शूटिंगदरम्यान हतिक रोशनला दुखापत

बॉलिवूड अभिनेता हतिक रोशनने अनेक सुपरहिट चित्रपटांमध्ये काम केले आहे. याशिवाय हतिक त्याच्या डान्समुळे देखील ओळखला जातो. सध्या हतिक त्याचा आगामी चित्रपट वॉर २ च्या शूटिंगमध्ये व्यस्त आहे. मात्र शूटिंग दरम्यान तो जखमी झाल्याची

माहिती समोर आली आहे. ज्यानंतर चाहत्यांनी देखील त्याच्या तब्येतीबाबत चिंता व्यक्त केली आहे.

मीडिया रिपोर्टनुसार, वॉर-२ मधील एका गाण्याचं शूट करत असताना हतिक रोशनच्या पायाला गंभीर दुखापत झाली आहे. त्यामुळे अभिनेत्याला डॉक्टरांनी आराम करण्याचा सल्ला दिला आहे. या कारणामुळे गाण्याचं शूटिंग थांबवण्यात आलं असून आता हे शूटिंग मे महिन्यात पुन्हा सुरु होण्याची शक्यता आहे. दरम्यान, वॉर २ची

चाहते आतुरतेने वाट पाहत आहे. वॉर २मध्ये हतिक रोशनसोबत साऊथ अभिनेता ज्युनियर एनटीआर देखील पाहायला मिळणार आहे. चाहते हतिक रोशन आणि ज्युनियर एनटीआरला एकाच पडद्यावर पाहण्यासाठी खूप उत्सुक आहेत. वॉर २ १४ ऑगस्ट २०२५ रोजी प्रेक्षकांच्या भेटीला येणार आहे. दिग्दर्शन अयान मुखर्जीने केले आहे.

हा सिद्धार्थ आनंदच्या वॉरचा सिक्वेल आहे. वॉर हा ब्लॉकबस्टर चित्रपट ठरल होता, ज्याने रिलीजच्या एका आठवड्यात २०० कोटींची कमाई केली होती.

Hrithik suffers leg injury

Song shoot with Jr NTR gets postponed

✓ Hrithik Roshan has suffered a leg injury during the rehearsals of an energetic dance-off with Jr NTR for *War 2*. Sources say that the actor has been advised rest for four weeks. The shoot of the song has been postponed, will be filmed in May tentatively. However, the movie's release date remains unchanged.

Sources say that Hrithik pushed himself a bit too hard during the rehearsal. The movie

is reportedly in post-production stage, and this minor hiccup is not interfering with the promotion plans of the film. The movie will be releasing August 14 this year.

War 2, directed by Ayan Mukerji, is a part of Aditya Chopra's YRF Spy Universe. Apart from Hrithik Roshan and Jr NTR, the film also stars Kiara Advani. The film is a sequel to *War*, a 2019 action thriller film, directed by Siddharth Anand.

Hrithik's leg injury delays dance number with Jr NTR in War 2

Hrithik's leg injury delays dance number with Jr NTR in War 2

Jr NTR is all set to make his Hindi film debut with *War 2*, starring alongside Hrithik Roshan. Directed by Ayan Mukerji and produced by Aditya Chopra, the film has been generating a lot of buzz. NTR and Hrithik started rehearsing for a high-energy dance number that appears in the film's climax. They spent nearly 15 days preparing for the sequence. However, during the shoot, Hrithik sustained a leg injury, forcing him to take a break on doctors' advice. Due to this, the song's shoot has been postponed. NTR, who had been stationed in Mumbai for the filming, is now returning to Hyderabad because of the delay, a source revealed. Most of the film, including its action sequences and dialogue portions, has already been completed. Only this dance number and a few remaining scenes are yet to be shot. Despite this minor setback, the makers remain committed to releasing *War 2* on August 15, coinciding with Independence Day. In the film, NTR takes on a negative role, marking his grand entry into Bollywood.

Fatty liver: The emerging crisis

Over 45% Indians are affected by non-alcoholic fatty liver disease (NAFLD), warns expert

SWATI SHARMA
DECCAN CHRONICLE

Recently, Bollywood actor Hrithik Roshan's sister Sunaina shared her inspiring journey of overcoming fatty liver, through mindful eating and regular exercise, Sunaina asserts she is now "completely cured" of her Grade 3 fatty liver.

Fatty liver disease, a condition characterised by the accumulation of fat in the liver, is becoming a growing concern worldwide, with approximately 30% of adults impacted by it. Fatty liver can manifest as either alcoholic fatty liver disease or non-alcoholic fatty liver disease (NAFLD), resulting from an accumulation of fat in the liver that is not linked to excessive alcohol intake. "Fatty liver is found in one among five individuals in India, and most of them consider it normal, though it is not really so. Fatty liver is due to excess fat within the liver, which, if not controlled, can lead to inflammation, scarring at a later stage, liver cirrhosis. With 30 per cent of the population suffering from incidence of severe fatty liver, it is a cause for concern," explains Professor Dr Tom Cherian, senior liver transplant surgeon and managing director of South Asian Liver Institute.

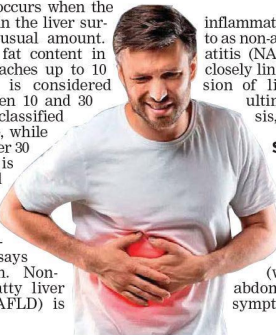

CAUSES

Fatty liver occurs when the fat content in the liver surpasses the usual amount. "When the fat content in the liver reaches up to 10 percent, it is considered mild; between 10 and 30 percent is classified as moderate, while anything over 30 percent is deemed severe and necessitates medical intervention," says Dr Cherian. Non-alcoholic fatty liver disease (NAFLD) is

“FATTY LIVER IS FOUND IN ONE AMONG FIVE INDIVIDUALS IN INDIA, AND MOST OF THEM CONSIDER IT NORMAL, THOUGH IT IS NOT REALLY SO. IT IS DUE TO EXCESS FAT WITHIN THE LIVER, WHICH, IF NOT CONTROLLED, CAN LEAD TO INFLAMMATION.”

— PROFESSOR DR TOM CHERIAN, Senior liver transplant surgeon.

inflammatory aspect referred to as non-alcoholic steatohepatitis (NASH). The latter is closely linked to the progression of liver scarring and ultimately, liver cirrhosis," he adds.

SYMPTOMS

Bleeding from the intestines or elsewhere, itching, jaundice (yellow skin and eyes), ascites (water within the abdomen), are some symptoms that suggest

the presence of advanced liver disease or cirrhosis. "But it must be noted that early fatty liver is virtually symptom free. It is only during the advanced stages that it gets identified in patients. Although liver biopsy is the only method of confirming the presence of NAFLD, basic blood tests and a good quality ultrasound can warn of the presence of this disease in most patients before symptoms. However, those who are obese or diabetic must check their livers once a year via ultrasounds and blood tests," says the Dr.

DIAGNOSIS

In recent times, it is not unusual for someone to have an incidental ultrasound report that says 'grade 1 or 2 fatty liver'. In fact, it is so common that many people think it is not a serious abnormality and can be ignored. However, this is not true. A recent study confirmed that liver transplantation for fatty liver now represents the fourth most common reason for transplantation in patients.

IS FATTY LIVER DISEASE IRREVERSIBLE?

"In the early stages (grade 1 to 3), early intervention can reverse the process of the disease. But once cirrhosis sets in, in most cases even if the injury is removed, further progression and symptoms is likely," he says.

NASH can advance to cirrhosis in 9-20 percent of patients, with about half experiencing symptoms within seven years, and it is also linked to the onset of liver cancer. Liver transplantation (LT) is the preferred approach for these patients, and the results are promising, with 1- and 5-year survival rates reaching 80 percent.

NON-ALCOHOLIC FATTY LIVER DISEASE CASES RISE

Due to obesity, hypertension and diabetes mellitus, the prevalence is found to be as high as 45 per cent. Carbohydrates, in the form of rice, are a central component that can lead to accumulation of triglycerides within the liver. "This process, overtime, leads to significant liver scarring and eventual progression of disease. It is a preventable disease if people take the right steps in time," warns Dr Cherian.

HRITHIK ROSHAN'S SISTER SUNAINA SHARED HER INSPIRING JOURNEY OF OVERCOMING FATTY LIVER SHE ASSERTS SHE IS NOW "COMPLETELY CURED" OF HER GRADE 3 FATTY LIVER.

IT IS SO COMMON THAT MANY PEOPLE THINK THAT FATTY LIVER IS NOT A SERIOUS ABNORMALITY AND CAN BE IGNORED. HOWEVER, THIS IS NOT TRUE. A RECENT STUDY CONFIRMED THAT LIVER TRANSPLANTATION FOR FATTY LIVER NOW REPRESENTS THE FOURTH MOST COMMON REASON FOR TRANSPLANTATION IN PATIENTS.

“CONSIDERING THE MANY FUNCTIONS PERFORMED BY THE LIVER, MAINTAINING A HEALTHY LIVER WILL SIGNIFICANTLY IMPACT OVERALL HEALTH AND WELL-BEING. OTHERWISE, IT WOULD LEAD TO DISEASES LIKE ACUTE (SUDDEN) HEPATITIS (INFLAMMATION), CHRONIC (LONG DURATION) HEPATITIS, FATTY LIVER DISEASE, CIRRHOSIS (SCARRING), AND LIVER CANCER. AMONG THESE DISEASES, HEPATITIS IS COMMON; CAUSES INFLAMMATION OF THE LIVER, WHICH IN MANY CASES IS SELF-LIMITING. NONETHELESS IT CAN PROGRESS TO FIBROSIS (HARDENING), CIRRHOSIS, OR LIVER CANCER.”

— DR ASHA SUBBALAKSHMI, Head of the Department of G.I., CARE Hospitals

Fatty liver: The emerging crisis

Over 45% Indians are affected by non-alcoholic fatty liver disease (NAFLD), warns expert

SWATI SHARMA

THE ASIAN AGE

Recently, Bollywood actor Hrithik Roshan's sister Sunaina shared her inspiring journey of overcoming fatty liver; through mindful eating and regular exercise, Sunaina asserts she is now "completely cured" of her Grade 3 fatty liver.

Fatty liver disease, a condition characterised by the accumulation of fat in the liver, is becoming a growing concern worldwide, with approximately 30% of adults impacted by it. Fatty liver can manifest as either alcoholic fatty liver disease or non-alcoholic fatty liver disease (NAFLD), resulting from an accumulation of fat in the liver that is not linked to excessive alcohol intake. "Fatty liver is found in one among five individuals in India, and most of them consider it normal, though it is not really so. Fatty liver is due to excess fat within the liver, which, if not controlled, can lead to inflammation, scarring at a later stage, liver cirrhosis. With 30 per cent of the population suffering from incidence of severe fatty liver, it is a cause for concern," explains Professor Dr Tom Cherian, senior liver transplant surgeon and managing director of South Asian Liver Institute.

CAUSES

Fatty liver occurs when the fat content in the liver surpasses the usual amount. "When the fat content in the liver reaches up to 10 percent, it is considered mild; between 10 and 30 percent is classified as moderate, while anything over 30 percent is deemed severe and necessitates medical intervention," says Dr Cherian. Non-alcoholic fatty liver disease (NAFLD) is

the scientific name for 'fatty liver'. By definition, these are people who do not abuse alcohol. "While many individuals with NAFLD experience only the presence of simple fat in their liver cells, some may progress to a more complex condition marked by fat accompanied by an

the presence of advanced liver disease or cirrhosis. "But it must be noted that early fatty liver is virtually symptom free. It is only during the advanced stages that it gets identified in patients. Although liver biopsy is the only method of confirming the presence of NAFLD, basic blood tests and a good quality ultrasound can warn of the presence of this disease in most patients before symptoms. However, those who are obese or diabetic must check their livers once a year via ultrasounds and blood tests," says the Dr.

DIAGNOSIS

In recent times, it is not unusual for someone to have an incidental ultrasound report that says 'grade 1 or 2 fatty liver'. In fact, it is so common that many people think it is not a serious abnormality and can be ignored. However, this is not true. A recent study confirmed that liver transplantation for fatty liver now represents the fourth most common reason for transplantation in patients.

IS FATTY LIVER DISEASE IRREVERSIBLE?

"In the early stages (grade 1 to 3), early intervention can reverse the process of the disease. But once cirrhosis sets in, in most cases even if the injury is removed, further progression and symptoms is likely," he says. NASH can advance to cirrhosis in 9-20 percent of patients, with about half experiencing symptoms within seven years, and it is also linked to the onset of liver cancer. Liver transplantation (LT) is the preferred approach for these patients, and the results are promising, with 1- and 5-year survival rates reaching 80 percent.

NON-ALCOHOLIC FATTY LIVER DISEASE CASES RISE

Due to obesity, hypertension and diabetes mellitus, the prevalence is found to be as high as 45 per cent. Carbohydrates, in the form of rice, are a central component that can lead to accumulation of triglycerides within the liver. "This process, overtime, leads to significant liver scarring and eventual progression of disease. It is a preventable disease if people take the right steps in time," warns Dr Cherian.

A FEW TIPS TO MAINTAIN GOOD LIVER HEALTH

- A good diet and exercise to prevent obesity.
- Refrain from regular and excessive alcohol (an occasional drink e.g. one glass of wine once a fortnight does not hurt).
- Ensure good sugar level control if diabetic.
- Get vaccinated against deadly liver viruses like Hepatitis B.

"FATTY LIVER IS FOUND IN ONE AMONG FIVE INDIVIDUALS IN INDIA, AND MOST OF THEM CONSIDER IT NORMAL, THOUGH IT IS NOT REALLY SO. IT IS DUE TO EXCESS FAT WITHIN THE LIVER, WHICH, IF NOT CONTROLLED, CAN LEAD TO INFLAMMATION."

— PROFESSOR DR TOM CHERIAN, Senior liver transplant surgeon.

The rise of the zombies

As horror comedies have gained momentum in the last two years, there is another genre creeping into the Hindi film industry— zombie fiction. We have heard that Hrithik Roshan, Kartik Aaryan, and Ranveer Singh are each developing zombie action films, sparking a “silent war” among each other. Reportedly, Hrithik has acquired the rights to adapt *I Am Legend* (2007) for ₹12 crores and is actively

developing it with *Kill* (2023) director Nikhil Nagesh Bhat. Reports suggest that Ranveer too is producing a zombie film through his own company, which he plans to launch later this year. There is also news that Kartik has approached T-Series to develop a large-scale zombie project starring him, which he wants to market as a “genre-defining movie.”

मानधन अन आगामी सिनेमे

मुंबई टाइम्स टीम

अभिनेत्री दीपिका पादुकोण सध्या तिचा सर्वाधिक वेळ लेक दुआ हिला देतेय. अंधेमध्ये दीपिकाचं दर्शन चाहत्यांना घडत असलं, तरी काही दिवसांपूर्वी ती जेव्हा रॅम्पवॉक करताना दिसली आणि त्या लूकवरून ती ट्रोलही झाली. मात्र, दीपिकानं त्याकडे लक्ष दिलं नाही. आगामी काळात ती कोणत्या चित्रपटात दिसणार याची चर्चा होती. सध्या तरी तिचा वेळ लेकीसाठी आसल्यानं नव्या सिनेमाबाबत ती फारशी उत्सुक नसल्याचं कळतंय. मधल्या काळात तिनं मानधनाचा आकडा वाढवल्यानं आधी त्याबद्दल बोला, अशी अटही निर्माता-दिग्दर्शकांसमोर असल्याची चर्चा आहे. या सगळ्यांत संजय लीला भन्साळी यांच्या 'वैजू बावरा'ची चर्चा मागे पडली आहे. यात रणवीरसिंह आणि दीपिका ही जोडी पुन्हा जमवण्याचा भन्साळी यांचा विचार होता. आता त्यांनी आलिया, रणवीर कपूर आणि विकी कौशल यांना घेऊन आगामी 'लव्ह अँड वॉर'चं काम सुरू केल्यानं दीपिका इतक्यात मोठ्या पडद्यावर दिसण्याची शक्यता कमीच आहे. 'फायटर' या चित्रपटात ती हतिक रोशनबरोबर झळकली होती. त्यानंतर ती सिंघम अगेनमध्ये दिसली. रोहित शेट्टीच्या लेडी सिंघमची घोषणा झालेली असली, तरी त्याचं काम सुरू झालेलं नाही.

Panels soon to implement 'right to die with dignity'

Bengaluru hospitals expect their committees to be functional by end of April

TINI SARA ANIEN
TEAM METROLIFE

Many hospitals in Bengaluru are setting up committees to implement 'the right to die with dignity'. They expect the committees to be functional by next month.

Karnataka is the first state to adopt the Supreme Court's direction to allow 'the right to die with dignity'.

In late January, the Karnataka government said it would provide the right to terminally ill patients with no hope of recovery. It also instructed hospitals to form two committees to suggest such patients to the judiciary – 'the right to die with dignity' requires a court order.

Some hospitals are waiting for detailed instructions, while others are in the process of setting up committees.

'Best practices'

Dr Radheshyam Naik, consultant medical oncologist, hematologist and bone marrow transplant physician with Samprada Hospital, says his hospital's committee will include two doctors (one internal and one from another hospital), a lawyer, and a female social worker.

Though new to India, the right to die with dignity is common in countries like The Netherlands, and their hospital plans to adopt their best practices. "The doctors on the committee could be intensivists, ICU specialists, oncologists, anesthetists and physicians," he says.

Dr Sunil Karanth, chairman and consultant (critical care medicine), Manipal Hospital, Old Airport Road, says the right to die with dignity has come about

The 2010-Bollywood film 'Guzarish', starring Hrithik Roshan, is about a paralysed magician-turned-radio jockey, who files a petition in court seeking permission to end his life. It explores the idea of active euthanasia, allowed in some countries but banned in India.

after long years of discussion.

"The primary medical board will include the primary doctor treating the patient, and two other subject expert doctors with at least five or more years of experience in their specialities. The secondary medical board will include three other doctors (who are not part of the primary board) from the same institution with five or more years of experience, including one from the hospital, selected by the district health officer," he says.

The order from the state government notifies that the nominated member from the District Health officer could be any of the doctors empanelled with the state's brain stem declaration committee.

"Our committee should be ready by April. We will provide basic training to our doctors to understand the legalities and the protocol," he says.

Once the primary board comes to a consensus with the patient's caregivers on the decision to withdraw life sustain-

ing treatment, the secondary board will need to give its decision within 48 hours, he explains.

Legal challenges

Dr Harish Reddy, group medical director, HCG Hospitals, says, "Our hospitals will need to intensively train doctors to understand the legal aspects."

"As we work towards forming a team, we want them to be aware of the importance of prognostication and the importance of the family's consent," he told *Metrolife*.

In case of comatose patients, no family member should be able to take advantage of the situation. Also, the team will be trained to handle conflicts which arise when a family member is not aligned with the decision of the primary family member or caregiver, he says. The HCG panel will be multidisciplinary and include oncologists, intensivists, and palliative care specialists. "A list should be ready in two weeks. The committee should be ready by April end," he says.

'Counselling a must'

Dr B L Sujatha Rathod, director of medical education, Karnataka, says emotional and legal aspects should not be neglected.

"Counselling the family which allows its kin to be taken off life support is needed. Assuring and reassuring them and getting a well-informed consent should be focused on. Grief counsellors or psychologists can also help the family understand organ donation," she says.

Taking a person off life support calls for decisions such as "determining at what stage a person should be taken off the ventilator". "Multiple expert opinions should be considered. It is also important to document all these steps on written and video recordings," she says.

MINISTER SAYS...

Health Minister Dinesh Gundu Rao on January 31 posted on X that hospitals must set up the primary and secondary medical boards, comprising three registered medical practitioners each, to implement the right to die with dignity.

"The secondary medical board must have a registered medical practitioner nominated by the District Health Officer," his post said.

WHAT'S ALLOWED

Withdrawal of life support under certain circumstances, is now legal in Karnataka.

Active euthanasia, or the act of ending a patient's life with the administration of a lethal substance, is not allowed in India. It is a criminal offence.

રિતિક રોશનને 'વોર 2' ના સેટ પર પગમાં ઈજા થઈ

રિતિક રોશનની એક્શન અને ડાન્સ સિકવલન્સથી તેના ફેન્સ હંમેશા ઈમ્પ્રેસ થતાં હોય છે. આવી જ એક ડાન્સ સિકવલન્સના શૂટમાં રિતિક રોશન ઘાયલ થયો છે. હિતિકને 'વોર 2'ના શૂટિંગ વખતે ઘાયલ થયો છે. તેને પગમાં ઈજા થઈ છે. તે જુનિયર એન્ટીઆર સાથે એક ગીતનું શૂટિંગ કરી રહ્યો હતો. હવે આ ગીત મે મહિનામાં શૂટ થશે કારણ કે રિતિકને ડોક્ટર દ્વારા ચાર અઠવાડિયા આરામ કરવાની સલાહ આપવામાં આવી છે. આ ફિલ્મ 15 ઓગસ્ટે રિલીઝ થવાની છે.

આ અંગે સૂત્ર દ્વારા મળતી માહિતી અનુસાર, "રિતિક રોશનને જુનિયર એન્ટીઆર સાથેના 'વોર 2'નાં આ ગીત માટે ઘણી મહેનત કરી હતી. આ ગીતના રિહર્સલ દરમિયાન તેના પગ પર વધારે પડતું વજન જતાં તે યોગ્ય રીતે ડાન્સ કરી શકતો નહોતો. ત્યાર બાદ ડોક્ટરે તેને ઈજા હોવાનું નિદાન કર્યું હતું. ડોક્ટરે તેને આગળ કોઈ જ જોખમ ન લેવા સલાહ આપી છે તેમજ તેના પગને આરામ આપવા માટે કહ્યું છે. આ ફિલ્મ માટે આ ગીત ઘણું મહત્વનું હોવાથી હવે મે મહિનામાં આ ફિલ્મનું શૂટિંગ થશે."

સૂત્રએ આગળ જણાવ્યું કે, "આ ગીતમાં રિતિક રોશન અને જુનિયર એન્ટીઆર વચ્ચે એક સ્પર્ધા જેવું દ્રશ્ય બતાવવામાં આવ્યું છે, જે હવે મે મહિનામાં આગળ વધશે. આ ફિલ્મ માટેના બધા જ કલાકારોના મહત્વના સીનનું શૂટ પૂરું થઈ ગયું છે અને ફિલ્મ હવે પોસ્ટ પ્રોડક્શનના તબક્કામાં છે. ત્યારે થોડું વિઘ્ન આવતા ફિલ્મના માર્કેટિંગ અને પ્રમોશનના પ્લાન પર થોડી અસર થશે."

આ ફિલ્મ આયાન મુખર્જી દ્વારા ડિરેક્ટ કરવામાં આવી છે તેમજ આદિત્ય ચોપરાના વાયઆરએફ સ્પાય યુનિવર્સનો એક ભાગ છે, જેણે અત્યાર સુધીમાં ઘણી હિટ ફિલ્મ્સ આપી છે.

वॉर 2 के सेट पर रितिक को लगी चोट, शूटिंग रुकी

रितिक रोशन और सऊथ ऐक्टर जूनियर एनटीआर इन दिनों अपनी फिल्म वॉर 2 की शूटिंग कर रहे हैं। मगर अब इस फिल्म की शूटिंग रोकनी पड़ी है। खबर है कि अयान मुखर्जी के निर्देशन में बन रही इस फिल्म के सेट पर रितिक रोशन को चोट लग गई है और डॉक्टरों ने उन्हें एक महीने आराम की सलाह दी है। मीडिया रिपोर्ट्स के अनुसार

रितिक और जूनियर एनटीआर फिल्म के लिए एक एनर्जी से भरे गाने की रीहर्सल कर रहे थे। इसी दौरान रितिक के पैर में चोट लग गई। डॉक्टर ने उन्हें चार हफ्ते तक आराम करने की सलाह दी है ताकि किसी और गंभीर समस्या से बचा जा सके। ऐसे में, इस हाई-एनर्जी सॉन्ग की शूटिंग अब पोस्टपोन हो गई है और अब इसे मई में फिल्माया जाएगा। रिपोर्ट्स के मुताबिक, रितिक ने जूनियर एनटीआर के साथ इस गाने की रीहर्सल करते समय खुद को पूरा झोंक दिया था। एक सूत्र ने बताया, 'रीहर्सल के दौरान उनके पैर में छोटी-सी चोट लग गई जो काफी अनकंफर्टेबल थी और जब डॉक्टरों ने उनकी चोट की जांच की तो उन्होंने सलाह दी कि वे इसे और जोखिम में ना डालें और इस बड़े गाने की शूटिंग से पहले अपने पैर को आराम दें।' सूत्र ने आगे बताया कि ये गाना अब मई में शूट किया जाएगा।

படப்பிடிப்பில் விபத்து

ஹிருத்திக் ரோஷன் படுகாயம்

இந்தி நடிகர் ஹிருத்திக் ரோஷன், தெலுங்கு நடிகர் ஜனினியர் என்பது ஆர் ஆகிய இருவரும் 'வார் 2' என்ற இந்தி படத்தில் நடித்து வருகிறார்கள். அயன் முகர்ஜி இயக்குகிறார். தமிழ், தெலுங்கு, இந்தி உள்ளிட்ட மொழிகளில் பான் இந்தியா படமாக உருவாகிறது.

இந்த படத்துக்காக சண்டை காட்சி படமாக்கப்பட்டது. பாடல் காட்சியொன்றையும் படமாக்கினார். அப்போது விபத்து ஏற்பட்டு ஹிருத்திக் ரோஷன் படுகாயம் அடைந்தார்.

உடனடியாக அவரை அருகில் இருந்த தனியார் ஆஸ்பத்திரியில் அனுமதித்தனர். அங்கு ஹிருத்திக் ரோஷனுக்கு டாக்டர்கள் தீவிர சிகிச்சை அளித்து வருகிறார்கள்.

ஒரு மாதம் ஹிருத்திக் ரோஷன் ஓய்வு எடுத்துக் கொள்ள வேண்டும் என்று டாக்டர்கள் அறிவுறுத்தி உள்ளனர். விபத்து காரணமாக படப்பிடிப்பு ரத்து செய்யப்பட்டது.
