धोरणात्मक आर्थिक प्रवेशद्वार मानले जाते, असे त्या म्हणाल्या.

चीनमधून दुर्मिळ चुंबकांच्या आयातीसाठी वाहन उद्योगाचे सरकारला साकडे

नवी दिल्ली : प्रवासी कारसह विविध प्रयोगांमध्ये वापरल्या जाणाऱ्या दुर्मिळ पृथ्वी चुंबकांच्या आयातीसाठी चीन सरकारकडून मंजुरी जलद मिळण्यासाठी वाहन उद्योगाने सरकारला साकडे घातले आहे.

उद्योग सूत्रांनुसार, विविध देशांतर्गत पुरवठादारांनी चीनमधील त्यांच्या स्थानिक विक्रेत्यांद्वारे चीन सरकारकडून मंजुरी मागितली आहे. तथापि, अद्याप कोणतीही मान्यता मिळालेली नाही, असे सूत्रांनी सांगितले. वाहन, गृह उपकरणे आणि स्वच्छ ऊर्जा यासह अनेक क्षेत्रांमध्ये वापरल्या जाणाऱ्या चुंबकांचे जागतिक प्रक्रिया क्षमतेच्या ९० टक्क्यांहून अधिक चीन नियंत्रित करतो.

चीन सरकारने ४ एप्रिलपासून निर्बंध लादले आहेत. सात दुर्मिळ घटक आणि संबंधित चुंबकांसाठी विशेष निर्यात परवाने अनिवार्य केले आहेत. जपानमध्ये, चीनच्या निर्बंधांमुळे सुझुकी मोटरने आधीच त्यांच्या स्विफ्ट कारचे उत्पादन स्थगित केले आहे. गेल्या आठवड्यात, मारुती सुझुकी इंडियाचे वरिष्ठ कार्यकारी अधिकारी (कॉर्पोरेट अफेयर्स) राहुल भारती म्हणाले की, चीनने भारत सरकारने मान्यता दिलेल्या आणि चीन सरकारने मंजूर केलेल्या अंतिम वापरकर्ता प्रमाणपत्राची मागणी केली आहे. म्हणून ती प्रक्रिया सुरू आहे आणि उद्योग सरकारशी चर्चा करत आहेत, असे त्यांनी सांगितले.

डेलॉइट इंडियाचे भागीदार आणि ऑटोमोटिव्ह सेक्टर लीडर रजत महाजन यांनी नमूद केले की, ही कमतरता पुरवठा साखळीतील एक प्रमुख व्यत्यय आहे, विशेषतः ईव्हीसाठी कारण दुर्मिळ पृथ्वी धातू इलेक्ट्रिक मोटरमध्ये मोठ्या प्रमाणात वापरल्या जातात.

જેન ઝેડ, મિલેનિયલ્સની નોકરી માટેના નિર્ણયમાં ગ્રોથ, સ્કિલ્સ પહેલી પ્રાથમિકતા

એજન્સી | મુંબઈ

કંપનીઓએ કર્મચારીઓની સુખાકારીને પ્રાથમિકતા આપવી જરૂરી

AI, ઓટોમેશનના આ સમય દરમિયાન દેશભરમાં મોટા ભાગની કંપનીઓએ પોતાના કર્મચારીઓની ખુશી અને એકંદરે સુખાકારીને વધારે પ્રાથમિકતા આપવી જરૂરી છે. શારીરિક, માનસિક અને નાણાકીય સુખાકારી એકબીજા સાથે ગાઢ રીતે જોડાયેલા છે અને નેતૃત્વના ઉચ્ચતમ સ્તરે તેને એકસાથે સંબોધિત કરવાની જરૂર છે.

ઓટોમેશન, જેનએઆઈ અને બદલાતી અપેક્ષાઓ વચ્ચે આજે કાર્યસ્થળ સતત વિકસી રહ્યું છે ત્યારે કારકિર્દીમાં પ્રગતિ અને શીખવાની તકો ભારતના યુવા વર્કફોર્સને નોકરીના નિર્ણયને આગળ ધપાવતા મુખ્ય પરિબળોમાં સામેલ છે. દેશના જનરેશન ઝેડ- મિલેનિયલ્સ કામના ભવિષ્યને જ અનુરૂપ થઈ રહ્યા નથી, પરંતુ તેને આકાર પણ આપી રહ્યા છે.

ડેલોઈટ ઈન્ડિયાના અધિકારી સરસ્વતી કસ્તુરીગન કહે છે 85 ટકા લોકો સાપ્તાહિક અપસ્કિલિંગમાં રોકાયેલા હોવાથી અને નોકરી પર શિક્ષણ માટે મજબૂત પસંદગી ધરાવતા હોવાથી, તેઓ GenAI જેવી ટેકનોલોજી સાથે સંરેખિત ચપળ, હેતુ-સંચાલિત કારકિર્દી બનાવી રહ્યા છે.

2025ના ડેલોઈટ ગ્લોબલ જનરલ ઝેડ અને મિલેનિયલ સર્વેને ટાંકીને તેમણે કહ્યું કે, નોકરીદાતાઓ માટે, આ વૃદ્ધિ, નવીનતા અને સતત શિક્ષણ પર આધારિત સંસ્કૃતિઓનું નિર્માણ કરવાનો આહ્વાન છે.

2025નો ડેલોઈટ ગ્લોબલ ઝેન ઝેડ અને મિલેનિયલ સરવે 505 જેન ઝેડ અને 304 મિલેનિયલ્સને આવરી લેતા 809 ભારતીય પ્રોફેશનલ્સના ફીડબેકને સામેલ કરવામાં આવ્યા છે. આ સર્વેમાં પરંપરાગત શિક્ષણના મૂલ્ય અંગે શંકાઓ વધી રહી છે, કારણ કે ઘણા લોકોએ પ્રશ્ન ઉઠાવ્યો હતો કે શું ઝડપથી બદલાતા રોજગાર બજારમાં માત્ર ઔપચારિક ડિગ્રી પૂરતી છે. 94% જેન ઝેડ અને 97% મિલેનિયલ્સને કહ્યું હતું કે તેઓ થિયરી કરતા પ્રેક્ટિકલ અનુભવને વધારે પ્રાધાન્ય આપે છે. વધુમાં, 52% જેન ઝેડ અને 45% મિલેનિયલ્સ ઉચ્ચ શિક્ષણની ગુણવત્તાથી અસંતુષ્ટ છે અને 36% અને 40% ખર્ચને લઈને ચિંતિત છે. તે ઉપરાંત દેશમાં 33% જેન ઝેડ અને 29% મિલેનિયલ્સ તણાવ અનુભવે છે.

અમેરિકા અધૂરા ડેટા આપીને ભારત પર ટેરિફ ઘટાડવા દબાણ કરી રહ્યું છેઃ GTRI

US ભારત પાસેથી વાર્ષિક 7 લાખ કરોડ કમાય છે, હવે ટેરિફના મુદ્દે વાટાઘાટો શક્ય

બિઝનેસ સંવાદદાતા | નવીદિલ્હી

અમેરિકાના રાષ્ટ્રપતિ ડોનાલ્ડ ટ્રમ્પે ભારત પર અમેરિકા સાથેના વેપારમાં અયોગ્ય લાભ લેવાનો આરોપ લગાવ્યો છે. નાણાવર્ષ 2024-25માં ભારત સાથે અમેરિકાની વેપાર ખાધ સરેરાશ $44.4 બિલિયન (લગભગ રૂ. 3.8 લાખ કરોડ) હતી. તેનો અર્થ એ થયો કે ભારતે અમેરિકાથી આયાત કરતા 3.8 લાખ કરોડ રૂપિયા વધુ નિકાસ કરી. આ ડેટાનો ઉપયોગ કરીને અમેરિકા ભારત પર એકપક્ષીય ટેરિફ ઘટાડવા અને બજારો ખોલવા માટે દબાણ કરી રહ્યું છે. પરંતુ આ આંકડા અપૂર્ણ અને ગેરમાર્ગે દોરનારા છે. ગ્લોબલ ટ્રેડ રિસર્ચ ઈનિશિયેટિવ (GTRI) અનુસાર અમેરિકા દર વર્ષે ભારતમાંથી શિક્ષણ, ડિજિટલ સેવાઓ, ફાઇનાન્સિયલ ઓપરેશન, બૌદ્ધિક સંપદા રોયલ્ટી અને શસ્ત્રોના વેચાણ દ્વારા $80-85 બિલિયન (રૂ. 6.6 થી 7 લાખ કરોડ) કમાય છે. તેનો અર્થ એ કે વસ્તુઓ અને સેવાઓમાં વેપાર ખાધ હોવા છતાં અમેરિકા ભારત કરતાં લગભગ 35-40 અબજ ડોલર (3 થી 3.4 લાખ કરોડ રૂપિયા) નો નફો કરી રહ્યું છે.

ભારત અને અમેરિકા વચ્ચે કરોડોના ડિફેન્સ કરાર

દર વર્ષે ભારત અમેરિકા પાસેથી અબજો રૂપિયાના શસ્ત્રો ખરીદે છે. તાજેતરમાં, ભારત અને પાકિસ્તાન વચ્ચે ચાલી રહેલા સરહદી તણાવ વચ્ચે, અમેરિકાએ ભારતને 131 મિલિયન ડોલર (લગભગ રૂ. 1100 કરોડ) ના લશ્કરી હાર્ડવેર અને લોજિસ્ટિક્સ સાધનો વેચવાનો કરાર કર્યો છે. પેટન્ટ, લાઇસન્સ, ફિલ્મો અને સ્ટ્રીમિંગ દ્વારા પણ આવક થાય છે. અમેરિકન ફાર્મા કંપનીઓ તેમના પેટન્ટ અને ડ્રગ લાઇસન્સ દ્વારા ભારતીય કંપનીઓ પાસેથી વાર્ષિક 1 થી 2 અબજ ડોલર કમાય છે.

અમેરિકાને ભારતથી ટ્રેડમાં નુકસાન નહિ પણ નફો છે

અમેરિકા ભારતથી નુકસાનમાં નથી પણ નફામાં છે. એ વાત બિલકુલ સ્પષ્ટ છે કે ભારત અમેરિકા પાસેથી એકપક્ષીય લાભ નથી લઈ રહ્યું. તેના બદલે, શિક્ષણ, ટેકનોલોજી, નાણાં અને સંરક્ષણ પણ નાણાં અને સંરક્ષણ ક્ષેત્રોમાં અમેરિકન કમાણીના મુખ્ય સ્ત્રોત છે. આવી સ્થિતિમાં, ભારત મજબૂત સ્થિતિમાંથી મુક્ત વેપાર કરાર પર વાટાઘાટો કરી શકે છે.

અમેરિકા ભારત પાસેથી ચાર મુખ્ય રીતે કમાણી કરે છેઃ શિક્ષણ દ્વારા દર વર્ષે બે લાખ કરોડ રૂપિયાથી વધુ કમાણી કરે છે. ભારતમાંથી મોટાભાગનો નાણા શિક્ષણ ક્ષેત્રે અમેરિકા જાય છે. દર વર્ષે 3 લાખથી વધુ ભારતીય વિદ્યાર્થીઓ અમેરિકા અભ્યાસ માટે જાય છે. અમેરિકામાં અભ્યાસ કરતા ભારતીય વિદ્યાર્થીઓ દર વર્ષે 25 અબજ ડોલર (2 લાખ કરોડ રૂપિયા) થી વધુ ખર્ચ કરે છે. આમાંથી, લગભગ $15 બિલિયન ટ્યુશન પાછળ અને $10 બિલિયન ખોરાક અને રહેઠાણ પાછળ ખર્ચવામાં આવે છે. અમેરિકન ટેક કંપનીઓ દર વર્ષે ભારતમાંથી $15-20 અબજ કમાય છે. ગૂગલ, મેટા, એમેઝોન, એપલ અને માઈક્રોસોફ્ટ જેવી કંપનીઓ ભારતના ઝડપથી વિકસતા ડિજિટલ માર્કેટમાંથી દર વર્ષે લગભગ $15-20 બિલિયન (લાખ કરોડ રૂપિયા) કમાય છે. અમેરિકન બેંકો ભારતમાંથી વાર્ષિક 80 હજારથી 1 લાખ કરોડ રૂપિયા કમાય છે. અમેરિકન બેંકો જેપી મોર્ગન, ગોલ્ડમેન સેક્સ, મેકકિન્સે, બીસીજી, ડેલોઈટ, પીડબ્લ્યુસી અને કેપીએમજી જેવી કન્સલ્ટિંગ કંપનીઓ ભારતના નાણાકીય ક્ષેત્રમાંથી દર વર્ષે $10-15 અબજ કમાય છે.

ઓટો ઈન્ડસ્ટ્રી

રેર અર્થ મેગ્નેટની અછત, ઓટી ઈન્ડસ્ટ્રીએ કેન્દ્ર પાસે મદદ માંગી

દેશની ઓટો ઈન્ડસ્ટ્રીએ સરકારને અપીલ કરી છે કે તેઓ રેર અર્થ મેગ્નેટની આયાત માટે ચીન સરકાર પાસેથી તરત જ મંજૂરી અપાવવામાં મદદ કરે. આ મેગ્નેટ પેસેન્જર કાર સહિત અનેક ક્ષેત્રોમાં ઉપયોગમાં લેવાય છે, વિશેષ રીતે ઈલેક્ટ્રિક વિકલ્સ માટે ખૂબ જરૂરી છે. 4 એપ્રિલ, 2024થી ચીને 7 રેર અર્થ તત્વો અને તેના સંબંધિત મેગ્નેટ્સની નિકાસ પર વિશેષ પરમિટ અનિવાર્ય કરી છે. ત્યારબાદથી ભારતીય સપ્લાયર્સે પોતાના સ્થાનિક ચીની વેન્ડર્સ મારફત નિકાસની મંજૂરી માંગી છે. પરંતુ અત્યાર સુધી કોઈ જવાબ મળ્યો નથી. ચીન પુરી દુનિયામાં આ મેગ્નેટ્સની 90% પ્રોસેસિંગ ક્ષમતા પર નિયંત્રણ રાખે છે. તેનો ઉપયોગ ઓટોમોબાઈલ, હોમ એપ્લાયન્સ અને ક્લીન એનર્જી સેક્ટરમાં થાય છે. આ વચ્ચે જાપાનમાં સુઝુકી મોટરને સ્વિફ્ટ કારનું પ્રોડક્શન રોકવું પડ્યું છે. જ્યારે ભારતમાં મારુતિ સુઝુકીના સીનિયર એક્ઝિક્યુટિવ રાહુલ ભારતીએ કહ્યું કે ચીને એન્ડ યૂઝર સર્ટિફિકેટ માંગ્યું છે, જેને ભારત સરકાર દ્વારા પ્રમાણિત અને ચીન સરકાર દ્વારા સ્વીકૃત કરવું પડશે. ડેલોઈટ ઈન્ડિયાના ઓટોમોટિવ સેક્ટર લીડર રજત મહાજને કહ્યું કે આ સંકટ ઈવી સપ્લાય ચેઈન માટે મોટો આંચકો છે કારણ કે રેર અર્થ મેગ્નેટ્સ ઈલેક્ટ્રિક કારનો મહત્વનો હિસ્સો છે. તે લાંબા સમયથી રિસર્ચ એન્ડ ડેવલપમેન્ટનો વિષય રહ્યો છે, પરંતુ અત્યાર સુધી તેના વિકલ્પોનો મોટા પાયે વાણિજ્યિક ઉપયોગ થયો નથી.

ভারতে বেড়েছে 'ফ্যান্টাসি গেমের' জনপ্রিয়তা

কয়েক টাকা বিনিয়োগ করে কোটিপতি হওয়ার স্বপ্ন

সুমেধা পাল
বিবিসি সংবাদদাতা

ইন্ডিয়ান প্রিমিয়ার লিগ (আইপিএল) ১৭ই মে থেকে আবার শুরু হওয়ায় বেশ উচ্ছ্বসিত। ভারত-পাকিস্তানের মধ্যে সংঘর্ষের কারণে আইপিএল স্থগিত করা হয়েছিল। তবে আইপিএল-এর প্রতি গৌতমের এই আবেগের পিছনে শুধুমাত্র ক্রিকেটের প্রতি ভালোবাসা নয়, অন্য কারণও রয়েছে।

আসলে, বিশ্বের অন্যতম অর্থশালী ফ্র্যাঞ্চাইজি ক্রিকেট লিগ হিসেবে বিবেচিত আইপিএল চলাকালীন এই দুই মাসই তার কাছে এমন একটা সুযোগ এনে দেয়, যে সময় তিনি 'ফ্যান্টাসি অ্যাপ'-এর মাধ্যমে অর্থ উপার্জন করতে পারেন। পেশায় গাড়ির পার্কিং লট সামলান ধর্মেন্দ্র গৌতম। তিনি বলেন, 'খেলার রোমাঞ্চ আর জেতার আশা আমাকে আকর্ষণ করে।'

'ফ্যান্টাসি গেমিং অ্যাপ্লিকেশন'গুলোতে যে কেউ বাস্তব খেলোয়াড়দের নিয়ে নিজেদের পছন্দ মতো দল তৈরি করতে পারেন। এই খেলোয়াড়রা আসল ম্যাচে যেমন যেমন পারফর্ম করেন, সেই অনুযায়ী অ্যাপ ব্যবহারকারীরা পয়েন্ট পান। এই পয়েন্টগুলোর ভিত্তিতে অ্যাপ ব্যবহারকারীরা লিডারবোর্ডে শীর্ষস্থানগুলোতে চলে আসতে পারেন এবং নগদ পুরস্কার জিততে পারেন। এই গেমে প্রবেশের জন্য 'এন্ট্রি ফি' এক টাকা হতে পারে এবং এই টাকা দিয়েই ব্যবহারকারীরা লক্ষ লক্ষ টাকা জেতার সুযোগ পেয়ে যেতে পারেন। গৌতমের মতো অনেক ভারতীয়ের জন্যই, 'ফ্যান্টাসি ক্রিকেট অ্যাপ' এমন একটা সুযোগ হয়ে দাঁড়িয়েছে যেখানে তারা তাদের প্রিয় খেলা দেখতেও পারেন আবার তার মাধ্যমে অর্থও উপার্জন করার সুযোগ পান।

ফ্যান্টাসি ক্রিকেটের রমরমা: ভারতে ক্রিকেটের ব্যাপক জনপ্রিয়তার ফলে এই জাতীয় 'ফ্যান্টাসি গেমিং অ্যাপ'গুলোকে ইতিমধ্যে একটা লক্ষ লক্ষ ভক্তের বড়সড় ভাণ্ডার তৈরি করে দিয়েছে। ভারতে ২০১৫ থেকে ২০২০ সালের মধ্যে ইন্টারনেটে ব্যবহারকারীর সংখ্যা দ্রুত বেড়েছে। একই সঙ্গে টেলিকম সংস্থাগুলোর মধ্যে সস্তা ইন্টারনেট প্ল্যান চালু করাকে কেন্দ্র করে একটা প্রতিযোগিতাও শুরু হয় যা 'ফ্যান্টাসি গেমিং অ্যাপ'গুলোকে দ্রুত ছড়িয়ে পড়তে সাহায্য করে। সহজলভ্য ইন্টারনেট কানেকশন খেলার 'লাইভ স্ট্রিমিং' এবং 'ফ্যান্টাসি অ্যাপ' দু'টোকেই সাধারণ মানুষের মোবাইলের স্ক্রিনে পৌঁছে যেতে সাহায্য করেছে। বহুজাতিক সংস্থা কেপিএমজি-র এক প্রতিবেদনে বলা হয়েছে, ভারতে ব্রডব্যান্ড ইন্টারনেট ব্যবহারকারীর সংখ্যা ২০১৬ সালে ৩৬ কোটি ৮০ লাখ থেকে বেড়ে ২০১৮ সালে ৫৬ কোটিতে দাঁড়িয়েছে। ওই একই সময়ে 'ফ্যান্টাসি স্পোর্টস অপারেটর'দের সংখ্যা ১০ থেকে বেড়ে দাঁড়িয়েছে ৭০-এ। পাঁচ বছর আগে, অর্থাৎ, ২০১৯ সালে 'ড্রিম ১১' 'ইউনিকর্ন স্ট্যাটাস' লাভ করে। অর্থাৎ ওই কোম্পানির সম্পদমূল্য এক বিলিয়ন বা ১০০ কোটি ডলারে পৌঁছায়। এটাই প্রথম ভারতীয় ফ্যান্টাসি গেমিং প্ল্যাটফর্ম যে এই স্ট্যাটাস অর্জন করে। এর পরে ২০২১ সালে 'মোবাইল প্রিমিয়ার লিগ' (এমপিএল) এবং ২০২২ সালে 'গেমস ২৪ x ৭' শত কোটি ডলার ব্যবসার ঘরে পৌঁছে যায়।

'ফেডারেশন অফ ইন্ডিয়ান ফ্যান্টাসি স্পোর্টস' বিবিসিকে জানিয়েছে, ভারতে এখন ২২.৫ কোটির চেয়েও বেশি মানুষ 'ফ্যান্টাসি স্পোর্টস অ্যাপ' ব্যবহার করেন। ডেলয়েট-এর সহযোগিতায় পরিচালিত এক গবেষণা থেকে এই পরিসংখ্যান পাওয়া গেছে। 'ফেডারেশন অফ ইন্ডিয়ান ফ্যান্টাসি স্পোর্টস'-এর তথ্য অনুযায়ী, এই অ্যাপগুলো ব্যবহারকারীদের বিভিন্ন খেলায় অর্থ বিনিয়োগের অনুমতি দেয়, কিন্তু ৮৫ শতাংশ ব্যবহারকারীদের আগ্রহ শুধুমাত্র ক্রিকেটের মধ্যেই সীমাবদ্ধ থাকে।

দ্রুত উপার্জন এবং তার বিপদ: 'ফ্যান্টাসি অ্যাপ'-এর প্রতি এই ব্যাপক আকর্ষণের কারণ খুব সহজ-এর মাধ্যমে দ্রুত টাকা আয় করার আশা। দিল্লির ক্রীড়া সাংবাদিক সিদ্ধান্ত আনে বলছেন, 'এই গেমগুলো এমনভাবে ডিজাইন করা হয়েছে যাতে লোকে ভাবে যে তারাই জিতবে। ভারতে মূলত ক্রিকেটের সঙ্গে এই অ্যাপগুলোর সম্পর্ক ছিল কিন্তু এখন অন্যান্য খেলার ক্ষেত্রেও তা দেখা যাচ্ছে। এই অ্যাপের সবচেয়ে বড় শক্তি হলো দ্রুত টাকা পাওয়ার লোভ।'

উত্তরপ্রদেশের মির্জাপুরের স্থানীয় আদালতে কেরানির কাজ করেন দয়ারাম। তার গল্প 'ফ্যান্টাসি গেম'-এর প্রতি ব্যবহারকারীদের মুগ্ধতাকে আরও বাড়িয়ে তোলে। চলতি বছরের এপ্রিল মাসে তিন কোটি টাকা জিতেছিলেন দয়ারাম। 'লক্ষ্ণৌ সুপার জায়ান্টস' এবং 'পাঞ্জাব কিংস'-এর মধ্যে অনুষ্ঠিত একটা আইপিএল ম্যাচে, তিনি 'ড্রিম ১১' অ্যাপ-এর লিডারবোর্ডে শীর্ষে ছিলেন। তার কথায়, 'গত দুই বছর ধরে খেলছি, কিন্তু এটাই আমার প্রথম বড় ধরনের জয়। আমি খুব খুশি, এখনও বিশ্বাস করতে পারছি না।' দয়ারাম আরও জানান, এই টাকা দিয়ে তিনি পরিবারের জন্য একটা বাড়ি তৈরি করতে চান। দয়ারাম বলেছেন, 'আমার আর খেলার কোনও পরিকল্পনা নেই। এখানে আপনি হেরেও যেতে পারেন।'

'ফ্যান্টাসি স্পোর্টস'-এর ক্ষেত্রে জেতা বা হারার বাস্তব চিত্রটা অবশ্য দয়ারামের গল্প থেকে ঠিক ফুটে ওঠে না। দিল্লির মহম্মদ রকিবের অভিজ্ঞতা বরং এই জেতা-হারার গল্পে বাস্তবের ছোঁয়া আনে। কন্ট্রাক্ট কর্মী (চুক্তিবদ্ধ কর্মী) হিসাবে নিযুক্ত মহম্মদ রাকিবের কথায়, 'আমি প্রতিটা আইপিএল ম্যাচের জন্য ফ্যান্টাসি টিম তৈরি করি। কিন্তু কখনও কোনও পুরস্কার জিতিনি।'

ধর্মেন্দ্র গৌতমও বিশ্বাস করেন যে 'ফ্যান্টাসি গেমিং অ্যাপ'গুলোতে জেতার সম্ভাবনা খুব কম। ঠিক তার পরেই তিনি ব্যাথা করেছেন বাস্তবে কোন বিষয়টা তাকে এই খেলার সঙ্গে বেঁধে রেখেছে। 'আপনি না-ই জিততে পারেন কিন্তু এই খেলায় যে উত্তেজনা এবং রোমাঞ্চ রয়েছে যা অন্যান্য। আপনি হয়ত এবার জিততে পারেননি কিন্তু মনে হবে যে পরের বার নিশ্চয়ই জিতবেন,' বলেছেন মহম্মদ রাকিব। 'আমি হয়তো তিন কোটি টাকা জিততে পারব না, কিন্তু আমি লোককে ৩০০ টাকা বা ৫০০ টাকা জিততে দেখেছি।'

কেপিএমজি-র রিপোর্ট অনুযায়ী, যাদের বার্ষিক আয় তিন লক্ষ টাকার কম, তাদের মধ্যে ৪০ শতাংশ সপ্তাহে পাঁচবারের বেশি 'ফ্যান্টাসি স্পোর্টস' খেলেন। আবার যাদের আয় ১০ লক্ষ টাকার বেশি, তাদের ১২ শতাংশের মধ্যে এই প্রবণতা দেখা গিয়েছে। এক্ষেত্রে উল্লেখযোগ্য বিষয় হলো যাদের আয় বছরে তিন লক্ষ টাকার কম, তাদের মধ্যে ৩৯ শতাংশ জানিয়েছেন, এই খেলায় অংশ নেওয়ার সবচেয়ে বড় কারণ হল টাকা জেতার সুযোগ।

তবে এই 'গেমিং অ্যাপ্লিকেশন' এবং সেটা ঘিরে তৈরি আশার করুণ পরিণতিও দেখা গেছে। 'ফ্যান্টাসি গেম'-এ বড় ধরনের হারের পর আত্মহত্যার ঘটনাও প্রকাশ্যে এসেছে। গত মার্চ মাসে বিহারে ৩৮ বছরের এক ব্যক্তি দুই কোটি টাকা খোয়ানোর পর আত্মহত্যা করেন। ঘটনাস্থল থেকে একটা নোট উদ্ধার করা হয়েছিল। সেই নোটে তিনি তার আসক্তির জন্য ফ্যান্টাসি ক্রিকেটকে দায়ী করেছেন। তিনি জানিয়েছিলেন, কোভিডের সময় থেকেই এই খেলার প্রতি আসক্ত হয়ে পড়েন তিনি।

চিকিৎসক মনোজ কুমার শর্মা, 'সার্ভিস ফর হেলদি ইউজ অফ টেকনোলজি' নামে একটা মানসিক স্বাস্থ্য ক্লিনিক চালান। তার মতে কোভিডের পর থেকে 'ফ্যান্টাসি স্পোর্টস'-এর প্রতি আকর্ষণ তাৎপর্যপূর্ণভাবে বেড়েছে। ডা. কুমার বলছেন, 'একটা বিভ্রম কাজ করে যে সবকিছু (ব্যবহারকারীর) নিয়ন্ত্রণে আছে। মানুষ ভাবতে থাকে যে সে জিততে পারে। কিন্তু বারবার হেরে যাওয়া মানসিক এবং ব্যবহারিক সমস্যার কারণ হতে পারে।' আত্মহত্যার ঘটনার পর কয়েকটা রাজ্য 'গেমিং অ্যাপ্লিকেশন'গুলোর বিরুদ্ধে পদক্ষেপ নিয়েছিল।

২০২২ সালে তামিলনাড়ুর মুখ্যমন্ত্রী এম. কে. স্টালিন গেমিং অ্যাপ-এর বিরুদ্ধে এই জাতীয় অভিযোগ খতিয়ে দেখার জন্য একটা বিশেষ কমিটি গঠনের কথা ঘোষণা করেছিলেন। ওই বছরই মধ্যপ্রদেশের স্বরাষ্ট্রমন্ত্রী নরোত্তম মিশ্র জানান, তার সরকার 'অনলাইন গেমিং' নিয়ন্ত্রণের জন্য আইন প্রণয়ন করবে। বিশেষজ্ঞদের মতে 'ফ্যান্টাসি গেমিং'কে ঝুঁকিপূর্ণ করে তোলার পিছনে সবচেয়ে বড় কারণ হলো এর সঠিক নিয়ন্ত্রণের অভাব।

নিয়ন্ত্রণের বিষয়ে স্বচ্ছতার অভাব : ফ্যান্টাসি স্পোর্টস-এর নিয়ন্ত্রণ কয়েক বছর ধরেই বিতর্কের কারণ হয়ে দাঁড়িয়েছে। ওড়িশা, আসাম, অন্ধ্রপ্রদেশ ও তেলেঙ্গানার মতো কমপক্ষে চারটে রাজ্য জুয়া বিরোধী আইনের আওতায় এই অ্যাপগুলো নিষিদ্ধ করেছে। তবে এই বিধিনিষেধের বৈধতা নিয়ে প্রশ্ন উঠেছে। এর কারণ হলো 'ফ্যান্টাসি স্পোর্টস'-এর জন্য আসলে কৌশলগত দক্ষতা দরকার না কি এটা ভাগ্যের বিষয়- এই বিষয়টা এখনও বিতর্কই রয়ে গিয়েছে। দক্ষতা ভিত্তিক খেলায় কৌশলগত সিদ্ধান্ত নেওয়ার বিষয় থাকে, প্রতিভা এবং জ্ঞানও দরকার। অন্যদিকে, ভাগ্যের উপর ভিত্তি করে যে সমস্ত গেম রয়েছে তা সম্পূর্ণরূপে ভাগ্যের উপর নির্ভর করে। প্রযুক্তি এবং গেমিং আইনজীবী জে শেঠার কথায়, ক্ষ্মফ্যান্টাসি স্পোর্টস দক্ষতা-ভিত্তিক গেম। একে জুয়া হিসাবে শ্রেণিবদ্ধ করা যায় না। সুপ্রিম কোর্টও তা গ্রাহ্য করে কয়েকটা সিদ্ধান্ত বহাল রেখেছে। এই পরিস্থিতিতে রাজ্য সরকার এবং কেন্দ্র এই অ্যাপগুলোকে পুরোপুরি নিষিদ্ধ করতে পারেনা। আদালতের তরফে ওই যুক্তি দেখিয়ে কর্ণাটক এবং তামিলনাড়ুর রাজ্য সরকারের তরফে 'ফ্যান্টাসি গেমিং'-এর উপর চাপানো নিষেধাজ্ঞা বাতিল করা হয়। কেন্দ্রীয় সরকার ২০২৩ সালে ফ্যান্টাসি গেমিং অ্যাপগুলোর ব্যবহার কমানোর উদ্দেশ্যে এই গেমে জেতা পুরস্কারের উপর ১৮ শতাংশ জিএসটি আরোপ করেছে। এই করের হার অ্যালকোহল এবং তামাকের সমতুল্য। এই সিদ্ধান্তকে চ্যালেঞ্জ জানিয়ে সুপ্রিম কোর্টে পাল্টা আবেদন জানানো হয়।

'ফ্যান্টাসি গেমিং' সংস্থাগুলো সহ আবেদনকারীদের যুক্তি ছিল যে, এই কর অনুচ্ছেদ ১৪ (আইনের কাছে সমতা) এবং অনুচ্ছেদ ১৯ (১) (জি) (যে কোনও পেশা অনুশীলনের) স্বাধীনতাকে লঙ্ঘন করে। ২০২৩ সালে, ভারত সরকারের তথ্য প্রযুক্তি অনলাইন গেমিং শিল্পের জন্য একটা 'ন্যাশনাল রেগুলেটরি ফ্রেম ওয়ার্ক' (জাতীয় নিয়ন্ত্রক কাঠামো) সম্পর্কে একটা নোটিফিকেশন প্রকাশ করেছিল। কিন্তু এই কাঠামোর আওতায় যেসব স্বনিয়ন্ত্রক সংস্থা গড়ে ওঠার কথা ছিল, তা এখনও হয়নি। এফআইএফএস বিবিসিকে বলেছে যে 'ফ্যান্টাসি গেমিং প্ল্যাটফর্ম'গুলো 'দায়িত্বশীল গেমিং' এর জন্য বেশ কয়েকটা শক্তপোক্ত পদক্ষেপ নিয়েছে। এই প্ল্যাটফর্মে ব্যবহারকারীদের 'তাদের নিজস্ব ব্যয় এবং সময় নিয়ন্ত্রণ করার' বিকল্প দেয়। এর উদ্দেশ্য হলো ব্যবহারকারীরা যাতে তাদের সিদ্ধান্ত সম্পর্কে সচেতন হতে পারেন। এফআইএফএস আরও দাবি করে যে 'ফ্যান্টাসি স্পোর্টস ইন্ডাস্ট্রি' ভারতের অর্থনীতিতে উল্লেখযোগ্য অবদান রাখছে। এসব অ্যাপ নিয়ে বিতর্ক চলতে থাকলেও ব্যবহারকারীদের কাছে খেলায় অংশ নেওয়াটা নিত্যদিনের ঘটনা। ধর্মেন্দ্র গৌতমের মতো অনেকের কাছে এটা এটা 'নেশা' হয়ে দাঁড়িয়েছে। তার কথায়, 'আমি খেলি কারণ আমার চারপাশে বাকিরাও এই খেলা খেলে। আমরা সবাই এই আশায় খেলি যে হয়ত আমরা জিতব। এই জন্য হাল ছেড়ে দেওয়াটা কিন্তু কঠিন।'

ट्रेड डिप्लोमेसी • अधूरे आंकड़े देकर भारत पर टैरिफ घटाने का दबाव डाल रहा अमेरिका: जीटीआरआई

अमेरिका भारत से हर साल 7 लाख करोड़ कमा रहा, 3 लाख करोड़ रुपए का सरप्लस

भास्कर न्यूज | नई दिल्ली

राष्ट्रपति डोनाल्ड ट्रम्प भारत पर अमेरिका के साथ व्यापार में अनुचित फायदा उठाने का आरोप लगाते रहे हैं। वित्त वर्ष 2024-25 में अमेरिका का भारत के साथ व्यापार घाटा 44.4 अरब डॉलर (3.8 लाख करोड़ रुपए) का था। यानी भारत ने अमेरिका से आयात के मुकाबले 3.8 लाख करोड़ का ज्यादा निर्यात किया। यही आंकड़ा दिखाकर ट्रम्प भारत पर एकतरफा टैरिफ कम करने और बाजार खोलने का दबाव बना रहा है, पर ये आंकड़े अधूरे और भ्रामक हैं। ग्लोबल ट्रेड रिसर्च इनिशिएटिव (जीटीआरआई) का कहना है कि एजुकेशन, डिजिटल सर्विस, फाइनेंशियल ऑपरेशन, बौद्धिक संपदा की रॉयल्टी और हथियार बेचकर अमेरिका हर साल भारत से 80-85 अरब डॉलर (6.6 से 7 लाख करोड़ रुपए) कमाता है। यानी वस्तुओं-सेवाओं के व्यापार से घाटे के बावजूद अमेरिका भारत के साथ 3-3.4 लाख करोड़ रुपए के ट्रेड सरप्लस में है।

हकीकत: भारत से 4 प्रमुख तरीकों से कमाई करता है अमेरिका, ये ट्रेड डेटा में नहीं दिखते

1 एजुकेशन के जरिये हर साल 2 लाख करोड़ रुपए से ज्यादा की कमाई

भारत से अमेरिका सबसे अधिक पैसा एजुकेशन में जाता है। 3 लाख से ज्यादा भारतीय छात्र हर साल अमेरिका पढ़ने जाते हैं। वहां पढ़ने वाले भारतीय छात्र सालाना 2 लाख करोड़ रुपए से अधिक खर्च करते हैं। करीब 1.3 लाख करोड़ रुपए ट्यूशन पर और लगभग 85 हजार करोड़ रुपए रहने-खाने पर खर्च होते हैं। यूएससी, एनवाईयू और नॉर्थ ईस्टर्न जैसी यूनिवर्सिटी में सबसे ज्यादा पैसा जाता है। इस हिसाब से शिक्षा भारत को अमेरिका का सबसे बड़ा निर्यात बन गया है।

2 अमेरिकी टेक कंपनियों को भारत से सालाना 1.70 लाख करोड़ तक आय

गूगल, मेटा, अमेजन, एपल और माइक्रोसॉफ्ट जैसी अमेरिका की दिग्गज टेक कंपनियां भारत के तेजी से बढ़ते डिजिटल मार्केट से हर साल 15-20 अरब डॉलर (1.7 लाख करोड़ रुपए तक) की कमाई करती हैं। ये कमाई इन्हें डिजिटल विज्ञापन, क्लाउड सर्विस, एप स्टोर्स, सॉफ्टवेयर व डिवाइस की बिक्री और स्ट्रीमिंग सब्सक्रिप्शन के जरिये होती है।

3 सालाना 1 लाख करोड़ रुपए तक कमाई करते हैं अमेरिकी बैंक

सिटीबैंक, जेपी मॉर्गन, गोल्डमैन सैक्स, मैकिंजी, बीसीजी, डेलॉय, पीडब्ल्यूसी और केपीएमजी जैसे अमेरिकी बैंक, बैंकिंग कंपनियां और कंसल्टिंग फर्म्स भारत के फाइनेंशियल सेक्टर से हर साल करीब 10-15 अरब डॉलर (1.3 लाख करोड़ रुपए तक) कमाती हैं। ये आय भारतीय कंपनियों को सलाह, कॉरपोरेट डील मैनेज करके और हाई एंड सर्विसेज के जरिये होती है।

4 हर साल ग्लोबल कैपेबिलिटी सेंटर्स की कमाई 1.7 लाख करोड़ तक

ग्लोबल कैपेबिलिटी सेंटर (जीसीसी) भारत में अमेरिका की आय के बड़े स्रोत हैं। वॉलमार्ट, डेल, आईबीएम, वेल्स फार्गो, सिस्को और मॉर्गन स्टेनली जैसी कंपनियां बेंगलुरु और हैदराबाद जैसे शहरों में जीसीसी चलाती हैं। ये बैक-एंड ऑफिस टेक्नोलॉजी, फाइनेंस और एनालिटिक्स का ग्लोबल ऑपरेशन संभालते हैं। ये काम तो भारत में करते हैं, पर बिलिंग अमेरिका में होती है।

भारत से घाटे में नहीं है अमेरिका

जीटीआरआई का कहना है कि भारत अमेरिका के साथ एकतरफा फायदे में नहीं है। एजुकेशन, टेक्नोलॉजी, फाइनेंस और डिफेंस जैसे सेक्टर भारत में अमेरिका की कमाई के प्रमुख स्रोत हैं। इस लिहाज से भारत मुक्त व्यापार समझौते पर मजबूती से मोलभाव करने की स्थिति में है।

डिफेंस सेक्टर में 1,100 करोड़ रुपए की नई डील, इसके बढ़ने के आसार

भारत हर साल अमेरिका से हजारों करोड़ रुपए के हथियार खरीदता है। हाल ही में भारत-पाक तनाव के बीच अमेरिका ने करीब 1,100 करोड़ रुपए के मिलिट्री हार्डवेयर और लॉजिस्टिक उपकरण भारत को बेचने की डील की है। ऐसी डील अब बढ़ने के आसार हैं।

पेटेंट, लाइसेंस, फिल्में और स्ट्रीमिंग के जरिये भी होती है कमाई

अमेरिकी फार्मा कंपनियां अपने पेटेंट और ड्रग लाइसेंस के जरिये भारतीय कंपनियों से सालाना 17,000 करोड़ रुपए तक कमाई करती हैं। इसके अलावा हॉलीवुड फिल्मों, ओटीटी प्लेटफॉर्म्स भी स्ट्रीमिंग और कंटेंट लाइसेंसिंग के माध्यम से करीब इतनी ही कमाई करते हैं।

अमेरिका भारत से हर साल 7 लाख करोड़ कमा रहा, 3 लाख करोड़ रुपए का सरप्लस

भास्कर न्यूज | नई दिल्ली

राष्ट्रपति डोनाल्ड ट्रम्प भारत पर अमेरिका के साथ व्यापार में अनुचित फायदा उठाने का आरोप लगाते रहे हैं। वित्त वर्ष 2024-25 में अमेरिका का भारत के साथ व्यापार घाटा 44.4 अरब डॉलर (करीब 3.8 लाख करोड़ रुपए) का था। यानी भारत ने अमेरिका से आयात के मुकाबले 3.8 लाख करोड़ रुपए का ज्यादा निर्यात किया। यही आंकड़ा दिखाकर अमेरिका भारत पर एकतरफा टैरिफ कम करने और बाजार खोलने का दबाव बना रहा है। लेकिन ये आंकड़े अधूरे और भ्रामक हैं। ग्लोबल ट्रेड रिसर्च इनिशिएटिव (जीटीआरआई) का कहना है कि शिक्षा, डिजिटल सर्विस, फाइनेंशियल ऑपरेशन, बौद्धिक संपदा की रॉयल्टी और हथियारों की बिक्री से अमेरिका हर साल भारत से 80-85 अरब डॉलर (6.6 से 7 लाख करोड़ रुपए) कमाता है। यानी वस्तुओं और सेवाओं के व्यापार घाटे के बावजूद अमेरिका भारत से 3-3.4 लाख करोड़ रुपए के ट्रेड सरप्लस में है।

हकीकत: भारत से 4 प्रमुख तरीकों से कमाई करता है अमेरिका, ये ट्रेड डेटा में नहीं दिखते

1 एजुकेशन के जरिये हर साल 2 लाख करोड़ रुपए से ज्यादा की कमाई

भारत से अमेरिका सबसे अधिक पैसा एजुकेशन में जाता है। 3 लाख से ज्यादा भारतीय छात्र हर साल अमेरिका पढ़ने जाते हैं। वहां पढ़ने वाले भारतीय छात्र हर साल 2 लाख करोड़ रुपए से अधिक खर्च करते हैं। इसमें करीब 1.3 लाख करोड़ रुपए ट्यूशन पर और करीब 85 हजार करोड़ रुपए रहने-खाने पर खर्च होते हैं। यूएससी, एनवाईयू और नॉर्थ ईस्टर्न जैसी यूनिवर्सिटी में सबसे ज्यादा पैसा जाता है। इस हिसाब से शिक्षा भारत को अमेरिका का सबसे बड़ा निर्यात बन गया है।

2 अमेरिकी टेक कंपनियों को भारत से सालाना 1.7 लाख करोड़ तक आय

गूगल, मेटा, अमेजन, एपल और माइक्रोसॉफ्ट जैसी अमेरिका की दिग्गज टेक कंपनियां भारत के तेजी से बढ़ते डिजिटल मार्केट से हर साल 15-20 अरब डॉलर (1.7 लाख करोड़ रुपए तक) की कमाई करती हैं। ये कमाई इन्हें डिजिटल विज्ञापन, क्लाउड सर्विस, एप स्टोर्स, सॉफ्टवेयर व डिवाइस की बिक्री और स्ट्रीमिंग सब्सक्रिप्शन के जरिये होती है।

3 सालाना 1 लाख करोड़ रुपए तक कमाई करते हैं अमेरिकी बैंक

सिटीबैंक, जेपी मॉर्गन, गोल्डमैन सैक्स, मैकिंजी, बीसीजी, डेलॉय, पीडब्ल्यूसी और केपीएमजी जैसे अमेरिकी बैंक, बैंकिंग कंपनियां और कंसल्टिंग फर्म्स भारत के फाइनेंशियल सेक्टर से हर साल करीब 10-15 अरब डॉलर (1.3 लाख करोड़ रुपए तक) कमाती हैं। ये आय भारतीय कंपनियों को सलाह, कॉरपोरेट डील मैनेज करके और हाई एंड सर्विसेज के जरिये होती है।

4 ग्लोबल कैपेबिलिटी सेंटर्स कमाते हैं 1 से 1.7 लाख करोड़ रुपए

ग्लोबल कैपेबिलिटी सेंटर (जीसीसी) भारत में अमेरिका की आय के बड़े स्रोत हैं। वॉलमार्ट, डेल, आईबीएम, वेल्स फार्गो, सिस्को और मॉर्गन स्टेनली जैसी कंपनियां बेंगलुरु और हैदराबाद जैसे शहरों में जीसीसी चलाती हैं। ये बैक-एंड ऑफिस टेक्नोलॉजी, फाइनेंस और एनालिटिक्स का ग्लोबल ऑपरेशन संभालते हैं। ये काम भारत में करते हैं, पर बिलिंग अमेरिका में होती है। अमेरिकी जीसीसी भारतीय ऑपरेशन से सालाना 1.2 से लेकर 1.7 लाख करोड़ रुपए तक की कमाई करते हैं।

भारत से घाटे में नहीं है अमेरिका

जीटीआरआई का कहना है कि भारत अमेरिका से एकतरफा फायदा ले रहा। एजुकेशन, टेक्नोलॉजी, फाइनेंस और डिफेंस जैसे सेक्टर भारत में अमेरिका की कमाई के प्रमुख स्रोत भी हैं। इस लिहाज से भारत मुक्त व्यापार समझौते पर मजबूती से मोलभाव करने की स्थिति में है।

डिफेंस सेक्टर में 1,100 करोड़ रुपए की नई डील, इसके बढ़ने के आसार

भारत हर साल अमेरिका से अरबों-खरबों रुपए के हथियार खरीदता है। भारत और पाक के बीच सीमा पर जारी तनाव के बीच अमेरिका ने करीब 1,100 करोड़ रुपए कीमत के सैन्य हार्डवेयर और लॉजिस्टिक उपकरण भारत को बेचने की डील की है।

पेटेंट, लाइसेंस, फिल्में और स्ट्रीमिंग के जरिये भी होती है कमाई

अमेरिकी फार्मा कंपनियां अपने पेटेंट और ड्रग लाइसेंस के जरिये भारतीय कंपनियों से सालाना 17,000 करोड़ रुपए तक कमाई करती हैं। हॉलीवुड फिल्मों, ओटीटी प्लेटफॉर्म भी स्ट्रीमिंग और कंटेंट लाइसेंसिंग के माध्यम से करीब इतनी ही कमाई करते हैं।

देसी कंसल्टेंसी फर्म्स बनाने की तैयारी शुरू

नई दिल्ली | केंद्र ने चार वैश्विक कंसल्टेंसी फर्मों पर निर्भरता घटाने की योजना बनाई है। इनमें डेलॉय, पीडब्ल्यूसी, ईवाई और केपीएमजी शामिल हैं। इन्हे बिग-4 कहा जाता है। सरकार देश में ही इनके टक्कर की कंसल्टिंग कंपनियां बनाना चाहती है। वित्त वर्ष 2023-24 में बिग-4 की भारतीय यूनिट्स की आय 38,800 करोड़ रुपए थी। 2024-25 में इसके 45 हजार करोड़ के पार निकलने की उम्मीद जताई गई है।

प्रोफेशन लीक से हटकर • कॉर्पोरेट से कैनवास तक का सफर

CA से क्रिएटिव आर्टिस्ट बनीं पूनम, होम डेकोर में दिखा रही अपना हुनर

चार्टर्ड अकाउंटेंसी की पढ़ाई, फाइनेंस में मास्टर्स, Deloitte जैसी एमएनसी में नौकरी, इससे लगता है कि बात किसी कॉर्पोरेट प्रोफेशनल की हो रही है। लेकिन कहानी है पूनम शाह की, जिन्होंने कॉमर्स और फाइनेंस छोड़कर रेजिन आर्ट में अपना मुकाम बनाया। आज उनके आर्टवर्क्स होटल्स, कॉर्पोरेट ऑफिस और लग्जरी होम डेकोर का हिस्सा हैं।

NMIMS से ग्रेजुएशन और यूके की एस्टन यूनिवर्सिटी से मास्टर्स करने के बाद पूनम ने Deloitte में काम किया। फिर शादी के बाद अमेरिका शिफ्ट हुईं। वहां के आर्ट वर्कशॉप्स और क्रिएटिव माहौल ने उनके भीतर की कलाकार को फिर से जगा दिया। धीरे-धीरे खाली समय में उन्होंने आर्ट को एक्सप्लोर करना शुरू किया। ऑफिस के बाद वे अलग-अलग आर्ट फॉर्म्स ट्राय करती थीं। लेकिन जब रेजिन से पहला आर्टवर्क बनाया, तो उसे देखकर संतुष्टि मिली। रेजिन की फ्लूडिटी, उसका टेक्सचर और उसमें छिपी चमक ने उन्हें खींच लिया। उन्होंने इसे फुल-टाइम प्रोफेशन बना लिया।

रेजिन आर्ट क्या होता है?

रेजिन आर्ट में एपॉक्सी रेजिन तरल को रंगों व ग्लिटर के साथ आर्टवर्क तैयार करते हैं। इससे टेबलटॉप, वॉल आर्ट, फर्नीचर और ज्वेलरी भी तैयार की जाती है। इसे Udemy और Skillshare जैसे ऑनलाइन कोर्स से सीखा जा सकता है।

जो युवा क्रिएटिव फील्ड में जाना चाहते हैं, वे छोटे से काम से शुरुआत कर सकते हैं। पैशन को पहले एक्सप्लोर करें और फिर फुल-टाइम का सोचें। साथ ही, फाइनेंशियल और क्रिएटिव दोनों प्लानिंग साथ में रखें।
-पूनम शाह

इस फील्ड में करियर बनाने के कई मौके हैं

- खुद का रेजिन प्रोडक्ट ब्रांड शुरू कर सकते हैं।
- इंस्टाग्राम, अमेजॉन जैसे प्लेटफॉर्म पर सेल कर सकते हैं।
- बच्चों और बड़ों के लिए वर्कशॉप्स आयोजित कर सकते हैं

ಜಿಸಿಸಿ ಬೆಂಬಲ: ಒಪ್ಪಂದಕ್ಕೆ ಸಹಿ

ಪ್ರಜಾವಾಣಿ ವಾರ್ತೆ

ಕರ್ನಾಟಕದಲ್ಲಿ ಜಾಗತಿಕ ಸಾಮರ್ಥ್ಯ ಕೇಂದ್ರಗಳನ್ನು ಬೆಂಬಲಿಸಲು ಸ್ಟೇಟ್ ಬ್ಯಾಂಕ್ ಆಫ್ ಇಂಡಿಯಾ ಮತ್ತು ಕರ್ನಾಟಕ ಡಿಜಿಟಲ್ ಎಕಾನಮಿ ಮಿಷನ್ ಅಧಿಕಾರಿಗಳು ತಿಳಿವಳಿಕೆ ಒಪ್ಪಂದಕ್ಕೆ ಅಂಕಿತ ಹಾಕಿದರು

ಬೆಂಗಳೂರು: ನಗರದಲ್ಲಿ ಇತ್ತೀಚೆಗೆ ನಡೆದ 'ಜಿಸಿಸಿ ಲೀಡರ್ಸ್ ಕನೆಕ್ಟ್' ಕಾರ್ಯಕ್ರಮ-ದಲ್ಲಿ ರಾಜ್ಯದಲ್ಲಿ ಜಾಗತಿಕ ಸಾಮರ್ಥ್ಯ ಕೇಂದ್ರಗಳನ್ನು (ಜಿಸಿಸಿ) ಬೆಂಬಲಿಸಲು ಸ್ಟೇಟ್ ಬ್ಯಾಂಕ್ ಆಫ್ ಇಂಡಿಯಾವು (ಎಸ್‌ಬಿಐ), ಕರ್ನಾಟಕ ಡಿಜಿಟಲ್ ಎಕಾನಮಿ ಮಿಷನ್ (ಕೆಡಿಇಎಂ) ಜೊತೆಗೆ ತಿಳಿವಳಿಕೆ ಒಪ್ಪಂದ ಪತ್ರಕ್ಕೆ ಅಂಕಿತ ಹಾಕಿದೆ.

ಕೆಡಿಇಎಂ ಅಧ್ಯಕ್ಷ ಬಿ.ವಿ. ನಾಯ್ಡು ಅವರ ಸಮ್ಮುಖದಲ್ಲಿ ಬ್ಯಾಂಕ್‌ನ ಬೆಂಗಳೂರು ವೃತ್ತದ ಮುಖ್ಯ ಪ್ರಧಾನ ವ್ಯವಸ್ಥಾಪಕಿ ಜೂಹಿ ಸ್ಮಿತಾ ಸಿನ್ಹಾ ಮತ್ತು ಕೆಡಿಇಎಂ ಸಿಇಒ ಸಂಜೀವ್ ಗುಪ್ತಾ ಸಹಿ ಹಾಕಿದರು.

ರಾಜ್ಯದಲ್ಲಿ ಜಿಸಿಸಿಗಳನ್ನು ಸಕ್ರಿಯಗೊಳಿಸುವ ಮತ್ತು ಸಬಲೀಕರಣಗೊಳಿಸುವ ಗುರಿಗೆ ಈ ಒಪ್ಪಂದವು ನೆರವಾಗಲಿದೆ. ಬೆಂಗಳೂರಿನಲ್ಲಿ ದೇಶದ ಮೊದಲ ವಿಶಿಷ್ಟ ಜಿಸಿಸಿ ಕೇಂದ್ರ ತೆರೆಯಲಾಗುವುದು ಎಂದು ಬ್ಯಾಂಕ್ ತಿಳಿಸಿದೆ.

ಜಿಸಿಸಿ, ನವೋದ್ಯಮ ಮತ್ತು ಐ.ಟಿ-ಬಿ.ಟಿ ವಲಯದ ಪ್ರಮುಖ ನೇಮಕಾತಿಗೆ ಪರಿಹಾರ ಒದಗಿಸುವ ಜ್ಯೋಯಿನ್ ಗ್ರೂಪ್ ಸಹಯೋಗದೊಂದಿಗೆ ಈ ಕಾರ್ಯಕ್ರಮ ಆಯೋಜಿಸಲಾಗಿತ್ತು. ವೆಸ್ಟರ್ನ್ ಡಿಜಿಟಲ್ ನಿರ್ದೇಶಕ ವೀರ ಲೋಕೇಶ್, ಬಾಯರ್ ಇಂಡಿಯಾದ ರಾಷ್ಟ್ರೀಯ ಮುಖ್ಯಸ್ಥೆ ಶಾರದಾ, ಡೆಲಾಯ್ಟ್ ಸಂಸ್ಥೆಯ ಪಾಲುದಾರ ಆದಿತ್ಯ ಮೀನಾ ಹಾಜರಿದ್ದರು.

ತೆರಿಗೆ ಸಂಗ್ರಹ ಪ್ರಮಾಣ ಮೇ ತಿಂಗಳಲ್ಲಿ ಶೇಕಡ 16ರಷ್ಟು ಹೆಚ್ಚಳ

ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ₹2 ಲಕ್ಷ ಕೋಟಿ

ನವದೆಹಲಿ (ಪಿಟಿಐ): ಸರಕು ಮತ್ತು ಸೇವಾ ತೆರಿಗೆ (ಜಿಎಸ್‌ಟಿ) ವ್ಯವಸ್ಥೆ ಮೂಲಕ ಸಂಗ್ರಹ ಆಗುವ ವರಮಾನವು ಮೇ ತಿಂಗಳಲ್ಲಿ ಶೇಕಡ 16.4ರಷ್ಟು ಹೆಚ್ಚಳ ಆಗಿದ್ದು, ₹2.01 ಲಕ್ಷ ಕೋಟಿಯಷ್ಟು ಆಗಿದೆ. ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹವು ಸತತ ಎರಡನೆಯ ತಿಂಗಳಲ್ಲಿಯೂ ₹2 ಲಕ್ಷ ಕೋಟಿಗಿಂತ ಹೆಚ್ಚಾಗಿದೆ.

ಜಿಎಸ್‌ಟಿ ಮೂಲಕ ಸಂಗ್ರಹವಾದ ವರಮಾನದ ಮೊತ್ತವು ಏಪ್ರಿಲ್‌ನಲ್ಲಿ ದಾಖಲೆಯು ₹2.37 ಲಕ್ಷ ಕೋಟಿ ಆಗಿತ್ತು. ಕಳೆದ ವರ್ಷದ ಮೇ ತಿಂಗಳಲ್ಲಿ ಸಂಗ್ರಹವು ₹1.72 ಲಕ್ಷ ಕೋಟಿ ಆಗಿತ್ತು.

ಈ ವರ್ಷದ ಮೇ ತಿಂಗಳಲ್ಲಿ ಆಂತರಿಕ ವಹಿವಾಟುಗಳಿಂದ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು ಶೇ 13.7ರಷ್ಟು ಏರಿಕೆ ಕಂಡಿದ್ದು, ಅಂದಾಜು ₹1.50 ಲಕ್ಷ ಕೋಟಿಗೆ ತಲುಪಿದೆ. ಆಮದು ಮೂಲಕ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು ಶೇ 25.2ರಷ್ಟು ಹೆಚ್ಚಳ ಕಂಡು ₹51 ಸಾವಿರ ಕೋಟಿಗೆ ತಲುಪಿದೆ.

ದೊಡ್ಡ ರಾಜ್ಯಗಳಾದ ಮಹಾರಾಷ್ಟ್ರ, ಪಶ್ಚಿಮ ಬಂಗಾಳ, ಕರ್ನಾಟಕ ಮತ್ತು ತಮಿಳುನಾಡಿನಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದಲ್ಲಿನ ಏರಿಕೆಯು ಶೇ 17ರಿಂದ ಶೇ 25ರವರೆಗೆ ಇದೆ. ಆದರೆ ಈ ರಾಜ್ಯಗಳಂತೆಯೇ ದೊಡ್ಡದಾಗಿರುವ ಗುಜರಾತ್, ಆಂಧ್ರಪ್ರದೇಶ, ತೆಲಂಗಾಣದಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದಲ್ಲಿನ ಹೆಚ್ಚಳವು ಶೇ 6ರವರೆಗೆ ಮಾತ್ರ ಇದೆ.

ಬೇರೆ ಬೇರೆ ರಾಜ್ಯಗಳ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದ ಏರಿಕೆ ಪ್ರಮಾಣ-ದಲ್ಲಿನ ವ್ಯತ್ಯಾಸದ ವಿಚಾರವಾಗಿ, ಆಯಾ ರಾಜ್ಯಗಳಿಗೆ ಮುಖ್ಯವಾದ ವಲಯಗಳನ್ನು ಗಮನದಲ್ಲಿ ಇರಿಸಿಕೊಂಡು ಆಳವಾದ ಪರಿಶೀಲನೆ ಆಗಬೇಕಿದೆ ಎಂದು ಡೆಲಾಯ್ಟ್ ಇಂಡಿಯಾ ಪಾಲುದಾರ ಎಂ.ಎಸ್. ಮಣಿ ಹೇಳಿದ್ದಾರೆ.

ಮಧ್ಯಪ್ರದೇಶ, ಹರಿಯಾಣ, ಪಂಜಾಬ್, ರಾಜಸ್ಥಾನದಲ್ಲಿ ವರಮಾನ ಸಂಗ್ರಹದ ಏರಿಕೆ ಪ್ರಮಾಣವು ಶೇ 10ರಷ್ಟು ಇದೆ.

ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದ ಪ್ರಮಾಣವು ಇದೇ ಮಟ್ಟದಲ್ಲಿ ಇನ್ನೂ ಒಂದೆರಡು ತಿಂಗಳು ಮುಂದುವರಿದರೆ, ಜಿಎಸ್‌ಟಿ ದರಗಳನ್ನು ಇನ್ನಷ್ಟು ಸರಳಗೊಳಿಸಲು ಸರ್ಕಾರಕ್ಕೆ ಅನುವಾಗಬಹುದು ಎಂದು ಪಿಡಬ್ಲ್ಯೂಸಿ ಎಲ್‌ಎಲ್‌ಪಿ ಪಾಲುದಾರ ಪ್ರತೀಜ್ ಜೈನ್ ಹೇಳಿದ್ದಾರೆ.

ಜಿಸಿಸಿ ಬೆಂಬಲಿಸಲು ಎಸ್‌ಬಿಐ ಕೆಡಿಇಎಂ ಮಿಷನ್ ಜತೆ ಒಪ್ಪಂದ

ಬೆಂಗಳೂರು: ಕರ್ನಾಟಕದಲ್ಲಿ ಜಾಗತಿಕ ಸಾಮರ್ಥ್ಯ ಕೇಂದ್ರಗಳನ್ನು (ಜಿಸಿಸಿ) ಬೆಂಬಲಿಸಲು ಭಾರತೀಯ ಸ್ಟೇಟ್ ಬ್ಯಾಂಕ್ ಕರ್ನಾಟಕ ಡಿಜಿಟಲ್ ಎಕಾನಮಿ ಮಿಷನ್ (ಕೆಡಿಇಎಂ) ನೊಂದಿಗೆ ಒಪ್ಪಂದಕ್ಕೆ ಸಹಿ ಹಾಕಿದೆ.

ಕೆಡಿಇಎಂ ಅಧ್ಯಕ್ಷ ಬಿ.ವಿ.ನಾಯ್ಡು, ಎಸ್‌ಬಿಐ ಬೆಂಗಳೂರು ವೃತ್ತದ ಮುಖ್ಯ ಪ್ರಧಾನ ವ್ಯವಸ್ಥಾಪಕರಾದ ಜೂಹಿ ಸ್ಮಿತಾ ಸಿನ್ಹಾ ಹಾಗೂ ಕೆಡಿಇಎಂನ ಸಿಇಒ ಸಂಜೀವ್ ಗುಪ್ತಾ ತಿಳವಳಿಕೆ ಒಪ್ಪಂದಕ್ಕೆ ಸಹಿ ಹಾಕಿದರು.

ಈ ಒಪ್ಪಂದವು ಎಸ್‌ಬಿಐ ಮತ್ತು ಕೆಡಿಇಎಂ ನಡುವಿನ ಸಹಯೋಗದ ಉಪಕ್ರಮಗಳ ಮೂಲಕ ಕರ್ನಾಟಕದಲ್ಲಿ ಜಿಸಿಸಿಗಳನ್ನು ಸಕ್ರಿಯಗೊಳಿಸುವ ಮತ್ತು ಸಬಲೀಕರಣಗೊಳಿಸುವ ಗುರಿಯನ್ನು ಹೊಂದಿರುವ ಕಾರ್ಯತಂತ್ರದ ಪಾಲುದಾರಿಕೆಯ ಆರಂಭವಾಗಿದೆ. ಇದೇ ವೇಳೆ ಎಸ್‌ಬಿಐ ಬ್ಯಾಂಕ್ ಭಾರತದ ಮೊದಲ ವಿಶಿಷ್ಟ ಜಿಸಿಸಿ ಕೇಂದ್ರವನ್ನು ಬೆಂಗಳೂರಿನಲ್ಲಿ ತೆರೆಯುವುದಾಗಿ ಘೋಷಿಸಿದೆ. ಈ ಪ್ರವರ್ತಕ ಉಪಕ್ರಮವನ್ನು ರಾಜ್ಯದಲ್ಲಿ ಬೆಳೆಯುತ್ತಿರುವ ಜಿಸಿಸಿ ಪರಿಸರ ವ್ಯವಸ್ಥೆಗೆ ಅವಶ್ಯಕತೆಗನುಗುಣವಾಗಿ ಸಿದ್ಧಪಡಿಸಿದ ಬ್ಯಾಂಕಿಂಗ್ ಪರಿಹಾರಗಳು ಮತ್ತು ಬೆಂಬಲವನ್ನು ನೀಡಲು ವಿನ್ಯಾಸಗೊಳಿಸಲಾಗಿದೆ. ಈ ವೇಳೆ ಮೆಸ್ಟರ್ನ್ ಡಿಜಿಟಲ್‌ನ ನಿರ್ದೇಶಕ ವೀರ ಲೋಕೇಶ್, ಬಾಯರ್ ಇಂಡಿಯಾದ ರಾಷ್ಟ್ರೀಯ ಮುಖ್ಯಸ್ಥ ಶಾರದಾ, ಡೆಲಾಯ್ಟ್‌ನ ಆದಿತ್ಯ ಮೀನಾ ಮತ್ತಿತರರಿದ್ದರು.

सिंगापुर से 15 अरब डालर का विदेशी निवेश आया

सात साल से बना हुआ है सबसे बड़ा एफडीआइ स्रोत

नई दिल्ली, 1 जून (भाषा)।

सिंगापुर पिछले सात साल से भारत का प्रत्यक्ष विदेशी निवेश (एफडीआइ) का सबसे बड़ा स्रोत बना हुआ है। भारत को 2024-25 में सिंगापुर से लगभग 15 अरब अमेरिकी डालर का सबसे अधिक विदेशी निवेश मिला है। पिछले वित्त वर्ष के दौरान कुल एफडीआइ (जिसमें इक्विटी प्रवाह, पुनर्निवेशित आय और अन्य पूंजी शामिल है) 14 फीसद बढ़कर 81.04 अरब डालर हो गया। यह पिछले तीन साल का सबसे ऊंचा आंकड़ा है। ताजा सरकारी आंकड़ों के अनुसार, 2024-25 में सिंगापुर से एफडीआइ 2023-24 के 11.77 अरब डालर से बढ़कर 14.94 अरब डालर हो गया।

2024-25 में कुल प्रवाह में सिंगापुर का योगदान लगभग 19 फीसद था। 2018-19 से, सिंगापुर, भारत के लिए एफडीआइ का सबसे बड़ा स्रोत बना हुआ है। इससे पहले 2017-18 में भारत ने मारीशस से सबसे ज़्यादा प्रत्यक्ष विदेशी निवेश आकर्षित किया था।

पिछले वित्त वर्ष में देश को मारीशस से 8.34 अरब डालर का विदेशी निवेश प्राप्त हुआ। बीते वित्त वर्ष में मारीशस के बाद अमेरिका (5.45 अरब डालर), नीदरलैंड (4.62 अरब डालर), संयुक्त अरब अमीरात (3.12 अरब डालर), जापान (2.47 अरब डालर), साइप्रस (1.2 अरब डालर), ब्रिटेन (79.5 करोड़ डालर), जर्मनी (46.9 करोड़ डालर) और केमैन आइलैंड (37.1 करोड़ डालर) का स्थान रहा। विशेषज्ञों का कहना है कि वैश्विक वित्तीय केंद्र के रूप में मजबूत स्थिति, बेहतर द्विपक्षीय संबंध और वैश्विक निजी इक्विटी और उद्यम पूंजी निवेश का 'गेटवे' होने की वजह से भारत के लिए सिंगापुर सबसे बड़ा एफडीआइ का स्रोत बना हुआ है।

डेलायट इंडिया की अर्थशास्त्री रुमकी मजूमदार ने कहा कि पूंजी बाजार में उथल-पुथल और

ताजा सरकारी आंकड़ों के अनुसार, 2024-25 में सिंगापुर से एफडीआइ 2023-24 के 11.77 अरब डालर से बढ़कर 14.94 अरब डालर हो गया। *भारत* के लिए 2018-19 से सिंगापुर सबसे बड़ा स्रोत बना हुआ है। इससे पहले 2017-18 में मारीशस से सबसे ज्यादा प्रत्यक्ष विदेशी निवेश आकर्षित किया था।

व्यापार को लेकर अनिश्चितताओं के बावजूद भारत भारी विदेश निवेश आकर्षित करने में कामयाब रहा है, जो स्थिर और दीर्घकालिक है। उन्होंने कहा कि चूंकि एशिया विदेशी पूंजी प्रवाह प्राप्त करने वाला दूसरा सबसे बड़ा क्षेत्र है, इसलिए कोष का एक बड़ा हिस्सा सिंगापुर से आता है। इसके कई कारण हैं। कम कर वाला क्षेत्र होने के साथ सिंगापुर का कानूनी ढांचा काफी मजबूत है, ऐसे में उसे एशिया के लिए रणनीतिक वित्तीय 'गेटवे' माना जाता है।

मजूमदार ने कहा कि दोनों देशों के बीच दोहरा कराधान बचाव संधि की वजह से सिंगापुर के संगठनों को भारत में निवेश करने में मदद मिलती है और भारत से कमाई पर उनका कुल कर का बोझ भी कम होता है।

जीएसटी संग्रह लगातार दूसरे महीने दो लाख करोड़ रुपए से अधिक रहा

मई में 16.4 फीसद के इजाफे से 2.01 लाख करोड़ पहुंचा आंकड़ा

नई दिल्ली, 1 जून (भाषा)।

सकल जीएसटी संग्रह लगातार दूसरे महीने दो लाख करोड़ रुपए के आंकड़े से ऊपर रहा। सकल वस्तु एवं सेवा कर (जीएसटी) संग्रह मई में 16.4 फीसद बढ़कर 2.01 लाख करोड़ रुपए से अधिक हो गया। अप्रैल में जीएसटी संग्रह 2.37 लाख करोड़ रुपए के रिकार्ड उच्च स्तर पर पहुंच गया था। मई, 2024 में यह संग्रह 1,72,739 करोड़ रुपए था।

मई, 2025 में घरेलू लेन-देन से सकल राजस्व 13.7 फीसद बढ़कर लगभग 1.50 लाख करोड़ रुपए हो गया, जबकि आयात से जीएसटी राजस्व 25.2 फीसद बढ़कर 51,266 करोड़ रुपए हो गया। मई, 2025 में कुल सकल जीएसटी राजस्व 2,01,050 करोड़ रुपए रहा।

सकल केंद्रीय जीएसटी राजस्व 35,434 करोड़ रुपए, राज्य जीएसटी राजस्व 43,902 करोड़ रुपए और एकीकृत जीएसटी लगभग 1.09 लाख करोड़ रुपए रहा। उपकर से राजस्व

12,879 करोड़ रुपए रहा। महीने के दौरान जारी कुल रिफंड चार फीसद घटकर 27,210 करोड़ रुपए रह गया। मई में शुद्ध जीएसटी संग्रह लगभग 1.74 लाख करोड़ रुपए रहा, जो पिछले साल की तुलना में 20.4 फीसद अधिक है।

डेलायट इंडिया के साझेदार एमएस मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में प्रत्येक राज्य में ऐसे क्षेत्रों का गहन विश्लेषण करने की जरूरत है, जो उसके लिए महत्वपूर्ण हैं। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 फीसद से 25 फीसद की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह फीसद तक की वृद्धि दिखाई है। मध्यप्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 फीसद की वृद्धि हुई है।

मणि ने कहा कि इसलिए, देशभर में औसत वृद्धि, संभवतः क्षेत्रीय या मौसमी कारकों के कारण राज्यों में समान रूप से परिलक्षित नहीं होती है, जिसके लिए गहन डेटा आधारित विश्लेषण की आवश्यकता होती है।

प्राइस वाटरहाउस एंड कंपनी एलएलपी के साझेदार प्रतीक जैन ने कहा कि इस महीने जीएसटी संग्रह में 16 फीसद की वृद्धि, कुछ महीनों तक 11 से 12 फीसद की वृद्धि के बाद नए सिरे से तेजी को दर्शाती है।

सिंगापुर रहा भारत का सबसे बड़ा FDI सोर्स

भाषा, नई दिल्ली: सिंगापुर पिछले सात साल से भारत का प्रत्यक्ष विदेशी निवेश (FDI) का सबसे बड़ा स्रोत बना हुआ है। भारत को 2024-25 में सिंगापुर से लगभग 15 अरब अमेरिकी डॉलर का सबसे अधिक विदेशी निवेश मिला है।

पिछले वित्त वर्ष के दौरान कुल FDI (जिसमें इक्विटी प्रवाह, पुनर्निवेशित आय और अन्य पूंजी शामिल है) 14 प्रतिशत बढ़कर 81.04 अरब डॉलर हो गया। यह पिछले तीन साल का सबसे ऊंचा आंकड़ा है। ताजा सरकारी आंकड़ों के अनुसार, 2024-25 में सिंगापुर से FDI 2023-24 के 11.77 अरब डॉलर से बढ़कर 14.94 अरब डॉलर हो गया। 2024-25 में कुल प्रवाह में सिंगापुर का योगदान लगभग 19 प्रतिशत था। 2018-19 से, सिंगापुर, भारत के लिए FDI का सबसे बड़ा स्रोत बना हुआ है। इससे पहले 2017-18 में भारत ने मॉरीशस से सबसे ज्यादा प्रत्यक्ष विदेशी निवेश आकर्षित किया था।

2024-25 के दौरान भारत को मिला निवेश

अमेरिका	: 5.45 अरब डॉलर
नीदरलैंड	: 4.62 अरब डॉलर
यूएई	: 3.12 अरब डॉलर
जापान	: 2.47 अरब डॉलर
साइप्रस	: 1.2 अरब डॉलर

क्या कहते हैं जानकार

विशेषज्ञों का कहना है कि वैश्विक वित्तीय केंद्र के रूप में मजबूत स्थिति, बेहतर द्विपक्षीय संबंध और ग्लोबल प्राइवेट इक्विटी और उद्यम पूंजी निवेश का 'गेटवे' होने की वजह से भारत के लिए सिंगापुर सबसे बड़ा FDI का स्रोत बना हुआ है।

डेलॉयट इंडिया की अर्थशास्त्री रुमकी मजूमदार ने कहा, ' पूंजी बाजार में उथल-पुथल और व्यापार को लेकर अनिश्चितताओं के बावजूद भारत भारी विदेश निवेश आकर्षित करने में कामयाब रहा है, जो स्थिर और दीर्घकालिक है। भारत और सिंगापुर के बीच डबल टैक्स अवॉइडेंस एग्रीमेंट (DTAA) के कारण सिंगापुर स्थित संस्थाएं भारत में निवेश कर करभार कम कर पाती हैं। FDI भारत की अर्थव्यवस्था के लिए बेहद जरूरी है क्योंकि यह देश के बुनियादी ढांचे - जैसे बंदरगाह, हवाई अड्डे और राजमार्ग - के विकास को गति देता है।

2 लाख करोड़ के पार GST कलेक्शन

नई दिल्ली, 1 जून (एजेंसी) : सकल माल एवं सेवा कर (जीएसटी) संग्रह मई में 2.01 लाख करोड़ रुपये से अधिक रहा है। यह मई-2024 के संग्रह से 16.4 प्रतिशत ज्यादा है।

रविवार को जारी सरकारी आंकड़ों के अनुसार इससे पहले, अप्रैल में जीएसटी संग्रह 2.37 लाख करोड़ रुपये के अपने अबतक के सर्वकालिक उच्चस्तर पर पहुंच गया था। मई में घरेलू लेनदेन से कुल जीएसटी राजस्व 13.7 प्रतिशत बढ़कर लगभग 1.50 लाख करोड़ रुपये हो गया, जबकि आयात से जीएसटी संग्रह 25.2 प्रतिशत बढ़कर 51,266 करोड़ रुपये रहा। मई में कुल केंद्रीय जीएसटी राजस्व 35,434 करोड़ रुपये, राज्य जीएसटी राजस्व 43,902 करोड़ रुपये और एकीकृत जीएसटी संग्रह लगभग 1.09 लाख करोड़ रुपये रहा। उपकर से राजस्व 12,879 करोड़ रुपये रहा। मई, 2024 में जीएसटी संग्रह 1,72,739 करोड़ रुपये रहा था।

मई में कुल संग्रह 16.4 प्रतिशत बढ़ा, फिर भी अप्रैल से कम रहा

रिफंड घटकर 4 फीसद हुआ

इस बीच, महीने के दौरान कुल रिफंड चार प्रतिशत घटकर 27,210 करोड़ रुपये रह गया। माह के दौरान शुद्ध जीएसटी संग्रह 20.4 प्रतिशत की सालाना वृद्धि के साथ लगभग 1.74 लाख करोड़ रुपये रहा। डेलॉयट इंडिया के साझेदार एम एस मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में गहन विश्लेषण करने की जरूरत है। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 प्रतिशत से 25 प्रतिशत की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह प्रतिशत तक ही रही है। मध्यप्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 प्रतिशत की वृद्धि हुई है।

सबसे गरीब अबादी से आता है जीएसटी संग्रह का 64.3 फीसद हिस्सा

ऑक्सफैम की एक रिपोर्ट के अनुसार जीएसटी संग्रह का लगभग 64.3 फीसद हिस्सा देश की सबसे गरीब 50 फीसद आबादी से एकत्र किया जाता है। मध्यम वर्ग इसका 30 फीसद हिस्सा चुकाता है, जबकि सुपर रिच का योगदान सिर्फ 3 से 4 फीसद के बीच रहता है। इस तरह जीएसटी संग्रह का एक बड़ा हिस्सा गरीब और मध्यम वर्ग से आता है।

भारत में जल्द ही खुद की 'बिग फोर' लेखा कंपनियां होंगी : गोयल

बर्न, (पंजाब केसरी) : वाणिज्य एवं उद्योग मंत्री पीयूष गोयल ने सोमवार को कहा कि सरकार भारत में बड़ी घरेलू लेखा कंपनियां बनाने की कोशिश कर रही है और देश में जल्द ही अपनी खुद की 'बिग फोर' कंपनियां होंगी। वर्तमान में दुनिया की 'बिग फोर' पेशेवर सेवा कंपनियां डेलॉयट, पी डब्ल्यू सी या प्राइसवाटरहाउस कूपर्स, अर्न्स्ट एंड यंग (ईवाई) और केपीएमजी हैं। ये चारों विदेशी कंपनियां भारत के लेखा परीक्षण और परामर्श क्षेत्र में हावी हैं। गोयल ने कहा कि अब हम अपनी खुद की 'बिग फोर' कंपनियां बनाने की कोशिश कर रहे हैं। पहले नियम (दोस्ताना नहीं) थे...आप जानते हैं, हम विलय नहीं कर सकते थे। हमारी सोच भी अलग थी। अब धीरे-धीरे लोग समझ रहे हैं...भारत में बहुत जल्द हमारी अपनी बिग फोर कंपनियां होंगी...।'' गोयल इस समय यूरोपीय देशों की आधिकारिक यात्रा पर हैं।

सराहनीय कदम | चडीगढ़ ग्रुप ऑफ कॉलेजिज़ मोहाली के झंझेड़ी कैंपस में प्लेसमैंट-डे मनाया

इस साल का सबसे अधिक पैकेज 1 करोड़ रहा

मोहाली, 10 जून (नियामियां): चंडीगढ़ ग्रुप ऑफ कॉलेजिज़ मोहाली के झंझेड़ी कैंपस में प्लेसमैंट-डे धूमधाम से मनाया गया। उच्च गुणवत्ता वाली शिक्षा और शानदार प्लेसमैंट रिकॉर्ड के लिए प्रसिद्ध इस संस्थान ने वर्ष 2025 में भी नए कीर्तिमान स्थापित किए हैं।

इस साल का सबसे अधिक पैकेज 1 करोड़ रहा, जो कि 2024 में मिले 45.5 लाख के पैकेज से दोगुना है। वहीं, औसत पैकेज बढ़कर 6.34 लाख प्रतिवर्ष हो गया।बी.टैक, बी.बी.ए., एम.बी.ए., बी.सी.ए., बी.कॉम., फैशन टैक्नोलॉजी और कृषि जैसे विभिन्न पाठ्यक्रमों के छात्रों को डिग्री पूरी होने से पहले ही देश-विदेश की नामी कंपनियों द्वारा नौकरी के ऑफर मिल चुके हैं।

सी.जी.सी. झंजेड़ी कैंपस में दाखिला लेने वाले हर छात्र को पढ़ाई के पहले साल से ही इंडस्ट्री प्रोजैक्ट्स में भागीदार बनाने, केस स्टडी करने आदि सहित प्री-प्लेसमैंट ट्रेनिंग दी जाती है।

वहीं, प्लेसमैंट में हिस्सा लेने वाली कंपनियों की संख्या 650 से बढ़कर 1,133 हो गई है।सी.जी.सी. के एम.डी. अर्श धालीवाल ने बताया कि झंजेड़ी कैंपस के छात्रों के लिए माइक्रोसॉफ्ट, अमेज़ॉन, सर्विसनाऊ, इंफोसिस, डेलॉइट, कैपजेमिनी, एचसीएल, विप्रो जैसी शीर्ष अंतर्राष्ट्रीय कंपनियां प्लेसमैंट के लिए पहुंच रही हैं।इसके अलावा, 1,133 कंपनियों की एक लंबी सूची है जो सी.जी.सी. झंजेड़ी की बेहतरीन व्यावहारिक शिक्षा के कारण प्लेसमैंट के लिए पहुंच रही हैं।

सी.जी.सी. लांडरां ने इंटरनैशनल पार्टनरशिप्स की मज़बूत

मोहाली, 10 जून (नियामियां): चंडीगढ़ ग्रुप ऑफ कॉलेजिज़ (सी.जी.सी.) लांडरां के इंटरनैशनल अफेयर्स डिपार्टमैंट ने ग्लोबल अकादमिक नैटवर्क का विस्तार करते हुए दो इंटरनैशनल इंस्टीट्यूशंस- यूनिवर्सिटी ऑफ डबरोवनिक, क्रोएशिया और येशिवा यूनिवर्सिटी, न्यूयॉर्क सिटी, यूएसए के साथ समझौता ज्ञापन मैमोरेंडम ऑफ़ अंडरस्टैंडिंग (एम.ओ.यू.) पर हस्ताक्षर किए हैं। सी.जी.सी. लांडरां ने अब तक अमरीका, ऑस्ट्रेलिया, यूनाइटेड किंगडम, कनाडा, बेल्जियम और अन्य देशों की ए.ए.सी.एस.बी.-मान्यता प्राप्त यूनिवर्सिटीज़ के साथ 60 से अधिक एम.ओ.यू. पर हस्ताक्षर किए हैं, जिनका उद्देश्य सी.जी.सी. छात्रों के करियर की संभावनाओं, शैक्षणिक उत्कृष्टता और व्यक्तिगत विकास को सशक्त बनाना है।

२०२४-२५ मध्ये देशात सुमारे १५ अब्ज डॉलरचा सर्वाधिक ओघ

सलग सातव्या आर्थिक वर्षात सिंगापूरमधून भारतात सर्वाधिक एफडीआर

नवी दिल्ली : गेल्या सात वर्षांत सिंगापूर भारतातील सर्वात मोठा थेट परकीय गुंतवणुकीचा (एफडीआय) सर्वात मोठा स्रोत राहिला आहे. २०२४-२५ मध्ये देशात सुमारे १५ अब्ज अमेरिकन डॉलरचा सर्वाधिक ओघ आला आहे. गेल्या आर्थिक वर्षात विदेशी गुंतवणूक १३ टक्क्यांनी वाढून ५० अब्ज अमेरिकन डॉलरवर पोहोचली.

गेल्या आर्थिक वर्षात एकूण थेट परकीय गुंतवणूक १४ टक्क्यांनी वाढून ८१.०४ अब्ज अमेरिकन डॉलरवर पोहोचली. गेल्या तीन वर्षांतील ही सर्वाधिक आहे.

ताज्या सरकारी आकडेवारीनुसार, २०२४-२५ मध्ये सिंगापूरमधून थेट परकीय गुंतवणूक १४.९४ अब्ज अमेरिकन डॉलरवर पोहोचली, जी २०२३-२४ मध्ये ११.७७ अब्ज अमेरिकन डॉलर होती. २०२४-२५ मध्ये एकूण थेट परकीय गुंतवणूक सुमारे १९ टक्के होती. २०१८-१९ पासून, सिंगापूर हा भारतात अशा गुंतवणुकीचा सर्वात मोठा स्रोत आहे. २०१७-१८ मध्ये, भारताने मॉरिशसमधून सर्वाधिक थेट परदेशी गुंतवणूक आकर्षित केली.

मॉरिशस, अमेरिकेसह अनेक देशांची गुंतवणूक

गेल्या आर्थिक वर्षात, देशाला मॉरिशसमधून ८.३४ अब्ज अमेरिकन डॉलरची परकीय गुंतवणूक मिळाली. २०२४-२५ मध्ये, मॉरिशसनंतर अमेरिका (५.४५ अब्ज अमेरिकन डॉलर), नेदरलँड्स (४.६२ अब्ज अमेरिकन डॉलर), यूएई (३.१२ अब्ज अमेरिकन डॉलर), जपान (२.४७ अब्ज अमेरिकन डॉलर), सायप्रस (१.२ अब्ज अमेरिकन डॉलर), यूके (७९५ दशलक्ष अमेरिकन डॉलर), जर्मनी (४६९ दशलक्ष अमेरिकन डॉलर) आणि केमन बेटे (३७१ दशलक्ष अमेरिकन डॉलर) यांचा क्रमांक लागतो. तज्ज्ञांच्या मते, जागतिक वित्तीय केंद्र म्हणून सिंगापूरचे स्थान, मजबूत द्विपक्षीय संबंध आणि जागतिक खासगी इक्विटी आणि उद्यम भांडवलासाठी प्रवेशद्वार म्हणून त्याची भूमिका यामुळे ते भारतात गुंतवणुकीसाठी एक नैसर्गिक मार्ग बनते.

भारत-सिंगापूर कराराचा लाभ : लोकेश शाह

इंडसलॉचे भागीदार लोकेश शाह म्हणाले की, भारत-सिंगापूर कर करार हा एफडीआयच्या प्रमुख चालकांपैकी एक होता. भारतात सिंगापूरचे सततचे वर्चस्व आता खऱ्या व्यवसाय आणि नियामक फायद्यांवर, सिंगापूरची अत्याधुनिक वित्तीय बाजारपेठ, प्रादेशिक केंद्र म्हणून त्याची स्थिती आणि राजकीय आणि आर्थिक स्थिरतेवर अधिक अवलंबून आहे, असे शाह म्हणाले.

जागतिक वित्तीय केंद्राकडे वाटचाल : पांडे

शार्दुल अमरचंद मंगलदास अँड कंपनीचे भागीदार रुद्र कुमार पांडे म्हणाले की, सिंगापूर भारतात एक महत्त्वपूर्ण आणि सक्रिय गुंतवणूकदार राहील, परंतु परिस्थिती हळूहळू विकसित होत आहे. सिंगापूरची भारतात वाढती थेट परकीय गुंतवणूक ही जागतिक वित्तीय केंद्र म्हणून त्याच्या भूमिकेवर आधारित आहे, जिथे मोठ्या संख्येने आंतरराष्ट्रीय खासगी इक्विटी आणि व्हेंचर कॅपिटल फंड आहेत, असे पांडे म्हणाले.

epaper.thegoan.net

अनिश्चितता असूनही भारतात मोठ्या प्रमाणात गुंतवणूक आकर्षित : मजुमदार

डेलॉइट इंडियाच्या अर्थशास्त्रज्ञ रुमकी मजुमदार म्हणाल्या की, भांडवली बाजारपेठेतील गोंधळ आणि व्यापाराभोवती अनिश्चितता असूनही, भारताने मोठ्या प्रमाणात गुंतवणूक आकर्षित केली आहे, जी स्थिर आणि दीर्घकालीन आहे. परकीय भांडवलाचा प्रवाह प्राप्त करणारा आशिया हा दुसऱ्या क्रमांकाचा सर्वात मोठा प्रदेश असल्याने निधीचा मोठा भाग सिंगापूरमधून येतो. त्याची अनेक कारणे आहेत. एक, कमी कर क्षेत्राधिकार आणि मजबूत कायदेशीर चौकट असल्याने, सिंगापूरला आशियातील धोरणात्मक आर्थिक प्रवेशद्वार मानले जाते, असे त्या म्हणाल्या.

लगातार दूसरे महीने दो लाख करोड़ रुपये से अधिक रहा जीएसटी संग्रह

नयी दिल्ली : सकल जीएसटी संग्रह लगातार दूसरे महीने दो लाख करोड़ रुपये के आंकड़े से ऊपर रहा। सकल वस्तु एवं सेवा कर (जीएसटी) संग्रह मई में 16.4 प्रतिशत बढ़कर 2.01 लाख करोड़ रुपये से अधिक हो गया। अप्रैल में जीएसटी संग्रह 2.37 लाख करोड़ रुपये के रिकॉर्ड उच्च स्तर पर पहुंच गया था। मई, 2024 में यह संग्रह 1,72,739 करोड़ रुपये था। मई, 2025 में घरेलू लेन-देन से सकल राजस्व 13.7 प्रतिशत बढ़कर लगभग 1.50 लाख करोड़ रुपये हो गया, जबकि आयात से जीएसटी राजस्व 25.2 प्रतिशत बढ़कर 51,266 करोड़ रुपये हो गया।

क्या रही स्थिति : मई, 2025 में कुल सकल जीएसटी राजस्व 2,01,050 करोड़ रुपये रहा। सकल

केंद्रीय जीएसटी राजस्व 35,434 करोड़ रुपये, राज्य जीएसटी राजस्व 43,902 करोड़ रुपये और एकीकृत जीएसटी लगभग 1.09 लाख करोड़ रुपये रहा। उपकर से राजस्व 12,879 करोड़ रुपये रहा। महीने के दौरान जारी कुल रिफंड चार प्रतिशत घटकर 27,210 करोड़ रुपये रह गया। मई में शुद्ध जीएसटी संग्रह लगभग 1.74 लाख करोड़ रुपये रहा, जो पिछले साल की तुलना में 20.4 प्रतिशत अधिक है।

क्या कहते हैं विशेषज्ञ : डेलॉयट इंडिया के साझेदार एम एस मणि ने कहा कि राज्यों में जीएसटी संग्रह में वृद्धि में व्यापक आधार पर अंतर देखा जा रहा है। ऐसे में प्रत्येक राज्य में ऐसे क्षेत्रों का गहन विश्लेषण करने की जरूरत है, जो उसके लिए महत्वपूर्ण हैं। महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों ने संग्रह में 17 प्रतिशत से 25 प्रतिशत की वृद्धि दर्ज की है, जबकि गुजरात, आंध्र प्रदेश और तेलंगाना जैसे बड़े राज्यों ने छह प्रतिशत तक की वृद्धि दिखाई है। मध्यप्रदेश, हरियाणा, पंजाब और राजस्थान जैसे कुछ राज्यों में जीएसटी संग्रह में औसतन 10 प्रतिशत की वृद्धि हुई है।

અમેરિકા ભારત સાથેના વ્યવહારમાં મોટી પુરાંત ધરાવે છે : જીટીઆરઆઈ

નવી દિલ્હી, તા. ૧ : અમેરિકી પ્રમુખ ડોનાલ્ડ ટ્રમ્પ ભારત સાથે પોતાના દેશની વ્યાપાર ખાધ માટે ભારતને જવાબદાર ગણાવીને પારસ્પરિક ટેરિફનો આધાર બનાવે છે પરંતુ બંને દેશો વચ્ચેના તમામ વેપારી વ્યવહારોને ધ્યાનમાં લઈએ તો અમેરિકા વાસ્તવમાં ભારત સાથે મોટી પુરાંત ધરાવે છે, એમ એક અભ્યાસે જણાવ્યું હતું.

ભારત સાથે અમેરિકાની વેપારખાધ લગભગ ૪૫ અબજ ડોલર છે પરંતુ અમેરિકા શિક્ષણ, ડિજિટલ સર્વિસ, ફાઇનાન્સિયલ કામગીરી અને બૌદ્ધિક અધિકારની રોયલ્ટી દ્વારા દર વર્ષે ૮૦થી ૮૫ અબજ ડોલર ઉસેટી લે છે. આમ ૩૫થી ૪૦ અબજ ડોલરની પુરાંત ધરાવે છે, એમ ગ્લોબલ ટ્રેડ રિસર્ચ ઇનીશીએટીવના અભ્યાસમાં જણાવાયું હતું.

વોશિંગ્ટન ભારત પર ટેરિફમાં કાપ મૂકવા અને બજારો ખુલ્લી કરવા દબાણ કરતું રહે છે પણ ભારત પાસેથી જંગી આર્થિક લાભ મેળવી રહ્યું છે.

ભારતે ફ્રી ટ્રેડ એગ્રીમેન્ટ બાબતે બળની ભૂમિકા ઉપર વાટાઘાટ કરવી જોઇએ અને ખાધની પોકળ દલીલોને ફગાવી દઈને વાજબી અને સમતોલ પારસ્પરિક શરતોની માગણી કરવી જોઇએ, એમ જીટીઆરઆઈના સ્થાપક અજય શ્રીવાસ્તવે જણાવ્યું હતું.

૨૦૨૪-૨૫ના વર્ષમાં ભારત અને અમેરિકા વચ્ચે વેપાર ૧૮૬ અબજ ડોલર ઉપર પહોંચ્યો હતો, એમ વાણિજ્ય મંત્રાલયના આંકડાઓએ દર્શાવ્યું હતું. ભારતે અમેરિકા ખાતે ૮૬.૫ અબજ ડોલરના માલસામાનની નિકાસ કરી હતી જ્યારે ૪૫.૩ અબજ ડોલરના ગુડ્ઝની આયાત કરી હતી. આમ ૪૧ અબજ ડોલરની વ્યાપાર પુરાંત જોવા મળી હતી.

સર્વિસીસ ક્ષેત્રે ભારતે ૨૮.૩ અબજ ડોલરની નિકાસ કરી હતી અને તે સામે ૨૫.૫ અબજ ડોલરની આયાત કરી હતી. આમ, પુરાંતમાં ૩.૨ અબજ ડોલરનો ઉમેરો થયો હતો. ભારતની કુલ વ્યાપાર પુરાંત ૪૪.૪ અબજ ડોલર થઈ હતી.

પરંતુ અમેરિકામાં અભ્યાસ કરતા ભારતીય વિદ્યાર્થીઓ દર વર્ષે ૧૫ અબજ ડોલર ટ્યુશન પાછળ અને રહેવા ખાવાપીવા પાછળ બીજા ૧૦ અબજ ડોલર ખર્ચે છે. આથી શિક્ષણ અમેરિકા તરફથી ભારત ખાતે સૌથી મોટી 'નિકાસ' છે.

અમેરિકાની ટેક્નોલોજી ક્ષેત્રે અગ્રણી કંપનીઓ ગૂગલ, મેટા, એમેઝોન, એપલ અને માઇક્રોસોફ્ટ ભારતીય બજારોમાં વેચાણ દ્વારા બીજા ૧૫થી ૨૦ અબજ ડોલરની વાર્ષિક આવક રળી લે છે.

અમેરિકન બેન્ક્સ અને સીટી બેન્ક, જે.પી. મોર્ગન, ગોલ્ડમાન સાક્સ, મેકકિન્સી, બીસીજી, ડિલોઇટ, પીડબલ્યુસી અને કેપીએમજી સહિતની કન્સલ્ટિંગ કંપનીઓ ભારતના ફાઇનાન્સિયલ સેક્ટરમાં તેમનાં કામકાજ દ્વારા દર વર્ષે ૧૦થી ૧૫ અબજ ડોલર કમાય છે.

ಮೇ ತಿಂಗಳ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ: 16.4ರಷ್ಟು ಹೆಚ್ಚಳ

ನವದೆಹಲಿ: ಸರಕು ಮತ್ತು ಸೇವಾ ತೆರಿಗೆ (ಜಿಎಸ್‌ಟಿ) ವ್ಯವಸ್ಥೆ ಮೂಲಕ ಸಂಗ್ರಹ ಆಗುವ ವರಮಾನವು ಮೇ ತಿಂಗಳಲ್ಲಿ ಶೇಕಡ 16.4ರಷ್ಟು ಹೆಚ್ಚಳ ಆಗಿದ್ದು, 2.01 ಲಕ್ಷ ಕೋಟಿಯಷ್ಟು ಆಗಿದೆ. ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹವು ಸತತ ಎರಡನೆಯ ತಿಂಗಳಲ್ಲಿಯೂ 2 ಲಕ್ಷ ಕೋಟಿಗಿಂತ ಹೆಚ್ಚಾಗಿದೆ.

ಜಿಎಸ್‌ಟಿ ಮೂಲಕ ಸಂಗ್ರಹವಾದ ವರಮಾನದ ಮೊತ್ತವು ಏಪ್ರಿಲ್‌ನಲ್ಲಿ ದಾಖಲೆಯ 2.37 ಲಕ್ಷ ಕೋಟಿ ಆಗಿತ್ತು. ಕಳೆದ ವರ್ಷದ ಮೇ ತಿಂಗಳಲ್ಲಿ ಸಂಗ್ರಹವು 1.72 ಲಕ್ಷ ಕೋಟಿ ಆಗಿತ್ತು.

ಈ ವರ್ಷದ ಮೇ ತಿಂಗಳಲ್ಲಿ ಆಂತರಿಕ ವಹಿವಾಟುಗಳಿಂದ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು

ಶೇ 13.7ರಷ್ಟು ಏರಿಕೆ ಕಂಡಿದ್ದು, ಅಂದಾಜು 1.50 ಲಕ್ಷ ಕೋಟಿಗೆ ತಲುಪಿದೆ. ಆಮದು ಮೂಲಕ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು ಶೇ 25.2ರಷ್ಟು ಹೆಚ್ಚಳ ಕಂಡು 51 ಸಾವಿರ ಕೋಟಿಗೆ ತಲುಪಿದೆ.

ದೊಡ್ಡ ರಾಜ್ಯಗಳಾದ ಮಹಾರಾಷ್ಟ್ರ, ಪಶ್ಚಿಮ ಬಂಗಾಳ, ಕರ್ನಾಟಕ ಮತ್ತು ತಮಿಳುನಾಡಿನಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದಲ್ಲಿನ ಏರಿಕೆಯು ಶೇ 17ರಿಂದ ಶೇ 25ರವರೆಗೆ ಇದೆ. ಆದರೆ ಈ ರಾಜ್ಯಗಳಂತೆಯೇ ದೊಡ್ಡದಾಗಿರುವ ಗುಜರಾತ್, ಆಂಧ್ರಪ್ರದೇಶ, ತೆಲಂಗಾಣದಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದಲ್ಲಿನ ಹೆಚ್ಚಳವು ಶೇ 6ರವರೆಗೆ ಮಾತ್ರ ಇದೆ.

ಬೇರೆ ಬೇರೆ ರಾಜ್ಯಗಳ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದ ಏರಿಕೆ ಪ್ರಮಾಣದಲ್ಲಿನ ವ್ಯತ್ಯಾಸದ ವಿಚಾರವಾಗಿ, ಆಯಾ ರಾಜ್ಯಗಳಿಗೆ ಮುಖ್ಯವಾದ ವಲಯಗಳನ್ನು ಗಮನದಲ್ಲಿ ಇರಿಸಿಕೊಂಡು ಆಳವಾದ ಪರಿಶೀಲನೆ ಆಗಬೇಕಿದೆ ಎಂದು ಡೆಲಾಯ್ಟ್ ಇಂಡಿಯಾ ಪಾಲುದಾರ ಎಂ.ಎಸ್. ಮಣಿ ಹೇಳಿದ್ದಾರೆ.

ಮಧ್ಯಪ್ರದೇಶ, ಹರಿಯಾಣ, ಪಂಜಾಬ್, ರಾಜಸ್ಥಾನದಲ್ಲಿ ವರಮಾನ ಸಂಗ್ರಹದ ಏರಿಕೆ ಪ್ರಮಾಣವು ಶೇ 10ರಷ್ಟು ಇದೆ.

ದೇಶದಾದ್ಯಂತ ವರಮಾನ ಏರಿಕೆ ಪ್ರಮಾಣವು ಒಂದೇ ಆಗಿಲ್ಲ. ಇದಕ್ಕೆ ವಲಯವಾರು ಕಾರಣಗಳು ಇರಬಹುದು. ಇದರ ಬಗ್ಗೆ ದತ್ತಾಂಶ ಆಧರಿಸಿ ವಿಶ್ಲೇಷಣೆ ಆಗಬೇಕು ಎಂದು ಅವರು ಹೇಳಿದ್ದಾರೆ.

ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದ ಪ್ರಮಾಣವು ಇದೇ ಮಟ್ಟದಲ್ಲಿ ಇನ್ನೂ ಒಂದೆರಡು ತಿಂಗಳು ಮುಂದುವರಿದರೆ, ಜಿಎಸ್‌ಟಿ ದರಗಳನ್ನು ಇನ್ನಷ್ಟು ಸರಳಗೊಳಿಸಲು ಸರಕಾರಕ್ಕೆ ಅನುವಾಗಬಹುದು ಎಂದು ಪಿಡಬ್ಲ್ಯೂಸಿ ಎಲ್‌ಎಲ್‌ಪಿ ಪಾಲುದಾರ ಪ್ರತೀಜ್ ಜೈನ್ ಹೇಳಿದ್ದಾರೆ.

२०२४-२५ मध्ये देशात सुमारे १५ अब्ज डॉलरचा सर्वाधिक ओघ

सलग सातव्या आर्थिक वर्षात सिंगापूरमधून भारतात सर्वाधिक एफडीआर

नवी दिल्ली : गेल्या सात वर्षांत सिंगापूर भारतातील सर्वात मोठा थेट परकीय गुंतवणुकीचा (एफडीआय) सर्वात मोठा स्रोत राहिला आहे. २०२४-२५ मध्ये देशात सुमारे १५ अब्ज अमेरिकन डॉलरचा सर्वाधिक ओघ आला आहे. गेल्या आर्थिक वर्षात विदेशी गुंतवणूक १३ टक्क्यांनी वाढून ५० अब्ज अमेरिकन डॉलरवर पोहोचली.

गेल्या आर्थिक वर्षात एकूण थेट परकीय गुंतवणूक १४ टक्क्यांनी वाढून ८१.०४ अब्ज अमेरिकन डॉलरवर पोहोचली. गेल्या तीन वर्षांतील ही सर्वाधिक आहे.

ताज्या सरकारी आकडेवारीनुसार, २०२४-२५ मध्ये सिंगापूरमधून थेट परकीय गुंतवणूक १४.९४ अब्ज अमेरिकन डॉलरवर पोहोचली, जी २०२३-२४ मध्ये ११.७७ अब्ज अमेरिकन डॉलर होती. २०२४-२५ मध्ये एकूण थेट परकीय गुंतवणूक सुमारे १९ टक्के होती. २०१८-१९ पासून, सिंगापूर हा भारतात अशा गुंतवणुकीचा सर्वात मोठा स्रोत आहे. २०१७-१८ मध्ये, भारताने मॉरिशसमधून सर्वाधिक थेट परदेशी गुंतवणूक आकर्षित केली.

मॉरिशस, अमेरिकेसह अनेक देशांची गुंतवणूक

गेल्या आर्थिक वर्षात, देशाला मॉरिशसमधून ८.३४ अब्ज अमेरिकन डॉलरची परकीय गुंतवणूक मिळाली. २०२४-२५ मध्ये, मॉरिशसनंतर अमेरिका (५.४५ अब्ज अमेरिकन डॉलर), नेदरलँड्स (४.६२ अब्ज अमेरिकन डॉलर), यूएई (३.१२ अब्ज अमेरिकन डॉलर), जपान (२.४७ अब्ज अमेरिकन डॉलर), सायप्रस (१.२ अब्ज अमेरिकन डॉलर), यूके (७९५ दशलक्ष अमेरिकन डॉलर), जर्मनी (४६९ दशलक्ष अमेरिकन डॉलर) आणि केमन बेटे (३७१ दशलक्ष अमेरिकन डॉलर) यांचा क्रमांक लागतो. तज्ज्ञांच्या मते, जागतिक वित्तीय केंद्र म्हणून सिंगापूरचे स्थान, मजबूत द्विपक्षीय संबंध आणि जागतिक खासगी इक्विटी आणि उद्यम भांडवलासाठी प्रवेशद्वार म्हणून त्याची भूमिका यामुळे ते भारतात गुंतवणुकीसाठी एक नैसर्गिक मार्ग बनते.

भारत-सिंगापूर कराराचा लाभ : लोकेश शाह

इंडसलॉचे भागीदार लोकेश शाह म्हणाले की, भारत-सिंगापूर कर करार हा एफडीआयच्या प्रमुख चालकांपैकी एक होता. भारतात सिंगापूरचे सततचे वर्चस्व आता खऱ्या व्यवसाय आणि नियामक फायद्यांवर, सिंगापूरची अत्याधुनिक वित्तीय बाजारपेठ, प्रादेशिक केंद्र म्हणून त्याची स्थिती आणि राजकीय आणि आर्थिक स्थिरतेवर अधिक अवलंबून आहे, असे शाह म्हणाले.

जागतिक वित्तीय केंद्राकडे वाटचाल : पांडे

शार्दुल अमरचंद मंगलदास अँड कंपनीचे भागीदार रूद्र कुमार पांडे म्हणाले की, सिंगापूर भारतात एक महत्त्वपूर्ण आणि सक्रिय गुंतवणूकदार राहील, परंतु परिस्थिती हळूहळू विकसित होत आहे. सिंगापूरची भारतात वाढती थेट परकीय गुंतवणूक ही जागतिक वित्तीय केंद्र म्हणून त्याच्या भूमिकेवर आधारित आहे, जिथे मोठ्या संख्येने आंतरराष्ट्रीय खासगी इक्विटी आणि व्हेंचर कॅपिटल फंड आहेत, असे पांडे म्हणाले.

अनिश्चितता असूनही भारतात मोठ्या प्रमाणात गुंतवणूक आकर्षित : मजुमदार

डेलॉइट इंडियाच्या अर्थशास्त्रज्ञ रुमकी मजुमदार म्हणाल्या की, भांडवली बाजारपेठेतील गोंधळ आणि व्यापाराभोवती अनिश्चितता असूनही, भारताने मोठ्या प्रमाणात गुंतवणूक आकर्षित केली आहे, जी स्थिर आणि दीर्घकालीन आहे. परकीय भांडवलाचा प्रवाह प्राप्त करणारा आशिया हा दुसऱ्या क्रमांकाचा सर्वात मोठा प्रदेश असल्याने निधीचा मोठा भाग सिंगापूरमधून येतो. त्याची अनेक कारणे आहेत. एक, कमी कर क्षेत्राधिकार आणि मजबूत कायदेशीर चौकट असल्याने, सिंगापूरला आशियातील धोरणात्मक आर्थिक प्रवेशद्वार मानले जाते, असे त्या म्हणाल्या.

नोकरीसाठी तरुणाईचे डिग्रीपेक्षा स्किल्सला प्राधान्य

भारताचे तरुण आता शिकत असताना नोकरी करत आहेत आणि नवीन कौशल्यं शिकणे, याला अधिक प्राधान्य देत आहेत. नोकरीच्या संधी कमी होत आहेत आणि महाविद्यालयातील शिक्षण जुन्या अभ्यासक्रमांमुळे मागे पडत आहेत.

एका सर्वेक्षणानुसार भारतातील ९४% तरुण काम करत असतानाच आवश्यक कौशल्ये शिकायला प्राधान्य देतात. ते नोकरीत मिळणाऱ्या पदापेक्षा कौशल्यं शिकणे आणि करिअर वाढीच्या संधी यांना अधिक महत्त्व देत आहेत.

टेक्नॉलॉजी आणि संबंधित कौशल्यांमध्ये सतत बदल होत असल्याने, कंपन्या आता उमेदवारांचे 'ऍटिट्यूड' व 'ऍप्टिट्यूड' पाहतात आणि त्यांना योग्य कौशल्यं देण्यावर भर देतात. त्यामुळे पारंपरिक अभ्यासक्रमांतील कौशल्यं आज उपयोगी नाहीत.

'उमेदवार काही विशिष्ट कौशल्यांमध्ये चांगले असू शकतात, परंतु कंपन्यांना आपल्या कर्मचाऱ्यांमध्ये वेगळे स्किल्स हवे असतील, तर कंपन्या त्यांना अपस्किल करतात,' असे सरस्वती कस्तुरीरंगन (डेलॉइट इंडियाचे पार्टनर) म्हणाल्या.

'कंपन्या आता अशा उमेदवारांना निवडतात जे लवचिक असतात, त्यांना नोकरीसाठी आवश्यक कौशल्यं दिली जातात. यामुळे, उमेदवारांची जुनीच कौशल्ये किंवा शिक्षण याला महत्व देता येत नाही,' असे कस्तुरीरंगन म्हणाल्या.

तरी काही तज्ज्ञांचे मते आहे की, औपचारिक उच्च शिक्षणाचे महत्व पूर्णपणे नाकारता येणार नाही. 'फील्ड जॉबमध्ये, प्रत्यक्ष कामाचा अनुभव हा शैक्षणिक डिग्रीपेक्षा महत्त्वाचा ठरतो. परंतु, काही ठिकाणी शैक्षणिक पात्रता, प्रमाणपत्रे आणि व्यावसायिक मान्यता यांचीही आवश्यक असते. नोकरीच्या गरजा बदलतात, तसे विशेष प्रकारच्या कौशल्यावर आधारित प्रशिक्षण आणि कार्यक्षमता वाढवणारे कोर्सेस गरजेचे ठरतात,' असे उपासना अगरवाल (एबीसीचे पार्टनर) यांनी सांगितले.

- नोकरीच्या संधी कमी होत आहेत आणि महाविद्यालयातील शिक्षण मागे पडत आहेत.
- कंपन्या, उमेदवारांचे ऍटिट्यूड व ऍप्टिट्यूड पाहतात, त्यांना योग्य कौशल्यं देण्यावर भर देतात.
- औपचारिक उच्च शिक्षणाचे महत्व पूर्णपणे नाकारता येणार नाही

– काही तज्ज्ञांचे मत.

स्वप्न, साइड जॉब आणि स्वावलंबन : तरुण पिढीचे अर्थशास्त्र

संध्यानंद.कॉम

निम्म्याहून अधिक तरुण सध्या अतिरिक्त उत्पन्नासाठी साइड जॉब (पार्ट टाइम नोकरी) करत आहेत. डेलॉइट संस्थेच्या २०२२च्या अहवालानुसार, देशात ६२% (जन्म वर्ष १९८० ते १९९५- जेन झेड) आणि ५१% (जन्म वर्ष १९९५ ते २०१० - मिलेनियल्स) तरुण वर्ग पार्ट टाइम जॉब करत आहेत. ही संख्या जागतिक पातळीवरील सरासरीपेक्षा जास्त आहे. जागतिक स्तरावर, अनुक्रमे ४५% आणि ३६%, असे पार्ट टाइम जॉब करतात.

याच अहवालानुसार, देशात ६५% तरुणांना उद्योजक व्हायचे आहे, तर ४९% तरुणांनी पार्ट टाइम जॉब करताना स्वतःचा उद्योग सुरू करायची इच्छा व्यक्त केली आहे. कोविडनंतरची आर्थिक घसरण आणि महागाई, या कारणांनी ४०% तरुणांनी मुख्य नोकरीबरोबर पार्ट टाइम जॉब निवडले आहेत. फूड डिलिव्हरी, राइडशेअरिंग किंवा सोशल मीडियावर कंटेंट तयार करणे, अशा अनेक लवचिक नोकऱ्या लोकप्रिय होत आहेत.

५०%पेक्षा अधिक तरुण जादा उत्पन्नासाठी पार्ट टाइम जॉब करतात

जगभरात हाच ट्रेंड :

सन २०२४मध्ये अमेरिकेतल्या संस्थेच्या सर्वेक्षणानुसार, किमान ५५% तरुण जोडीला पार्ट टाइम जॉब करत होते आणि त्यांना सरासरी १,२५३ डॉलर मासिक उत्पन्न मिळत होते. त्यापैकी ४०% म्हणाले की महागाईमुळे आणि ३८% जणांनी कोविडनंतरच्या आर्थिक अडचणींमुळे पार्ट टाइम जॉब स्वीकारले.

नोएडातील आकाश (नाव बदलले आहे), कॉर्पोरेट क्लायंटसाठी पब्लिक रिलेशन फर्ममध्ये पूर्ण वेळ काम करतात. पण राहिलेल्या मोकळ्या वेळेत ते राजकीय भाषणे, सोशल मीडिया पोस्ट तयार करण्याचे साइड जॉब करतात. त्यांना या जॉबने 'कामाचे स्वातंत्र्य आणि आर्थिक आधार' मिळत आहे, असे ते सांगतात.

स्वतंत्रतेचे भान :

बंगळुरूच्या मेघा निधी हिने २०२२मध्ये एका फिल्म स्टुडिओमध्ये प्रॉडक्शन मॅनेजर म्हणून काम करताना पार्ट टाइम काम सुरू केले. 'माझ्या नियमित, पूर्ण वेळ कामात मी समाधानी नव्हते. पार्ट टाइम जॉबमुळे माझ्या लक्षात आले, की मला छोटे प्रोजेक्ट करायला आवडतात. आता मला माझ्या वेळेनुसार स्वतःचे प्रोजेक्ट सुरू करायचे आहेत,' असे ती सांगते. मेघा निधी हिला फिल्म आणि आर्टिस्ट मॅनेजमेंटमध्ये पार्ट टाइम जॉब करत फुलटाइम फ्रीलान्सिंगमध्ये शिफ्ट व्हायची प्रेरणा मिळाली. 'या साइड जॉबमुळे मला अशा अनेक संधी मिळाल्या ज्याचा मी कधी विचारही केला नव्हता,' मेघा म्हणते.

फक्त उत्पन्न नाही, तर सर्जनशीलतेलाही वाव :

नोएडातील श्राव्या (वय वर्षे २८) ब्रँण्ड्ससाठी व्हिज्युअल कॅम्पेन्स तयार करते. ती म्हणते, 'मी उत्पन्नासाठी साइड जॉब करते. मला असे जॉब फार आवडत नाहीत, पण मला माझ्या वेळेनुसार काहीतरी करत राहायला आवडते. त्यामुळे मी फक्त तीच कामे स्वीकारते जी मी चांगली करू शकेन.' श्राव्या पुढे म्हणते, 'या प्रोजेक्टमुळे माझा आत्मविश्वास वाढतो आणि आर्थिकदृष्ट्याही मी भक्कम होत माझे खर्च भागवू शकते.'

GST कलेक्शन से सरकार मालामाल : जनता बेहाल

मई में कलेक्शन 2 लाख करोड़ के पार : महाराष्ट्र सहित कई राज्यों ने 25 % तक ज्यादा टैक्स दिए

- 12 महीनों में केंद्र सरकार के खजाने में 20 लाख करोड़ रुपये से ज्यादा राजस्व आया, पिछले वर्ष के मुकाबले मई में जीएसटी कलेक्शन में 16 प्रतिशत से भी ज्यादा वृद्धि का रिकॉर्ड बना

राज्यों का जीएसटी कलेक्शन

मई में जीएसटी कलेक्शन में योगदान देने वाले शीर्ष पांच राज्य महाराष्ट्र, पश्चिम बंगाल, कर्नाटक, तमिलनाडु और उत्तर प्रदेश थे. इन राज्यों के जीएसटी कलेक्शन में करीब 17% और 25% का इजाफा हुआ है. गुजरात, आंध्र प्रदेश और तेलंगाना जैसे अन्य बड़े राज्यों में -2% से लेकर 6% तक की मामूली ग्रोथ दर्ज की गई. मध्य प्रदेश, हरियाणा, पंजाब और राजस्थान जैसे राज्यों में लगभग 10% की मीडियम ग्रोथ देखी गई.

नई दिल्ली, 1 जून (वि.प्र./वार्ता)

जीएसटी कलेक्शन से केंद्र सरकार मालामाल है और जनता बेहाल है. मई में जीएसटी कलेक्शन 2 लाख करोड़ के पार पहुंच गया. महाराष्ट्र, बंगाल, कर्नाटक और तमिलनाडु ने 17 से 25 प्रतिशत तक ज्यादा टैक्स दिए. इन 12 महीनों में सरकार के खजाने में 20 लाख करोड़ से ज्यादा राजस्व आने व जीएसटी कलेक्शन के चलते केंद्र मालामाल है, जबकि महंगाई की मार झेल रही जनता बेहाल है. पिछले वर्ष के मुकाबले में मई में जीएसटी कलेक्शन में 16 प्रतिशत से भी ज्यादा वृद्धि का रिकॉर्ड है. जीएसटी वसूली में मई महीने में रिकॉर्ड टूट गया है.

मई महीने में 2,01,050 करोड़ रुपये जीएसटी वसूली हुई. इस महीने में पिछले साल के मुकाबले 16.4 फीसदी अधिक जीएसटी संग्रह किया गया. इससे पहले अप्रैल महीने में सालाना आधार पर 12.6 प्रतिशत बढ़कर 2.37 लाख करोड़ के सर्वोच्च स्तर पर पहुंच गया था. सरकार की ओर से जारी आंकड़ों के अनुसार अप्रैल 2024 में वस्तु व सेवा कर (जीएसटी) का संग्रह 2.10 लाख करोड़ रुपये था. यह 01 जुलाई 2017 से जीएसटी लागू होने के बाद दूसरा सबसे अधिक संग्रह था. मार्च 2025 में जीएसटी संग्रह 1.96 लाख करोड़ रुपये रहा था. वहीं मार्च में सकल जीएसटी संग्रह 9.9 प्रतिशत बढ़कर 1.96 लाख करोड़ रुपये से अधिक हो गया. मार्च में घरेलू लेनदेन से जीएसटी राजस्व 8.8 प्रतिशत बढ़कर 1.49 लाख करोड़ रुपये हो गया, जबकि आयातित वस्तुओं से राजस्व 13.56 प्रतिशत बढ़कर 46,919 करोड़ रुपये हो गया. घरेलू लेन-देन से जीएसटी संग्रह 13.7% बढ़कर करीब 1.50 लाख करोड़ रुपये हुआ. वहीं आयात पर जीएसटी राजस्व 25.2% की तेज बढ़ोतरी के साथ 51,266 करोड़ रुपये रहा.

वहीं शुद्ध जीएसटी संग्रह 1.74 लाख करोड़ रहा, जो कि पिछले साल मई की तुलना में 20.4% अधिक है. वहीं कुल रिफंड मई 2025 में 4% घटकर 27,210 करोड़ हुआ. मई 2024 में जीएसटी संग्रह 1.72 लाख करोड़ था. इस साल मई में यह बढ़कर 2.01 लाख करोड़ से अधिक हो गया, जो कि देश की अर्थव्यवस्था में सुधार और बेहतर कर अनुपालन को दर्शाता है. डेलॉयट इंडिया के पार्टनर एमएस मणि ने कहा कि जीएसटी संग्रह में राज्यों के बीच काफी अंतर देखा गया है. इसका मुख्य कारण राज्यों की आर्थिक गतिविधियों में विविधता और कई सेक्टरों का योगदान हो सकता है. GST कलेक्शन से...

(पेज 1 से आगे)

महाराष्ट्र, पश्चिम बंगाल, कर्नाटक और तमिलनाडु जैसे बड़े राज्यों में 17% से 25% तक की बढ़ोतरी हुई. वहीं, गुजरात, आंध्र प्रदेश और तेलंगाना जैसे अन्य बड़े राज्यों में यह बढ़ोतरी सिर्फ छह फीसदी तक सीमित रही. मध्य प्रदेश, हरियाणा, पंजाब और राजस्थान जैसे राज्यों में करीब 10% की औसत बढ़ोतरी हुई. एमएस मणि ने आगे कहा, जीएसटी संग्रह की यह औसत बढ़ोतरी सभी राज्यों में समान नहीं दिखती. इसके पीछे मौसमी प्रभाव या सेक्टर आधारित कारण हो सकते हैं, जिनका विस्तृत डाटा-आधारित विश्लेषण जरूरी है.

चार ऑडिट कंपनियों को टक्कर देने भारतीय कंपनी बनाने केंद्र सरकार कर रही विचार !

नई दिल्ली, 8 जून (आ. प्र.)

भारत भी दुनिया की चार दिग्गज परामर्श एवं ऑडिट कंपनियों को टक्कर देने वाली कंपनी बनाने की तैयारी कर रहा है. कंपनी मामलों के मंत्रालय की सचिव दीप्ति गौर मुखर्जी की अध्यक्षता में एक समिति ऐसी देसी कंपनी बनाने के लिए जरूरी कदमों पर विचार करेगी. यह समिति जरूरत पड़ने पर नीतिगत उपाय भी सुझाएगी. इस सिलसिले में पहली बैठक शुक्रवार को प्रधानमंत्री कार्यालय (पीएमओ) में शुक्रवार (6 जून) को हुई थी. प्रधानमंत्री के प्रमुख सलाहकार शक्तिकांत दास की अध्यक्षता में हुई इस बैठक में आर्थिक मामलों के विभाग के सचिव अजय सेठ, वित्तीय सेवा विभाग के सचिव एम नागराज, राजस्व सचिव अरविंद श्रीवास्तव और गौर मुखर्जी समेत शीर्ष सरकारी अधिकारी शामिल हुए थे. प्रधानमंत्री की आर्थिक सलाहकार परिषद के सदस्य संजीव सान्याल ने इन शीर्ष अधिकारियों के समक्ष वैश्विक स्तर की एक ऐसी भारतीय कंपनी तैयार करने का खाका पेश किया. सूत्रों ने कहा कि इस बैठक से पहले भारतीय सनदी लेखाकार संस्थान (आईसीएआई) ने भी इस विषय पर अपनी सलाह कंपनी मामलों के मंत्रालय के अधिकारियों को दी थी. चार बड़ी कंपनियों डेलॉयट, पीडब्ल्यूसी, ईवाई और केपीएमजी को विभिन्न सरकारी मंत्रालयों एवं विभागों से काफी काम मिलता है. अब सरकार चाहती है कि ऐसी कंपनियों पर निर्भरता कम कर देश में ही एक कंपनी तैयार की जाए, जो यह काम कर सके. ग्रांट थॉर्नटन भारत, बीडीओ इंडिया दो बड़े नाम हैं, जो परामर्श सेवा देने वाली छह बड़ी कंपनियों में शामिल हैं.

ಮೇನಲ್ಲಿ ₹2.01 ಲಕ್ಷ ಕೋಟಿ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ

ನವದೆಹಲಿ: ಸರ್ಕಾರವು ಮೇ ತಿಂಗಳಲ್ಲಿ ಸರಕು ಮತ್ತು ಸೇವಾ ತೆರಿಗೆ (ಜಿಎಸ್‌ಟಿ) ಯಿಂದ 2.01 ಲಕ್ಷ ಕೋಟಿ ರೂ. ಸಂಗ್ರಹಿಸಿದೆ. 2024ರ ಮೇನಲ್ಲಿ 1.73 ಲಕ್ಷ ಕೋಟಿ ರೂ. ಸಂಗ್ರಹವಾಗಿತ್ತು. ವಾರ್ಷಿಕ ಆಧಾರದಲ್ಲಿ ಈ ಬಾರಿಯ ಮೇನಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಶೇಕಡ 16.4ರಷ್ಟು ಹೆಚ್ಚಳ ಕಂಡಿದೆ ಎಂದು ಭಾನುವಾರ ಬಿಡುಗಡೆಯಾದ ಸರ್ಕಾರದ ಅಂಕಿಅಂಶಗಳು ತಿಳಿಸಿವೆ. ಇದಕ್ಕೂ ಮೊದಲು ಅಂದರೆ 2025ರ ಏಪ್ರಿಲ್‌ನಲ್ಲಿ ದಾಖಲೆಯ 2.37 ಲಕ್ಷ ಕೋಟಿ ರೂ. ಸಂಗ್ರಹವಾಗಿತ್ತು. ಇದು ಸಾರ್ವಕಾಲಿಕ ದಾಖಲೆಯಾಗಿತ್ತು. ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹವು ಸತತ ಎರಡನೇ ತಿಂಗಳಲ್ಲೂ 2 ಲಕ್ಷ ಕೋಟಿ ರೂ. ಗಳಿಗಿಂತ ಹೆಚ್ಚಾಗಿರುವುದು ಗಮನಾರ್ಹ. ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಪ್ರಮಾಣವು ಇದೇ ಮಟ್ಟದಲ್ಲಿ ಇನ್ನೂ ಒಂದೆರಡು ತಿಂಗಳು ಮುಂದುವರಿದರೆ, ಜಿಎಸ್‌ಟಿ ದರಗಳನ್ನು ಇನ್ನಷ್ಟು ಸರಳಗೊಳಿಸಲು ಸರ್ಕಾರಕ್ಕೆ ಅನುವಾಗಬಹುದು ಎಂದು ತಜ್ಞರು ಹೇಳಿದ್ದಾರೆ.

■ **ಕಳೆದ ವರ್ಷದ ಮೇಗಿಂತ ಶೇ.16.14 ರಷ್ಟು ಹೆಚ್ಚಳ**

ದೊಡ್ಡ ರಾಜ್ಯಗಳಾದ ಮಹಾರಾಷ್ಟ್ರ, ಪಶ್ಚಿಮ ಬಂಗಾಳ, ಕರ್ನಾಟಕ ಮತ್ತು ತಮಿಳುನಾಡಿನಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ವರಮಾನ ಸಂಗ್ರಹದಲ್ಲಿನ ಏರಿಕೆಯು ಶೇಕಡ 17ರಿಂದ 25ರವರೆಗೆ ಇದೆ. ಆದರೆ, ಈ ರಾಜ್ಯಗಳಂತೆಯೇ ದೊಡ್ಡ ರಾಜ್ಯಗಳಾಗಿರುವ ಗುಜರಾತ್, ಆಂಧ್ರಪ್ರದೇಶ ಮತ್ತು ತೆಲಂಗಾಣದಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಹೆಚ್ಚಳ ಶೇ.6ರವರೆಗೆ ಮಾತ್ರ ಇದೆ. ಮಧ್ಯಪ್ರದೇಶ, ಹರಿಯಾಣ, ಪಂಜಾಬ್, ರಾಜಸ್ಥಾನದಲ್ಲಿ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಏರಿಕೆ ಪ್ರಮಾಣ ಶೇ.10ರಷ್ಟಿದೆ.

'ಬೇರೆ ಬೇರೆ ರಾಜ್ಯಗಳ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಏರಿಕೆ ಪ್ರಮಾಣದಲ್ಲಿನ ವ್ಯತ್ಯಾಸದ ವಿಚಾರವಾಗಿ, ಆಯಾ ರಾಜ್ಯಗಳಿಗೆ ಮುಖ್ಯವಾದ ವಲಯಗಳನ್ನು ಗಮನದಲ್ಲಿ ಇರಿಸಿಕೊಂಡು ಆಳವಾದ ಪರಿಶೀಲನೆ ಆಗಬೇಕಿದೆ. ದೇಶದಾದ್ಯಂತ ಜಿಎಸ್‌ಟಿ ಸಂಗ್ರಹ ಪ್ರಮಾಣ ಒಂದೇ ಆಗಿಲ್ಲ. ಇದಕ್ಕೆ ವಲಯವಾರು ಕಾರಣಗಳು ಇರಬಹುದು. ಇದರ ಬಗ್ಗೆ ದತ್ತಾಂಶ ಆಧರಿಸಿ ವಿಶ್ಲೇಷಣೆ ಆಗಬೇಕಿದೆ' ಎಂದು ಡೆಲಾಯ್ಟ್ ಇಂಡಿಯಾ ಪಾಲುದಾರ ಎಂ.ಎಸ್.ಮಣಿ ಹೇಳಿದ್ದಾರೆ.

ಆಂತರಿಕ ವಹಿವಾಟುಗಳಿಂದ ವರಮಾನ ಏರಿಕೆ

ಈ ವರ್ಷದ ಮೇ ತಿಂಗಳಲ್ಲಿ ದೇಶದ ಆಂತರಿಕ ವಹಿವಾಟುಗಳಿಂದ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು ಶೇ.13.7ರಷ್ಟು ಏರಿಕೆ ಕಂಡಿದ್ದು, ಅಂದಾಜು 1.50 ಲಕ್ಷ ಕೋಟಿ ರೂ.ಗೆ ತಲುಪಿದೆ. ಆಮದು ಮೂಲಕ ಬರುವ ಜಿಎಸ್‌ಟಿ ವರಮಾನವು ಶೇಕಡ 25.2ರಷ್ಟು ಹೆಚ್ಚಳ ಕಂಡು 51 ಸಾವಿರ ಕೋಟಿ ರೂ.ಗಳಿಗೆ ತಲುಪಿದೆ.

माहितीसाठ्याचे कुशल खोदकाम

विक्री, विपणन, संशोधन, ग्राहकसेवा आदी मार्गातून, उद्योग, कॉर्पोरेट, व्यावसायिक संस्था, अनेक प्रकारची व्यामिश्र माहिती गोळा करत असते. विशिष्ट कालावधीनंतर, या माहितीचा प्रचंड साठा गोळा होतो. साठलेल्या या माहितीचे विश्लेषण केल्यानंतर, संस्था किंवा कार्पोरेट डाटामेस यांना, भविष्यात येणाऱ्या अडचणी, समस्या, प्रश्न याची कल्पना येते. कोणत्या क्षेत्रात तत्काळ सुधारणा करण्याची आवश्यकता आहे, हे कळते. कंपनीच्या महसुलात वाढ करण्यासाठी या विश्लेषणाचा उपयोग होतो.

सध्या (१) मॉर्केटिंग, (२) टेलिकम्युनिकेशन, (३) हाऊसटरोसिंग, (४) सोशल मीडिया, (५) फायनान्शअल सर्विसेस, (६) मॅन्युफॅक्चुरिंग, (७) हेल्थकेअर, (८) ट्रेडिंग, (९) एनर्जी, (१०) ई-गव्हर्नन्स आणि (११) ई-कॉमर्स या क्षेत्रात, बिझिनेस ॲनॅलिटिक्स क्षेत्रातील तज्ज्ञ मनुष्यबळाची सेवा मोठ्या प्रमाणावर घेतली जाते.

भारतात, या ज्ञानशाखेतील मनुष्यबळाची मागणी मोठ्या प्रमाणावर वाढली आहे. मात्र, राज्य ठरी या क्षेत्रात पुरेशा प्रमाणात असे प्रशिक्षित मनुष्यबळ उपलब्ध नाही. (१) बिग डाटा (गोळा होणाऱ्या विविध प्रकारच्या माहितीचा साठा), (२) ॲनॅलिटिक्स (साठलेल्या माहितीचे सांख्यिकीय निष्कर्ष काढणे किंवा विश्लेषण करणे), (३) प्रॉबॅबिलिटी (संभाव्यता), (३) मॅनेजिरा ॲनॅलिटी (व्यवस्थापकीय कौशल्य), (४) बिझनेस ॲडरस्टॅडिंग (व्यवसायाची सूक्ष्म जाणीव), (५) मॅटॅनिंग रिसोर्सेस (संसाधनाची देखभाल) हे विषय हाताळणाऱ्या उच्चप्रशिक्षित मनुष्यबळाची कमतरता आढळून येते.

बिझिनेस ॲनॅलिटिक्स तज्ज्ञ आणि प्रणालीद्वार, निर्णय क्षमतेसाठी आवश्यक ठरणाऱ्या विश्लेषणात्मक, कार्यात्मक आणि तांत्रिक कौशल्यात वाढ करणे शक्य होऊ शकते. मॅकन्सी, मॉर्गन स्टॅनले, मायक्रोसॉफ्ट, टाटा समूह, गुगल, फेसबुक, लिंक्डइन, अमॅरिकन एक्सप्रेस, हिलीट, ॲक्सेंचुर, सत्यम ॲण्ड टदुब्रे अशासारख्या सर्वच मोठ्या राष्ट्रीय आणि आंतरराष्ट्रीय कंपन्यांमध्ये या मनुष्यबळाची भरती केली जात आहे.

करिअर संधी

या मनुष्यबळास (१) डाटा ॲनॅलिटिक्स, (२) फंक्शनल मॅनेजर्स (वित्त/ मनुष्य बळ/ विपणन/ वित्त/ कार्यान्वयन इत्यादी), (३) बिझिनेस ॲनॅलिस्ट प्रोजेक्ट मॅनेजर, (४) बिझिनेस इंटेलिजन्स एक्सपर्ट, (५) बिझिनेस ॲनॅलिटिक्स कन्सल्टंट, (६) डाटा अनॅलिस्ट, (७) विषदाटा अनॅलिस्ट, (८) डाटा ॲनॅलिटिक्स प्रोग्रॅमर, (९) डाटा मायनिंग एक्सपर्ट, (१०) डाटा वेअरहाऊस एक्सपर्ट, (११) प्रॉडिक्टिव्ह मॉडेलर, (१२) क्वॉन्टिटेटिव्ह अनॅलिस्ट, अशा पदांवर कार्य करण्याची संधी मिळू शकते.

डाटा मायनिंग

डाटा मायनिंग म्हणजेच माहितीचे उत्खनन करून, ज्यांना सोडवावू शकणाऱ्या संधांच्या समस्या जाणून घेऊ शकतात, त्याहीपेक्षा त्यांना खऱ्याखोट्याचे उपाय शोधणेसुध्दा सुलभ जाते. क्रेडिट कार्ड कंपन्यांना, फसवणूक करणाऱ्या घटक/ व्यक्ती/ कार्यप्रणाली ओळख बांधणे शक्य होत आहे.

अभ्यासक्रम आणि संस्था

(१) पोस्ट ग्रॅज्युएट डिप्लोमा इन बिझनेस ॲनॅलिटिक्स

हा आपल्या देशातील सर्वोत्कृष्ट आणि वैशिष्टपूर्ण अभ्यासक्रम आहे. हा अभ्यासक्रम देशातील तीन दर्जेदार संस्थांनी एकत्रितरित्या सुरू केला आहे. या तीन संस्था आहेत- (१) इंडियन इन्स्टिट्यूट ऑफ मॅनेजमेंट, कोलकाता (आयआयएम), (२) इंडियन इन्स्टिट्यूट ऑफ टेक्नॉलॉजी, खरगपूर (आयआयटी) आणि (३) इंडियन स्टॉटिस्टिकल इन्स्टिट्यूट कोलकाता (आयएसआय).

बिझिनेस ॲनॅलिटिक्स, क्षेत्रातील जागतिक पातळीवरील सर्वोत्कृष्ट मनुष्यबळाची निर्मिती करण्याचा उद्दिष्टपूर्तीसाठी, या तीन श्रेष्ट संस्था एकत्र आल्या आहेत. हा अभ्यासक्रम केलेल्या विद्यार्थ्यांना राष्ट्रीय आणि आंतरराष्ट्रीय स्तरावर विविध स्वरूपाच्या करिअर संधी सुलभतेने मिळाल्या आहेत. गणितीय विश्लेषणात गती व रस असणाऱ्या आणि आव्हानात्मक व्यावसायिक समस्यांना सोडवू इच्छिणाऱ्या तरुण-तरुणींसाठी हा अभ्यासक्रम, उत्कृष्ट करिअर घडविण्याचा उत्तम पर्याय ठरू शकतो. हा अभ्यासक्रम, या तीनही संस्थांमध्ये अनुभवी प्राध्यापक शिकवतात. यामधलाच कंपन्यांमध्ये, प्राध्यापकांची सुविधा उपलब्ध करून दिली जाते. अभ्यासक्रमाच्या कालावधीत, साताऱ्याने या क्षेत्रातील, व्यावसायिकांशी संवाद घडवून आणला जातो. या अभ्यासक्रमाला प्रवेश घेतलेल्या विद्यार्थ्यांना, प्रत्येकी सहा महिने तीनही संस्थांमध्ये अभ्यास करावा लागतो. (अ) आयआयएम कोलकाता येथे व्यवस्थापनाच्या कार्यात्मक क्षेत्रात, ॲनॅलिटिक्स तंत्राचा वापर, (ब) आयएसआय कोलकाता येथे, ॲनॅलिटिक्ससाठी आवश्यक असणारे सांख्यिकी आणि मशिन लर्निंग तंत्रकौशल्य, (क) आयआयटी कानपूर येथे ॲनॅलिटिक्सच्या विविध तंत्रज्ञानात्मक पैलूचे ज्ञान प्रदान केले जाते.

या अभ्यासक्रमाचा कालावधी दोन वर्षांचा आहे. यामध्ये प्रतिष्ठित व्यावसायिक संस्थेतील, सहा महिन्याच्या इंटर्नशीपचा समावेश आहे. या अभ्यासक्रमाची पदव्युत्तर पदविका प्रमाणपत्र तीनही संस्था एकत्रितरित्या देतात. हा अभ्यासक्रम करणाऱ्या विद्यार्थ्यांना आयआयएम, आयआयटी आणि आयएसआय या तीनही संस्थांच्या प्लेसमेंट प्रक्रियेत संधी दिली जाते.

अशी असते परीक्षा-

या अभ्यासक्रमाच्या प्रवेशासाठी, सीबीटी (कॉम्प्युटर बेस्ड टेस्ट) घेतली जाते. या परीक्षेत १५० गुणांचे ५० प्रश्न विचारले जातात. हे प्रश्न बहुपर्यायी (मल्टिपल चॉइस) पध्दतीचे असतात. प्रत्येक प्रश्नाचे फक्त एकच अचूक उत्तर असते. अचूक उत्तराला ३ गुण दिले जातात. चुकलेल्या उत्तरासाठी एका गुणाची कपात केली जाते. या पेपरमध्ये- (१) भाषिक आणि शाब्दिक क्षमतेचे (व्हर्बल ॲबिलिटी) १५ प्रश्न, (२) तार्किक कारणमीमांसा (लॉजिकल रिझनिंग) ५ प्रश्न, (३) माहिती विश्लेषण (डाटा इंटरप्रिटेशन आणि डाटा सिन्थुलायझेशन) १५ प्रश्न (४) संख्यात्मक कल (क्वॉन्टिटेटिव्ह ॲबिलिटी) – २५ प्रश्न विचारले जातात.

या परीक्षेतील गुणांच्या आधारे उमेदवारांना मुलाखतीसाठी पाचारण केले जाते. त्यानंतर विद्यार्थ्यांची अंतिम निवड केली जाते.

अर्हता- या अभ्यासक्रमासाठी पुढील अर्हताप्राप्त विद्यार्थी पात्र ठरतात- (१) बीई/ बीटेक/ एम कॉम/ एम.एससी किंवा (२) ज्या विद्यार्थ्यांनी ३ वर्षे कालावधीची अभियांत्रिकी पदविका करून बीई/बीटेक अभ्यासक्रम पूर्ण केला असेल किंवा अभियांत्रिकी पदविकेनंतर चार वर्षे कालावधीचा बीएससी अभ्यासक्रम केला असेल, तेसुध्दा अभ्यासक्रमासाठी पात्र ठरतात, किंवा या सोबत चार्टर्ड अकाउंटंट परीक्षा /कंपनी सेक्रेटरी परीक्षा उत्तीर्ण झालेले विद्यार्थीही पात्र ठरतात. या सर्व अभ्यासक्रमांमध्ये खुल्या संवर्गातील विद्यार्थ्यांना ६० टक्के आणि अनुसूचित जाती आणि जमाती संवर्गातील विद्यार्थ्यांना ५५ टक्के गुण मिळायला हवेत.

संपर्क- https:// www. iimcal. ac. in/ programs/ pgdba, ईमेल- pgdbaadmissions@iimcal. ac. in, दूरध्वनी- ०३३-७१२११२०३

(२) एमबीए-बिझनेस ॲनॅलिटिक्स

इंडियन इन्स्टिट्यूट ऑफ मॅनेजमेंट, काशिपूर मधील बिझिनेस ॲनॅलिटिक्स, अभ्यासक्रमाची संरचना ही विद्यार्थ्यांना, सध्याच्या व्यावसायिक पर्यावरणात, व्यामिश्र स्वरूपाच्या माहितीसाठ्याचे विश्लेषण करून, सुयोग्य निर्णय घेणे शक्य व्हावे, याअनुषंगाने करण्यात आली आहे. या अभ्यासक्रमात विविध व्यवस्थापकीय कौशल्य आणि ॲनॅलिटिक्साच्या तंत्राचा सुयोग्य समन्वय साध्यकरत आला आहे. ॲनॅलिटिकल तंत्रकौशल्य, व्यवस्थापन कौशल्य, संवादकौशल्य या ही घटकांनी, भरिष्यातील व्यावसायिक नेतृत्वाचा विकास, अभ्यासक्रमाव्यारे होणे अपेक्षित आहे. डाटा ॲनॅलिटिक्साच्या तंत्रकौशल्यामुळे, या विद्यार्थ्यांना उद्योग व्यवसायाच्या अधिक प्रगतिसाठी लुकनीती विकसित करणे आणि त्यानुसार अचूक निर्णय येणे शक्य होते. या अभ्यासक्रमामध्ये अनुभवासाठी इंटर्नशीपची सुविधा उपलब्ध करून दिली जाते.

या अभ्यासक्रमाचा कालावधी दोन वर्षे. अर्हता- कोणत्याही शाखेतील पदवी- खुला संवर्ग- ५० टक्के, राखीव संवर्ग- ४५ टक्के. प्रारंभिक चाळणीसाठी कॅट परीक्षेचे गुण ग्राह्य धरले जातात. **संपर्क- https:// iimkashipur. ac. in**

इंडियन इन्स्टिट्यूट ऑफ मॅनेजमेंट बेंगळूरुनेसुध्दा एमबीए इन बिझिनेस ॲनॅलिटिक्स हा अभ्यासक्रम सुरू केला आहे. कालावधी दोन वर्षे. अर्हता- कोणत्याही विषयातील ६० टक्के गुणांसह पदवी (खुला संवर्ग), ५५ टक्के (राखीव संवर्ग). या अभ्यासक्रमाच्या प्रारंभिक चाळणीसाठी कॉमन एन्ट्रन्स टेस्ट (कॅट) परीक्षेतील गुण ग्राह्य धरले जातात. **संपर्क- ttps:// www. iimb. ac. in**

(३) पोस्ट ग्रॅज्युएट सर्टिफिकेट कोर्स इन बिझिनेस ॲनॅलिटिक्स- हा अभ्यासक्रम, इंडियन इन्स्टिट्यूट ऑफ मॅनेजमेंट तिरुचिरापल्लीने, सुरू केला आहे. या अभ्यासक्रमाचा कालावधी तेरा महिने. अर्हता- कोणत्याही विषयातील ५० टक्के गुणांसह पदवी (खुला संवर्ग), ४५ टक्के (राखीव संवर्ग).

या अभ्यासक्रमात, ऑपरेशन रिसर्च फॉर बिझिनेस, डाटा वेअरहाउसिंग फॉर बिझिनेस, डाटा कलेक्शन, डिजुलाइझेन ॲण्ड स्टोरीटेलिंग कुशय डाटा, प्रेडिक्टिवक मॉडेलिंग, डाटा मायनिंग, बिझिनेस इंटेलिजन्स ॲण्ड ॲनॅलिटिक्स, रिस्क ॲनॅलिटिक्स, फायनांशिअल ॲनॅलिटिक्स, फायनांशिअल ॲनॅलिटिक्स, पिपल ॲनॅलिटिक्स, ऑटोफोशअल इंटेलिजन्स ॲण्ड मशिन लर्निंग, मार्केटिंग ॲनॅलिटिक्स, ऑपरेशन ॲण्ड सप्लाय चेन ॲनॅलिटिक्स आदी विषयघटकांचा समावेश आहे. हा अभ्यासक्रम सध्या कार्यरत असणाऱ्या व्यावसायिकांना उपयुक्त ठरू शकतो.

દુર્લભ ધાતુઓની પુરવઠા સાંકળમાં ભંગાણ : વાટાઘાટો માટે પ્રતિનિધિમંડળ બીજિંગ જશે

નવી દિલ્હી, તા. ૬ જૂન

દુર્લભ ધાતુઓની પુરવઠા સાંકળમાં વિક્ષેપથી દેશના ટોચના મંત્રાલયો સજાગ બન્યાં છે. પ્રધાનમંત્રી કાર્યાલય, ભારે ઉદ્યોગ મંત્રાલય, વિદેશ મંત્રાલય અને વાણિજ્ય મંત્રાલય સંયુક્ત રીતે રેર અર્થ મેગ્નેટની નિકાસ પર ચીનના પ્રતિબંધોની અસરનું મૂલ્યાંકન કરી રહ્યા છે.

જાણકાર સૂત્રોના જણાવ્યા મુજબ, સરકાર બેઇજિંગમાં એક ઉદ્યોગ પ્રતિનિધિમંડળ મોકલવાનું વિચારી શકે છે. આનો ઉદ્દેશ્ય નવી પરમિટ સિસ્ટમ પર ચીનના વાણિજ્ય મંત્રાલય પાસેથી સ્પષ્ટતા મેળવવાનો છે. આ પગલાને સપ્લાય અવરોધો હળવાં કરવા અને વધુ વિક્ષેપ અટકાવવાના પગલા તરીકે જોવામાં આવી રહ્યું છે.

૪ એપ્રિલ, ૨૦૨૫થી ભારતને ચીન તરફથી રેર અર્થ મેગ્નેટ (દુર્લભ પૃથ્વી ચુંબક) માટે આયાત મંજૂરી મળી નથી. સપ્લાય અવરોધો ઇલેક્ટ્રોનિક વાહનો અને ઇલેક્ટ્રોનિક્સ ક્ષેત્રને અસર કરી રહ્યા છે, તેથી ભારત સરકાર વાટાઘાટો માટે બીજિંગમાં એક પ્રતિનિધિમંડળ મોકલવાનું વિચારી રહી છે

અગાઉ ૨ જૂનના રોજ ભારે ઉદ્યોગ વિભાગના પ્રધાન એચડી કુમારસ્વામીએ જણાવ્યું હતું કે સરકાર ૨-૩ અઠવાડિયામાં ઉદ્યોગ અધિકારીઓનું એક પ્રતિનિધિમંડળ ચીન મોકલવાની તૈયારી કરી રહી છે જેથી ત્યાંના અધિકારીઓ સાથે આ મુદ્દા પર ચર્ચા કરી શકાય.

૪ એપ્રિલથી કોઈ પણ ભારતીય કંપનીને ચીનમાંથી દુર્લભ પૃથ્વી ચુંબક આયાત કરવાની મંજૂરી મળી નથી. આ વિલંબ બેઇજિંગ દ્વારા રજૂ કરાયેલા નવા નિકાસ નિયમને અનુસરે છે, જેમાં હવે આયાતકારોને ચીની સત્તાવાળાઓ પાસેથી પરવાનગી મેળવવી આવશ્યક છે. આ નવા નિયમોએ ભારતીય ઉત્પાદકોને ફસાયેલા રાખ્યા છે, અમલીકરણ અંગે મૂંઝવણને કારણે લો-એન્ડ મેગ્નેટ પણ અટકી ગયા છે.

સમારિયમ, ગેડોલિનિયમ, ટર્બિયમ, ડિસ્પ્રોસિયમ, લ્યુટેટિયમ, સ્કેન્ડિયમ અને યટ્રીયમ

સહિતની મહત્વપૂર્ણ સામગ્રી ઇલેક્ટ્રિક મોટર્સ, બ્રેકિંગ સિસ્ટમ્સ, સ્માર્ટફોન, એરોસ્પેસ ઘટકો અને મિસાઇલ ટેકનોલોજીમાં આવશ્યક છે.

ઉલોઇટ ઇન્ડિયાના પાર્ટનર અને ઓટોમોટિવ ક્ષેત્રના અગ્રણી રજત મહાજને આ મુદ્દાની ગંભીરતા ઉપર ભાર મૂકતાં જણાવ્યું છે કે આ સમયે ઇલેક્ટ્રિક વાહનોનાં વોલ્યુમને સંતોષવા માટે રિસાયકલ કરવા પૂરતા રેર અર્થ મેગ્નેટ નથી. ઓઈએમ માટે પાવરટ્રેન તેમજ વૈકલ્પિક સામગ્રી પર અચાનક માર્ગ બદલવો સરળ રહેશે નહીં. આશા છે કે આ પરિસ્થિતિ રાજદ્વારી ચેનલો દ્વારા ઉકેલાઈ જશે, પરંતુ જો તે ચાલુ રહેશે, તો આપણે મોટા ઓઈએમ માટે પાવરટ્રેન તરફ પરિવર્તન જોઈ શકીએ છીએ.

ચીનના નિકાસ પ્રતિબંધો પાછળ ટ્રમ્પ ટેરિફ

ઉદ્યોગ નિરીક્ષકોનો મત છે કે રેર અર્થ મેગ્નેટની નિકાસ પર ચીનના નવા નિયમો કદાચ અમેરિકાના પ્રેસિડેન્ટ ડોનાલ્ડ ટ્રમ્પ દ્વારા લાદવામાં આવેલા ટેરિફના પ્રતિભાવમાં છે. એકલું ભારત તેનું નુકસાન સહન કરી રહ્યું નથી. ભારત, જપાન, યુરોપ અને યુએસ સહિત ઘણા દેશો જે રેર અર્થ માટે ચીન પર ભારે આધાર રાખે છે, તે સહુ નિકાસ લાઇસન્સ ઝડપી બનાવવા માટે તાત્કાલિક ચીન સાથે રાજદ્વારી વાટાઘાટો કરવા માંગે છે.

ચીન વિશ્વના ૯૦% રેર અર્થ ખનિજોનું ઉત્પાદન કરે છે

ચીન વિશ્વના લગભગ ૯૦ ટકા રેર અર્થ ખનિજોનું ઉત્પાદન કરે છે, જે વૈશ્વિક સપ્લાય ચેઇન માટે તેની નિકાસ નીતિઓને મહત્વપૂર્ણ બનાવે છે.

ભારત સરકાર હવે પરિસ્થિતિ પર નજીકથી નજર રાખી રહી છે અને આ મહત્વપૂર્ણ સામગ્રીની અવિરત પહોંચ સુનિશ્ચિત કરવા માટે તેના રાજદ્વારી અને વેપાર વિકલ્પોનું મૂલ્યાંકન કરી રહી છે.

चीनी सरकार से मंजूरी के लिए वाहन उद्योग ने मदद मांगी

दुर्लभ पृथ्वी चुंबकों के आयात मे तेजी लाने के लिए पहल

पायनियर समाचार सेवा। नई दिल्ली

वाहन उद्योग ने यात्री कारें सहित विभिन्न अनुप्रयोगों में इस्तेमाल होने वाले दुर्लभ पृथ्वी चुंबकों के आयात के लिए चीन की सरकार से मंजूरी में तेजी लाने के लिए सरकार से मदद मांगी है।

उद्योग के सूत्रों के अनुसार, विभिन्न घरेलू आपूर्तिकर्ताओं ने पहले ही चीन में अपने स्थानीय विक्रेताओं के माध्यम से चीनी सरकार से मंजूरी मांगी है। सूत्रों ने कहा कि अभी तक कोई मंजूरी नहीं दी गई है। दुर्लभ पृथ्वी चुंबकों के वैश्विक प्रसंस्करण क्षमता के 90 प्रतिशत से अधिक पर चीन का नियंत्रण है। इनका इस्तेमाल वाहन, घरेलू उपकरणों और स्वच्छ ऊर्जा सहित कई क्षेत्रों में किया जाता है।

चीनी सरकार ने चार अप्रैल से सात दुर्लभ पृथ्वी तत्वों और संबंधित चुंबकों के लिए विशेष निर्यात लाइसेंस अनिवार्य करते हुए प्रतिबंध लगा दिए हैं। चीन के प्रतिबंधों के चलते जापान में सुजुकी मोटर ने पहले ही अपनी स्विफ्ट कार का उत्पादन रोक दिया है।

पिछले सप्ताह मारुति सुजुकी इंडिया के वरिष्ठ कार्यकारी अधिकारी (कॉरपोरेट मामले) राहुल भारती ने कहा था कि चीन ने कंपनी से भारत सरकार द्वारा समर्थित और चीनी सरकार द्वारा अनुमोदित अंतिम उपयोगकर्ता प्रमाणपत्र मांगा है। डेलॉइट इंडिया के पार्टनर और वाहन क्षेत्र के प्रमुख रजत महाजन ने कहा कि यह कमी विशेष रूप से ईवी के लिए आपूर्ति श्रृंखला में एक बड़ी बाधा है। ज्ञात हो कि इन भारत का वाहन सेक्टर विदेशी कंपनियों से चुनौती पा रहा है।

इलेक्ट्रिक वाहनांचे हृदय चीनच्या चुंबकाने थांबविले

लोकमत न्यूज नेटवर्क

नवी दिल्ली : इलेक्ट्रिक वाहनांचे हृदय मानले जाणारे, तसेच प्रवासी कारांसह विविध उपकरणांमध्ये वापरले जाणारे दुर्मीळ पृथ्वी चुंबक चीनकडून आयात करण्यासाठी वाहन उद्योगाने सरकारची मदत मागितली आहे. विविध देशांतर्गत पुरवठादारांनी चीनमधील त्यांच्या स्थानिक विक्रेत्यांद्वारे आधीच चीन सरकारकडून मंजुरी मागितली आहे. मात्र, ती मिळालेली नाही.

डेलॉइट इंडिया कंपनीचे भागीदार रजत महाजन यांनी सांगितले की, ही कमतरता विशेषतः इलेक्ट्रिक वाहनांच्या पुरवठा साखळीसाठी अडथळा ठरते

वाहनांत कशासाठी वापर?

पॉवर स्टेअरिंग सिस्टमसाठी.

एबीएस सेन्सर, क्रँकशाफ्ट सेन्सर, कॅमशाफ्ट सेन्सरसाठी.

गाडीचे स्पीकर्स व इन्फोटेनमेंट सिस्टमसाठी.

हायब्रिड आणि ईव्ही बॅटरीला अधिक कार्यक्षम करण्यासाठी.

सुझुकीने उत्पादन थांबविले

चार एप्रिलपासून संबंधित चुंबकांसाठी विशेष निर्यात परवाने बंधनकारक करून चीन सरकारने निर्बंध लादले आहेत. चीनच्या निर्बंधांमुळे सुझुकी मोटरने स्विफ्टचे उत्पादन थांबवले आहे.

स्वदेशी 'बिग फोर'

वेध
कौस्तुभ वीरकर

जागतिक स्तरावर भारताची आर्थिक आणि व्यावसायिक क्षमता सातत्याने वाढत असताना देशांतर्गत व्यावसायिक सेवा क्षेत्राला बळकटी देणे अत्यंत आवश्यक आहे. याच अनुषंगाने, भारत स्वतःच्या चार मोठ्या लेखापरीक्षण आणि सल्लागार संस्था निर्माण करण्याच्या दिशेने महत्त्वाचे पाऊल टाकत आहे. याबाबत पंतप्रधानांचे सचिव शक्तिकांत दास यांनी नुकतीच एक बैठक घेतली. भारत सरकार देशांतर्गत मोठ्या लेखापरीक्षण आणि सल्लागार संस्थांना प्रोत्साहन देण्याचा विचार करत आहे, ज्या जागतिक स्तरावरील 'बिग फोर' अर्थात 'डेलॉईट', 'पीडब्ल्यूसी', 'ईवाय' आणि 'केपीएमजी' कंपन्यांशी स्पर्धा करू शकतील. सध्या भारतीय लेखापरीक्षण क्षेत्रावर परदेशी 'बिग फोर' कंपन्यांचेच वर्चस्व आहे. या बदलामागे परदेशी सल्लागार संस्थांवरील अवलंबित्व कमी करणे आणि व्यावसायिक सेवा क्षेत्रात जागतिक क्षमता विकसित करणे हा मुख्य उद्देश आहे. 'कर सल्लामसलत, डिजिटल प्रशासन आणि पायाभूत सुविधा नियोजन' यांसारख्या महत्त्वाच्या क्षेत्रांमध्ये धोरणात्मक आत्मनिर्भरता प्राप्त करणे सध्या भारतासाठी आवश्यक आहे.

स्वदेशी 'बिग फोर' संस्थांच्या निर्मितीमुळे अनेक फायदे अपेक्षित आहेत. यामुळे भारतीय कंपन्यांना स्थानिक ग्राहकांना सेवा देण्याबरोबरच जागतिक स्तरावर लेखापरीक्षण करण्याची संधी मिळेल. यामुळे भारताची आत्मनिर्भरता वाढेल, आर्थिक कामगिरी सुधारेल आणि जागतिक शक्ती म्हणून भारताची प्रतिष्ठाही वाढेल. सध्या 'डेलॉईट', 'पीडब्ल्यूसी', 'ईवाय' आणि 'केपीएमजी' या जागतिक 'बिग फोर' कंपन्या भारतात लेखापरीक्षण, कर सल्लामसलत, व्यवसाय सल्ला आणि इतर व्यावसायिक सेवा पुरवतात. त्या भारताच्या कॉर्पोरेट जगात महत्त्वाची भूमिका बजावतात आणि देशाच्या आर्थिक परिस्थितीवर भाष्यही करतात. स्वदेशी 'बिग फोर' कंपन्यांची निर्मिती म्हणजे केवळ स्पर्धा नाही, तर भारतीय बुद्धिमत्ता, क्षमता आणि नैतिकतेला जागतिक स्तरावर एक नवी ओळख मिळणार आहे. ही वाटचाल भविष्यात सायबर सुरक्षा, कृत्रिम बुद्धिमत्ता आणि डेटा ॲनालिटिक्स यांसारख्या उदयोन्मुख क्षेत्रांमध्येही भारतीय कंपन्यांना जागतिक नेतृत्वाचा विकास मिळवून देईल. या माध्यमातून भारत केवळ इतरांच्या नियमांवर चालणार नाही, तर स्वतःचे नियम आणि मापदंड निर्माण करेल. भारताच्या व्यावसायिक सेवा क्षेत्राची 'आत्मनिर्भर' वाटचाल एक निश्चित क्रांती घडवून आणेल, यात शंका नाही! ◆◆

વિશ્વની અગ્રણી ઓડિટ કંપનીઓ સાથે સ્પર્ધા કરી શકે તેવી સ્થાનિક કંપની બનાવાશે

નવી દિલ્હી, તા.૭

ભારત એવી કંપની બનાવવાની પણ તૈયારી કરી રહ્યું છે જે વિશ્વની ચાર અગ્રણી કન્સલ્ટિંગ અને ઓડિટ કંપનીઓ સાથે સ્પર્ધા કરી શકે. કોર્પોટ બાબતોના મંત્રાલય હેઠળની એક સમિતિ આવી સ્થાનિક કંપની બનાવવા માટે જરૂરી પગલાંઓ પર વિચાર કરશે. જરૂર પડ્યે આ સમિતિ નીતિગત પગલાં પણ સૂચવશે.

આ સંદર્ભમાં પહેલી બેઠક તાજેતરમાં યોજાઈ હતી. જેમાં આર્થિક સલાહકાર પરિષદના સભ્ય સંજીવ સાન્યાલે વૈશ્વિક સ્તરની ભારતીય કંપની બનાવવા માટે બ્લુપ્રિન્ટ રજૂ કરી હતી.

ચાર મોટી કંપનીઓ ડેલોઇટ, PWC, EY અને KPMG ને વિવિધ સરકારી મંત્રાલયો અને વિભાગો તરફથી ઘણું કામ મળે છે. હવે સરકાર આવી કંપનીઓ પર નિર્ભરતા ઘટાડવા અને દેશમાં જ એક એવી કંપની બનાવવા માંગે છે, જે આ કામ કરી શકે. ગ્રાન્ટ થોર્ન્ટન ઇન્ડિયા, BDO ઇન્ડિયા પણ બે મોટા નામ છે, જે કન્સલ્ટન્સી સેવાઓ પૂરી પાડતી છ મોટી કંપનીઓમાં સામેલ છે.

अमेरिकेचा खोटेपणा उघड

भारता बरोबरच्या व्यापारात अमेरिकेस तोटा होत नाही, हे नुकतेच समोर आले. परदेशी गुंतवणूकदारांचा भारतावर पुन्हा विश्वास बसत असल्याचे आकडेवारीवरुन दिसून आले. याच सुमारास धारावी प्रकल्पांतर्गत आधुनिक एकात्मिक वाहतूक केंद्र उभारण्याची लक्षवेधी योजना समोर आली.

अर्थनगरीतून

महेश देशपांडे

अमेरिकेचे अध्यक्ष डोनाल्ड ट्रम्प यांनी वारंवार व्यापारतुटीचा मुद्दा उपस्थित करत भारत 'टॅरिफ किंग' असल्याचा आरोप केला. ते अमेरिकेतून होणाऱ्या आयातीवरील कर कमी करण्यासाठी भारतावर दबाव आणत आहेत; परंतु अमेरिकेस व्यापारात्त तोटा होत असल्याचा त्यांचा दावा अर्धवट तथ्यांवर आधारित असल्याचे जाणकारांचे म्हणणे आहे. 'ग्लोबल ट्रेड रिसर्च इनिशिएटिव्ह'नुसार शिक्षण, डिजिटल सेवा, आर्थिक व्यवहार आणि बौद्धिक संपदा रॉयल्टी इत्यादींमधून अमेरिकेला दर वर्षी ८० ते ८५ अब्ज डॉलर्स मिळतात. हे आकडे समाविष्ट केल्यास अमेरिकेला भारतासोबतच्या व्यापारात ३५ ते ४० अब्ज डॉलसचा नफा होतो.

१३ फेब्रुवारी २०२५ रोजी ट्रम्प यांनी दावा केला होता की अमेरिकेची भारतासोबतची व्यापार तूट शंभर अब्ज डॉलर्स आहे. हा आकडा चुकीचा होता. केंद्र सरकारच्या आकडेवारीनुसार २०२४-२५ मध्ये दोन्ही देशांदरम्यान १८६ अब्ज डॉलर्सचा व्यापार झाला होता. भारताने अमेरिकेला ८६.५ अब्ज डॉलर्सच्या वस्तू निर्यात केल्या आणि अमेरिकेतून ४५.३ अब्ज डॉलर्सच्या वस्तू आयात केल्या. अशा प्रकारे, भारताकडे वस्तू निर्यातीत ४१ अब्ज डॉलर्सचा नफा होता.

या आकडेवारीत अनेक महत्त्वाचे व्यवसाय समाविष्ट नाहीत. उच्च शिक्षण क्षेत्रात अमेरिकेला भारताकडून भरपूर महसूल मिळतो. अमेरिकेत शिक्षण घेणारे भारतीय विद्यार्थी दर वर्षी सुमारे २५ अब्ज डॉलर्स खर्च करतात. शिक्षण शुल्काच्या स्वरूपात १५ अब्ज डॉलर्स तर उर्वरित दहा अब्ज डॉलर्स तेथे राहण्यासाठी खर्च केले जातात. भारतीय विद्यार्थ्यांचा वार्षिक खर्च ८७,००० ते एक लाख ४२ हजार डॉलर्सपर्यंत असतो. अशा प्रकारे शिक्षण ही अमेरिकेतून भारतात होणाऱ्या सर्वात मोठ्या निर्यातींपैकी एक आहे. गुगल, मेटा, अमेझॉन, ॲपल आणि मायक्रोसॉफ्टसारख्या अमेरिकन कंपन्या दर वर्षी भारताच्या डिजिटल बाजारपेठेतून १५ ते २० अब्ज डॉलर्स कमावतात.

त्यातील मोठा भाग अमेरिकेत परत जातो. सिटी बँक, जेपी मॉर्गन, गोल्डमन सॅक्स, मॅकेन्झी, बीसीजी, डेलॉइट, पीडब्ल्यूसी आणि केपीएमजीसारख्या अमेरिकन बँका आणि सल्लागार कंपन्या दर वर्षी भारतातून १० ते १५ अब्ज डॉलर्स कमावतात.

अमेरिकेसाठी उत्पन्नाचा आणखी एक मोठा स्रोत म्हणजे ग्लोबल कॅपॅबिलिटी सेंटर (जीसीसी). वॉलमार्ट, डेल, आयबीएम, वेल्स फार्गो, सिस्को आणि मॉर्गन स्टॅनलीसारख्या कंपन्या बंगळुरू आणि हैदराबादमध्ये ग्लोबल कॅपॅबिलिटी सेंटर चालवत आहेत. त्यांचे बहुतेक काम भारतात केले जाते; परंतु त्यांचे आर्थिक मूल्य अमेरिकेत जाते; जे दर वर्षी १५ ते २० अब्ज डॉलर्स आहे.

फायझर, जॉन्सन अँड जॉन्सन, मर्क यासारख्या अमेरिकन औषध कंपन्या दर वर्षी पेटंट, औषध परवाना आणि तंत्रज्ञान हस्तांतरयातून दीड ते दोन अब्ज डॉलर्स कमावतात. फोर्ड आणि जीएमसारख्या ऑटोमोबाईल कंपन्या आणि घटक पुरवठादार परवाना आणि तांत्रिक सेवांमधून ०.८ ते १.२ अब्ज डॉलर्स कमावतात. हॉलिवूड आणि अमेरिकन स्ट्रीमिंग प्लॅटफॉर्म भारतात बॉक्स ऑफिस, सबस्क्रिप्शन आणि कंटेंट परवाना यातून दर वर्षी १ ते १.५ अब्ज डॉलर्स कमावतात. अमेरिका संरक्षण क्षेत्रातही भारताला अब्जावधी डॉलर्सची विक्री करते. त्याचे आकडे अनेकदा गुप्त असतात.

'जीटीआरआय ग्लोबल ट्रेड रिसर्च इनिशिएटिव्ह'चे संस्थापक अजय श्रीवास्तव म्हणतात की भारताने अमेरिकेसोबत मुक्त व्यापार कराराच्या चर्चेत पूर्ण आत्मविश्वासाने जावे आणि अमेरिकेने केलेल्या तोट्याच्या अतिरंजित दाव्याला विरोध करावा. अमेरिका अजूनही व्यापार तुटीवर लक्ष केंद्रित करत असल्यास भारतानेही चर्चा शुल्कापुरती मर्यादित ठेवावीत.

श्रीवास्तव यांच्या मते व्यापार संतुलनाशी काहीही संबंध नसलेल्या क्षेत्रांमध्ये अमेरिकेला मोठ्या सवलती देण्यात काही अर्थ नाही कारण यामुळे अमेरिकेचा व्यापारी नफा आणखी वाढेल.

ताज्या आकडेवारीनुसार, मे मध्ये परदेशी पोर्टफोलिओ गुंतवणूकदारांनी १९,८६० कोटी रुपयांची गुंतवणूक केली. तथापि, जानेवारीमध्ये ७८,०२७ कोटी रुपये, फेब्रुवारीमध्ये ३४,५७४ कोटी रुपये आणि मार्चमध्ये ३,९७३ कोटी रुपये परकीय गुंतवणूकदारांनी काढून घेतले आहेत. 'जिओजित इन्व्हेस्टमेंट्स'चे मुख्य गुंतवणूक धोरणकार व्ही. के. विजयकुमार यांनी इशारा दिला की शेअर बाजारातील मूल्यांकने महाग होत आहेत. परदेशी गुंतवणूकदार शेअरच्या किमती वाढतील तेव्हा विक्री करू शकतात.

'मॉर्निंग स्टार इन्व्हेस्टमेंट'चे सहसंचालक हिमांशू श्रीवास्तव म्हणाले की मे महिन्यात गुंतवणुकीसाठी अनेक घटक जबाबदार होते. अमेरिकेत कमी महागाईची अपेक्षा आणि 'फेडरल रिझर्व'ने व्याजदरात कपात केल्याने भारतासारख्या उदयोन्मुख बाजारपेठा आकर्षक झाल्या. त्याच वेळी, भारताची मजबूत जीडीपी वाढ, कंपन्यांची चांगली कमाई आणि धोरणात्मक सुधारणांमुळे गुंतवणूकदारांचा आत्मविश्वास वाढला. विजयकुमार म्हणाले की डॉलरच्या किमतीत घट, अमेरिका आणि चीनच्या अर्थव्यवस्थांमध्ये मंदी, भारताची जलद जीडीपी वाढ आणि कमी महागाई तसेच व्याजदर यामुळे गुंतवणुकीला चालना मिळत आहे.

मे महिन्यामध्ये परकीय गुंतवणूकदारांनी वाहने व त्यांचेसुटे भाग दूरसंचार आणि वित्तीय क्षेत्रात खरेदी केली. स्टॉकव्यतिरिक्त, परदेशी पोर्टफोलिओ गुंतवणूकदारांनी डेट जनरल लिमिटमध्ये १९,६१५ कोटी रुपये आणि डेट व्हॉलंटरी रिटेन्शनमध्ये १,८९९ कोटी रुपये गुंतवले. गुंतवणूकदारांची ही क्रिया एप्रिलच्या मध्यापासून सुरू झाली आणि मे महिन्यातही सुरू राहिली. भारतातील आर्थिक स्थैर्य आणि जागतिक बाजारपेठेतील अनुकूल वातावरण गुंतवणूकदारांना आकर्षित करत असल्याचे तज्ज्ञांचे म्हणणे आहे.

आता एक वेगळी बातमी. अदानी समूहाने मुंबईतील धारावी पुनर्विकास प्रकल्पांतर्गत आधुनिक वाहतूक केंद्र बांधण्याची योजना तयार केली आहे. या योजनेंतर्गत रेल्वे, रस्ते आणि विमानतळाशी संबंधित सुविधा एकाच ठिकाणी उपलब्ध असतील. या प्रकल्पासाठी स्थापन करण्यात आलेल्या 'नवभारत मेगा डेव्हलपर्स प्रायव्हेट लिमिटेड'च्या निवेदनामध्ये म्हटले आहे की या केंद्रात मुंबई आणि नवी मुंबई विमानतळांसाठी विशेष गाड्या, चेक-इन आणि ट्रांझिट सुविधादेखील असतील. या कंपनीमध्ये अदानी समूहाचा ८० टक्के हिस्सा आहे तर उर्वरित २० टक्के हिस्सा महाराष्ट्र सरकारकडे आहे.

या मल्टीमोडल ट्रांझिट हबमध्ये रेल्वे, मेट्रो सेवा आणि शहरात येणाऱ्या आणि जाणाऱ्या शहर बसेसचा समावेश असेल. धारावी आणि आसपासच्या भागात वाहतूक सुलभ आणि जलद करण्याचा सरकारचा उद्देश आहे. अदानी समूहाद्वारे संचालित मुंबई आणि नवी मुंबई विमानतळ या वाहतूक केंद्राशी जोडले जातील. गेल्या वर्षी ऑक्टोबरमध्ये महाराष्ट्र सरकारने धारावीच्या पुनर्विकासासाठी मुंबईच्या ईशान्येकडील २५६ एकर मिठागर जमीन संपादित करण्यास मान्यता दिली. या आठवड्यात राज्य सरकारने धारावीच्या मास्टर प्लॅनलाही हिरवा कंदील दाखवला.

जगभरात शेतांपासून दुकानांपर्यंत १३.२ टक्के अन्न वाया जाते. १७ टक्के अन्न दुकाने आणि घरांमधून फेकून दिले जाते. एकूणच, सुमारे ३० टक्के अन्न कधीच कोणाच्याही पोटात पोहोचत नाही. गरीब देशांमध्ये शेतातून गोदामे आणि दुकानांपर्यंत अन्न येताना वाया जाते. श्रीमंत देशांमधील बहुतेक अन्न घरांमध्ये वाया जाते, म्हणजेच लोक गरजेपेक्षा जास्त खरेदी करतात आणि उरलेले अन्न फेकून देतात. भारतात अन्न वाया जाण्याबाबत कोणतीही व्यापक सरकारी पाहणी झालेली नाही; परंतु कापणीनंतर बनणारे किती अन्न वाया जाते हे शोधण्यासाठी काही पाहण्या झाल्या.

२०२२-२३ ३३ कोटी टन अन्न धान्याचे उत्पादन झाले. फळे आणि भाज्यांचे उत्पादनही वाढले आहे; पण उत्पादन वाढत असताना, तोटाही वाढत आहे. काही पाहण्यांतून दिसून आले आहे की, कापणीनंतरचे नुकसान अजून ते खूप जास्त आहे. 'नेबकॉन्स' च्या २०२२ च्या पाहणीनुसार २०२० ते २०२२ दरम्यान पिकांचे

अन्न प्रक्रिया उद्योगावर हवा भर

एकीकडे शेतकऱ्यांच्या शेतीमालाला पुरेसा भाव मिळत नाही, तर दुसरीकडे प्रक्रियेअभावी ३० टक्के फळे, भाज्या वाया जातात. शेतमाल वाया न घालवल्यास शेतकऱ्यांचे उत्पन्न वाढेल. सर्वांसाठी जास्त अन्न शिल्लक राहील, कोणीही उपाशी राहणार नाही. शेतीतले नुकसानही कमी होईल. त्यासाठी अन्न प्रक्रियेच्या मुद्दयाकडे गांभिर्याने पहावे लागेल.

आणि शेतीशी संबंधित गोष्टींचे नुकसान झाल्यामुळे आपल्याला दर वर्षी १.५३ लाख कोटी रुपयांचे (१८.५ अब्ज डॉलर्स) नुकसान सहन करावे लागले आहे. भारतात धान्य, डाळी आणि तेलबियांचे नुकसान जागतिक पातळीपेक्षा जास्त आहे. याचे मुख्य कारण म्हणजे शेतीमध्ये यंत्रसामग्रीचा कमी वापर आणि साठवणूक आणि वाहतुकीच्या कमी सुविधा हे आहे.

चीनमध्ये धान्याचे नुकसान फक्त २.२२ टक्के आहे. भारतात ते ४.४४ टक्के आहे. फळे आणि भाज्यांचे नुकसान तृणधान्ये आणि तेलबियांपेक्षा जास्त आहे; परंतु जागतिक सरासरीच्या तुलनेत भारतात हे नुकसान कमी आहे. गुणवत्तेचा ऱ्हास हीदेखील एक मोठी समस्या आहे. आपल्या देशात धान्य, डाळी आणि तेल उत्पादनांचे नुकसान खूप मोठे आहे. फळे आणि भाज्यांचे नुकसान थोडे कमी आहे.पाहणी फक्त नुकसानाचे प्रमाण सांगते; परंतु गुणवत्तेत किती नुकसान झाले हे यावरून कळत नाही. उदाहरणार्थ पीक कापले जाते, स्वच्छ केले जाते, घरी किंवा बाजारात नेले जाते आणि नंतर गोदामे आणि दुकानांमध्ये पोहोचवले जाते, तेव्हा गुणवत्तेतही खूप नुकसान होते.

'आयसीएआर' या संस्थेतर्फे धान्याच्या प्रमाणासोबत गुणवत्तेतील तोटा मोजण्याचा प्रयत्न केला. पंजाब, मध्य प्रदेश आणि बिहारमधील काही जिल्ह्यांमध्ये भात, गहू, मका आणि सोयाबीन संबंधी ही पाहणी झाली.त्यानुसार सोयाबीनचे सर्वाधिक १५.३४ टक्के नुकसान झाल्याचे दिसून आले. गव्हाचे ७.८७ टक्के नुकसान झाले. तांदळाचे ६.३७ टक्के नुकसान झाले. मक्याचे ५.९५ टक्के नुकसान झाले. गव्हाच्या गुणवत्तेचे नुकसान २.२७ टक्के इतके होते. याचे कारण गव्हामध्ये ओलावा शोषून घेण्याची क्षमता असते. त्यामुळे गोदामात साठवल्यावर त्याची गुणवत्ता खराब होते. गुणवत्तेत घट होणे दर्शवते की पिकाची गुणवत्ता किती खालावली आहे.

शेत जितके मोठे असेल तितके नुकसान कमी होते. कंबाईन हार्वेस्टर वापरल्याने नुकसान कमी होते. कुटुंबप्रमुखाचे शिक्षण जितके जास्त असेल तितके नुकसान कमी होते. बाजारापासून जितके जास्त अंतर असेल तितके नुकसान जास्त. सर्वात मोठी बाब म्हणजे लहान शेतांमध्ये जास्त नुकसान होते. शेतीचा आकार एका युनिटने लहान शेतकऱ्यांचे प्रति हेक्टर ३.५ किलो नुकसान होते, तर मोठ्या शेतकऱ्यांचे सुमारे १.१६ किलो नुकसान होते. या शेतकऱ्यांकडे यंत्रांची विशेषतः कंबाईन हार्वेस्टरची कमतरता आहे. भारतात कापणीनंतर मोठ्या प्रमाणात धान्य वाया जाते. याला साठवणुकीचा अभाव, पारंपारिक धान्य व्यवस्थापन प्रणाली कारणीभूत आहे.

या समस्येवर अन्न प्रक्रिया हा एक प्रभावी उपाय ठरू शकतो. अन्न प्रक्रियेमुळे दीर्घकालीन साठवणुकीची गरज कमी होते. प्रक्रिया केलेले धान्य जास्त काळ टिकते, कारण ते खराब होण्याची शक्यता कमी असते. उदाहरणार्थ गव्हाचे पीठ, रवा, ब्रेड, बिस्किटे आणि शिजवण्यासाठी तयार पदार्थांमध्ये रूपांतर केल्याने त्याचे आयुष्य वाढते. शेतकऱ्यांनी आपले उत्पादन थेट अन्न प्रक्रिया केंद्रांना विकल्यास चांगला भाव मिळू शकतो. यामुळे शेतकऱ्यांना त्यांचे धान्य खराब होण्याच्या भीतीने कमी किमतीत घाईघाईने विकण्याची गरज भासणार नाही. उदाहरणार्थ भातावर प्रक्रिया करून तांदूळ, पोहे, फुगीर तांदूळ बनवल्याने किंमत आणि मागणी वाढते.

धान्य जास्त काळ सुरक्षित राहिले आणि कमी वाया गेले तर भारत अन्न सुरक्षेच्या बाबतीत अधिक मजबूत होईल. अन्न प्रक्रिया निर्यातीच्या संधीदेखील वाढवू शकते. त्यामुळे शेतकरी आणि उद्योगांना फायदा होईल. भारत हा कृषीप्रधान देश आहे. या देशातील अर्ध्याहून अधिक लोकसंख्या शेतीवर अवलंबून आहे. त्याचे भौगोलिक स्थान आणि नैसर्गिक संसाधने हे दूध, मांस, फळे, भाज्या आणि धान्ये यासारख्या अनेक अन्नपदार्थांचे प्रमुख उत्पादक बनवतात; परंतु या उत्पादनांच्या प्रक्रियेची पातळी खूपच कमी आहे.

सरकारच्या अन्न प्रक्रिया उद्योग मंत्रालयाने २०२१ मध्ये डेलॉइट नावाच्या कंपनीच्या मदतीने केलेल्या पाहणीतून दिसून आले की फळांच्या प्रक्रियेचे प्रमाण खूपच कमी म्हणजे ४.५ टक्के आहे. भाज्यांची परिस्थिती आणखी वाईट आहे. फक्त २.७ टक्के भाज्यांवर प्रक्रिया केली जाते. दूध प्रक्रियेचा स्तर (२१.१ टक्के) थोडा चांगला आहे. मांस प्रक्रियेची पातळी सर्वाधिक (३४.२ टक्के) आहे. माशांच्या प्रक्रियेची पातळी १५.४ टक्के आहे. अन्न प्रक्रिया वाढते, तेव्हा कच्च्या मालाची मागणीही वाढते. याचा अर्थ शेतकऱ्यांच्या पिकांना चांगला भाव मिळतो. प्रक्रिया क्षेत्राच्या वाढीसह शेती केवळ उपजीविकेचे साधन बनत नाही, तर एक मोठा व्यवसायदेखील बनू शकते.

प्रा. सुखदेव बखळे

भारतात अन्न आणि पेयांचा व्यवसाय सुमारे ३८० अब्ज डॉलरचा आहे आणि यापैकी ३२ टक्के अन्न प्रक्रिया क्षेत्रातून येते. २०१४ पासून हा व्यवसाय दर वर्षी आठ टक्के दराने वाढत आहे; पण याबाबत जाणवणारी एक मोठी समस्या म्हणजे अन्नपदार्थांची नासाडी. आपल्या देशात फळे आणि भाज्यांसारख्या सुमारे ४० टक्के नाशवंत वस्तू वाया जातात. 'सीआयपीएचईटी' या सरकारी संस्थेने केलेल्या पाहणीत आढळून आले की, आपल्याकडे सुमारे ४.६५ टक्के ते ५.९९ टक्के धान्य वाया जाते. फळे आणि भाज्यांमध्ये सुमारे ४.५८ टक्के ते १५.८८ टक्क्यांपर्यंत नासाडी होते. २०१० मध्ये डाळींची नासाडी ४.३ टक्क्यांवरून ६.१ टक्क्यांपर्यंत वाढली; २०१५ मध्ये ती ६.३६ टक्क्यांवरून ८.४१ टक्क्यांपर्यंत वाढली. या पाहणीनुसार पीक काढणीनंतर होणारे नुकसान ९२,६५१

आणि शेतीशी संबंधित गोष्टींचे नुकसान झाल्यामुळे आपल्याला दर वर्षी १.५३ लाख कोटी रुपयांचे (१८.५ अब्ज डॉलर्स) नुकसान सहन करावे लागले आहे. भारतात धान्य, डाळी आणि तेलबियांचे नुकसान जागतिक पातळीपेक्षा जास्त आहे. याचे मुख्य कारण म्हणजे शेतीमध्ये यंत्रसामग्रीचा कमी वापर आणि साठवणूक आणि वाहतुकीच्या कमी सुविधा हे आहे.

चीनमध्ये धान्याचे नुकसान फक्त २.२२ टक्के आहे. भारतात ते ४.४४ टक्के आहे. फळे आणि भाज्यांचे नुकसान तृणधान्ये आणि तेलबियांपेक्षा जास्त आहे; परंतु जागतिक सरासरीच्या तुलनेत भारतात हे नुकसान कमी आहे. गुणवत्तेचा ऱ्हास हीदेखील एक मोठी समस्या आहे. आपल्या देशात धान्य, डाळी आणि तेल उत्पादनांचे नुकसान खूप मोठे आहे. फळे आणि भाज्यांचे नुकसान थोडे कमी आहे.पाहणी फक्त नुकसानाचे प्रमाण सांगते; परंतु गुणवत्तेत किती नुकसान झाले हे यावरून कळत नाही. उदाहरणार्थ पीक कापले जाते, स्वच्छ केले जाते, घरी किंवा बाजारात नेले जाते आणि नंतर गोदामे आणि दुकानांमध्ये पोहोचवले जाते, तेव्हा गुणवत्तेतही खूप नुकसान होते.

'आयसीएआर' या संस्थेतर्फे धान्याच्या प्रमाणासोबत गुणवत्तेतील तोटा मोजण्याचा प्रयत्न केला. पंजाब, मध्य प्रदेश आणि बिहारमधील काही जिल्ह्यांमध्ये भात, गहू, मका आणि सोयाबीन संबंधी ही पाहणी झाली.त्यानुसार सोयाबीनचे सर्वाधिक १५.३४ टक्के नुकसान झाल्याचे दिसून आले. गव्हाचे ७.८७ टक्के नुकसान झाले. तांदळाचे ६.३७ टक्के नुकसान झाले. मक्याचे ५.९५ टक्के नुकसान झाले.` गव्हाच्या गुणवत्तेचे नुकसान २.२७ टक्के इतके होते. याचे कारण गव्हामध्ये ओलावा शोषून घेण्याची क्षमता असते. त्यामुळे गोदामात साठवल्यावर त्याची गुणवत्ता खराब होते. गुणवत्तेत घट होणे दर्शवते की पिकाची गुणवत्ता किती खालावली आहे.

शेत जितके मोठे असेल तितके नुकसान कमी होते. कंबाईन हार्वेस्टर वापरल्याने नुकसान कमी होते. कुटुंबप्रमुखाचे शिक्षण जितके जास्त असेल तितके नुकसान कमी होते. बाजारापासून जितके जास्त अंतर असेल तितके नुकसान जास्त. सर्वात मोठी बाब म्हणजे लहान शेतांमध्ये जास्त नुकसान होते. शेतीचा आकार एका युनिटने वाढल्यास भाताचे नुकसान प्रति हेक्टर सात टक्क्यांनी कमी होते.

भारतातील ८६ टक्के शेतकऱ्यांकडे दोन हेक्टरपेक्षा कमी जमीन आहे. त्यामुळे त्यांना जास्त नुकसान सहन करावे लागते. बिहारमध्ये लहान शेतांची संख्या सर्वाधिक आहे. त्यामुळे तेथे प्रति हेक्टर नुकसानही जास्त आहे. येथे बनवल्याने किंमत आणि मागणी वाढते.

धान्य जास्त काळ सुरक्षित राहिले आणि कमी वाया गेले तर भारत अन्न सुरक्षेच्या बाबतीत अधिक मजबूत होईल. अन्न प्रक्रिया निर्यातीच्या संधीदेखील वाढवू शकते. त्यामुळे शेतकरी आणि उद्योगांना फायदा होईल. भारत हा कृषीप्रधान देश आहे. या देशातील अर्ध्याहून अधिक लोकसंख्या शेतीवर अवलंबून आहे. त्याचे भौगोलिक स्थान आणि नैसर्गिक संसाधने हे दूध, मांस, फळे, भाज्या आणि धान्ये यासारख्या अनेक अन्नपदार्थांचे प्रमुख उत्पादक बनवतात; परंतु या उत्पादनांच्या प्रक्रियेची पातळी खूपच कमी आहे.

'जीसीसी'मध्ये महाराष्ट्र कुठे?

■ अमोल शिवाजी देठे

आतापर्यंत अधिकाधिक राज्यांचा वस्तुनिर्मिती (मॅन्युफॅक्चरिंग) क्षेत्रात गुंतवणूक करण्यासाठी प्रयत्न असे. परंतु आता वस्तुनिर्मितीसोबतच, नवीन क्षेत्रे जोमाने उदयाला येत आहेत. असेच एक क्षेत्र म्हणजे ग्लोबल केपॅबिलिटी सेंटर (जीसीसी). केंद्रीय अर्थसंकल्पातही राष्ट्रीय जीसीसी धोरणाचे नियोजन केले आहे.

नुकत्याच सुरू झालेल्या 'जीसीसी'मध्ये तेलंगण सर्वांच्या पुढे आहे. खरे तर, यापूर्वीही आंध्र प्रदेश तंत्रज्ञानामध्ये आघाडीवर होते, ते तेव्हाचे मुख्यमंत्री चंद्रबाबू नायडू यांच्यामुळे. तेलंगणमध्ये देशातील सर्वांत जास्त जीसीसी आहेत. त्यामुळे तेलंगणमध्ये केवळ चार वर्षांत फक्त विदेशी गुंतवणूकच वाढलेली नाही, तर जवळपास एक लाखपेक्षा अधिक नव्या नोकऱ्या निर्माण झालेल्या आहेत. महाराष्ट्राला मात्र खूप उशीर झाला आहे आणि महाराष्ट्राला जीसीसीसाठी आता खूप प्रयत्न करावे लागतील.

■ **जीसीसी म्हणजे काय?**

जगाची बाजारपेठ आणि पुरवठा साखळी झपाट्याने बदलत आहे. डिजिटल प्रगती आणि कृत्रिम प्रज्ञा (एआय), मशिन लर्निंग यांच्या जोरावर व्यवसायाची गणिते बदलली आहेत. वस्तुनिर्मिती हा महत्त्वाचा भाग आहेच, पण सेवा क्षेत्र मात्र एआय आणि ओपन एपीआयमुळे खूप बदलत आहे. याच्याशी संलग्न अशा सेवा क्षेत्रामध्ये सध्या सर्वांत जास्त बोलबाला आहे, तो जीसीसीचा. जीसीसी म्हणजे सर्वसाधारणपणे जगभरातील कंपन्यांनी आपले युनिट दुसऱ्या देशामध्ये सुरू करणे. यामध्ये तंत्रज्ञान, इनोव्हेशन आणि टॅलेंटवर भर दिला जातो. थोडक्यात, याला साध्या भाषेत बॅक ऑफिस देखील म्हणता येईल.

आपले जीसीसी युनिट भारतामध्ये तसेच दुसऱ्या देशांमध्ये उभारण्याची चढाओढ जगभरातील मोठमोठ्या आंतरराष्ट्रीय कंपन्यांमध्ये लागली आहे. जीसीसी युनिट सेटअप केल्यामुळे त्यांना दुसऱ्या देशातील टॅलेंट सहज उपलब्ध होते. जीसीसीची मुळात सुरुवातच नवीन टॅलेंट शोधणे, तंत्रज्ञानाच्या माध्यमातून नवीन इनोव्हेशन निर्माण करणे यासाठी केलेली आहे. तसेच कंपनीच्या नवीन योजनांना पुढे घेऊन जाणे, आंतरराष्ट्रीय कंपन्यांना दुसऱ्या देशात जीसीसी युनिट सेटअप करून आपला उद्योग वाढवणे हे जास्त महत्त्वाचे वाटत आहे, कारण ते खर्चाची बचत करणारे आहे. समजा वेल्स फार्गो या अमेरिकेतील मोठ्या बहुराष्ट्रीय वित्त कंपनीला नवीन सेगमेंट सुरू करायचे असेल, तर ही कंपनी साधारणपणे तंत्रज्ञानात पारंगत असलेल्या ५०० जणांना नियुक्त करेल, तंत्रज्ञानातील इनोव्हेशनच्या जोरावर व्यवसाय वाढवेल. परंतु, त्यांच्या देशात तशी व्यवस्था निर्माण करण्यापेक्षा असे युनिट दुसऱ्या देशात निर्माण करणे, जिथे टॅलेंट पूरक असेल, पायाभूत सुविधा सुलभरीत्या उपलब्ध असतील तिथे करणे फायद्याचे ठरते. हे एक प्रकारे दुसऱ्या ठिकाणाहून आपले काम केल्यासारखे आहे. वेल्स फार्गोने हैदराबाद मध्ये जीसीसी युनिट निर्माण केलेले आहे.

आंतरराष्ट्रीय कंपन्यांनी भारतामध्ये जीसीसी निर्माण करण्याचे सर्वांत महत्त्वाचे कारण म्हणजे,

चित्र : एआय

पुढच्या काही वर्षांत जीसीसीमुळे जवळपास १९ ते २० लाख नोकऱ्या निर्माण होतील आणि भारताच्या अर्थव्यवस्थेमध्ये यामुळे ६५ अब्ज डॉलरची वाढ होईल. यात महाराष्ट्र कुठे आहे, हा प्रश्न आहे.

भारतात उपलब्ध असलेले टेक टॅलेंट. त्यातही हैदराबाद किंवा बेंगळुरूमध्ये मोठ्या प्रमाणात जाण्याचे महत्त्वाचे कारण म्हणजे तिथे – विशेषतः दक्षिण भारतात उपलब्ध असलेले टेक इंजिनीअर. त्यामुळे जगभरातील मोठमोठ्या कंपन्या भारतातील टॅलेंट मिळवण्यासाठी आपले जीसीसी युनिट भारतामध्ये निर्माण करत आहेत आणि यात झपाट्याने वाढ होत आहे

सध्या भारतामध्ये जवळपास दोन हजार जीसीसी युनिट कार्यरत आहेत. उदा. मायक्रोसॉफ्ट, डेलॉइट कन्सल्टिंग, वेल्स फार्गो, सिटी बँक, सेल्सफोर्स या आंतरराष्ट्रीय कंपन्यांनी आपली जीसीसी युनिट निर्माण केली आहेत. त्यामुळे त्यांच्या व्यवसायात वाढ होत आहे. उदा. २०२० मध्ये जेव्हा मायक्रोसॉफ्टने जीसीसीचे सेटअप केले त्या वर्षी कंपनीची भारतातून निर्यात ४,८७२ कोटी रुपयांची होती, जी २०२४मध्ये १५,३१५ कोटी रुपयांपर्यंत वाढली.

भारताच्या जीडीपीमध्ये जीसीसीचा सहभाग ४.५ टक्के सहभाग असेल, असे भाकीत विझमॅटिक या सल्लागार संस्थेने केले आहे. 'अर्न्स्ट अँड यंग'च्या 'फ्युचर ऑफ जीसीसी इन इंडिया - अ व्हिजन २०३०' या अहवालानुसार, भारतामध्ये जीसीसीचे मार्केट २०३०पर्यंत ११० अब्ज डॉलरचे होईल. परंतु महाराष्ट्रामध्ये जीसीसीचे कार्य फक्त नावापुरतेच आहे. भारतातील जीसीसी पर्वाला सुरुवातच मुळात तेलंगणपासून झालेली आहे. आज वेल्स फार्गो, मॉर्गन स्टॅनले, गोल्डमन सॅक्स, वॉलमार्ट, एअर बीएनबी या जगातील सर्वांत मोठ्या कंपन्यांचे युनिट तेलंगणमध्ये आहेत. खरे तर तेलंगणने (पूर्वीचे आंध्र प्रदेश) जोमाने टेक कंपन्यांना आपल्याकडे वळवून घेतले.

साधारण तीसेक वर्षांपूर्वी जेव्हा बिल गेट्स भारतात आले, तेव्हा चंद्रबाबू नायडू यांनी त्यांना भेटण्याची इच्छा व्यक्त केली. नायडू यांना बिल गेट्स यांच्याबरोबर दोन मिनिटे भेटण्याची संधी मिळाली. नायडू यांची बिल गेट्स यांच्यासोबतची ही मीटिंग ४० मिनिटांपर्यंत चालली. परिणामी, बिल गेट्स यांनी भारतात मायक्रोसॉफ्टची सुरुवात हैदराबादमध्ये केली. ती सुरुवात एवढी जोरात झाली की आज आयबीएम असो की गुगल, आयएसबी असो, की जेपी मॉर्गन, अधिकाधिक बहुराष्ट्रीय कंपन्यांच्या शाखा हैदराबादमध्ये आहेत. एवढेच नव्हे तर, आयकिया या स्वीडिश कंपनीनेदेखील आपली भारतातील सुरुवात हैदराबादपासून केली होती.

■ **बदलते जग आणि महाराष्ट्र**

जगाची पुरवठा साखळी बदलत आहे. त्यामुळे इथून पुढे येणारी विदेशी गुंतवणूकदेखील वेगळी असेल. त्यामुळे महाराष्ट्राला आपली धोरणे बदलावी लागतील. इथून पुढे महाराष्ट्राला गुंतवणूक मिळवण्यासाठी खूप कष्ट करावे लागतील. आतापर्यंत, राज्यामध्ये असलेला समुद्र, बंदरे आणि मुंबईसारख्या शहराचे आर्थिक राजधानी म्हणून असलेले वर्चस्व याचा खूप फायदा झाला. महाराष्ट्र सरकारला जीसीसीचे महत्त्व नक्कीच पटले आहे. दोन महिन्यांपूर्वी महाराष्ट्राचे मुख्यमंत्री देवेंद्र फडणवीस आपण चार-पाच जीसीसींबरोबर चर्चा सुरू आहे आणि नवी मुंबई, पुणे, नागपूर, संभाजीनगर येथे जीसीसी पार्क बनवणार आहोत, असे म्हणाले होते. दरम्यान आता दुसऱ्या राज्यांनीदेखील कंबर कसली आहे. यावर्षी दावोसमध्ये झालेल्या जागतिक आर्थिक परिषदेत भारतातून सहा राज्यांनी आपले स्टॉल लावले होते. कर्नाटकने त्यांचे जीसीसी धोरण अगोदरच लागू केले आहे; शिवाय तिथे जीसीसीची सुरुवातही झालेली आहे. स्पर्धा मोठी आहे आणि तंत्रज्ञानाच्या जगामध्ये उद्योगांना लागणारे टॅलेंट म्हणजेच टेक इंजिनीअर; हे महाराष्ट्रापेक्षा दक्षिणेत जास्त आहेत. त्यामुळे महाराष्ट्र सरकारला कुशल मनुष्यबळावर लक्ष द्यावे लागेल. तसेच महाराष्ट्रातील विद्यार्थ्यांनीदेखील त्यानुसार शिक्षण घ्यायला हवे.

सर्वांत महत्त्वाचे म्हणजे, महाराष्ट्रासाठी आता पुढील वाटचाल कशी असेल? उद्योगशीलता कशी कसा घडवली जाईल? नोकरी आणि आरक्षणाच्या विळख्यातून मनुष्यबळाचा योग्य वापर कसा करता येईल? अशा महत्त्वाच्या विषयांवर आराखडा तयार करायला हवा. दक्षिणेने तंत्रज्ञानात आघाडी घेतली आहे. मुंबईतील आर्थिक राजधानीला अहमदाबादच्या 'गिफ्ट सिटी'मध्ये हलवण्याचे प्रयत्न चालू आहेत. महाराष्ट्राने आपल्या धोरणांचा, नियमांचा आणि विकासाचा वेग खूप विचारपूर्वक वाढवायला हवा. एक मात्र नक्की, विदेशी गुंतवणूकदार त्याच राज्यांना निवडतील, जी राज्ये खरोखर आपली मजबूत, आधुनिक धोरणे आणि पायाभूत सुविधांच्या जोरावर 'पॉवरहाऊस' बनतील. तेलंगणने तेच दाखवून दिले आहे.

■ जीसीसी म्हणजे काय?

जगाची बाजारपेठ आणि पुरवठा साखळी झपाट्याने बदलत आहे. डिजिटल प्रगती आणि कृत्रिम प्रज्ञा (एआय), मशिन लर्निंग यांच्या जोरावर व्यवसायाची गणिते बदलली आहेत. वस्तुनिर्मिती हा महत्त्वाचा भाग आहेच, पण सेवा क्षेत्र मात्र एआय आणि ओपन एपीआयमुळे खूप बदलत आहे. याच्याशी संलग्न अशा सेवा क्षेत्रामध्ये सध्या सर्वांत जास्त बोलबाला आहे, तो जीसीसीचा. जीसीसी म्हणजे सर्वसाधारणपणे जगभरातील कंपन्यांनी आपले युनिट दुसऱ्या देशामध्ये सुरू करणे. यामध्ये तंत्रज्ञान, इनोव्हेशन आणि टॅलेंटवर भर दिला जातो. थोडक्यात, याला साध्या भाषेत बँक ऑफिस देखील म्हणता येईल.

आपले जीसीसी युनिट भारतामध्ये तसेच दुसऱ्या देशांमध्ये उभारण्याची चढाओढ जगभरातील मोठमोठ्या आंतरराष्ट्रीय कंपन्यांमध्ये लागली आहे. जीसीसी युनिट सेटअप केल्यामुळे त्यांना दुसऱ्या देशातील टॅलेंट सहज उपलब्ध होते. जीसीसीची मुळात सुरुवातच नवीन टॅलेंट शोधणे, तंत्रज्ञानाच्या माध्यमातून नवीन इनोव्हेशन निर्माण करणे यासाठी केलेली आहे. तसेच कंपनीच्या नवीन योजनांना पुढे घेऊन जाणे, आंतरराष्ट्रीय कंपन्यांना दुसऱ्या देशात जीसीसी युनिट सेटअप करून आपला उद्योग वाढवणे हे जास्त महत्त्वाचे वाटत आहे, कारण ते खर्चाची बचत करणारे आहे. समजा वेल्स फार्गो या अमेरिकेतील मोठ्या बहुराष्ट्रीय वित्त कंपनीला नवीन सेगमेंट सुरू करायचे असेल, तर ही कंपनी साधारणपणे तंत्रज्ञानात पारंगत असलेल्या ५०० जणांना नियुक्त करेल, तंत्रज्ञानातील इनोव्हेशनच्या जोरावर व्यवसाय वाढवेल. परंतु, त्यांच्या देशात तशी व्यवस्था निर्माण करण्यापेक्षा असे युनिट दुसऱ्या देशात निर्माण करणे, जिथे टॅलेंट पूरक असेल, पायाभूत सुविधा सुलभरीत्या उपलब्ध असतील तिथे करणे फायद्याचे ठरते. हे एक प्रकारे दुसऱ्या ठिकाणाहून आपले काम केल्यासारखे आहे. वेल्स फार्गोने हैदराबाद मध्ये जीसीसी युनिट निर्माण केलेले आहे.

आंतरराष्ट्रीय कंपन्यांनी भारतामध्ये जीसीसी निर्माण करण्याचे सर्वांत महत्त्वाचे कारण म्हणजे,

चित्र : एआय

पुढच्या काही वर्षांत जीसीसीमुळे जवळपास १९ ते २० लाख नोकऱ्या निर्माण होतील आणि भारताच्या अर्थव्यवस्थेमध्ये यामुळे ६५ अब्ज डॉलरची वाढ होईल. यात महाराष्ट्र कुठे आहे, हा प्रश्न आहे.

भारतात उपलब्ध असलेले टेक टॅलेंट. त्यातही हैदराबाद किंवा बेंगळुरूमध्ये मोठ्या प्रमाणात जाण्याचे महत्त्वाचे कारण म्हणजे तिथे – विशेषतः दक्षिण भारतात उपलब्ध असलेले टेक इंजिनीअर. त्यामुळे जगभरातील मोठमोठ्या कंपन्या भारतातील टॅलेंट मिळवण्यासाठी आपले जीसीसी युनिट भारतामध्ये निर्माण करत आहेत आणि यात झपाट्याने वाढ होत आहे

सध्या भारतामध्ये जवळपास दोन हजार जीसीसी युनिट कार्यरत आहेत. उदा. मायक्रोसॉफ्ट, डेलॉइट कन्सल्टिंग, वेल्स फार्गो, सिटी बँक, सेल्सफोर्स या आंतरराष्ट्रीय कंपन्यांनी आपली जीसीसी युनिट निर्माण केली आहेत. त्यामुळे त्यांच्या व्यवसायात वाढ होत आहे. उदा. २०२० मध्ये जेव्हा मायक्रोसॉफ्टने जीसीसीचे सेटअप केले त्या वर्षी कंपनीची भारतातून निर्यात ४,८७२ कोटी रुपयांची होती, जी २०२४मध्ये १५,३१५ कोटी रुपयांपर्यंत वाढली.

भारताच्या जीडीपीमध्ये जीसीसीचा सहभाग ४.५ टक्के सहभाग असेल, असे भाकीत विझमॅटिक या सल्लागार संस्थेने केले आहे. 'अर्न्स्ट अँड यंग'च्या 'फ्युचर ऑफ जीसीसी इन इंडिया - अ व्हिजन २०३०' या अहवालानुसार, भारतामध्ये जीसीसीचे मार्केट २०३०पर्यंत ११० अब्ज डॉलरचे होईल. परंतु महाराष्ट्रामध्ये जीसीसीचे कार्य फक्त नावापुरतेच आहे. भारतातील जीसीसी पर्वाला सुरुवातच मुळात तेलंगणपासून झालेली आहे. आज वेल्स फार्गो, मॉर्गन स्टॅनले, गोल्डमन सॅक्स, वॉलमार्ट, एअर बीएनबी या जगातील सर्वांत मोठ्या कंपन्यांचे युनिट तेलंगणमध्ये आहेत. खरे तर तेलंगणने (पूर्वीचे आंध्र प्रदेश) जोमाने टेक कंपन्यांना आपल्याकडे वळवून घेतले.

साधारण तीसेक वर्षांपूर्वी जेव्हा बिल गेट्स भारतात आले, तेव्हा चंद्रबाबू नायडू यांनी त्यांना भेटण्याची इच्छा व्यक्त केली. नायडू यांना बिल गेट्स यांच्याबरोबर दोन मिनिटे भेटण्याची संधी मिळाली. नायडू यांची बिल गेट्स यांच्यासोबतची ही मीटिंग ४० मिनिटांपर्यंत चालली. परिणामी, बिल गेट्स यांनी भारतात मायक्रोसॉफ्टची सुरुवात हैदराबादमध्ये केली. ती सुरुवात एवढी जोरात झाली की आज आयबीएम असो की गुगल, आयएसबी असो, की जेपी मॉर्गन, अधिकाधिक बहुराष्ट्रीय कंपन्यांच्या शाखा हैदराबादमध्ये आहेत. एवढेच नव्हे तर, आयकिया या स्वीडिश कंपनीनेदेखील आपली भारतातील सुरुवात हैदराबादपासून केली होती.

■ बदलते जग आणि महाराष्ट्र

जगाची पुरवठा साखळी बदलत आहे. त्यामुळे इथून पुढे येणारी विदेशी गुंतवणूकदेखील वेगळी असेल. त्यामुळे महाराष्ट्राला आपली धोरणे बदलावी लागतील. इथून पुढे महाराष्ट्राला गुंतवणूक मिळवण्यासाठी खूप कष्ट करावे लागतील. आतापर्यंत, राज्यामध्ये असलेला समुद्र, बंदरे आणि मुंबईसारख्या शहराचे आर्थिक राजधानी म्हणून असलेले वर्चस्व याचा खूप फायदा झाला. महाराष्ट्र सरकारला जीसीसीचे महत्त्व नक्कीच पटले आहे. दोन महिन्यांपूर्वी महाराष्ट्राचे मुख्यमंत्री देवेंद्र फडणवीस आपण चार-पाच जीसीसींबरोबर चर्चा सुरू आहे आणि नवी मुंबई, पुणे, नागपूर, संभाजीनगर येथे जीसीसी पार्क बनवणार आहोत, असे म्हणाले होते. दरम्यान आता दुसऱ्या राज्यांनीदेखील कंबर कसली आहे. यावर्षी दावोसमध्ये झालेल्या जागतिक आर्थिक परिषदेत भारतातून सहा राज्यांनी आपले स्टॉल लावले होते. कर्नाटकने त्यांचे जीसीसी धोरण अगोदरच लागू केले आहे; शिवाय तिथे जीसीसीची सुरुवातही झालेली आहे. स्पर्धा मोठी आहे आणि तंत्रज्ञानाच्या जगामध्ये उद्योगांना लागणारे टॅलेंट म्हणजेच टेक इंजिनीअर; हे महाराष्ट्रापेक्षा दक्षिणेत जास्त आहेत. त्यामुळे महाराष्ट्र सरकारला कुशल मनुष्यबळावर लक्ष द्यावे लागेल. तसेच महाराष्ट्रातील विद्यार्थ्यांनीदेखील त्यानुसार शिक्षण घ्यायला हवे.

सर्वांत महत्त्वाचे म्हणजे, महाराष्ट्रासाठी आता पुढील वाटचाल कशी असेल? उद्योगशीलता कशी कसा घडवली जाईल? नोकरी आणि आरक्षणाच्या विळख्यातून मनुष्यबळाचा योग्य वापर कसा करता येईल? अशा महत्त्वाच्या विषयांवर आराखडा तयार करायला हवा. दक्षिणेने तंत्रज्ञानात आघाडी घेतली आहे. मुंबईतील आर्थिक राजधानीला अहमदाबादच्या 'गिफ्ट सिटी'मध्ये हलवण्याचे प्रयत्न चालू आहेत. महाराष्ट्राने आपल्या धोरणांचा, नियमांचा आणि विकासाचा वेग खूप विचारपूर्वक वाढवायला हवा. एक मात्र नक्की, विदेशी गुंतवणूकदार त्याच राज्यांना निवडतील, जी राज्ये खरोखर आपली मजबूत, आधुनिक धोरणे आणि पायाभूत सुविधांच्या जोरावर 'पॉवरहाऊस' बनतील. तेलंगणने तेच दाखवून दिले आहे.

सरकार बनाएगी विदेशी दिग्गज फर्मों को टक्कर देने वाली कंपनी

भारत की कंपनी बनने से विदेशी परामर्श कंपनियों पर निर्भरता हो जाएगी कम

नई दिल्ली।

केंद सरकार भी दु निया की चार दिग्गज परामर्श एवं ऑडिट कंपनियों को टक्कर देने वाली कंपनी बनाने की योजना बना रहा है। कंपनी मामलों के मंत्रालय की सचिव दीप्ति गौर मुखर्जी की अध्यक्षता में एक समिति ऐसी देसी कंपनी बनाने के लिए जरूरी कदमों पर विचार करेगी।

यह समिति जरूरत पड़ने पर नीतिगत उपाय भी सुझाएगी। इस सिलसिले में हाल ही में पहली बैठक प्रधानमंत्री कार्यालय (पीएमओ) में हुई थी। प्रधानमंत्री के प्रमुख सलाहकार शक्तिकांत दास की अध्यक्षता में हुई इस बैठक में आर्थिक मामलों के विभाग के सचिव अजय सेठ, वित्तीय सेवा विभाग के सचिव एम नागराज, राजस्व सचिव अरविंद श्रीवास्तव और गौर मुखर्जी समेत शीर्ष सरकारी अधिकारी शामिल हुए थे।

प्रधानमंत्री की आर्थिक सलाहकार परिषद के सदस्य संजीव सान्याल ने इन शीर्ष अधिकारियों के समक्ष वैश्विक स्तर की एक ऐसी भारतीय कंपनी तैयार करने का खाका पेश किया। सूत्रों ने कहा कि इस बैठक से पहले भारतीय सनदी लेखाकार संस्थान (आईसीएआई) ने भी इस विषय पर अपनी सलाह कंपनी मामलों के मंत्रालय के अधिकारियों को दी थी। चार बड़ी कंपनियों डेलॉयट, पीडब्ल्यूसी, ईवाई और केपीएमजी को विभिन्न सरकारी मंत्रालयों एवं विभागों से काफी काम मिलता है। अब सरकार चाहती है कि ऐसी कंपनियों पर निर्भरता कम कर देश में ही एक कंपनी तैयार की जाए, जो ये काम कर सके।

भारत में जल्द ही खुद की 'बिग फोर' लेखा कंपनियां होंगी: गोयल

बर्न : वाणिज्य एवं उद्योग मंत्री पीयूष गोयल ने सोमवार को कहा कि सरकार भारत में बड़ी घरेलू लेखा कंपनियां बनाने की कोशिश कर रही है और देश में जल्द ही अपनी खुद की 'बिग फोर' कंपनियां होंगी। वर्तमान में दुनिया की 'बिग फोर' पेशेवर सेवा कंपनियां डेलॉयट, पीडब्ल्यूसी या प्राइसवाटरहाउस कूपर्स, अर्न्स्ट एंड यंग (ईवाई) और केपीएमजी हैं। ये चारों विदेशी कंपनियां भारत के लेखा परीक्षण और परामर्श क्षेत्र में हावी हैं। गोयल ने यहां संवाददाताओं से कहा, ''अब हम अपनी खुद की 'बिग फोर' कंपनियां बनाने की कोशिश कर रहे हैं। पहले नियम (दोस्ताना नहीं) थे...आप जानते हैं, हम

विलय नहीं कर सकते थे। हमारी सोच भी अलग थी। अब धीरे-धीरे लोग समझ रहे हैं...भारत में बहुत जल्द हमारी अपनी बिग फोर कंपनियां होंगी...।'' गोयल इस समय यूरोपीय देशों की आधिकारिक यात्रा पर हैं।

ਸੀਜੀਸੀ ਝੰਜੇੜੀ 'ਚ ਪਲੇਸਮੈਂਟ ਦਿਹਾੜਾ ਮਨਾਇਆ

ਸਟਾਫ ਰਿਪੋਰਟਰ • ਪੰਜਾਬੀ ਜਾਗਰਣ

ਐਸਏਐਸ ਨਗਰ : ਚੰਡੀਗੜ੍ਹ ਗਰੁੱਪ ਆਫ਼ ਕਾਲਜਿਜ਼ ਮੁਹਾਲੀ, ਝੰਜੇੜੀ ਕੈਂਪਸ ਮਿਆਰੀ ਸਿੱਖਿਆ ਦੇਣ ਤੋਂ ਬਿਹਤਰੀਨ ਨੌਕਰੀ ਦੇ ਮੌਕਿਆਂ ਨੂੰ ਉਪਲਬਧ ਕਰਾਉਣ ਲਈ ਮੰਨਿਆ ਜਾਂਦਾ ਹੈ। ਇਸ ਸਾਲ ਵੀ ਸੀਜੀਸੀ ਮੁਹਾਲੀ, ਝੰਜੇੜੀ ਨੇ ਆਪਣੇ ਪਿਛਲੇ 2024 ਵਿਚ ਮਿਲੀ 45.5 ਲੱਖ ਦੀ ਸਭ ਤੋਂ ਵੱਧ ਪੈਕੇਜ ਰਕਮ ਰਿਕਾਰਡ ਨੂੰ ਦੁੱਗਣਾ ਕਰਦੇ ਹੋਏ ਇਕ ਕਰੋੜ ਦਾ ਟੀਚਾ ਪ੍ਰਾਪਤ ਕੀਤਾ ਹੈ। ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਕੈਂਪਸ ਵੱਲੋਂ ਲਗਾਤਾਰ ਹਾਸਲ ਹੋ ਰਹੀ ਬਿਹਤਰੀਨ ਪਲੇਸਮੈਂਟ ਉਪਲਬਧੀ ਨੂੰ ਮਨਾਉਣ ਲਈ ਮੈਨੇਜਮੈਂਟ ਵੱਲੋਂ ਕੈਂਪਸ ਵਿਚ ਪਲੇਸਮੈਂਟ ਦਿਹਾੜਾ ਮਨਾਇਆ ਗਿਆ।

ਜ਼ਿਕਰੇਖਾਸ ਹੈ ਕਿ ਬੀ.ਟੈਕ ਦੇ ਵੱਖ-ਵੱਖ ਸਟ੍ਰੀਮ, ਬੀਬੀਏ, ਐਮਬੀਏ, ਬੀਸੀਏ, ਬੀ.ਕਾਮ, ਫੈਸ਼ਨ ਟੈਕਨੋਲੋਜੀ ਅਤੇ ਖੇਤੀਬਾੜੀ ਸਮੇਤ ਹੋਰ ਕਈ ਸਟ੍ਰੀਮ ਦੇ ਵਿਦਿਆਰਥੀਆਂ ਦੀ ਡਿਗਰੀ ਜੁਲਾਈ, 2025 ਵਿਚ ਪੂਰੀ ਹੋਣੀ ਹੈ। ਇਨ੍ਹਾਂ ਵਿਦਿਆਰਥੀਆਂ ਵਿਚੋਂ ਲਗਭਗ ਸਭ ਕਾਬਿਲ ਵਿਦਿਆਰਥੀਆਂ ਦੀ ਚੋਣ ਵਿਸ਼ਵ ਦੀਆਂ ਚੋਟੀ ਦੀਆਂ ਬਹੁਕੌਮੀ ਕੰਪਨੀਆਂ ਅਤੇ ਵਿੱਤੀ ਅਦਾਰਿਆਂ ਵੱਲੋਂ ਕੈਂਪਸ ਵਿਚ ਜ਼ਿਰਕਤ ਕਰਦੇ ਹੋਏ ਡਿਗਰੀ ਪੂਰੀ ਹੋਣ ਤੋਂ ਪਹਿਲਾਂ ਹੀ ਕਰ ਲਈ ਗਈ ਹੈ। ਇਕ ਪਾਸੇ ਜਿੱਥੇ ਇਸ ਸਾਲ ਦਾ ਵੱਧ ਤੋਂ ਵੱਧ ਪੈਕੇਜ ਇਕ ਕਰੋੜ ਤਕ ਪਹੁੰਚ ਗਿਆ ਹੈ, ਉੱਥੇ ਹੀ ਔਸਤਨ ਪੈਕੇਜ 6.34 ਲੱਖ ਦਾ ਰਿਹਾ ਹੈ। ਇਹ ਉਪਲਬਧੀ ਉਦਯੋਗ ਕੰਪਨੀਆਂ ਦੀ ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਦੇ ਭਰੋਸੇ ਨੂੰ ਦਰਸਾਉਂਦੇ ਹਨ। ਕੁੱਲ ਜੌਬ ਆਫ਼ਰ ਦੇ ਗੁਣਾ ਤੋਂ ਵੀ ਵੱਧ ਵਧਦਿਆਂ 872 ਤੋਂ ਵੱਧ ਕੇ 1,960 ਤਕ ਪਹੁੰਚ ਗਏ ਹਨ। ਕੈਂਪਸ ਵਿਚ ਚੋਣ ਕਰਨ ਆਉਣ ਵਾਲੀਆਂ ਕੰਪਨੀਆਂ ਦੀ ਗਿਣਤੀ ਵੀ 650 ਤੋਂ ਵੱਧ ਕੇ 1,133 ਤੋਂ ਉੱਪਰ ਚਲੀ ਗਈ ਹੈ।

ਸਫ਼ਲਤਾ ਦਾ ਇਹ ਮੁਕਾਮ ਇੱਥੇ ਹੀ ਖ਼ਤਮ ਨਹੀਂ ਹੁੰਦਾ ਬਲਕਿ ਅਖੀਰੀ ਸਮੈਸਟਰ ਵਿਚ ਇੰਟਰਨਸ਼ਿਪ ਹਾਸਲ ਕਰਨ ਦੇ ਇੰਟਰਨਸ਼ਿਪ ਮੌਕਿਆਂ ਵਿਚ ਵੀ ਕਾਫ਼ੀ ਉਛਾਲ ਆਇਆ। ਸਭ ਤੋਂ ਵੱਧ ਮਿਲੀ ਸਟਾਈਪੈਂਡ 2024 ਦੀ 0.5 ਲੱਖ ਤੋਂ ਵਧ ਕੇ 2025 ਵਿਚ 1.5 ਲੱਖ ਹੋ ਗਈ, ਜਿਸ ਨਾਲ ਉਦਯੋਗ ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਦੇ ਪ੍ਰੈਕਟੀਕਲ ਸਿੱਖਣ ਮਾਡਲ 'ਤੇ ਭਰੋਸਾ ਜਤਾਉਂਦਾ ਹੈ।

ਸੀਜੀਸੀ ਦੇ ਐਮਡੀ ਅਰਸ਼ ਧਾਲੀਵਾਲ ਨੇ ਇਸ ਸਬੰਧੀ ਜਾਣਕਾਰੀ ਸਾਂਝੀ ਕਰਦੇ ਹੋਏ ਦੱਸਿਆ ਕਿ ਝੰਜੇੜੀ ਕੈਂਪਸ ਦੇ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਮਾਈਕ੍ਰੋਸਾਫਟ, ਐਮਾਜ਼ਾਨ, ਸਰਵਿਸਨਾਓ, ਇੰਫੋਸਿਸ, ਡੇਲੋਇਟ, ਕੈਪਜੇਮਿਨੀ, ਐਚਸੀਐਲ, ਵਿਪਰੋ ਜਿਹੀਆਂ ਸਿਰਮੌਰ ਕੌਮਾਂਤਰੀ ਕੰਪਨੀਆਂ ਪਲੇਸਮੈਂਟ ਲਈ ਪਹੁੰਚ ਰਹੀਆਂ ਹਨ। ਇਸ ਦੇ ਇਲਾਵਾ 1,133 ਕੰਪਨੀਆਂ ਦੀ ਲੰਬੀ ਲਿਸਟ ਹੈ ਜੋ ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਦੀ ਬਿਹਤਰੀਨ ਪ੍ਰੈਕਟੀਕਲ ਸਿੱਖਿਆ ਸਦਕਾ ਪ੍ਰੈਕਟੀਕਲ ਪਲੇਸਮੈਂਟ ਲਈ ਪਹੁੰਚ ਰਹੀਆਂ ਹਨ। ਜਦ ਕਿ ਕੁੱਝ ਵਿਦਿਆਰਥੀ ਅਜਿਹੇ ਵੀ ਹਨ, ਜਿਨ੍ਹਾਂ ਨੂੰ ਇਕ ਤੋਂ ਵੱਧ ਕੰਪਨੀਆਂ ਨੇ ਨੌਕਰੀ ਦੀ ਪੇਸ਼ਕਸ਼ ਕੀਤੀ ਹੈ। ਉਨ੍ਹਾਂ ਅੱਗੇ ਕਿਹਾ ਕਿ ਇਕ ਪਾਸੇ ਜਿੱਥੇ ਪ੍ਰਾਈਵੇਟ ਉੱਚ ਸਿੱਖਿਆ ਅਦਾਰੇ ਆਰਥਿਕ ਚੁਨੌਤੀਆਂ ਕਾਰਨ ਘਟਦੇ ਪਲੇਸਮੈਂਟ ਦਰ ਦਰਸਾ ਰਹੇ ਹਨ, ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਨੇ 18 ਫ਼ੀਸਦੀ ਦੀ ਵਾਧੂ ਰਿਕਾਰਡ ਕਰਕੇ ਇਕ ਵੱਖਰੀ ਪਹਿਚਾਣ ਬਣਾਈ ਹੈ। ਇਹ ਉਪਲਬਧੀ ਸੰਸਥਾ ਦੀ ਨਵੀਨਤਮ ਸੋਚ, ਤਕਨੀਕੀ ਤਾਲਮੇਲ ਵਾਲੇ ਕੋਰਸ ਅਤੇ ਪ੍ਰੈਕਟੀਕਲ ਸਿੱਖਣ ਦੀ ਤਰੱਕੀ ਨੂੰ ਦਰਸਾਉਂਦਾ ਹੈ।

ਪ੍ਰੈਜ਼ੀਡੈਂਟ ਧਾਲੀਵਾਲ ਨੇ ਇਸ ਉਪਲਬਧੀ 'ਤੇ ਸਾਰੀ ਟੀਮ ਨੂੰ ਵਧਾਈ ਦਿੰਦੇ ਹੋਏ ਦੱਸਿਆ ਕਿ ਸੀਜੀਸੀ ਝੰਜੇੜੀ ਕੈਂਪਸ ਵੱਲੋਂ ਦਾਖ਼ਲਾ ਲੈਣ ਵਾਲੇ ਹਰ ਵਿਦਿਆਰਥੀ ਨੂੰ ਪੜ੍ਹਾਈ ਦੇ ਪਹਿਲੇ ਸਾਲ ਤੋਂ ਇੰਡਸਟਰੀ ਪ੍ਰੋਜੈਕਟਾਂ ਵਿਚ ਭਾਗੀਦਾਰ ਬਣਾਉਣ, ਕੇਸ ਸਟੱਡੀ ਕਰਨ ਆਦਿ ਸਮੇਤ ਪ੍ਰੀ-ਪਲੇਸਮੈਂਟ ਟਰੇਨਿੰਗ 360 ਡਿਗਰੀ ਤਰੀਕੇ ਨਾਲ ਦਿੱਤੀ ਜਾਂਦੀ ਹੈ। ਇਸ ਤਰ੍ਹਾਂ ਟੀਮ ਵੱਲੋਂ ਕੀਤੇ ਜਾਂਦੇ ਸਾਂਝੇ ਉਪਰਾਲੇ ਸਦਕਾ ਜਿੱਥੇ ਇਕ ਪਾਸੇ ਕੰਪਨੀਆਂ ਸਾਰਾ ਸਾਲ ਕੈਂਪਸ ਵਿਚ ਪਲੇਸਮੈਂਟ ਲਈ ਆਉਂਦੀਆਂ ਰਹਿੰਦੀਆਂ ਹਨ, ਉੱਥੇ ਹੀ ਨਾਲ-ਨਾਲ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਇੰਟਰਵਿਊ ਲਈ ਪਹਿਲਾਂ ਹੀ ਪੂਰੀ ਤਰ੍ਹਾਂ ਤਿਆਰ ਕਰ ਲਿਆ ਜਾਂਦਾ ਹੈ। ਉਨ੍ਹਾਂ ਇਸ ਉਪਲਬਧੀ ਦਾ ਸਿਹਰਾ ਅਧਿਆਪਕਾਂ ਵੱਲੋਂ ਬਿਹਤਰੀਨ ਸਿੱਖਿਆ, ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਦਿੱਤੀ ਜਾਣ ਵਾਲੀ ਪ੍ਰੈਕਟੀਕਲ ਜਾਣਕਾਰੀ, ਪਲੇਸਮੈਂਟ ਵਿਭਾਗ ਵੱਲੋਂ ਪ੍ਰੀ-ਪਲੇਸਮੈਂਟ ਟਰੇਨਿੰਗ ਅਤੇ ਵਿਦਿਆਰਥੀਆਂ ਵੱਲੋਂ ਦਿੱਤੇ ਜਾ ਰਹੇ ਬਿਹਤਰੀਨ ਨਤੀਜਿਆਂ ਨੂੰ ਦਿੰਦੇ ਹੋਏ ਅਗਾਹ ਸਫ਼ਲਤਾ ਦੀਆਂ ਹੋਰ ਉਚਾਈਆਂ ਦੀ ਸੰਭਾਵਨਾ ਪ੍ਰਗਟ ਕੀਤੀ। ਇਸ ਖ਼ੁਸ਼ੀ ਦੇ ਮੌਕੇ 'ਤੇ ਮੈਨੇਜਮੈਂਟ ਵੱਲੋਂ ਕੇਕ ਕੱਟਣ ਦੀ ਰਸਮ ਵੀ ਅਦਾ ਕੀਤੀ ਗਈ।

ਸਮਝੌਤਾ | ਸੀ.ਜੀ.ਸੀ. ਲਾਂਡਰਾਂ ਵੱਲੋਂ ਕ੍ਰੋਏਸ਼ੀਆ ਅਤੇ ਅਮਰੀਕਾ ਦੀਆਂ ਯੂਨੀਵਰਸਿਟੀਆਂ ਨਾਲ ਓ.ਐੱਮ.ਯੂ. 'ਤੇ ਹਸਤਾਖ਼ਰ

ਹੁਣ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਮਿਲਣਗੇ ਵਧੇਰੇ ਖੋਜ ਦੇ ਮੌਕੇ

ਮੋਹਾਲੀ, 10 ਜੂਨ (ਰਣਬੀਰ) : ਚੰਡੀਗੜ੍ਹ ਗਰੁੱਪ ਆਫ਼ ਕਾਲਜਿਜ਼ (ਸੀ.ਜੀ.ਸੀ.) ਲਾਂਡਰਾਂ ਦੇ ਕੌਮਾਂਤਰੀ ਮਾਮਲਿਆਂ ਦੇ ਵਿਭਾਗ ਨੇ ਦੁਨੀਆ ਭਰ 'ਚ ਆਪਣੇ ਅਕਾਦਮਿਕ ਨੈੱਟਵਰਕ ਨੂੰ ਵਧਾਉਣ ਦੇ ਮੱਦੇਨਜ਼ਰ ਦੋ ਕੌਮਾਂਤਰੀ ਸੰਸਥਾਵਾਂ ਡੁਬਰੋਵਨਿਕ ਯੂਨੀਵਰਸਿਟੀ, ਕਰੋਸ਼ੀਆ ਅਤੇ ਯੇਸ਼ਿਵਾ ਯੂਨੀਵਰਸਿਟੀ, ਨਿਊਯਾਰਕ ਸਿਟੀ, ਅਮਰੀਕਾ ਨਾਲ ਸਮਝੌਤਾ ਪੱਤਰਾਂ (ਐੱਮ.ਓ.ਯੂ.) 'ਤੇ ਹਸਤਾਖ਼ਰ ਕੀਤੇ ਹਨ। ਇਸ ਭਾਈਵਾਲੀ ਦਾ ਮੁੱਖ ਉਦੇਸ਼ ਵਿਦਿਆਰਥੀਆਂ ਅਤੇ ਫੈਕਲਟੀ ਮੈਂਬਰਾਂ ਨੂੰ ਗਲੋਬਲ ਯੋਗਤਾਵਾਂ, ਵਿਭਿੰਨ ਸਿੱਖਣ ਦੇ ਅਨੁਭਵਾਂ ਅਤੇ ਵਧੇਰੇ ਰਿਸਰਚ ਦੇ ਮੌਕਿਆਂ ਨਾਲ ਲੈਸ ਕਰਨਾ ਹੈ।

ਸੀ.ਜੀ.ਸੀ. ਨੇ ਹੁਣ ਤੱਕ ਦੁਨੀਆ ਭਰ ਦੀਆਂ ਪ੍ਰਮੁੱਖ ਵਿੱਦਿਅਕ ਸੰਸਥਾਵਾਂ ਨਾਲ 60 ਤੋਂ ਵੱਧ ਸਮਝੌਤਾ ਪੱਤਰਾਂ 'ਤੇ ਹਸਤਾਖ਼ਰ ਕੀਤੇ ਹਨ, ਜਿਨ੍ਹਾਂ 'ਚ ਅਮਰੀਕਾ, ਆਸਟ੍ਰੇਲੀਆ, ਯੂ.ਕੇ., ਕੈਨੇਡਾ, ਬੈਲਜੀਅਮ ਅਤੇ ਏ.ਏ.ਸੀ.ਐੱਸ.ਬੀ. ਮਾਨਤਾ ਪ੍ਰਾਪਤ ਯੂਨੀਵਰਸਿਟੀਆਂ ਆਦਿ ਸ਼ਾਮਲ ਹਨ। ਯੂਨੀਵਰਸਿਟੀ ਆਫ਼ ਡੁਬਰੋਵਨਿਕ (ਕ੍ਰੋਏਸ਼ੀਆ) ਨਾਲ ਗਠਜੋੜ ਸੀ.ਜੀ.ਸੀ.

ਲਈ ਸੰਯੁਕਤ ਅਕਾਦਮਿਕ ਖੋਜ, ਆਰ.ਐਂਡ ਡੀ. ਉਪਰਾਲਿਆਂ ਅਤੇ ਵਿਕਾਸ ਪਹਿਲਕਦਮੀਆਂ, ਫੈਕਲਟੀ ਅਤੇ ਵਿਦਿਆਰਥੀ ਆਦਾਨ-ਪ੍ਰਦਾਨ ਪ੍ਰੋਗਰਾਮਾਂ, ਅਕਾਦਮਿਕ ਗਤੀਸ਼ੀਲਤਾ ਅਤੇ ਅਧਿਐਨ ਦੌਰਿਆਂ 'ਚ ਸਹਿਯੋਗ ਲਈ ਮੌਕੇ ਪ੍ਰਦਾਨ ਕਰੇਗਾ। ਕੇ.ਏ. 171 ਯੂਰਪੀ ਯੂਨੀਅਨ ਪ੍ਰਾਜੈਕਟ ਦੇ ਢਾਂਚੇ ਹੇਠ ਹਾਲ ਹੀ 'ਚ ਕ੍ਰੋਏਸ਼ੀਆ ਦੌਰੇ ਦੌਰਾਨ ਸੀ.ਬੀ.ਐੱਸ.ਏ. ਦੇ ਡਾਇਰੈਕਟਰ ਪ੍ਰਿੰਸੀਪਲ ਅਤੇ ਡੀਨ ਇੰਟਰਨੈਸ਼ਨਲ ਅਫੇਅਰਜ਼, ਸੀ.ਜੀ.ਸੀ. ਲਾਂਡਰਾਂ ਦੇ ਡਾ. ਰਮਨਦੀਪ ਸੈਣੀ ਅਤੇ ਐਸੋਸੀਏਟ ਡਾਇਰੈਕਟਰ, ਟੀ.ਪੀ.ਪੀ., ਸੀ.ਜੀ.ਸੀ. ਲਾਂਡਰਾਂ ਦੇ ਮਨਦੀਪ ਸਿੰਘ ਵੱਲੋਂ ਅਧਿਕਾਰਿਤ ਤੌਰ 'ਤੇ ਹਸਤਾਖ਼ਰ ਕੀਤੇ ਗਏ।

ਇਸੇ ਤਰ੍ਹਾਂ ਹੀ ਅਕਾਦਮਿਕ ਸਾਂਝੇਦਾਰੀ ਤਹਿਤ ਸੀ.ਜੀ.ਸੀ. ਲਾਂਡਰਾਂ ਨੇ ਅਮਰੀਕਾ ਦੇ ਨਿਊਯਾਰਕ ਸਿਟੀ ਵਿਖੇ ਸਥਿਤ ਪ੍ਰਮੁੱਖ ਯੇਸ਼ਿਵਾ ਯੂਨੀਵਰਸਿਟੀ ਨਾਲ ਵੀ ਇਕ ਸਮਝੌਤਾ ਪੱਤਰ 'ਤੇ ਹਸਤਾਖ਼ਰ ਕੀਤੇ ਹਨ। ਇਸ ਰਾਹੀਂ ਕ੍ਰੈਡਿਟ ਟ੍ਰਾਂਸਫਰ ਪ੍ਰੋਗਰਾਮਾਂ, ਉੱਚ ਸਿੱਖਿਆ ਦੇ ਮੌਕਿਆਂ, ਫੈਕਲਟੀ ਅਤੇ ਵਿਦਿਆਰਥੀ ਆਦਾਨ-ਪ੍ਰਦਾਨ ਨਾਲ ਕੋਆਪ੍ਰੇਟਿਵ ਸਿੱਖਿਆ ਦੇ ਮੌਕੇ ਉਪਲਬਧ ਹੋਣਗੇ। ਸੀ.ਜੀ.ਸੀ. ਲਾਂਡਰਾਂ ਦੇ ਪ੍ਰਧਾਨ ਰਸ਼ਪਾਲ ਸਿੰਘ ਧਾਲੀਵਾਲ ਨੇ ਕਿਹਾ ਕਿ ਇਹ ਸਮਝੌਤੇ ਸਾਡੇ ਵਿਦਿਆਰਥੀਆਂ ਨੂੰ ਪਰਿਵਰਤਨਸ਼ੀਲ ਗਲੋਬਲ ਸਿੱਖਿਆ ਅਤੇ ਅਨੁਭਵ ਮੁਹੱਈਆ ਕਰਵਾਉਣ ਦੀ ਸਾਡੀ ਦੂਰਦਰਸ਼ੀ ਸੋਚ ਨੂੰ ਦਰਸਾਉਂਦੇ ਹਨ। ਕੌਮਾਂਤਰੀ ਅਕਾਦਮਿਕ ਗਠਜੋੜਾਂ ਨੂੰ ਉਤਸ਼ਾਹਿਤ ਕਰ ਕੇ ਉਹ ਆਪਣੇ ਵਿਦਿਆਰਥੀਆਂ ਅਤੇ ਫੈਕਲਟੀ ਨੂੰ ਅਰਥਪੂਰਨ ਖੋਜ 'ਚ ਸ਼ਾਮਲ ਹੋਣ, ਅੰਤਰ ਸੱਭਿਆਚਾਰਕ ਐਕਸਪੋਜ਼ਰ ਅਤੇ ਉਨ੍ਹਾਂ ਦੀਆਂ ਅਕਾਦਮਿਕ ਯਾਤਰਾਵਾਂ ਨੂੰ ਹੋਰ ਫਲਦਾਇਕ ਬਣਾਉਣ ਲਈ ਸ਼ਕਤੀ ਪ੍ਰਦਾਨ ਕਰਨ ਦਾ ਯਤਨ ਕਰਦੇ ਹਾਂ।

An alternative to the 'Big 4' is necessary for developed India

6 • PG | 320 • Sqcm | 179121 • AVE | 24.58K • Cir | Top Left

Kolkata

विकसित भारत के लिए 'बिग 4' का विकल्प जरूरी

प्रधानमंत्री कार्यालय में हाल ही हुई एक बैठक से यह स्पष्ट संकेत मिला कि सरकार देश में वैश्विक 'बिग 4' कंसल्टिंग फर्मों- डेलॉइट, ईवाय, केपीएमजी और पीडब्ल्यूसी की निर्भरता कम कर अपनी घरेलू सलाहकार कंपनियों को आगे लाने की दिशा में गंभीर है। यह केवल व्यावसायिक आत्मनिर्भरता का ही प्रश्न नहीं है, बल्कि रणनीतिक संप्रभुता और नीतिगत स्वतंत्रता का भी मामला बनता जा रहा है। भारत में नीति निर्धारण से लेकर सरकारी सुधारों और कॉर्पोरेट पुनर्गठन तक के कई क्षेत्रों में विदेशी कंसल्टिंग फर्मों की भूमिका बहुत अधिक रही है। इन फर्मों ने वर्षों से केंद्र और राज्य सरकारों के साथ अनेक परियोजनाओं पर कार्य किया है। हालांकि सवाल भी उठते रहे हैं कि क्या विदेशी सलाहकार हमारी जमीनी सच्चाइयों को देशज संस्थानों जितनी बारीकी से समझ सकते हैं?

सरकार की चिंता दो स्तरों पर है- पहला, डेटा सुरक्षा और गोपनीयता, और दूसरा, स्थानीय प्रतिभा का उचित उपयोग। जब नीति, प्रशासन और रणनीतिक प्रोजेक्ट्स की जिम्मेदारी विदेशी कंपनियों को दी जाती है, तब देश के भीतर का नॉलेज इकोसिस्टम कमजोर होता है और निर्णय प्रक्रिया पर बाहरी प्रभाव की आशंका बढ़ती है। भारत के पास आज मजबूत टेक्नोलॉजिकल इन्फ्रास्ट्रक्चर है, बेजोड़ युवा प्रतिभा है और उद्यमिता का विस्तार भी हो रहा है। ऐसे में यह उपयुक्त समय है जब देश अपनी खुद की कंसल्टिंग इंडस्ट्री को आकार देने का प्रयास करे। स्टार्टअप संस्कृति, इंजीनियरिंग और मैनेजमेंट संस्थानों से निकलते नवाचारों को नीति-निर्माण और कॉर्पोरेट सलाह में बदला जा सकता है। आत्मनिर्भर भारत केवल उत्पादन तक सीमित नहीं रह सकता, यह विचार और योजना के स्तर पर भी स्वावलंबी बने, तभी वह टिकाऊ और पूर्ण होगा। भारत को अब 'बिग 4' पर निर्भरता खत्म कर देशी सोच, देशी विशेषज्ञता और देशी आत्मबल पर आधारित भविष्य की ओर बढ़ना होगा।

लेकिन, सवाल है कैसे? सबसे पहले, सरकार को स्थानीय फर्मों के लिए एक 'प्राथमिकता नीति' बनानी होगी। जैसे छोटे और लघु उद्योगों को कुछ सरकारी टेंडरों में प्राथमिकता दी जाती है, वैसे ही कंसल्टिंग प्रोजेक्ट्स में घरेलू संस्थानों को मौका दिया जाए। दूसरा कदम होगा गुणवत्ता और पारदर्शिता का निर्माण। 'बिग 4' की सफलता केवल उनके ग्लोबल ब्रांड या नेटवर्क पर आधारित नहीं है। यह उनकी कार्यप्रणाली की गुणवत्ता, रिपोर्टिंग ढांचे और प्रोफेशनलिज्म पर भी टिकी है। भारत की घरेलू फर्मों को भी इसी स्तर की पेशेवर प्रतिबद्धता अपनानी होगी, जिससे वे सरकार और कॉर्पोरेट जगत में विश्वास अर्जित कर सकें। तीसरा, थिंक टैंक और कंसल्टिंग फर्मों के बीच गतिशील इकोसिस्टम के लिए शैक्षिक संस्थानों और नीति संस्थाओं के बीच मजबूत साझेदारी बनानी होगी। यह नीति निर्माण को स्थानीय संदर्भों से जोड़ने में सहायक होगा।

तकनीकी कौशल की ओर अग्रसर भारत

अब तक यह माना जाता रहा है कि हमारे देश में उद्योग अनुरूप व्यवस्था होने में अक्सर बहुत देरी होती है। इस कारण वैश्विक रोजगार बाजार तक भारत की पहुंच अपेक्षाकृत कम रही है। परंतु केंद्र सरकार की ओर से किए जा रहे अनेक प्रयासों से इस स्थिति में व्यापक परिवर्तन देखने में आ रहा है। वस्तुतः भारत को 2047 तक एक वैश्विक विनिर्माण महाशक्ति के रूप में विकसित करने की योजना के तहत अनेक क्षेत्रों में एक मजबूत नीतिगत और संस्थागत ढांचा तैयार किया जा रहा है। उम्मीद की जा रही है कि तकनीकी कौशल के मामले में भारत जल्द ही विश्व के अग्रणी देशों में शामिल हो सकता है

उद्योग अनुरूप कौशल विकास की दिशा में तेजी से आगे बढ़ रहा भारत। प्रतीकात्मक

भारत को स्वतंत्रता के शताब्दी वर्ष 2047 तक एक वैश्विक विनिर्माण महाशक्ति के रूप में विकसित करने की योजना है। केंद्र सरकार ने इसके लिए इंडस्ट्री कैंपस सहयोग और कौशल नवाचार के दोहरे इंजन द्वारा साधने के लिए एक मजबूत नीतिगत और संस्थागत ढांचा तैयार किया है। चौथी औद्योगिक क्रांति और उससे आगे की सफलता इस बात पर निर्भर करेगी कि हम ज्ञान, नवाचार और मानव श्रम को कितनी अच्छी तरह एकीकृत करते हैं। भारत के वैश्विक विनिर्माण शक्ति बनने की आकांक्षा की प्रमुख बाधा अवसरों की कमी नहीं है, बल्कि जाब-रेडी टैलेंट की कमी है। आज भारत हर वर्ष 15 लाख से अधिक इंजीनियर तैयार करता है, लेकिन कई रिपोर्टों के अनुसार, केवल संख्या बल ही वैश्विक प्रतिस्पर्धा की कसौटी नहीं है। विश्व बैंक की 2024 इंडिया स्किल्स रिपोर्ट बताती है कि एआइ, रोबोटिक्स, क्लीन टेक और इंडस्ट्री 4.0 जैसे उभरते क्षेत्रों में केवल 46 प्रतिशत स्नातक युवा ही जाब-रेडी हैं, जिससे पाठ्यक्रम में बदलाव, अनुभव आधारित शिक्षा और हाइब्रिड स्किल की आवश्यकता स्पष्ट होती है।

डेलाएट-एनएसडीसी की एक रिपोर्ट के अनुसार, भारत को 2030 तक विनिर्माण और अवसंरचना क्षेत्रों में 2.9 करोड़ से अधिक कुशल पेशेवरों की कमी का सामना करना पड़ सकता है। एआइ, रोबोटिक्स, आइओटी और एडिटिव मैन्युफैक्चरिंग जैसे उद्योगों में टेक्नोलाजी तेजी से इंटेलिजेंट और इंटरकनेक्टेड सिस्टम में बदल रही है। ऐसे में मांग सामान्य श्रमिकों से हटकर ऐसे बहु-कौशलयुक्त, डिजिटल रूप से सक्षम पेशेवरों की बढ़ गई है, जो नवाचार-आधारित वातावरण में कार्य कर सकें।

शैक्षणिक पाठ्यक्रमों और औद्योगिक जरूरतों के बीच असंतुलन ने श्रमिकों के एक बड़े हिस्से को या तो बेरोजगार या अल्प-रोजगार में ढाल दिया है। यह चुनौती ग्रामीण और अर्ध-शहरी क्षेत्रों में और अधिक जटिल हो जाती है, जहां गुणवत्तापूर्ण कौशल प्रशिक्षण की पहुंच सीमित है। इस गंभीर अंतर को पहचानते हुए मोदी सरकार ने इस खाई को पाटने के लिए क्रांतिकारी कदम उठाए हैं, जैसे स्किल इंडिया मिशन, राष्ट्रीय शिक्षा नीति 2020, स्किल इंडिया डिजिटल हब, आइटीआइ का आधुनिकीकरण और उत्पादन आधारित प्रोत्साहन (पीएलआइ) योजनाएं।

स्किलिंग इकोसिस्टम : भारत को चौथी औद्योगिक क्रांति में केवल भागीदार नहीं, बल्कि अग्रणी बनाने के उद्देश्य से केंद्र सरकार ने एक मजबूत, बहुआयामी नीतिगत ढांचा तैयार किया है, जो शिक्षा, कौशल विकास और औद्योगिक विकास को आपस में जोड़ता है। ये सुधार अलग-अलग प्रयास नहीं हैं, बल्कि 2047 में विकसित भारत के व्यापक राष्ट्रीय दृष्टिकोण के अंतर्गत आपस में जुड़े हुए एकीकृत प्रयास हैं।

स्किल इंडिया डिजिटल हब : स्किल इंडिया मिशन की डिजिटल रीढ़ के रूप में लांच किया गया कार्यक्रम वैयक्तिकृत शिक्षा, एआइ-सक्षम करियर पाथ-वे और एक डायनामिक जाब-मैचिंग इंजन प्रदान करता है। वर्ष 2030 तक 50 करोड़ भारतीयों को कौशल देने का लक्ष्य लेकर चला यह मंच अब तक 2.5 करोड़ से अधिक शिक्षार्थियों को जोड़ चुका है।

उत्पादन आधारित प्रोत्साहन योजना : दो लाख करोड़ की पीएलआइ योजना, इलेक्ट्रानिक्स, आटोमोबाइल, फार्मा और सौर ऊर्जा माड्यूल जैसे क्षेत्रों को कवर करती है और इसने एपल और टेस्ला के आपूर्तिकर्ताओं और माइक्रोन जैसी वैश्विक कंपनियों को भारत में विनिर्माण आधार स्थापित करने के लिए आकर्षित किया है। डीपीआइआइटी की 2024 की रिपोर्ट के अनुसार, पीएलआइ से जुड़े क्षेत्रों में अब तक पांच लाख से अधिक प्रत्यक्ष रोजगार सृजित हो चुके हैं।

राष्ट्रीय शिक्षा नीति 2020 : सर्वसमावेशी और व्यावसायिक शिक्षा को मिलाकर तैयार की गई नई राष्ट्रीय शिक्षा नीति 2020 स्कूल स्तर पर कोडिंग, इंटर्नशिप और अनुभवात्मक शिक्षा को अनिवार्य बनाती है। इसके परिणामस्वरूप अब तक 12 हजार से अधिक स्कूलों में स्किल हब स्थापित किए जा चुके हैं, जो एआइ, इलेक्ट्रानिक्स और डाटा साइंस जैसे विषयों में प्रारंभिक प्रशिक्षण दे रहे हैं। यूनेस्को की ग्लोबल एजुकेशन मानिटरिंग रिपोर्ट ने भारत की राष्ट्रीय शिक्षा नीति को 'दुनिया की सबसे भविष्योन्मुखी शैक्षिक नीतियों में से एक' बताया है।

राष्ट्रीय अप्रेंटिसशिप प्रोत्साहन योजना : अब तक 18 लाख से अधिक प्रशिक्षुओं को प्रशिक्षण देने वाली एनएपीएस, सिद्धांत और व्यवहार के बीच की खाई को पाट रही है। सीआइआइ के 2024 के एक सर्वे के अनुसार, एनएपीएस में भाग लेने वाली 70 प्रतिशत कंपनियों ने पहले छह महीनों में ही अपनी उत्पादकता में स्पष्ट वृद्धि देखी है।

सेमीकंडक्टर मिशन : 76 हजार करोड़ रुपये से अधिक के बजट के साथ भारत घरेलू चिप डिजाइन और फैब्रिकेशन क्षमता में निवेश कर रहा है। एनएमटीआईसीएच यानी नामटेक (न्यू एज मेकर्स इंस्टीट्यूट आफ टेक्नोलाजी) इस मिशन में महत्वपूर्ण भूमिका निभा रहा है, जहां यह फैब्स और डिजाइन हाउस के लिए टैलेंट पाइपलाइन विकसित कर रहा है। भारत का सेमीकंडक्टर मिशन केवल नीति नहीं है, यह एक रणनीति है।

एआइ : भारत अब रोबोटिक प्रोसेस आटोमेशन में दुनिया की शीर्ष 10 अर्थव्यवस्थाओं में शामिल है। केंद्र सरकार के नेतृत्व वाला एआइ मिशन 300 से अधिक एआइ-केंद्रित स्किलिंग प्रोग्राम को विश्वविद्यालयों में फंड कर चुका है। इस मिशन की विशेषता यह है कि यह एथिकल एआइ माड्यूल्स को भी शामिल करता है, जिससे भारत जिम्मेदार नवाचार में भी वैश्विक नेतृत्व कर रहा है।

वैश्विक मानदंड और भारत की बढ़त

भारत का मैन्युफैक्चरिंग, इंजीनियरिंग और टेक्नोलाजी (एमईटी) माडल, जिसे भारत की अग्रणी औद्योगिक इकाइयों के सहयोग से आगे बढ़ाया जा रहा है, ग्लोबल साउथ के उन देशों के लिए एक ब्लूप्रिंट के रूप में उभर रहा है जो औद्योगिक रूप से आगे बढ़ने के साथ ही अपनी सांस्कृतिक जड़ों को भी बचाए रखना चाहते हैं। अंतरराष्ट्रीय पर्यवेक्षक और नीति विश्लेषक अब इस एकीकृत कौशल पारिस्थितिकी तंत्र को भारत की एक अनोखी साफ्ट पावर के रूप में देख रहे हैं। विश्वभर में कई देश पारंपरिक रूप से ऐसे स्किलिंग माडल में निवेश करते आए हैं जो अकादमिक शिक्षा को उद्योग के प्रत्यक्ष अनुभव के साथ जोड़ते हैं। उदाहरण के लिए, जर्मनी का प्रसिद्ध डुअल वोकेशनल एजुकेशन एंड ट्रेनिंग (वीईटी) सिस्टम कक्षा शिक्षण और कार्यस्थल अभ्यास को इस तरह एकीकृत करता है कि छात्र पहले दिन से ही नौकरी के लिए तैयार होते हैं। जापान के काइजेन आधारित तकनीकी स्कूल 'सतत सुधार' की विचारधारा को व्यावसायिक प्रशिक्षण में समाहित करते हैं, जिससे उत्पादकता और गुणवत्ता में जबरदस्त सुधार होता है। इसी प्रकार, दक्षिण कोरिया में मैकेट्रानिक्स और तकनीकी विश्वविद्यालयों में निवेश ने उसे एक कृषि-प्रधान समाज से एक वैश्विक हाई-टेक निर्माण महाशक्ति में बदलने में अहम भूमिका निभाई। ये अंतरराष्ट्रीय माडल इस तथ्य को रेखांकित करते हैं कि भविष्य के लिए तैयार कार्यबल निर्माण में मजबूत उद्योग-अकादमी सहयोग कितना महत्वपूर्ण है।

उल्लेखनीय है कि भारत अब केवल वैश्विक मैन्युफैक्चरिंग रुझानों को अपना नहीं रहा, वह वह कौशल खाका बना रहा है जिसे अन्य देश अपनाएंगे। इस परिवर्तन को अंतरराष्ट्रीय स्तर पर मान्यता मिल रही है। अंतरराष्ट्रीय श्रम संगठन द्वारा प्रकाशित ग्लोबल स्किल्स रेडीनेस इंडेक्स 2025 में भारत को 'भविष्य के लिए तैयार कार्यबल के लिए सरकार-उद्योग-अकादमी समन्वय' में शीर्ष तीन देशों में स्थान दिया गया है।

यह 2020 की रैंकिंग से एक महत्वपूर्ण छलांग है, जिसका श्रेय स्किल इंडिया डिजिटल हब और पीएलआइ-अनुरूप स्किल फ्रेमवर्क एवं नेमटेक व गति शक्ति विश्वविद्यालय जैसे मिशन-चालित संस्थानों को जाता है।

महत्वपूर्ण बात यह है कि यह बदलाव केवल महानगरों तक सीमित नहीं है। अब छोटे शहरों में भी स्किलिंग हब, ग्रामीण छात्रवृत्तियां और स्थानीय नवाचार प्रयोगशालाएं स्थापित की जा रही हैं, ताकि देश को विश्व की कौशल राजधानी बनाने की गति तेज की जा सके। यही विकेंद्रीकरण इस मिशन को वास्तव में लोकतांत्रिक और समावेशी बनाता है। असल में, भारत केवल आज की नौकरियों के लिए कार्यबल नहीं बना रहा है, वह कल के निर्माता, प्रौद्योगिकियों, उद्योगों और विचारों के सर्जक तैयार कर रहा है जो अभी अस्तित्व में नहीं हैं। लिहाजा यह तय है कि भारत अपने लक्ष्य को प्राप्त करने की दिशा में तेजी से आगे बढ़ेगा।

(शिवेश प्रताप)

अन्य संस्थागत नवाचार : प्रधानमंत्री गति शक्ति राष्ट्रीय मास्टर प्लान भारत का 1.2 लाख करोड़ डालर का इन्फ्रास्ट्रक्चर विजन, केवल लाजिस्टिक्स और कनेक्टिविटी का भौतिक कायाकल्प नहीं है, बल्कि कौशल और शिक्षा में एक संस्थागत क्रांति भी है। इस योजना के अंतर्गत कंपनियों को बिना किसी वित्तीय योगदान की मांग के अपने क्षेत्रीय विशेषज्ञता के आधार पर पाठ्यक्रम के सह-निर्माण की अनुमति दी जाती है। इससे कौशल विकास की पारंपरिक आर्थिकी को नया आकार मिल रहा है।

दिल्ली-मुंबई और चेन्नई-बेंगलुरु जैसे औद्योगिक गलियारों के निकट स्थित ये उन्नत संस्थान हाइपर-लोकल स्किलिंग के इंजन बन रहे हैं। एनएसडीसी की 2024 की रिपोर्ट के अनुसार, गति शक्ति से जुड़े आइटीआइ से प्लेसमेंट दर पारंपरिक व्यावसायिक केंद्रों की तुलना में 26 प्रतिशत अधिक है। रेल मंत्रालय और रक्षा मंत्रालय ने भेल और एचएएल जैसी कंपनियों के साथ मिलकर आटोमेशन, सुरक्षा प्रणालियों और ग्रीन एनर्जी में प्रयोगशालाएं स्थापित की हैं। ये सभी मिलकर भारत को कौशल विकास का हब बनाने में मददगार साबित हो रहे हैं।
